

## Changes For Success

### Part 1:

Select the top three changes that you are going to make in order to use class time more effectively.

- I will ask questions when they occur to me in class.
  
- I will persist in getting answers to my questions by going to the teacher, the textbook, a video, a tutor, or a classmate.
  
- I will miss a class only if I have an emergency or an exceptionally good reason.
  
- If I have to miss a class, I will get handouts from the instructor, complete notes from a classmate, read the sections, watch a corresponding video, and attempt my homework.
  
- I will always arrive to class early or on time.
  
- I will start thinking about math before the class actually begins. I can review homework, class notes, or relevant textbook material.
  
- I will get a seat where I can see and hear well.
  
- I will take a complete set of notes.
  
- I will always have all my supplies and my homework.
  
- I will contribute to my group and ask them questions.

## Changes For Success

### Part 2:

Select the top three changes that you are going to make in order to use time between classes more effectively.

- I will allow at least two hours per day for homework and studying.
- I will read my math notes on the same day that I wrote them.
- I will make a summary sheet of important math terminology or properties for each section.
- I will do my homework on the same day it is assigned or before the next class.
- I will be persistent in my homework and seek help when I need it.
- When I finish my homework I will check my answers.
- I will write out specific questions that I need answered after doing my homework.
- I will use my homework problems to build a list of practice test problems.
- I will keep my homework and notes organized in my notebook.
