HYBRID EVENING PROGRAM	TRADITIONAL PROGRAM TRACK
Curriculum Design • Designed for students who need more flexibility in the day hours • Courses are offered throughout the week with occasional Saturday intensive labs or community service work. Ideally students come to campus 2-3 times per week in the evening dependent on scheduling of courses and how instruction is delivered. • Courses offered on-line and in face-to-face format • Students must be self-directed, computer literate, and have ready access to computer technology to use on-line course delivery method • Level I fieldwork required involving day-time clinic observations	**Curriculum Design** • Designed for students who are free to attend full-time day classes Monday through Friday, with some early evening courses. An occasional Saturday may be expected to allow for community service work. • For those who desire a structured program in a traditional classroom lecture/lab format • Seven (7) quarters in length; quarters 6 and 7 consisting of full-time internship/fieldwork • Full time employment is not recommended • Program is developmental in design where students must finish foundational classes in program before entering application practice classes

• Program demands align with part time employment • Nine (9) quarters in length • Program is developmental in design where students must finish foundational classes in program before entering application academic practice classes
