- Gain familiarity with various literary genres within American ethnic literature, including fiction, drama, poetry and memoir, along with related literary criticism.
- Investigate the historical, cultural and political contexts within which literary works emerge and function.
- Understand the evolving definitions, functions and struggles around race and ethnicity as expressed in the literature.
- Explore the intersections of race, gender, class, and sexuality as these inform the literature.
- Engage in close reading and critical thinking in relation to texts and contexts.
- Develop a comparative understanding of the literature and experiences of different ethnic groups, including the relationship between ethnic literature and the traditional American canon.
- Improve writing skills and gain greater confidence in producing literary criticism.
- Demonstrate student responsibility by fulfilling requirements in a timely, engaged and serious manner.
- Successfully complete written responses to literature.
- Participate effectively, demonstrating critical reflection.

Program Outcomes

Students will demonstrate college-level reading skills by summarizing, analyzing, interpreting, synthesizing, and evaluating college texts; and develop an awareness of the approach's writers use for different audiences, genres, and rhetorical situations.

College-wide Outcomes

Critical Thinking - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

ENGL 248 - African American Literature

Credits: 5

A survey of African American literature from its colonial origins through the 21st century. Course requires close reading and written interpretation from among the following genres: African American fiction, poetry, drama, essays, songs, and film. Focuses on such historical periods/movements as abolitionism and the slave narrative,

Reconstruction, the Harlem Renaissance, the Black Arts Movement, and postmodernism.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English and Diversity

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

Identify and evaluate key African American writers of literature, applying an African American approach to this study.

Examine the intersection of economics, history, culture, region, politics, religion, gender, and sexuality to African American literature.

Compare the historical relationships of African American lived experience and current African American lived experiences.

Assess how African American literature relates to society as a whole and/or how it relates to other literature of the dominant culture.

Investigate African American motifs, forms, and genres.

Improve writing and critical thinking as one works to communicate understanding of African American literature.

Program Outcomes

Students will demonstrate college-level reading skills by summarizing, analyzing, interpreting, synthesizing, and evaluating college texts; and develop an awareness of the approach's writers use for different audiences, genres, and rhetorical situations.

College-wide Outcomes

Critical Thinking - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

ENGL 249 - U.S. Latinx Literature

Credits: 5

Examines the literary and cultural traditions of the Chicanx, Cuban American, Dominican American, Puerto Rican, and Central American writers in the United States. Course includes critically reading and interpreting fiction, drama, poetry, and essays as a way to make distinctions and interconnections between these Latinx communities. Themes including exile and exodus, religion and spirituality, patriarchy and feminism, sub/urbanism and border theory among others will inform students' understanding and

appreciation of the texts.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English and Diversity

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Comprehend significant political, historical, and geographical contexts that generate Latinx literary works.

- Distinguish the relevance and importance between genres such as fiction, drama, poetry, essay and the role that crossing genres plays in this literature.

- Contextualize the nexus that emerges between sexuality, class, gender, and ethnicity/complexion within a broader U.S. culture.

- Articulate the transforming circumstances, definitions, and debates that surround the construction of Latinx identities as informed by the literature and scholarly discourse.

- Incorporate close reading, critical analysis, and writing projects as tools for synthesizing Latinx literature.

- Successfully complete written responses to literature.

- Participate effectively, demonstrating critical reflection.

Program Outcomes

Demonstrate college-level reading skills by summarizing, analyzing, interpreting, synthesizing, and evaluating college texts; and develop an awareness of the approach's writers use for different audiences, genres, and rhetorical situations.

College-wide Outcomes

Critical Thinking - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

ENGL 250 - U.S. Indigenous Literatures

Credits: 5

A focus on the literary, oral, and cultural traditions of U.S. indigenous communities, including Native Americans, Alaska Natives, and Pacific Islanders. Course involves critically reading and interpreting important literary genres including non/fiction, drama, poetry, autobiography, critical essays, and epistolary works which can also be situated in other cultural narrative genres such as songs/chants/music, dance narratives, film and

documentary. Additionally, this course incorporates a study of historical, political, and cultural texts to contextualize the works. Examines how Native American writers combine tradition and contemporary ways to develop innovative forms of expression.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English and Diversity

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

Comprehend significant political, historical, and geographical contexts that generate Native American works. Understand how the written literature has been shaped by colonial contact and by external cultural and political forces while understanding how Native American writers have continued to incorporate elements from their traditional cultures into their work as a way of resisting assimilation and/or cultural extermination.

Distinguish the relevance and importance between genres such as autobiography, non/fiction, drama, poetry, songs/chants/music, dance narratives, critical essays, epistolary works and/or the role that crossing these genres plays in this literature.

Contextualize the nexus that emerges between sexualities, disabilities, class, genders, blood quantum laws/practices within the broader North American cultures.

Articulate the transforming circumstances, definitions, and debates that surround the construction of varied Native American identities and nations as informed by the scholarly discourse, and external influences such as colonial narratives/depictions, the media, and state/government decrees and practices (i.e., federal recognition of tribes in the U.S., anti-miscegenation laws, etc.). Develop a critical eye toward Native American literature as depicted by non-Native Americans.

Participate in one or more of the following: engagement in service learning and collaborations with neighboring native communities (i.e., Muckleshoot, Puyallup, Snoqualmie, Nisqually) and more broadly throughout Pacific Northwest, mythic archetypes/narratives (i.e., the trickster, hero quests, creation stories), religious beliefs (i.e., role of ceremonial practice in healing and identity formation, the Ghost Dance), adaptation of the oral tradition (i.e., reflected in contemporary poetry), the built and natural environments, language and orally, stereotyping and prejudice, folktales and the role of the storyteller and the oral tradition, the sacred and secular, assimilation and appropriation, political and social activism, the Native American Renaissance, among others.

Incorporate close reading, critical analysis, and writing projects as tools for synthesizing Native American literature and discourse.

Cultivate an awareness and appreciation of the complex interplay between social and political forces, the traditions and customs of particular Native American nations, and the imaginations of individual writers.

Successfully complete written responses to the assigned literature and readings.

Participate effectively, demonstrating critical reflection.

Program Outcomes

Demonstrate college-level reading skills by summarizing, analyzing, interpreting, synthesizing, and evaluating college texts; and develop an awareness of the approach's writers use for different audiences, genres, and rhetorical situations.

College-wide Outcomes

Critical Thinking - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

ENGL 251 - Asian American Literatures

Credits: 5

A study of selected literature and other cultural productions by Asian American writers from various countries and immigration histories, including China, Japan, India, Korea, the Philippines, and Vietnam, among others. Examining genres such as poetry, fiction, drama, spoken word, and memoir, contextualized alongside film, music, and other forms of popular culture, students will address issues such as identity, race, gender, sexuality, class/income, exclusion, resistance, cultural preservation, religion, generation, language, assimilation, disability, multi-racialism, and activism. Students will read individual texts closely, explore various literary critical and comparative approaches, situate texts in their historical and cultural contexts, and produce their own written interpretations.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English and Diversity

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Analyze various literary genres within Asian American literature, including fiction, drama, poetry, spoken word, and memoir, along with related literary criticism.
- Perform close reading and critical thinking in relation to texts and contexts.
- Produce written responses to the literature, employing literary critical frameworks.

Identify the role of stereotypes, especially gendered ones, and the ways in which Asian Americans have responded through literature, popular culture, and activism.

Recognize the wide diversity within Asian America, including countries of origin, immigration histories (economic migrants, refugees, undocumented, students, etc.), income and educational levels, among other crucial intersections of gender, sexuality, language, age/generation, religion, disability, multiracialism, etc., as these inform the literature.

Investigate the historical, cultural and political contexts within which literary works emerge and function, including various immigration acts, Japanese internment during WWII, the Korean and Vietnamese wars, the growth of Asian immigration after 1965, and the rise of China and India as global economic powers.

Discuss the rise of "Asian American" as a category and the various literatures and experiences it denotes, including relationships between and within Asian American communities. the experiences of other communities of color, the traditional American canon, and dominant culture.

Program Outcomes

Demonstrate college-level reading skills by summarizing, analyzing, interpreting, synthesizing, and evaluating college texts; and develop an awareness of the approach's writers use for different audiences, genres, and rhetorical situations.

College-wide Outcomes

Critical Thinking - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

ENGL 252 - Muslim American Literature

Credits: 5

A study of Muslim American literature, including poetry, fiction, drama, spoken word, and/or memoir. Recognizing the diversity within Muslim America, students will interpret literary works in relation to culture, race, gender, sexuality, class/income, disability, immigration history, and/or language. Students will situate literary works in their historical, cultural, and political contexts, including Islamic and Arabic literature, U.S. slavery, European colonialism, Black Muslims, 9/11, Islamophobia, Islam and feminism, and/or the Israel-Palestine conflict.

Enrollment Requirement: Eligible for ENGL 99.

Satisfies Requirement: Humanities/Fine Arts/English and Diversity

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

Engage in close reading, critical thinking, discussion, and writing in response to various genres within Muslim American literature, including fiction, drama, poetry, spoken word, and/or memoir, along with related literary criticism.

Recognize the wide diversity within Muslim America, including culture, race, gender, sexuality, class/income, disability, immigration history, and/or language, as these inform the literature, including how Muslim Americans have responded to oppression through literature, popular culture, and/or activism.

Investigate the historical, cultural, and political contexts within which literary works emerge and function, including Islamic and Arabic literature, U.S. slavery, European colonialism, Black Muslims, 9/11, Islamophobia, Islam and feminism, and/or the Israel-Palestine conflict.

Situate Muslim American literature in relation to US history, the traditional American literary canon, and/or the (ethnic) literatures of other communities of color.

Program Outcomes

Demonstrate college-level reading skills by summarizing, analyzing, interpreting, synthesizing, and evaluating college texts; and develop an awareness of the approach's writers use for different audiences, genres, and rhetorical situations.

College-wide Outcomes

Critical Thinking - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

ENGL& 255 - World Literature II: 7th to 18th Century

Credits: 5

An historical and critical survey of selected works of world literature of the seventh through the 18th centuries from a diversity of cultures.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

Discuss the common elements in literature of the Middle Ages and the Renaissance to achieve an understanding of those elements.

Discuss the characteristics of the Medieval and Renaissance eras as they are found in the literature of these periods.

Develop critical thinking and reading skills by analyzing, interpreting, and evaluating in response to works of a specific literary period.

Apply critical thinking and reading skills to the study of the literary works of the Medieval and Renaissance eras.

Discuss the importance and relevance of the literature of the Medieval and Renaissance eras to the modern and the contemporary world (especially as the literature relates to the psychological and spiritual needs of peoples of the world today).

Write responses to literature.

Demonstrate critical reflection in participation.

Program Outcomes

Demonstrate college-level reading skills by summarizing, analyzing, interpreting, synthesizing, and evaluating college texts; and develop an awareness of the approach's writers use for different audiences, genres, and rhetorical situations.

College-wide Outcomes

Critical Thinking - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

ENGL& 256 - World Literature III: 19th to 21st Century

Credits: 5

A critical and comparative survey of European and non-western world literature that reflects the various forces and social transformations relating to colonialism, nationalism, postcolonialism, im/migration, globalization, and economic systems from a spectrum of cultures.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English and Diversity

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

Compare the importance between the various genres of world literature, such as the novel, short story, drama, poetry, and/or memoir, along with related literary criticism.

Investigate and comprehend the historical, cultural, and political contexts within which works of world literature emerge and function.

Develop a comparative understanding of evolving definitions, functions, and struggles around identity, community, culture, nationalism, transnationalism, sense of place, power relations, globalization (among others) from various dominant and marginalized groups as expressed in the literature.

Write projects/essays that respond to the literature.

Engage in close reading, interpretation, critical analysis, and class discussions as tools for understanding, evaluating, and comparing world literature and discourses from various periods.

Evaluate how different world cultures transform, and are transformed by, key global forces through examining works of world literature.

Program Outcomes

Demonstrate college-level reading skills by summarizing, analyzing, interpreting, synthesizing, and evaluating college texts; and develop an awareness of the approach's writers use for different audiences, genres, and rhetorical situations.

College-wide Outcomes

Critical Thinking - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ENGL 264 - Shakespeare on Film

Credits: 5

Analyze several of Shakespeare's plays and how they are adapted and portrayed on film. Study the original text (complete plays and/or excerpts) and one or more film adaptations of those plays, interpret and analyze themes and cultural parallels and modern relevancy. Apply film terms, literary analysis, and cultural analysis (including class, race, and gender issues).

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Outcomes:

Students who successfully complete this class will be able to:

Discuss Shakespeare's themes and messages, the historical and cultural contexts of the plays, and literary techniques within the plays (themes, characterization, poetic language, symbolism, for example).

Evaluate the film adaptations of certain plays including analysis of the directors' choices within those subjective adaptations of the original plays such as close or loose adaptations, changes made, comparisons of the same scene by different directors, settings, character depictions and casting, timeline and choices to change the time in history for which a play is set. historical context and social issues from Shakespeare's time translated to modern times, and other choices that affect the differences among adaptations of the same plays.

Apply various forms of literary criticism approaches to their analyses of the plays and films. (For example, feminist criticism, social and historical criticism, racial and cultural bias criticism, Marxist criticism, post-modern criticism, psychological criticism, and film methodology criticism including application of specific film terms and analysis and critique of decisions by the directors, etc.)

Program Outcomes

Produce effective written communication, which demonstrates critical thinking; writing and research processes; and knowledge of genres for workplace, expository, or research writing.

Demonstrate college-level reading skills by summarizing, analyzing, interpreting, synthesizing, and evaluating college texts; and develop an awareness of the approach's writers use for different audiences, genres, and rhetorical situations.

College-wide Outcomes

Critical Thinking - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

ENGL 335 - Advanced Technical Writing

Credits: 5

Prepare students to communicate effectively in a professional environment. Students become familiar with the processes, forms, and styles of technical writing as they create various documents, including instructions, proposals, and discipline-specific and/or client-based research projects. Emphasizes the purpose and audience, as well as clarity, concision, and document design.

Enrollment Requirement: Admission into a bachelor's degree program; and ENGL& 101 with a grade of 2.0 or higher; or instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

Develop a sense of how purposes, audiences, situations, technologies, and methods affect writers' and users' perceptions of written and digital communication.

Implement and demonstrate theories of document design (e.g. format, layout, graphics) in course projects.

Exhibit the recursive nature of writing and design process in terms of researching, drafting, reviewing/testing, editing, and revising.

Develop strategies synchronous and asynchronous communication with peers, instructors, users, and/or clients that foster mutual respect and responsibility, including different varieties of testing and assessing written and digital communications.

Implement and evaluate a range of research methods and information resources to develop and produce ethically responsible professional documents.

Create effective arguments in professional documents using discursive and visual information.

Demonstrate awareness of how various media genres and technologies affect and are affected by users and readers and, thus, are integral to the communication and design process.

Use and adapt various technologies to produce attractive, persuasive, professional documents and distribute them electronically to fulfill the purpose and need of various audiences and purposes.

Program Outcomes

Produce effective written communication, which demonstrates critical thinking; writing and research processes; and knowledge of genres for workplace, expository, or research writing.

Demonstrate college-level reading skills by summarizing, analyzing, interpreting, synthesizing, and evaluating college texts; and develop an awareness of the approach's writers use for different audiences, genres, and rhetorical situations.

College-wide Outcomes

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

English Language Learning

\$25 tuition will be charged for any combination of ELL classes each quarter.

ELL 1 - ELL Community-Based Level 1

Credits: 1-12

Beginning level community-based English class for ELL students. Students study reading, writing, speaking and listening. This is a pass/no credit course.

Enrollment Requirement: ELL 8, 9; placement test; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

Read and comprehend learned words in a few simple phrases and basic personal information slowly and with some effort but with few errors, to independently accomplish simple, well defined, and structured reading activities in a few comfortable and familiar settings.

Write individual words, simple phrases and a few very simple sentences slowly and with some effort and some errors. They can independently accomplish simple, well defined, and highly structured writing activities in a few comfortable and familiar settings.

Speak learned and rehearsed words and phrases with hesitation and some inaccuracy in a familiar setting with a familiar audience (usually face-to-face with one person). A high level of support is provided (in the form of written, visual, or verbal prompts). Pronunciation may be inaccurate or nonstandard and speech may, at times, be difficult to understand even by a skilled, supportive listener.

Comprehend the gist of short, simple conversations and explanations on familiar, learned topics in face-to-face situations when tasks are highly structured and include supports, such as visual cues, pre-learning of new vocabulary and phrases, or collaborative listening. Text is considerably adjusted for listeners who require a slower rate of speech with frequent opportunities for repetition or rephrasing. For English language learners, level of ease and confidence in using English may be low, even in familiar contexts.

*The outcomes will be adjusted in depth and intensity depending on the credits for which the classes are offered. More intensity and depth can include multi-level cohort activities, class projects, guest speakers, field trips, and expanded language development and application in speaking, listening, reading, and writing.

Program Outcomes

We are now using the Career and College Readiness Standards from the National Reporting System. When students are ready to leave our program in level 6, they can do the following:

In Reading

Cite evidence from the text to analyze and draw inferences

Summarize

Use context to determine meaning

Analyze how texts are organized

Determine points of view
Understand graphs, charts, diagrams, maps
Delineate and evaluate arguments
Compare and contrast texts
Be familiar with affixes and roots
Understand similes and metaphors

In Writing

Produce clear and coherent writing in which the development, organization, and style are appropriate to the task and audience
Write to inform, explain, examine and convey ideas
Write arguments with reasons and evidence
Write narratives
Introduce and develop a topic
Create cohesion and clarify relationships between ideas
Revise, edit, rewrite
Do short research project drawing on several cited sources

In Speaking & Listening

Actively participate in conversations
Analyze arguments
Build on the ideas of others
Express opinions clearly and persuasively
Work in groups to discuss, pose, and answer questions
Contribute relevant comments and observations
Evaluate soundness of speakers' reasoning and sufficiency of evidence
Adapt speech to formal/informal circumstances
Give clear, effective presentations integrating multi-media

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 2 - ELL Community-Based Level 2

Credits: 1-12

High-beginning level community-based English class for ELL students. Students study reading, writing, speaking and listening. This is a pass/no credit course.

Enrollment Requirement: ELL 1 or 10; and placement test; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

Read and comprehend words in simple sentences, slowly with some repetition and with few errors, to independently accomplish simple, well-defined and structured reading activities in a range of comfortable and familiar settings.

Write simple sentences on familiar topics with some effort and errors to independently accomplish simple, well defined, and structured writing activities in a few comfortable and familiar settings.

Sometimes speak learned and rehearsed words, phrases, and simple sentences fluently and accurately but other times speak with hesitation and inaccuracy in a familiar setting with a familiar audience (usually face-to-face with one person). A high level of support is provided (in the form of written, visual, or verbal prompts). Pronunciation may be inaccurate or nonstandard and speech may, at times, be difficult to understand even by a skilled, supportive listener.

Comprehend the gist of simple conversations and explanations on familiar topics in face-to-face situations when tasks are highly structured and include supports, such as visual cues, pre-learning of new vocabulary and phrases, or collaborative listening. Text is considerably adjusted for listeners who usually require a slower rate of speech with frequent opportunities for repetition or rephrasing. For English language learners, level of ease and confidence in using English may be low, even in familiar contexts.

*The outcomes will be adjusted in depth and intensity depending on the credits for which the classes are offered. More intensity and depth can include multi-level cohort activities, class projects, guest speakers, field trips, and expanded language development and application in speaking, listening, reading, and writing.

Program Outcomes

Understand graphs, charts, diagrams, maps

Delineate and evaluate arguments

Compare and contrast texts

Be familiar with affixes and roots

Understand similes and metaphors

In Writing

Produce clear and coherent writing in which the development, organization, and style are appropriate to the task and audience

Write to inform, explain, examine and convey ideas

Write arguments with reasons and evidence

Write narratives

Introduce and develop a topic

Create cohesion and clarify relationships between ideas

Revise, edit, rewrite

Do short research project drawing on several cited sources

In Speaking & Listening

Actively participate in conversations

Analyze arguments

Build on the ideas of others

Express opinions clearly and persuasively

Work in groups to discuss, pose, and answer questions

Contribute relevant comments and observations

Evaluate soundness of speakers' reasoning and sufficiency of evidence

Adapt speech to formal/informal circumstances

Give clear, effective presentations integrating multi-media

By the time you leave level 6, you should have control over these parts of grammar: punctuation, present, past, future, continuous, present perfect, past perfect , modals, gerunds, infinitives, questions and negative statements , pronouns and prepositions , active and passive voice compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 3 - ELL Community-Based Level 3

Credits: 1-12

Low Intermediate level community-based English class for ELL students. Students study reading, writing, speaking and listening. This is a pass/no credit course.

Enrollment Requirement: ELL 2, 20, 21 or 28; and placement test; and instructor

consent.

Course Outcomes:

Students who successfully complete this class will be able to:

Read and comprehend words in small blocks of simple text, slowly but easily and with few errors, to independently accomplish simple, well-defined and structured reading activities in a range of comfortable and familiar settings.

Write several simple sentences on familiar topics with some effort and errors to independently accomplish simple, well defined, and structured writing activities in a few comfortable and familiar settings.

Speak mostly short utterances (sometimes inaccurate, incomplete sentences and sometimes fluent and accurate sentences that may be expansions of learned materials and stock phrases) in familiar settings with a familiar audience (usually face-to-face with one person) when provided with a high level of support (in the form of written, visual, or verbal prompts). Pronunciation may be inaccurate or non-standard and speech may be difficult to understand even by a skilled, supportive listener.

Listen for structured and well-defined purposes related to maintaining personal conversations, acquiring information, or completing basic transactions, either face-to-face or in a brief telephone conversation when language is somewhat simplified and frequent opportunities for repetition, rewording and clarification are provided. For English language learners, level of ease using English is growing but varies depending on the level of familiarity with the audience and purpose and the stressfulness of the context.

*The outcomes will be adjusted in depth and intensity depending on the credits for which the classes are offered. More intensity and depth can include multi-level cohort activities, class projects, guest speakers, field trips, and expanded language development and application in speaking, listening, reading, and writing.

Program Outcomes

We are now using the Career and College Readiness Standards from the National Reporting System. When students are ready to leave our program in level 6, they can do the following:

In Reading

Cite evidence from the text to analyze and draw inferences

Summarize

Use context to determine meaning

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 6 - English Language Learning Intro to Literacy

Credits: 1-15

Introduction to literacy level English class for ELL students. Students study print awareness, reading, writing, speaking and listening.

Enrollment Requirement: Placement test and instructor's permission.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

1. Recognize and reproduce
 - letter names and sounds
 - short vowel sounds
2. Demonstrate ability to sound out short vowel words, reading from left to right within a word.
3. Identify the order of phonemes (e.g., initial and final) with words with a simple syllabic structure.
4. Identify and sort rhyming words with short vowel patterns.
5. Recognize beginnings and endings of sentences.
6. Distinguish the main features of letters (e.g., tail in p or dot in i), use spaces to visually mark the different words, and use them in copying and writing.
7. Write lowercase letters.
8. Write numerals 1-10.
9. Start to write high frequency single syllable words and their name.
10. Write left to right on a line.
11. Participate in guided discussions with diverse partners with instructor support.
12. Speak learned and rehearsed words and phrases with hesitation and some inaccuracy, using a high level of support.
13. Communicate some basic needs to instructor and other students in English.
14. Comprehend the gist of short, simple conversations with highly structured supports.
15. Start to use the digital tools in Canvas to complete online classwork.

The outcomes will be adjusted in depth and intensity depending on the credits for which the classes are offered. More intensity and depth can include multi-level cohort activities, class projects, guest speakers, field trips, and expanded language development and application in speaking, listening, reading, and writing.

Program Outcomes

Reporting System. When students are ready to leave our program in level 6, they can do the following:

In Reading

Cite evidence from the text to analyze and draw inferences

Summarize

Use context to determine meaning

Analyze how texts are organized

Determine points of view

Understand graphs, charts, diagrams, maps

Delineate and evaluate arguments

Compare and contrast texts

Be familiar with affixes and roots

Understand similes and metaphors

In Writing

Produce clear and coherent writing in which the development, organization, and style are appropriate to the task and audience

Write to inform, explain, examine and convey ideas

Write arguments with reasons and evidence

Write narratives

Introduce and develop a topic

Create cohesion and clarify relationships between ideas

Revise, edit, rewrite

Do short research project drawing on several cited sources

In Speaking & Listening

Actively participate in conversations

Analyze arguments

Build on the ideas of others

Express opinions clearly and persuasively

Work in groups to discuss, pose, and answer questions

Contribute relevant comments and observations

Evaluate soundness of speakers' reasoning and sufficiency of evidence

Adapt speech to formal/informal circumstances

Give clear, effective presentations integrating multi-media

By the time you leave level 6, you should have control over these parts of grammar:

punctuation, present, past, future, continuous, present perfect, past perfect ,

modals, gerunds, infinitives, questions and negative statements , pronouns and

prepositions , active and passive voice

compound and complex sentences.

College-wide Outcomes

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 7 - ELL Reading Support for Literacy Level

Credits: 1-10

This is a reading class for literacy level ELL students. Students will learn basic reading skills including letter sound recognition, basic vocabulary, fluency and comprehension.

Enrollment Requirement: Placement test and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Improve phonemic awareness and decoding skills.

- Build basic vocabulary.

- Read and comprehend learned words in a few simple phrases and basic personal information slowly and with some effort and some errors to independently accomplish simple, well defined, and structured reading activities in a few comfortable and familiar settings.

- Identify the main topic and retell key details of a text.

- Ask and answer questions to help determine or clarify the meaning of words and phrases in a text.

- Use the illustrations and details in a text to describe its key ideas.

The outcomes will be adjusted in depth and intensity depending on the credits for which the classes are offered. More intensity and depth can include multi-level cohort activities, class projects, guest speakers, field trips, and expanded language development and application in reading.

Program Outcomes

We are using the Career and College Readiness Standards from the National Reporting System. When students are ready to leave our program in level 6, they can do the following:

In Reading

- Cite evidence from the text to analyze and draw inferences

- Summarize

- Use context to determine meaning

- Analyze how texts are organized

- Determine points of view

- Understand graphs, charts, diagrams, maps

- Delineate and evaluate arguments

- Compare and contrast texts

Be familiar with affixes and roots
Understand similes and metaphors

In Writing

Produce clear and coherent writing in which the development, organization, and style are appropriate to the task and audience
Write to inform, explain, examine and convey ideas
Write arguments with reasons and evidence
Write narratives
Introduce and develop a topic
Create cohesion and clarify relationships between ideas
Revise, edit, rewrite
Do short research project drawing on several cited sources

In Speaking & Listening

Actively participate in conversations
Analyze arguments
Build on the ideas of others
Express opinions clearly and persuasively
Work in groups to discuss, pose, and answer questions
Contribute relevant comments and observations
Evaluate soundness of speakers' reasoning and sufficiency of evidence
Adapt speech to formal/informal circumstances
Give clear, effective presentations integrating multi-media

By the time you leave level 6, you should have control over these parts of grammar:

punctuation, present, past, future, continuous, present perfect, past perfect, modals, gerunds, infinitives, questions and negative statements, pronouns and prepositions, active and passive voice, compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

ELL 8 - ELL Community-Based Literacy Level

Credits: 1-12

Literacy level community-based English class for ELL students. Students study reading, writing, speaking and listening. This is a pass/no credit course.

Enrollment Requirement: Placement test and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

Read and comprehend learned words in a few simple phrases and basic personal information slowly and with some effort but with few errors, to independently accomplish simple, well defined, and structured reading activities in a few comfortable and familiar settings.

Write individual words, simple phrases and a few very simple sentences slowly and with some effort and some errors. They can independently accomplish simple, well defined, and highly structured writing activities in a few comfortable and familiar settings.

Speak learned and rehearsed words and phrases with hesitation and some inaccuracy in a familiar setting with a familiar audience (usually face-to-face with one person). A high level of support is provided (in the form of written, visual, or verbal prompts). Pronunciation may be inaccurate or nonstandard and speech may, at times, be difficult to understand even by a skilled, supportive listener.

Comprehend the gist of short, simple conversations and explanations on familiar, learned topics in face-to-face situations when tasks are highly structured and include supports, such as visual cues, pre-learning of new vocabulary and phrases, or collaborative listening. Text is considerably adjusted for listeners who require a slower rate of speech with frequent opportunities for repetition or rephrasing. For English language learners, level of ease and confidence in using English may be low, even in familiar contexts.

*The outcomes will be adjusted in depth and intensity depending on the credits for which the classes are offered. More intensity and depth can include multi-level cohort activities, class projects, guest speakers, field trips, and expanded language development and application in speaking, listening, reading, and writing.

Program Outcomes

We are now using the Career and College Readiness Standards from the National Reporting System. When students are ready to leave our program in level 6, they can do the following:

In Reading

This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 10 - English Language Learning Level 1

Credits: 1-15

Beginning level of ELL. Students prepare for academic or work readiness with contextualized study of content. Students work on all language skills and technology skills. This is a pass/no credit course.

Enrollment Requirement: ELL 8 or 9; and placement test; and instructor consent.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

Ask and answer questions about key details in a text. Identify the main topic and retell key details of a text. Ask and answer questions to help determine or clarify the meaning of words and phrases in a text.

Know and use various text features to locate key facts or information in a text. Use the illustrations and details in a text to describe its key ideas.

Write informative/explanatory texts in which they name a topic, supply some facts about the topic.

With guidance and support, use a variety of digital tools to produce and publish writing.

Participate in collaborative conversations with diverse partners in small and larger groups.

Follow agreed-upon rules for discussions (e.g., listening to others with care, speaking one at a time about the topics and texts under discussion).

Confirm understanding of a text read aloud or information presented orally or through other media by asking and answering questions about key details.

Ask and answer questions in order to seek help, get information, or clarify something that is not understood.

Describe people, places, things, and events with some details.

Speak audibly and try to express thoughts, feelings, and ideas clearly.

Produce complete sentences when appropriate to task and situation.

*The outcomes will be adjusted in depth and intensity depending on the credits for which the classes are offered. More intensity and depth can include multi-level cohort activities, class projects, guest speakers, field trips, and expanded language development and application in speaking, listening, reading, and writing.

Program Outcomes

Evaluate soundness of speakers' reasoning and sufficiency of evidence
Adapt speech to formal/informal circumstances
Give clear, effective presentations integrating multi-media

By the time you leave level 6, you should have control over these parts of grammar: punctuation, present, past, future, continuous, present perfect, past perfect, modals, gerunds, infinitives, questions and negative statements, pronouns and prepositions, active and passive voice
compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 16 - ELL Summer Institute Conversation Level 1

Credits: 1-5

Provides beginning ELL students with conversation and pronunciation language practice. This is a pass/no credit course.

Enrollment Requirement: Placement test; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Begin to participate in collaborative conversations with diverse partners in small and larger groups.

- Begin to follow agreed-upon rules for discussions (e.g., listening to others with care, speaking one at a time about the topics under discussion.)

- Ask and answer questions in order to seek help, get information, or clarify something that is not understood.

- Describe people, places, things, and events with some relevant details, start to express ideas and feelings clearly.

- Speak audibly and start to express thoughts, feelings, and ideas clearly.

- Produce complete sentences when appropriate to task and situation.

*The outcomes will be adjusted in depth and intensity depending on the credits for which the classes are offered. More intensity and depth can include multi-level cohort activities, class projects, guest speakers, field trips, and expanded language development and application in speaking and listening.

By the time you leave level 6, you should have control over these parts of grammar:

punctuation, present, past, future, continuous, present perfect, past perfect ,

modals, gerunds, infinitives, questions and negative statements , pronouns and

prepositions , active and passive voice

compound and complex sentences

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

ELL 17 - ELL Technology Support Level 1

Credits: 1-5

Provides ELL 1, 8, 9, 10 students with opportunities to learn, improve, and use English through technology. Students will discover new ways to enhance their language-learning skills, which will add to their overall success in other ELL classes and beyond. This is a pass/no credit course.

Enrollment Requirement: Placement test and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

Accomplish and/or collaborate to complete English language-learning activities and project-based assignments through technology with additional support from instructor and peers.

Know the major parts of a computer and express an understanding of their basic functions.

Use keys and functions common to most programs, such as save, open, delete, and close.

Use the Internet, Canvas, email, and programs such as Microsoft Word and PowerPoint.

Program Outcomes

We are now using the Career and College Readiness Standards from the National Reporting System. When students are ready to leave our program in level 6, they can do the following:

In Reading

Cite evidence from the text to analyze and draw inferences

Summarize

Use context to determine meaning

Analyze how texts are organized

Determine points of view

Understand graphs, charts, diagrams, maps

Delineate and evaluate arguments

Compare and contrast texts

Be familiar with affixes and roots

Write to inform, explain, examine and convey ideas

Write arguments with reasons and evidence

Write narratives

Introduce and develop a topic

Create cohesion and clarify relationships between ideas

Revise, edit, rewrite

Do short research project drawing on several cited sources

In Speaking & Listening

Actively participate in conversations

Analyze arguments

Build on the ideas of others

Express opinions clearly and persuasively

Work in groups to discuss, pose, and answer questions
Contribute relevant comments and observations
Evaluate soundness of speakers' reasoning and sufficiency of evidence
Adapt speech to formal/informal circumstances
Give clear, effective presentations integrating multi-media

By the time you leave level 6, you should have control over these parts of grammar:
punctuation, present, past, future, continuous, present perfect, past perfect ,
modals, gerunds, infinitives, questions and negative statements , pronouns and
prepositions , active and passive voice
compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 20 - English Language Learning Level 2

Credits: 1-15

High-beginning level of ELL. Students prepare for academic or work readiness with contextualized study of content. Students work on all language skills plus information literacy, tech skills, and project-based learning. This is a pass/no credit course.

Enrollment Requirement: ELL 1 or 10; and placement test; and instructor consent.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Participate in collaborative conversations with diverse partners in small and larger groups.
- Follow agreed-upon rules for discussions (e.g., listening to others with care, speaking one at a time about the topics and texts under discussion).
- Build on others' talk in conversations by responding to the comments of others through multiple exchanges.
- Ask questions to clear up any confusion about the topics and texts under discussion.

Confirm understanding of a text read aloud or information presented orally or through other media by asking and answering questions about key details and requesting clarification if something is not understood.

Ask and answer questions in order to seek help, get information, or clarify something that is not understood.

Describe people, places, things, and events with relevant details, start to express ideas and feelings clearly.

Speak audibly and start to express thoughts, feelings, and ideas clearly.

Produce complete sentences when appropriate to task and situation.

Ask and answer questions about key details in a text.

Identify the main topic and retell key details of a text.

Describe the connection between two individuals, events, ideas, or pieces of information in a text.

Ask and answer questions to help determine or clarify the meaning of words and phrases in a text.

Know and use various text features to locate key facts or information in a text.

Use the illustrations and details in a text to describe its key ideas.

Identify the reasons an author gives to support points in a text.

Write informative/explanatory texts in which they name a topic, supply some facts about the topic, and provide some sense of closure.

Write narratives in which they recount two or more appropriately sequenced events, include some details regarding what happened, use temporal words to signal event order, and provide some sense of closure.

With guidance and support focus on a topic, respond to questions and suggestions from peers, and add details to strengthen writing as needed.

With guidance and support, use a variety of digital tools to produce and publish writing, including in collaboration with peers.

Participate in shared research and writing projects. With guidance and support, recall information from experiences or gather information from provided sources to answer a question.

*The outcomes will be adjusted in depth and intensity depending on the credits for which the classes are offered. More intensity and depth can include multi-level cohort activities, class projects, guest speakers, field trips, and expanded language development and application in speaking, listening, reading, and writing.

Program Outcomes

Program Outcomes

We are now using the Career and College Readiness Standards from the National Reporting System. When students are ready to leave our program in level 6, they can do the following:

In Reading

Cite evidence from the text to analyze and draw inferences

Summarize

Use context to determine meaning

Analyze how texts are organized

Determine points of view

Understand graphs, charts, diagrams, maps

Delineate and evaluate arguments

Compare and contrast texts

Be familiar with affixes and roots

Understand similes and metaphors

In Writing

Produce clear and coherent writing in which the development, organization, and style are appropriate to the task and audience

Write to inform, explain, examine and convey ideas

Write arguments with reasons and evidence

Write narratives

Introduce and develop a topic

Create cohesion and clarify relationships between ideas

Revise, edit, rewrite

Do short research project drawing on several cited sources

In Speaking & Listening

Actively participate in conversations

Analyze arguments

Build on the ideas of others
Express opinions clearly and persuasively
Work in groups to discuss, pose, and answer questions
Contribute relevant comments and observations
Evaluate soundness of speakers' reasoning and sufficiency of evidence
Adapt speech to formal/informal circumstances
Give clear, effective presentations integrating multi-media

By the time you leave level 6, you should have control over these parts of grammar:
punctuation, present, past, future, continuous, present perfect, past perfect ,
modals, gerunds, infinitives, questions and negative statements , pronouns and
prepositions , active and passive voice
compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 22 - ELL Summer Institute Conversation Level 2

Credits: 5

Provides high-beginning ELL students with conversation and pronunciation language practice. This is a pass/no credit course.

Enrollment Requirement: ELL 1 or 10; and placement test; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Begin to participate in collaborative conversations with diverse partners in small and larger groups.
- Begin to follow agreed-upon rules for discussions (e.g., listening to others with care, speaking one at a time about the topics and texts under discussion).
- Try to build on others' talk in conversations by responding to the comments of others through multiple exchanges.
- Ask and answer questions in order to seek help, get information, or clarify something that is not understood.
- Describe people, places, things, and events with relevant details, start to express ideas and feelings clearly.

Speak audibly and start to express thoughts, feelings, and ideas clearly.
Produce complete sentences when appropriate to task and situation.
Begin to recognize and improve pronunciation of English phonemes, stress, rhythm, intonation and reductions.

Program Outcomes

We are now using the Career and College Readiness Standards from the National Reporting System. When students are ready to leave our program, they can do the following:

In Reading

Cite evidence from the text to analyze and draw inferences

Summarize

Use context to determine meaning

Analyze how texts are organized

Determine points of view

Understand graphs, charts, diagrams, maps

Delineate and evaluate arguments

Compare and contrast texts

Be familiar with affixes and roots

In Writing

Produce clear and coherent writing in which the development, organization, and style are appropriate to the task and audience

Write to inform, explain, examine and convey ideas

Write arguments with reasons and evidence

Write narratives

Introduce and develop a topic

Create cohesion and clarify relationships between ideas

Revise, edit, rewrite

Do short research project drawing on several cited sources

In Speaking & Listening

Actively participate in conversations

Analyze arguments

Build on the ideas of others

Express opinions clearly and persuasively

Work in groups to discuss, pose, and answer questions

Contribute relevant comments and observations

Evaluate soundness of speakers' reasoning and sufficiency of evidence

Adapt speech to formal/informal circumstances

Give clear, effective presentations integrating multi-media

By the time you leave level 6, you should have control over these parts of grammar: punctuation, present, past, future, continuous, present perfect, past perfect ,

modals, gerunds, infinitives, questions and negative statements , pronouns and prepositions , active and passive voice
compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

ELL 23 - ELL Summer Institute Writing Level 2

Credits: 5

High-beginning ELL students who want to focus on their fluency and accuracy in writing through project-based learning. This is a pass/no credit course.

Enrollment Requirement: ELL 1 or 10; and placement test; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Begin to write with increased fluency.
- Use feedback to rewrite.
- Edit your own writing with instructor and peer support.
- Use correct spelling and punctuation.
- Control verb tenses, subject-verb agreement, word order, pronouns.
- Use details.
- Understand the function of an introduction, a conclusion, and an organizing principle in your paragraph.
- Have a positive attitude toward writing and increased confidence in your writing.
- Be a self-motivated, independent learner.
- Use writing as a tool for critical thinking.
- Use written English to explore what you have to say.

Program Outcomes

We are now using the Career and College Readiness Standards from the National Reporting System. When students are ready to leave our program, they can do the following:

In Reading

Cite evidence from the text to analyze and draw inferences

Summarize

Use context to determine meaning

Analyze how texts are organized

Determine points of view

Understand graphs, charts, diagrams, maps
Delineate and evaluate arguments
Compare and contrast texts
Be familiar with affixes and roots
Understand similes and metaphors

In Writing

Produce clear and coherent writing in which the development, organization, and style are appropriate to the task and audience
Write to inform, explain, examine and convey ideas
Write arguments with reasons and evidence
Write narratives
Introduce and develop a topic
Create cohesion and clarify relationships between ideas
Revise, edit, rewrite
Do short research project drawing on several cited sources

In Speaking & Listening

Actively participate in conversations
Analyze arguments
Build on the ideas of others
Express opinions clearly and persuasively
Work in groups to discuss, pose, and answer questions
Contribute relevant comments and observations
Evaluate soundness of speakers' reasoning and sufficiency of evidence
Adapt speech to formal/informal circumstances
Give clear, effective presentations integrating multi-media

By the time you leave level 6, you should have control over these parts of grammar:
punctuation, present, past, future, continuous, present perfect, past perfect ,
modals, gerunds, infinitives, questions and negative statements , pronouns and
prepositions , active and passive voice
compound and complex sentences

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 24 - ELL Conversation Support Level 2

Credits: 1-5

Provides high-beginning ELL students with language practice opportunities. Students become active participants in conversations and improve their ability to manage conversations. This is a pass/no credit course.

Enrollment Requirement: ELL 1 or 10; and placement test; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

Begin to participate in collaborative conversations with diverse partners in small and larger groups.

Begin to follow agreed-upon rules for discussions (e.g., listening to others with care, speaking one at a time about the topics and texts under discussion).

Try to build on others' talk in conversations by responding to the comments of others through multiple exchanges.

Ask and answer questions in order to seek help, get information, or clarify something that is not understood.

Describe people, places, things, and events with relevant details, start to express ideas and feelings clearly.

Speak audibly and start to express thoughts, feelings, and ideas clearly.

Produce complete sentences when appropriate to task and situation

*The outcomes will be adjusted in depth and intensity depending on the credits for which the classes are offered. More intensity and depth can include multi-level cohort activities, class projects, guest speakers, field trips, and expanded language development and application in speaking, listening, reading, and writing.

Program Outcomes

We are now using the Career and College Readiness Standards from the National Reporting System. When students are ready to leave our program in level 6, they can do the following:

In Reading

Cite evidence from the text to analyze and draw inferences

Summarize

Use context to determine meaning

Analyze how texts are organized

Determine points of view

Understand graphs, charts, diagrams, maps

Delineate and evaluate arguments

Compare and contrast texts

Be familiar with affixes and roots

Understand similes and metaphors

In Writing

Produce clear and coherent writing in which the development, organization, and style

are appropriate to the task and audience
Write to inform, explain, examine and convey ideas
Write arguments with reasons and evidence
Write narratives
Introduce and develop a topic
Create cohesion and clarify relationships between ideas
Revise, edit, rewrite
Do short research project drawing on several cited sources

In Speaking & Listening

Actively participate in conversations
Analyze arguments
Build on the ideas of others
Express opinions clearly and persuasively
Work in groups to discuss, pose, and answer questions
Contribute relevant comments and observations
Evaluate soundness of speakers' reasoning and sufficiency of evidence
Adapt speech to formal/informal circumstances
Give clear, effective presentations integrating multi-media

By the time you leave level 6, you should have control over these parts of grammar:
punctuation, present, past, future, continuous, present perfect, past perfect ,
modals, gerunds, infinitives, questions and negative statements , pronouns and
prepositions , active and passive voice
compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 26 - ELL Writing Support Level 2

Credits: 1-5

For current students in ELL 2, 20, 21, 28 who want to improve their writing skills, and especially for students who have stronger speaking/listening skills than reading/writing skills for their level. This is a pass/no credit course.

Enrollment Requirement: ELL 1 or 10; and placement test; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

Write informative/explanatory texts to examine a topic and convey ideas and information clearly.

- a. Introduce a topic and group related information together; include illustrations when useful to aiding comprehension.
- b. Develop the topic with facts, definitions, and details.
- c. Use linking words and phrases (e.g., also, another, and, more, but) to connect ideas within categories of information.
- d. Provide a concluding statement or section.
- c. Use linking words and phrases (e.g., because, therefore, since, for example) to connect opinion and reasons.
- d. Provide a concluding statement or section.

Write informative/explanatory texts to examine a topic and convey ideas and information clearly.

- a. Introduce a topic and group related information together; include illustrations when useful to aiding comprehension.
- b. Develop the topic with facts, definitions, and details.
- c. Use linking words and phrases (e.g., also, another, and, more, but) to connect ideas within categories of information.
- d. Provide a concluding statement or section.

Write narratives in which they recount two or more appropriately sequenced events, include some details regarding what happened, use temporal words to signal event order, and provide some sense of closure.

With guidance and support focus on a topic, respond to questions and suggestions from peers, and add details to strengthen writing as needed.

With guidance and support, use a variety of digital tools to produce and publish writing, including in collaboration with peers.

Participate in shared research and writing projects (e.g., explore a number of "how-to" books on a given topic and use them to write a sequence of instructions).

With guidance and support, recall information from experiences or gather information from provided sources to answer a question.

*The outcomes will be adjusted in depth and intensity depending on the credits for which the classes are offered. More intensity and depth can include multi-level cohort activities, class projects, guest speakers, field trips, and expanded language development and application in speaking, listening, reading, and writing.

Program Outcomes

We are now using the Career and College Readiness Standards from the National Reporting System. When students are ready to leave our program in level 6, they can do the following:

In Reading

Cite evidence from the text to analyze and draw inferences

Summarize

Work in groups to discuss, pose, and answer questions

Contribute relevant comments and observations

Evaluate soundness of speakers' reasoning and sufficiency of evidence

Adapt speech to formal/informal circumstances

Give clear, effective presentations integrating multi-media

By the time you leave level 6, you should have control over these parts of grammar:

punctuation, present, past, future, continuous, present perfect, past perfect, modals,

gerunds, infinitives, questions and negative statements, pronouns and prepositions,

active and passive voice

compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those

responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 27 - ELL Technology Support Level 2

Credits: 1-5

Provides ELL 2, 20, 21 and 28 students with opportunities to learn, improve, and use English through technology. Students will discover new ways to enhance their language-learning skills, which will add to their overall success in other ELL classes and beyond. This is a pass/no credit course.

Enrollment Requirement: ELL 1, 8, 9 or 10; and placement test; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Independently accomplish and/or collaborate to complete English language-learning activities and project-based assignments through technology.

- Know the major parts of a computer and express an understanding of their basic functions.

- Use keys and functions common to most programs, such as save, open, delete, and close.

- Use the Internet, Canvas, email, and programs such as Microsoft Word and PowerPoint.

*The outcomes will be adjusted in depth and intensity depending on the credits for which the classes are offered. More intensity and depth can include multi-level cohort activities, class projects, guest speakers, field trips, and expanded language development and application in speaking, listening, reading, and writing.

Program Outcomes

Give clear, effective presentations integrating multi-media

By the time you leave level 6, you should have control over these parts of grammar: punctuation, present, past, future, continuous, present perfect, past perfect , modals, gerunds, infinitives, questions and negative statements , pronouns and prepositions , active and passive voice compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 28 - English Language Learning Pathways to Work L2

Credits: 1-15

Provides an introduction for students interested in entering the workforce or participating

in an I-BEST. Gives students the necessary information to research a career or choose an I-BEST program. Teaches the students study skills, employability skills, and improves reading, writing, listening, and speaking skills. This is a pass/no credit course.

Enrollment Requirement: ELL 1, 10; placement test; and instructor consent.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

Reading: Students will ask and answer questions about key details in a text related to employment as well as identify the main topic and retell those key details. With a lot of support, they will describe the connection between two events, ideas, or pieces of information in a text. They will ask and answer questions to help determine or clarify the meaning of words and phrases in a text. They will use various text features, illustrations and details to locate and describe key facts or information in a text.

Writing: Students, with a lot of support and scaffolding, will write informative/explanatory texts in which they name a topic related to employment, supply some facts about the topic, and provide some sense of closure. They will also write short narratives in which they include some details about their work history, education and future goals, and they will use a variety of digital tools to produce and publish writing, including in collaboration with peers.

Speaking and Listening: Students will ask and answer questions in order to seek help, get information, or clarify something that is not understood. They will describe people, places, things, and events related to employment with relevant details, expressing ideas and feelings clearly. They will speak audibly and express thoughts, feelings, and ideas with increasing clarity. Students will follow oral directions and ask for clarification.

Employability skills: Students will use self-awareness and workplace skills to make decisions, work in teams, problem solve and present information.

Technology and Math Skills: Students will begin to use Microsoft Word and PowerPoint to compose and edit a document and create a presentation with a lot of assistance. Students will learn how to use the internet to research a topic. Students will learn the meaning of math symbols and use addition, subtraction, multiplication, division, and measurement.

Program Outcomes

In Reading

- Cite evidence from the text to analyze and draw inferences
- Summarize
- Use context to determine meaning
- Analyze how texts are organized

- Determine points of view
- Understand graphs, charts, diagrams, maps
- Delineate and evaluate arguments
- Compare and contrast texts
- Be familiar with affixes and roots
- Understand similes and metaphors

In Writing

- Produce clear and coherent writing in which the development, organization, and style are appropriate to the task and audience
- Write to inform, explain, examine and convey ideas
- Write arguments with reasons and evidence
- Write narratives
- Introduce and develop a topic
- Create cohesion and clarify relationships between ideas
- Revise, edit, rewrite
- Do short research project drawing on several cited sources

In Speaking & Listening

- Actively participate in conversations
- Analyze arguments
- Build on the ideas of others
- Express opinions clearly and persuasively
- Work in groups to discuss, pose, and answer questions
- Contribute relevant comments and observations
- Evaluate soundness of speakers' reasoning and sufficiency of evidence
- Adapt speech to formal/informal circumstances
- Give clear, effective presentations integrating multi-media

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 29 - ELL Summer Institute Cmty Exploration Level 2

Credits: 2

This is a multi-level class offered every summer quarter. Students will explore and become familiar with their community through field trips, volunteer experiences, and other hands-on project-based learning. Students will use and strengthen their communicative language skills through authentic English immersion. Students will have

the opportunity to explore the campus at large and off-campus sites. This is a pass/no credit course.

Enrollment Requirement: ELL 1 or 10; and placement test; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Participate in collaborative conversations with diverse partners in small and larger groups.
- Follow agreed-upon rules for discussions (e.g., listening to others with care, speaking one at a time about the topics and texts under discussion).
- Build on others' talk in conversations by responding to the comments of others through multiple exchanges.
- Ask questions to clear up any confusion about the topics under discussion.
- Ask and answer questions in order to seek help, get information, or clarify something that is not understood.
- Describe people, places, things, and events with relevant details, start to express ideas and feelings clearly.
- Speak audibly and start to express thoughts, feelings, and ideas clearly.
- Participate in a shared project. With guidance and support, recall information from experiences or gather information from provided sources to answer a question.

Program Outcomes

We are now using the Career and College Readiness Standards from the National Reporting System. When students are ready to leave our program in level 6, they can do the following:

In Reading

- Cite evidence from the text to analyze and draw inferences
- Summarize

- Analyze how texts are organized
- Determine points of view
- Understand graphs, charts, diagrams, maps
- Delineate and evaluate arguments
- Compare and contrast texts
- Be familiar with affixes and roots
- Understand similes and metaphors

In Writing

- Produce clear and coherent writing in which the development, organization, and style are appropriate to the task and audience
- Write to inform, explain, examine and convey ideas
- Write arguments with reasons and evidence
- Write narratives

Introduce and develop a topic
Create cohesion and clarify relationships between ideas
Revise, edit, rewrite
Do short research project drawing on several cited sources

In Speaking & Listening
Actively participate in conversations
Analyze arguments
Build on the ideas of others
Express opinions clearly and persuasively
Work in groups to discuss, pose, and answer questions
Contribute relevant comments and observations
Evaluate soundness of speakers' reasoning and sufficiency of evidence
Adapt speech to formal/informal circumstances
Give clear, effective presentations integrating multi-media

By the time you leave level 6, you should have control over these parts of grammar:
punctuation, present, past, future, continuous, present perfect, past perfect ,
modals, gerunds, infinitives, questions and negative statements , pronouns and
prepositions , active and passive voice
compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

ELL 30 - English Language Learning Level 3

Credits: 1-15

Low-intermediate level of ELL. Students prepare for academic or work readiness with contextualized study of content. Students work on all language skills plus information literacy, tech skills, and project-based learning. This is a pass/no credit course.

Enrollment Requirement: ELL 2, 20, 21 or 28; and placement test; and instructor consent.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

Ask and answer questions about key details in a text.
Identify the main topic and retell key details of a text.

Describe the connection between two individuals, events, ideas, or pieces of information in a text.

Ask and answer questions to help determine or clarify the meaning of words and phrases in a text.

Know and use various text features to locate key facts or information in a text.

Use the illustrations and details in a text to describe its key ideas.

Identify the reasons an author gives to support points in a text.

Identify basic similarities in and differences between two texts on the same topic.

Write informative/explanatory texts in which they name a topic, supply some facts about the topic, and provide some sense of closure.

Write narratives in which they recount two or more appropriately sequenced events, include some details regarding what happened, use temporal words to signal event order, and provide some sense of closure.

With guidance and support focus on a topic, respond to questions and suggestions from peers, and add details to strengthen writing as needed.

With guidance and support, use a variety of digital tools to produce and publish writing, including in collaboration with peers.

Participate in shared research and writing projects.

With guidance and support, recall information from experiences or gather information from provided sources to answer a question.

Participate in collaborative conversations with diverse partners in small and larger groups.

Follow agreed-upon rules for discussions (e.g., listening to others with care, speaking one at a time about the topics and texts under discussion, and gaining the floor in respectful ways).

Build on others' talk in conversations by responding to the comments of others through multiple exchanges.

Ask and answer questions in order to seek help, get information, or clarify something that is not understood.

Ask questions to check understanding of information presented and stay on topic.

Explain their own ideas and understanding in light of the discussion.

Describe people, places, things, and events with relevant details.

Speak audibly and start to express thoughts, feelings, and ideas clearly.

Produce complete sentences when appropriate to task and situation.

*The outcomes will be adjusted in depth and intensity depending on the credits for which the classes are offered. More intensity and depth can include multi-level cohort activities, class projects, guest speakers, field trips, and expanded language development and application in speaking, listening, reading, and writing.

Program Outcomes

punctuation, present, past, future, continuous, present perfect, past perfect ,
modals, gerunds, infinitives, questions and negative statements , pronouns and
prepositions , active and passive voice

compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those

responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 31 - English Language Learning Intensive Writing L3

Credits: 1-15

Low-intermediate level of ELL for students who are permanent residents of Washington state. Students prepare for academic or work readiness with contextualized study of content. Students work on all language skills with an emphasis on reading and writing. Students will also work on information literacy, tech skills, and project-based learning. This is a pass/no credit course.

Enrollment Requirement: ELL 20, 21, 22 or 28; and placement test; and instructor consent.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Ask and answer questions about key details in a text.
- Identify the main topic and retell key details of a text.
- Describe the connection between two individuals, events, ideas, or pieces of information in a text.
- Ask and answer questions to help determine or clarify the meaning of words and phrases in a text.
- Know and use various text features to locate key facts or information in a text.
- Use the illustrations and details in a text to describe its key ideas.
- Identify the reasons an author gives to support points in a text.
- Identify basic similarities in and differences between two texts on the same topic.
- Write informative/explanatory texts in which they name a topic, supply some facts about the topic, and provide some sense of closure.
- Write narratives in which they recount two or more appropriately sequenced events, include some details regarding what happened, use temporal words to signal event order, and provide some sense of closure.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

ELL 33 - ELL Summer Institute Writing Level 3

Credits: 5

Low-intermediate ELL students who want to focus on their fluency and accuracy in writing through project-based learning. This is a pass/no credit course.

Enrollment Requirement: ELL 2, 20, 21, 22 or 28; and placement test; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Write informative/explanatory texts to examine a topic and convey ideas and information clearly.
- Produce writing in which the development and organization are appropriate to task and purpose.
- With guidance and support from peers and others, develop and strengthen writing as needed by planning, revising, and editing.
- With guidance and support, use technology to produce and publish writing (using keyboarding skills) as well as to interact and collaborate with others.
- With guidance and support, recall information from experiences or gather information from provided sources to answer a question.
- Participate in shared research and writing projects.

Program Outcomes

We are now using the Career and College Readiness Standards from the National Reporting System. When students are ready to leave our program, they can do the following:

In Reading

Cite evidence from the text to analyze and draw inferences

This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 34 - ELL Conversation Support Level 3

Credits: 1-5

Provides low-intermediate ELL students with language practice opportunities to share ideas, opinions and experiences. Students become active participants in conversations and improve their ability to manage conversations. This is a pass/no credit course.

Enrollment Requirement: ELL 2, 20, 21 or 28; placement test; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Participate in collaborative conversations with diverse partners in small and larger groups.

- Follow agreed-upon rules for discussions (e.g., listening to others with care, speaking one at a time about the topics and texts under discussion).

- Build on others' talk in conversations by responding to the comments of others through multiple exchanges.

- Ask and answer questions in order to seek help, get information, or clarify something that is not understood.

- Describe people, places, things, and events with relevant details, start to express ideas and feelings clearly.

- Speak audibly and start to express thoughts, feelings, and ideas clearly.

- Produce complete sentences when appropriate to task and situation.

*The outcomes will be adjusted in depth and intensity depending on the credits for which the classes are offered. More intensity and depth can include multi-level cohort activities, class projects, guest speakers, field trips, and expanded language development and application in speaking, listening, reading, and writing.

Program Outcomes

We are now using the Career and College Readiness Standards from the National Reporting System. When students are ready to leave our program in level 6, they can do the following:

In Reading

- Cite evidence from the text to analyze and draw inferences

- Summarize

- Use context to determine meaning

- Analyze how texts are organized

- Determine points of view

- Understand graphs, charts, diagrams, maps

- Delineate and evaluate arguments

- Compare and contrast texts

- Be familiar with affixes and roots

- Understand similes and metaphors

In Writing

Produce clear and coherent writing in which the development, organization, and style are appropriate to the task and audience

Write to inform, explain, examine and convey ideas

Write arguments with reasons and evidence

Write narratives

Introduce and develop a topic

Create cohesion and clarify relationships between ideas

Revise, edit, rewrite

Do short research project drawing on several cited sources

In Speaking & Listening

Actively participate in conversations

Analyze arguments

Build on the ideas of others

Express opinions clearly and persuasively

Work in groups to discuss, pose, and answer questions

Contribute relevant comments and observations

Evaluate soundness of speakers' reasoning and sufficiency of evidence

Adapt speech to formal/informal circumstances

Give clear, effective presentations integrating multi-media

By the time you leave level 6, you should have control over these parts of grammar: punctuation, present, past, future, continuous, present perfect, past perfect, modals, gerunds, infinitives, questions and negative statements, pronouns and prepositions, active and passive voice
compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 36 - ELL Writing Support Level 3

Credits: 1-5

For current students in ELL 3, 30, 31 or 38 who want to improve their writing skills, and especially for students who have stronger speaking/listening skills than reading/writing skills for their level. This is a pass/no credit course.

Enrollment Requirement: ELL 20, 21 or 28; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

Write opinion pieces on topics or texts, supporting a point of view with reasons and information.

- a. Introduce a topic or text clearly, state an opinion, and create an organizational structure in which ideas are logically grouped to support the writer's purpose.
- b. Provide logically ordered reasons that are supported by facts and details.
- c. Link opinion and reasons using words, phrases, and clauses (e.g., consequently, specifically).
- d. Provide a concluding statement or section related to the opinion presented.

Write informative/explanatory texts to examine a topic and convey ideas and information clearly.

- a. Introduce a topic clearly and group related information in paragraphs and sections; include formatting (e.g., headings), illustrations, and multimedia when useful to aiding comprehension.
- b. Develop the topic with facts, definitions, concrete details, quotations, or other information and examples related to the topic.
- c. Link ideas within categories of information using words and phrases (e.g., another, for example, also, because).
- d. Use precise language and domain-specific vocabulary to inform about or explain the topic.
- e. Provide a concluding statement or section related to the information or explanation presented.

Write narratives in which they recount a well-elaborated event or short sequence of events, include details to describe actions, thoughts, and feelings, use temporal words to signal event order, and provide a sense of closure.

Produce clear and coherent writing in which the development and organization are appropriate to task, purpose, and audience.

With guidance and support from peers and others, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach.

(Editing for conventions should demonstrate command of Language standards 1-3 at this level.)

With some guidance and support, use technology, including the Internet, to produce and publish writing as well as to interact and collaborate with others; demonstrate sufficient command of keyboarding skills to type a minimum of one page in a single sitting.

Conduct short research projects that use several sources to build knowledge through investigation of different aspects of a topic.

Recall relevant information from experiences or gather relevant information from print and digital sources; summarize or paraphrase information in notes and finished work and provide a list of sources.

Draw evidence from literary or informational texts to support analysis, reflection, and research.

- a. Apply Reading standards from this level to literature (e.g., "Refer to details and examples in a text when explaining what the text says explicitly and when drawing inferences from the text").
- b. Apply Reading standards from this level to informational text (e.g., "Explain how an author uses reasons and evidence to support particular points in a text, identifying which reasons and evidence support which point(s)")

*The outcomes will be adjusted in depth and intensity depending on the credits for which the classes are offered. More intensity and depth can include multi-level cohort activities, class projects, guest speakers, field trips, and expanded language development and application in speaking, listening, reading, and writing.

Program Outcomes

We are now using the Career and College Readiness Standards from the National Reporting System. When students are ready to leave our program in level 6, they can do the following:

In Reading

Cite evidence from the text to analyze and draw inferences

Summarize

Use context to determine meaning

Write to inform, explain, examine and convey ideas

Write arguments with reasons and evidence

Write narratives

Introduce and develop a topic

Create cohesion and clarify relationships between ideas

Revise, edit, rewrite

Do short research project drawing on several cited sources

In Speaking & Listening

Actively participate in conversations

Analyze arguments

Build on the ideas of others

Express opinions clearly and persuasively

Work in groups to discuss, pose, and answer questions

Contribute relevant comments and observations

Evaluate soundness of speakers' reasoning and sufficiency of evidence

Adapt speech to formal/informal circumstances

Give clear, effective presentations integrating multi-media

By the time you leave level 6, you should have control over these parts of grammar: punctuation, present, past, future, continuous, present perfect, past perfect, modals, gerunds, infinitives, questions and negative statements, pronouns and prepositions, active and passive voice
compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 37 - ELL Technology Support Level 3

Credits: 1-5

Provides ELL 3, 30, 38 students with opportunities to learn, improve, and use English through technology. Students will discover new ways to enhance their language-learning skills, which will add to their overall success in other ELL classes and beyond. This is a pass/no credit course.

Enrollment Requirement: ELL 2, 20, 21 or 28; and placement test; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

Independently accomplish and/or collaborate to complete English language-learning activities and project-based assignments through technology.

Know the major parts of a computer and express an understanding of their basic functions.

Use keys and functions common to most programs, such as save, open, delete, and close.

Use the Internet, Canvas, email, and programs such as Microsoft Word and PowerPoint.

*The outcomes will be adjusted in depth and intensity depending on the credits for which the classes are offered. More intensity and depth can include multi-level cohort activities, class projects, guest speakers, field trips, and expanded language development and application in speaking, listening, reading, and writing.

Program Outcomes

By the time you leave level 6, you should have control over these parts of grammar: punctuation, present, past, future, continuous, present perfect, past perfect, modals, gerunds, infinitives, questions and negative statements, pronouns and prepositions, active and passive voice
compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 38 - English Language Learning Pathways to Work L3

Credits: 1-15

Provides an introduction for students interested in entering the workforce or participating in an I-BEST. Gives students the necessary information to research a career or choose an I-BEST program. Teaches the students study skills, employability skills, and improves reading, writing, listening, and speaking skills. This is a pass/no credit course.

Enrollment Requirement: ELL 2, 20, 21, 22, 28; placement test; and instructor consent.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

Reading: Students will ask and answer questions about key details in a text related to workplace as well as identify the main topic and retell those key details. With a lot of support, they will describe the connection between two events, ideas, or pieces of information in a text. They will ask and answer questions to help determine or clarify the meaning of words and phrases in a text. They will use various text features, illustrations and details to locate and describe key facts or information in a text.

Writing: Students, with a lot of support and scaffolding, will write informative/explanatory texts in which they name a topic related to workplace, supply some facts about the topic, and provide some sense of closure. They will also write short narratives in which they include some details about their work

history, education and future goals, and they will use a variety of digital tools to produce and publish writing, including in collaboration with peers.

Speaking and Listening: Students will ask and answer questions in order to seek help, get information, or clarify something that is not understood. They will describe people, places, things, and events related to workplace with relevant details, expressing ideas and feelings clearly. They will speak audibly and express thoughts, feelings, and ideas with increasing clarity. Students will follow oral directions and ask for clarification.

Employability skills: Students will use self-awareness and workplace skills to make decisions, work in teams, problem solve and present information.

Technology and Math Skills: Students will use Microsoft Word and PowerPoint to compose and edit a document and create a presentation with some assistance. Students will learn how to use the internet to research a topic. Students will learn the meaning of math symbols and use addition, subtraction, multiplication, division, and measurement.

Program Outcomes

We are now using the Career and College Readiness Standards from the National Reporting System. When students are ready to leave our program in level 6, they can do the following:

In Reading

Cite evidence from the text to analyze and draw inferences

Summarize

Use context to determine meaning

Analyze how texts are organized

Determine points of view

Understand graphs, charts, diagrams, maps

Delineate and evaluate arguments

Compare and contrast texts

Be familiar with affixes and roots

Understand similes and metaphors

In Writing

Produce clear and coherent writing in which the development, organization, and style are appropriate to the task and audience

Write to inform, explain, examine and convey ideas

Write arguments with reasons and evidence

Write narratives

Introduce and develop a topic

Create cohesion and clarify relationships between ideas

Revise, edit, rewrite

Do short research project drawing on several cited sources

In Speaking & Listening

Actively participate in conversations

Analyze arguments
Build on the ideas of others
Express opinions clearly and persuasively
Work in groups to discuss, pose, and answer questions
Contribute relevant comments and observations
Evaluate soundness of speakers' reasoning and sufficiency of evidence
Adapt speech to formal/informal circumstances
Give clear, effective presentations integrating multi-media

By the time you leave level 6, you should have control over these parts of grammar:
punctuation, present, past, future, continuous, present perfect, past perfect, modals,
gerunds, infinitives, questions and negative statements, pronouns and prepositions,
active and passive voice
compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 39 - ELL Summer Institute Cmty Exploration Level 3

Credits: 2

This is a multi-level class offered every summer quarter. Students will explore and become familiar with their community through field trips, volunteer experiences, and other hands-on project-based learning. Students will use and strengthen their communicative language skills through authentic English immersion. Students will have the opportunity to explore the campus at large and off-campus sites. This is a pass/no credit course.

Enrollment Requirement: ELL 2, 20, 21, 22 or 28; and placement test; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

Participate in a shared project.

With guidance and support, recall information from experiences or gather information from provided sources to answer a question.

Participate in collaborative conversations with diverse partners in small and larger groups.

Follow agreed-upon rules for discussions (e.g., listening to others with care, speaking one at a time about the topics and texts under discussion, and gaining the floor in respectful ways).

Build on others' talk in conversations by responding to the comments of others through multiple exchanges.

Ask and answer questions in order to seek help, get information, or clarify something that is not understood.

Ask questions to check understanding of information presented and stay on topic.

Explain their own ideas and understanding in light of the discussion.

Describe people, places, things, and events with relevant details.

Speak audibly and start to express thoughts, feelings, and ideas clearly.

Program Outcomes

We are now using the Career and College Readiness Standards from the National Reporting System. When students are ready to leave our program in level 6, they can do the following:

In Reading

Cite evidence from the text to analyze and draw inferences

Summarize

Use context to determine meaning

Analyze how texts are organized

Determine points of view

By the time you leave level 6, you should have control over these parts of grammar: punctuation, present, past, future, continuous, present perfect, past perfect, modals, gerunds, infinitives, questions and negative statements, pronouns and prepositions, active and passive voice
compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

ELL 40 - English Language Learning Level 4

Credits: 1-15

Intermediate level of ELL. Students prepare for academic or work readiness with contextualized study of content. Students work on all language skills plus information literacy, tech skills, and project-based learning. This is a pass/no credit course.

Enrollment Requirement: ELL 3, 30, 31 or 38; and placement test; and instructor consent.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Ask and answer such questions as who, what, where, when, why, and how to demonstrate understanding of key details in a text.
- Determine the main idea of a text; recount the key details and explain how they support the main idea.
- Describe the relationship between a series of historical events, scientific ideas or concepts, or steps in technical procedures in a text, using language that pertains to time, sequence, and cause/effect.
- Determine the meaning of general academic and domain-specific words and phrases in a text relevant to a topic or subject area.

Know and use various text features to locate key facts or information in a text efficiently.

Use text features and search tools to locate information relevant to a given topic efficiently.

Identify the main purpose of a text, including what the author wants to answer, explain, or describe.

Distinguish their own point of view from that of the author of a text.

Use information gained from illustrations and the words in a text to demonstrate understanding of the text.

Describe how reasons support specific points the author makes in a text.

Write opinion pieces on topics or texts, supporting a point of view with reasons.

- a. Introduce the topic or text they are writing about, state an opinion, and create an organizational structure that lists reasons.
- b. Provide reasons that support the opinion.
- c. Use linking words and phrases to connect opinion and reasons.
- d. Provide a concluding statement or section.

Write informative/explanatory texts to examine a topic and convey ideas and information clearly.

- a. Introduce a topic and group related information together; include illustrations when useful to aiding comprehension.
- b. Develop the topic with facts, definitions, and details.
- c. Use linking words and phrases to connect ideas within categories of information.
- d. Provide a concluding statement or section.

Write narratives in which they recount a well-elaborated event or short sequence of events, include details to describe actions, thoughts, and feelings, use temporal words to signal event order, and provide a sense of closure.

Produce writing in which the development and organization are appropriate to task and purpose.

With guidance and support from peers and others, develop and strengthen writing as needed by planning, revising, and editing.

With guidance and support, use technology to produce and publish writing as well as to interact and collaborate with others.

Speak more fluently with increased vocabulary and improved pronunciation, intonation and word stress.

Know the differences between formal and informal speech.

Use your conversational skills to actively participate in class, other classes and outside of class at work, home, and within the community.

Enhance your active listening skills.

Improve your ability to manage conversations, recognize when listeners don't understand and be able to provide clarification, have a positive attitude toward speaking and an increased confidence in speaking, as well as be self-motivated, independent learners.

*The outcomes will be adjusted in depth and intensity depending on the credits for which the classes are offered. More intensity and depth can include multi-level cohort activities, class projects, guest speakers, field trips, and expanded language development and application in speaking, listening, reading, and writing.

Program Outcomes

We are now using the Career and College Readiness Standards from the National Reporting System. When students are ready to leave our program in level 6, they can do the following:

In Reading

Cite evidence from the text to analyze and draw inferences

Summarize

Use context to determine meaning

Analyze how texts are organized

Determine points of view

Understand graphs, charts, diagrams, maps

Delineate and evaluate arguments

Compare and contrast texts

Be familiar with affixes and roots

Understand similes and metaphors

In Writing

Produce clear and coherent writing in which the development, organization, and style are appropriate to the task and audience

Write to inform, explain, examine and convey ideas

Write arguments with reasons and evidence

Write narratives

Introduce and develop a topic

Create cohesion and clarify relationships between ideas

Revise, edit, rewrite

Do short research project drawing on several cited sources

In Speaking & Listening

Actively participate in conversations

Analyze arguments

Build on the ideas of others

Express opinions clearly and persuasively

Work in groups to discuss, pose, and answer questions

Contribute relevant comments and observations

Evaluate soundness of speakers' reasoning and sufficiency of evidence

Adapt speech to formal/informal circumstances

Give clear, effective presentations integrating multi-media

By the time you leave level 6, you should have control over these parts of grammar: punctuation, present, past, future, continuous, present perfect, past perfect, modals,

gerunds, infinitives, questions and negative statements, pronouns and prepositions, active and passive voice
compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 41 - English Language Learning Intensive Writing L4

Credits: 1-15

Intermediate level of ELL for students who are permanent residents of Washington state. This class is intended for students who have much stronger speaking/listening skills than reading/writing skills for their level. It is for students who want to improve their writing skills. This is a pass/no credit course.

Enrollment Requirement: ELL 3, 30, 31 or 38; and placement test; and instructor consent.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Ask and answer such questions as who, what, where, when, why, and how to demonstrate understanding of key details in a text.
- Determine the main idea of a text; recount the key details and explain how they support the main idea.
- Describe the relationship between a series of historical events, scientific ideas or concepts, or steps in technical procedures in a text, using language that pertains to time, sequence, and cause/effect.
- Determine the meaning of general academic and domain-specific words and phrases in a text relevant to a topic or subject area.
- Know and use various text features to locate key facts or information in a text efficiently.
- Use text features and search tools to locate information relevant to a given topic efficiently.
- Identify the main purpose of a text, including what the author wants to answer, explain, or describe.

Distinguish their own point of view from that of the author of a text.

Use information gained from illustrations and the words in a text to demonstrate understanding of the text.

Explain how specific aspects of a text's illustrations contribute to what is conveyed by the words in a story.

Describe how reasons support specific points the author makes in a text.

Compare and contrast the most important points and key details presented in two texts on the same topic.

Write opinion pieces on topics or texts, supporting a point of view with reasons.

- a. Introduce the topic or text they are writing about, state an opinion, and create an organizational structure that lists reasons.
- b. Provide reasons that support the opinion.
- c. Use linking words and phrases to connect opinion and reasons.
- d. Provide a concluding statement or section.

Write informative/explanatory texts to examine a topic and convey ideas and information clearly.

- a. Introduce a topic and group related information together; include illustrations when useful to aiding comprehension.
- b. Develop the topic with facts, definitions, and details.
- c. Use linking words and phrases to connect ideas within categories of information.
- d. Provide a concluding statement or section.

Write narratives in which they recount a well-elaborated event or short sequence of events, include details to describe actions, thoughts, and feelings, use temporal words to signal event order, and provide a sense of closure.

Produce writing in which the development and organization are appropriate to task and purpose.

With guidance and support from peers and others, develop and strengthen writing as needed by planning, revising, and editing.

With guidance and support, use technology to produce and publish writing as well as to interact and collaborate with others.

Conduct short research projects that build knowledge about a topic.

Recall information from experiences or gather information from print and digital sources; take brief notes on sources and sort evidence into provided categories.

*The outcomes will be adjusted in depth and intensity depending on the credits for which the classes are offered. More intensity and depth can include multi-level cohort activities, class projects, guest speakers, field trips, and expanded language development and application in speaking, listening, reading, and writing.

Program Outcomes

Compare and contrast texts

Be familiar with affixes and roots

Understand similes and metaphors

In Writing

Produce clear and coherent writing in which the development, organization, and style are appropriate to the task and audience

Write to inform, explain, examine and convey ideas

Write arguments with reasons and evidence

Write narratives

Introduce and develop a topic

Create cohesion and clarify relationships between ideas

Revise, edit, rewrite

Do short research project drawing on several cited sources

In Speaking & Listening

Actively participate in conversations

Analyze arguments

Build on the ideas of others

Express opinions clearly and persuasively

Work in groups to discuss, pose, and answer questions

Contribute relevant comments and observations

Evaluate soundness of speakers' reasoning and sufficiency of evidence

Adapt speech to formal/informal circumstances

Give clear, effective presentations integrating multi-media

By the time you leave level 6, you should have control over these parts of grammar:

punctuation, present, past, future, continuous, present perfect, past perfect, modals,

gerunds, infinitives, questions and negative statements, pronouns and prepositions,

active and passive voice

compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those

responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 42 - ELL Summer Institute Conversation Level 4

Credits: 5

Provides intermediate ELL students with conversation and pronunciation language practice. This is a pass/no credit course.

Enrollment Requirement: ELL 3, 30, 31 or 38; and placement test; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Speak more fluently with increased vocabulary and improved pronunciation, intonation and word stress.
- Know the differences between formal and informal speech.
- Use your conversational skills to actively participate in class, other classes and outside of class at work, home, and within the community.
- Enhance your active listening skills.
- Improve your ability to manage conversations, recognize when listeners don't understand and be able to provide clarification, have a positive attitude toward speaking and an increased confidence in speaking, as well as be self-motivated, independent learners.

Program Outcomes

Produce clear and coherent writing in which the development, organization, and style are appropriate to the task and audience

Write to inform, explain, examine and convey ideas

Write arguments with reasons and evidence

Write narratives

Introduce and develop a topic

Create cohesion and clarify relationships between ideas

Revise, edit, rewrite

Do short research project drawing on several cited sources

In Speaking & Listening

Actively participate in conversations

Analyze arguments

Build on the ideas of others

Express opinions clearly and persuasively

Work in groups to discuss, pose, and answer questions

Contribute relevant comments and observations

Evaluate soundness of speakers' reasoning and sufficiency of evidence

Adapt speech to formal/informal circumstances

Give clear, effective presentations integrating multi-media

By the time you leave level 6, you should have control over these parts of grammar: punctuation, present, past, future, continuous, present perfect, past perfect, modals, gerunds, infinitives, questions and negative statements, pronouns and prepositions, active and passive voice
compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

ELL 43 - ELL Summer Institute Writing Level 4

Credits: 5

Intermediate ELL students who want to focus on their fluency and accuracy in writing through project-based learning. This is a pass/no credit course.

Enrollment Requirement: ELL 3, 30, 31 or 38; and placement test; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Write with increased fluency.
- Use feedback to rewrite.
- Edit your own writing.
- Use correct spelling and punctuation.
- Control verb tenses, subject-verb agreement, word order, pronouns.
- Use details.
- Understand the function of an introduction, a conclusion, and an organizing principle in your writing of a narrative essay.
- Have a positive attitude toward writing and increased confidence in your writing.
- Be a self-motivated, independent learner.
- Use writing as a tool for critical thinking.
- Use written English to explore what you have to say.

Program Outcomes

We are now using the Career and College Readiness Standards from the National Reporting System. When students are ready to leave our program, they can do the following:

In Reading

- Cite evidence from the text to analyze and draw inferences
- Summarize
- Use context to determine meaning
- Analyze how texts are organized
- Determine points of view
- Understand graphs, charts, diagrams, maps
- Delineate and evaluate arguments
- Compare and contrast texts
- Be familiar with affixes and roots
- Understand similes and metaphors

In Writing

- Produce clear and coherent writing in which the development, organization, and style are appropriate to the task and audience
- Write to inform, explain, examine and convey ideas
- Write arguments with reasons and evidence
- Write narratives
- Introduce and develop a topic
- Create cohesion and clarify relationships between ideas
- Revise, edit, rewrite
- Do short research project drawing on several cited sources

In Speaking & Listening

- Actively participate in conversations

Analyze arguments
Build on the ideas of others
Express opinions clearly and persuasively
Work in groups to discuss, pose, and answer questions
Contribute relevant comments and observations
Evaluate soundness of speakers' reasoning and sufficiency of evidence
Adapt speech to formal/informal circumstances
Give clear, effective presentations integrating multi-media

By the time you leave level 6, you should have control over these parts of grammar:
punctuation, present, past, future, continuous, present perfect, past perfect,
modals, gerunds, infinitives, questions and negative statements , pronouns and
prepositions , active and passive voice
compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 44 - ELL Conversation Support Level 4

Credits: 1-10

Provides additional support for current students in ELL 40 and 48 who need to improve their conversational skills. This is a pass/no credit course.

Enrollment Requirement: ELL 3, 30, 31 or 38; and placement test; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

Speak more fluently with increased vocabulary and improved pronunciation, intonation and word stress.
Know the differences between formal and informal speech.
Use your conversational skills to actively participate in class, other classes and outside of class at work, home, and within the community.
Enhance your active listening skills.
Improve your ability to manage conversations, recognize when listeners don't understand and be able to provide clarification, have a positive attitude toward

speaking and an increased confidence in speaking, as well as be self-motivated, independent learners.

*The outcomes will be adjusted in depth and intensity depending on the credits for which the classes are offered. More intensity and depth can include multi-level cohort activities, class projects, guest speakers, field trips, and expanded language development and application in speaking, listening, reading, and writing.

Program Outcomes

We are now using the Career and College Readiness Standards from the National Reporting System. When students are ready to leave our program in level 6, they can do the following:

In Reading

Cite evidence from the text to analyze and draw inferences

Summarize

Use context to determine meaning

Analyze how texts are organized

Determine points of view

Understand graphs, charts, diagrams, maps

Delineate and evaluate arguments

Compare and contrast texts

Be familiar with affixes and roots

Understand similes and metaphors

In Writing

Produce clear and coherent writing in which the development, organization, and style are appropriate to the task and audience

Write to inform, explain, examine and convey ideas

Write arguments with reasons and evidence

Write narratives

Introduce and develop a topic

Create cohesion and clarify relationships between ideas

Revise, edit, rewrite

Do short research project drawing on several cited sources

In Speaking & Listening

Actively participate in conversations

Analyze arguments

Build on the ideas of others

Express opinions clearly and persuasively

Work in groups to discuss, pose, and answer questions

Contribute relevant comments and observations

Evaluate soundness of speakers' reasoning and sufficiency of evidence

Adapt speech to formal/informal circumstances

Give clear, effective presentations integrating multi-media

By the time you leave level 6, you should have control over these parts of grammar: punctuation, present, past, future, continuous, present perfect, past perfect, modals, gerunds, infinitives, questions and negative statements, pronouns and prepositions, active and passive voice compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 45 - ELL Pronunciation Support Level 4

Credits: 1-5

Provides additional support for current students in ELL 40 who need to improve their pronunciation skills. This is a pass/no credit course.

Enrollment Requirement: ELL 3, 30, 31 or 38; and placement test; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

Recognize and improve articulation of English segmentals (vowels and consonants).

Recognize and improve production of English suprasegmentals (stress, rhythm, intonation, reductions) at the word, phrase and sentence level.

Identify and self-monitor key points of interference between students' first language and American English.

Effectively use online resources and phonemic alphabets to verify correct pronunciation.

Become aware of differences between spelling and pronunciation in American English.

*The outcomes will be adjusted in depth and intensity depending on the credits for which the classes are offered. More intensity and depth can include multi-level cohort activities, class projects, guest speakers, field trips, and expanded language development and application in speaking, listening, reading, and writing.

Program Outcomes

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is

designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

ELL 46 - ELL Writing Support Level 4

Credits: 1-5

For current students in ELL 40 who want to improve their writing skills, and especially for students who have stronger speaking/listening skills than reading/writing skills for their level. This is a pass/no credit course.

Enrollment Requirement: ELL 3, 30, 31, 38; placement test; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Write with increased fluency.
- Use feedback to rewrite.
- Edit their own writing.
- Use correct spelling and punctuation.
- Control verb tenses, subject-verb agreement, word order, pronouns.
- Use details.
- Understand the function of an introduction, a conclusion, an organizing principle in their writing of a narrative essay.
- Have a positive attitude toward writing and increased confidence in their writing.
- Be self-motivated, independent learners.
- Use writing as a tool for critical thinking.

*The outcomes will be adjusted in depth and intensity depending on the credits for which the classes are offered. More intensity and depth can include multi-level cohort activities, class projects, guest speakers, field trips, and expanded language development and application in speaking, listening, reading, and writing.

compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 47 - ELL Technology Support Level 4

Credits: 1-5

Provides ELL 40, 41 and 48 students with opportunities to learn, improve, and use

English through technology. Students will discover new ways to enhance their language-learning skills, which will add to their overall success in other ELL classes and beyond. This is a pass/no credit course.

Enrollment Requirement: ELL 3, 30, 31 or 38; and placement test; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Independently accomplish and/or collaborate to complete English language-learning activities and project-based assignments through technology.

- Know the major parts of a computer and express an understanding of their basic functions.

- Use technology vocabulary appropriately and effectively.

- Use keys and functions common to most programs, such as save, open, delete, and close.

- Gain access and learn how to use resources, such as spell check, thesaurus, and dictionaries.

- Increase ability in using a variety of other forms of technology, such as a digital camera, scanner, etc.

- Use the Internet, Canvas, online databases, email, and programs such as Microsoft Word and PowerPoint.

*The outcomes will be adjusted in depth and intensity depending on the credits for which the classes are offered. More intensity and depth can include multi-level cohort activities, class projects, guest speakers, field trips, and expanded language development and application in speaking, listening, reading, and writing.

Program Outcomes

This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

ELL 48 - English Language Learning Pathways to Work L4

Credits: 1-15

Provides an introduction for students interested in participating in an I-BEST. Allows students to learn about each I-BEST program and its' requirements. Gives students the necessary information to choose a program, while teaching the students study skills, employability skills, and improve their English in reading, writing, listening, and speaking. This is a pass/no credit course.

Enrollment Requirement: ELL 3, 30, 31 or 38; and placement test; and instructor

consent.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

Reading: Students will ask and answer questions about key details in a text related to the workplace as well as identify the main topic and retell those key details. With a lot of support, they will describe the connection between two events, ideas, or pieces of information in a text. They will ask and answer questions to help determine or clarify the meaning of words and phrases in a text. They will use various text features, illustrations and details to locate and describe key facts or information in a text.

Writing: Students, with a lot of support and scaffolding, will write informative/explanatory texts in which they name a topic related to the workplace, supply some facts about the topic, and provide some sense of closure. They will also write short narratives in which they include some details about their work history, education and future goals, and they will use a variety of digital tools to produce and publish writing, including in collaboration with peers.

Speaking and Listening: Students will ask and answer questions in order to seek help, get information, or clarify something that is not understood. They will describe people, places, things, and events related to the workplace with relevant details, expressing ideas and feelings clearly. They will speak audibly and express thoughts, feelings, and ideas with increasing clarity. Students will follow oral directions and ask for clarification.

Employability skills: Students will use self-awareness and workplace skills to make decisions, work in teams, problem solve and present information.

Technology and Math Skills: Students will use Microsoft Word and PowerPoint to compose and edit a document and create a presentation. Students will learn how to use the internet to research a topic. Students will learn the meaning of math symbols and use addition, subtraction, multiplication, division, and measurement.

Program Outcomes

In Reading

- Cite evidence from the text to analyze and draw inferences
- Summarize
- Use context to determine meaning
- Analyze how texts are organized
- Determine points of view
- Understand graphs, charts, diagrams, maps
- Delineate and evaluate arguments
- Compare and contrast texts

- Be familiar with affixes and roots
- Understand similes and metaphors

In Writing

- Produce clear and coherent writing in which the development, organization, and style are appropriate to the task and audience
- Write to inform, explain, examine and convey ideas
- Write arguments with reasons and evidence
- Write narratives
- Introduce and develop a topic
- Create cohesion and clarify relationships between ideas
- Revise, edit, rewrite
- Do short research project drawing on several cited sources

In Speaking & Listening

- Actively participate in conversations
- Analyze arguments
- Build on the ideas of others
- Express opinions clearly and persuasively
- Work in groups to discuss, pose, and answer questions
- Contribute relevant comments and observations
- Evaluate soundness of speakers' reasoning and sufficiency of evidence
- Adapt speech to formal/informal circumstances
- Give clear, effective presentations integrating multi-media

By the time you leave level 6, you should have control over these parts of grammar: punctuation, present, past, future, continuous, present perfect, past perfect, modals, gerunds, infinitives, questions and negative statements, pronouns and prepositions, active and passive voice compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 49 - ELL Summer Institute Cmty Exploration Level 4

Credits: 2

This is a multi-level class offered every summer quarter. Students will explore and become familiar with their community through field trips, volunteer experiences, and

other hands-on project-based learning. Students will use and strengthen their communicative language skills through authentic English immersion. Students will have the opportunity to explore the campus at large and off-campus sites. This is a pass/no credit course.

Enrollment Requirement: ELL 3, 30, 31 or 38; and placement test; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Speak more fluently with increased vocabulary and improved pronunciation, intonation and word stress.
- Know the differences between formal and informal speech.
- Use your conversational skills to actively participate in class, other classes and outside of class at work, home, and within the community.
- Enhance your active listening skills.
- Improve your ability to manage conversations, recognize when listeners don't understand and be able to provide clarification, have a positive attitude toward speaking and an increased confidence in speaking, as well as be self-motivated, independent learners.

Program Outcomes

- Produce clear and coherent writing in which the development, organization, and style are appropriate to the task and audience
- Write to inform, explain, examine and convey ideas
- Write arguments with reasons and evidence
- Write narratives
- Introduce and develop a topic

Create cohesion and clarify relationships between ideas
Revise, edit, rewrite
Do short research project drawing on several cited sources

In Speaking & Listening

Actively participate in conversations

Analyze arguments

Build on the ideas of others

Express opinions clearly and persuasively

Work in groups to discuss, pose, and answer questions

Contribute relevant comments and observations

Evaluate soundness of speakers' reasoning and sufficiency of evidence

Adapt speech to formal/informal circumstances

Give clear, effective presentations integrating multi-media

By the time you leave level 6, you should have control over these parts of grammar:
punctuation, present, past, future, continuous, present perfect, past perfect, modals,
gerunds, infinitives, questions and negative statements, pronouns and prepositions,
active and passive voice
compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

ELL 50 - English Language Learning Level 5

Credits: 1-15

High-Intermediate level of ELL. Students prepare for academic or work readiness with contextualized study of content. Students work on all language skills plus information literacy, tech skills, and project-based learning. This is a pass/no credit course.

Enrollment Requirement: ELL 40, 41 or 48; and placement test; and instructor consent.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

In Reading

a. Cite several pieces of textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.

- b. Determine a theme or central idea of a text and how it is conveyed through particular details; provide a summary of the text distinct from personal opinions or judgments.
- c. Analyze how a text makes connections among and distinctions between individuals, ideas, or events (e.g., through comparisons, analogies, or categories).
- d. Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings; analyze the impact of a specific word choice on meaning and tone.
- e. Analyze how a particular sentence, paragraph, chapter, or section fits into the overall structure of a text and contributes to the development of the ideas.
- f. Integrate information presented in different media or formats (e.g., in charts, graphs, photographs, videos, or maps) as well as in words to develop a coherent understanding of a topic or issue.

In Writing

- a. Write arguments to support claims with clear reasons and relevant evidence.
- b. Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
- c. With some guidance and support from peers and others, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
- d. Use technology, including the Internet, to produce and publish writing and link to and cite sources as well as to interact and collaborate with others, including linking to and citing sources.
- e. Conduct short research projects to answer a question, drawing on several sources and generating additional related, focused questions for further research and investigation.
- f. Draw evidence from literary or informational texts to support analysis, reflection, and research.
- g. Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing.
- h. Demonstrate command of the conventions of standard English grammar and usage when writing.

In Speaking and Listening

- a. Engage effectively in a range of collaborative discussions (one on-one, in groups, and teacher led) with diverse partners, building on others' ideas and expressing their own clearly.
- b. Analyze the purpose of information presented in diverse media and formats (e.g., visually, quantitatively, orally) and evaluate the motives (e.g., social, commercial, political) behind its presentation
- c. Integrate multimedia and visual displays into presentations to clarify information, strengthen claims and evidence, and add interest.
- d. Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.

e. Demonstrate command of the conventions of standard English grammar and usage when speaking.

*The outcomes will be adjusted in depth and intensity depending on the credits for which the classes are offered. More intensity and depth can include multi-level cohort activities, class projects, guest speakers, field trips, and expanded language development and application in speaking, listening, reading, and writing.

Program Outcomes

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

ELL 53 - ELL Summer Institute Writing Level 5

Credits: 5

High-intermediate ELL students who want to focus on their fluency and accuracy in writing through project-based learning. This is a pass/no credit course.

Enrollment Requirement: ELL 40, 41 or 48; and placement test; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Write with increased fluency.

- Use feedback to rewrite.

- Edit your own writing.

- Use correct spelling and punctuation.

- Control verb tenses, subject-verb agreement, word order, pronouns.

- Use details.

- Understand the function of an introduction, a conclusion, and an organizing principle in your writing of a narrative essay.

- Have a positive attitude toward writing and increased confidence in your writing.

- Be a self-motivated, independent learner.

- Use writing as a tool for critical thinking.

- Use written English to explore what you have to say.

Program Outcomes

We are now using the Career and College Readiness Standards from the National Reporting System. When students are ready to leave our program, they can do the following:

In Reading

- Cite evidence from the text to analyze and draw inferences

- Summarize

- Use context to determine meaning

- Analyze how texts are organized

- Determine points of view

- Understand graphs, charts, diagrams, maps

- Delineate and evaluate arguments

- Compare and contrast texts

- Be familiar with affixes and roots

- Understand similes and metaphors

In Writing

- Produce clear and coherent writing in which the development, organization, and style are appropriate to the task and audience

- Write to inform, explain, examine and convey ideas

- Write arguments with reasons and evidence

- Write narratives

Introduce and develop a topic
Create cohesion and clarify relationships between ideas
Revise, edit, rewrite
Do short research project drawing on several cited sources

In Speaking & Listening

compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 55 - ELL Pronunciation Support Level 5

Credits: 1-5

Provides additional support for current students in ELL 50 who need to improve their pronunciation skills. This is a pass/no credit course.

Enrollment Requirement: ELL 40, 41 or 48; and placement test; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

Recognize and improve articulation of English segmentals (vowels and consonants).

Recognize and improve production of English suprasegmentals (stress, rhythm, intonation, reductions) at the word, phrase and sentence level.

Identify and self-monitor key points of interference between students' first language and American English.

Effectively use online resources and phonemic alphabets to verify correct pronunciation.

Become aware of differences between spelling and pronunciation in American English.

*The outcomes will be adjusted in depth and intensity depending on the credits for which the classes are offered. More intensity and depth can include multi-level cohort activities, class projects, guest speakers, field trips, and expanded language development and application in speaking, listening, reading, and writing.

Program Outcomes

We are now using the Career and College Readiness Standards from the National Reporting System. When students are ready to leave our program, they can do the following:

In Reading

Cite evidence from the text to analyze and draw inferences

Summarize

Use context to determine meaning

Analyze how texts are organized

Determine points of view

Understand graphs, charts, diagrams, maps

Delineate and evaluate arguments

Compare and contrast texts

Be familiar with affixes and roots

Understand similes and metaphors

In Writing

Produce clear and coherent writing in which the development, organization, and style are appropriate to the task and audience

Write to inform, explain, examine and convey ideas

Write arguments with reasons and evidence

Write narratives

Introduce and develop a topic

Create cohesion and clarify relationships between ideas

Revise, edit, rewrite

Do short research project drawing on several cited sources

In Speaking & Listening

Actively participate in conversations

Analyze arguments

Build on the ideas of others

Express opinions clearly and persuasively

Work in groups to discuss, pose, and answer questions

Contribute relevant comments and observations

Evaluate soundness of speakers' reasoning and sufficiency of evidence

Adapt speech to formal/informal circumstances

Give clear, effective presentations integrating multi-media

By the time you leave level 6, you should have control over these parts of grammar: punctuation, present, past, future, continuous, present perfect, past perfect, modals, gerunds, infinitives, questions and negative statements, pronouns and prepositions, active and passive voice compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 56 - ELL Writing Support Level 5

Credits: 1-5

For current students in ELL 50 who want to improve their writing skills, and especially for students who have stronger speaking/listening skills than reading/writing skills for their level. This is a pass/no credit course.

Enrollment Requirement: ELL 40, 41 or 48; and placement test; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Write with increased fluency.

- Use feedback to rewrite.

- Edit their own writing.

- Use correct spelling and punctuation.

- Control verb tenses, subject-verb agreement, word order, pronouns.

- Use details.

- Understand the function of an introduction, a conclusion, an organizing principle in their writing of a narrative essay.

- Have a positive attitude toward writing and increased confidence in their writing.

- Be self-motivated, independent learners.

- Use writing as a tool for critical thinking.

*The outcomes will be adjusted in depth and intensity depending on the credits for which the classes are offered. More intensity and depth can include multi-level cohort activities, class projects, guest speakers, field trips, and expanded language development and application in speaking, listening, reading, and writing.

Program Outcomes

We are now using the Career and College Readiness Standards from the National Reporting System. When students are ready to leave our program, they can do the following:

In Reading

Cite evidence from the text to analyze and draw inferences

Summarize

Use context to determine meaning

Analyze how texts are organized

Determine points of view

Understand graphs, charts, diagrams, maps

Delineate and evaluate arguments

Compare and contrast texts

Be familiar with affixes and roots

Understand similes and metaphors

In Writing

Produce clear and coherent writing in which the development, organization, and style are appropriate to the task and audience

Write to inform, explain, examine and convey ideas

Write arguments with reasons and evidence

Write narratives

Introduce and develop a topic

Create cohesion and clarify relationships between ideas

Revise, edit, rewrite

Do short research project drawing on several cited sources

In Speaking & Listening

Actively participate in conversations

Analyze arguments

Build on the ideas of others

Express opinions clearly and persuasively

Work in groups to discuss, pose, and answer questions

Contribute relevant comments and observations

Evaluate soundness of speakers' reasoning and sufficiency of evidence

Adapt speech to formal/informal circumstances

Give clear, effective presentations integrating multi-media

By the time you leave level 6, you should have control over these parts of grammar: punctuation, present, past, future, continuous, present perfect, past perfect, modals, gerunds, infinitives, questions and negative statements, pronouns and prepositions, active and passive voice
compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 57 - ELL Technology Support Level 5

Credits: 1-5

Provides ELL 50 students with opportunities to learn, improve, and use English through technology. Students will discover new ways to enhance their language-learning skills, which will add to their overall success in other ELL classes and beyond. This is a pass/no credit course.

Enrollment Requirement: ELL 40, 41 or 48; and placement test; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Independently accomplish and/or collaborate to complete English language-learning activities and project-based assignments through technology.

- Know the major parts of a computer and express an understanding of their basic functions.

- Use technology vocabulary appropriately and effectively.

- Use keys and functions common to most programs, such as save, open, delete, and close.

- Gain access and learn how to use resources, such as spell check, thesaurus, and dictionaries. Increase ability in using a variety of other forms of technology, such as a digital camera, scanner, etc.

- Use the Internet, Canvas, online databases, email, and programs such as Microsoft Word and PowerPoint.

*The outcomes will be adjusted in depth and intensity depending on the credits for which the classes are offered. More intensity and depth can include multi-level cohort activities, class projects, guest speakers, field trips, and expanded language development and application in speaking, listening, reading, and writing.

Program Outcomes

We are now using the Career and College Readiness Standards from the National Reporting System. When students are ready to leave our program, they can do the following:

In Reading

Cite evidence from the text to analyze and draw inferences

Summarize

Use context to determine meaning

Determine points of view

Understand graphs, charts, diagrams, maps

Delineate and evaluate arguments

Compare and contrast texts

Be familiar with affixes and roots

Understand similes and metaphors

In Writing

Produce clear and coherent writing in which the development, organization, and style are appropriate to the task and audience

Write to inform, explain, examine and convey ideas

Write arguments with reasons and evidence

Write narratives

Introduce and develop a topic

Create cohesion and clarify relationships between ideas

Revise, edit, rewrite

Do short research project drawing on several cited sources

In Speaking & Listening

Actively participate in conversations

Analyze arguments

Build on the ideas of others

Express opinions clearly and persuasively

Work in groups to discuss, pose, and answer questions

Contribute relevant comments and observations

Evaluate soundness of speakers' reasoning and sufficiency of evidence

Adapt speech to formal/informal circumstances

Give clear, effective presentations integrating multi-media

By the time you leave level 6, you should have control over these parts of grammar:

punctuation, present, past, future, continuous, present perfect, past perfect, modals,

gerunds, infinitives, questions and negative statements, pronouns and prepositions,

active and passive voice

compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those

responsibilities which will enable them to work successfully individually and with others.

ELL 59 - ELL Summer Institute Cmty Exploration Level 5

Credits: 2

This is a multi-level class offered every summer quarter. Students will explore and become familiar with their community through field trips, volunteer experiences, and other hands-on project-based learning. Students will use and strengthen their communicative language skills through authentic English immersion. Students will have the opportunity to explore the campus at large and off-campus sites. This is a pass/no credit course.

Enrollment Requirement: ELL 40, 41 or 48; and placement test; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

Engage effectively in a range of collaborative discussions (one on-one, in groups, and teacher led) with diverse partners, building on others' ideas and expressing their own clearly.

Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.

Program Outcomes

We are now using the Career and College Readiness Standards from the National Reporting System. When students are ready to leave our program in level 6, they can do the following:

In Reading

Cite evidence from the text to analyze and draw inferences

Summarize

Use context to determine meaning

Analyze how texts are organized

Determine points of view

Understand graphs, charts, diagrams, maps

Delineate and evaluate arguments

Compare and contrast texts

Be familiar with affixes and roots

Understand similes and metaphors

In Writing

Produce clear and coherent writing in which the development, organization, and style are appropriate to the task and audience

Write to inform, explain, examine and convey ideas

Write arguments with reasons and evidence
Write narratives
Introduce and develop a topic
Create cohesion and clarify relationships between ideas
Revise, edit, rewrite
Do short research project drawing on several cited sources

In Speaking & Listening
Actively participate in conversations
Analyze arguments
Build on the ideas of others
Express opinions clearly and persuasively
Work in groups to discuss, pose, and answer questions
Contribute relevant comments and observations
Evaluate soundness of speakers' reasoning and sufficiency of evidence
Adapt speech to formal/informal circumstances
Give clear, effective presentations integrating multi-media

By the time you leave level 6, you should have control over these parts of grammar:
punctuation, present, past, future, continuous, present perfect, past perfect, modals,
gerunds, infinitives, questions and negative statements, pronouns and prepositions,
active and passive voice
compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

ELL 60 - English Language Learning Level 6

Credits: 1-15

Advanced level of ELL. Students prepare for academic or work readiness with contextualized study of content. Students work on all language skills plus information literacy, tech skills, and project-based learning. This is a pass/no credit course.

Enrollment Requirement: ELL 50; placement test; and instructor consent.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

In Reading

Cite evidence from the text to analyze and draw inferences
Summarize
Use context to determine meaning
Analyze how texts are organized
Determine points of view
Understand graphs, charts, diagrams, maps
Delineate and evaluate arguments
Compare and contrast texts
Be familiar with affixes and roots
Understand similes and metaphors

In Writing

Produce clear and coherent writing in which the development, organization, and style are appropriate to the task and audience
Write to inform, explain, examine and convey ideas
Write arguments with reasons and evidence
Write narratives
Introduce and develop a topic
Create cohesion and clarify relationships between ideas
Revise, edit, rewrite
Do short research project drawing on several cited sources

In Speaking & Listening

Actively participate in conversations
Analyze arguments
Build on the ideas of others
Express opinions clearly and persuasively
Work in groups to discuss, pose, and answer questions
Contribute relevant comments and observations
Evaluate soundness of speakers' reasoning and sufficiency of evidence
Adapt speech to formal/informal circumstances
Give clear, effective presentations integrating multi-media

Grammar:

Punctuation, present, past, future, continuous, present perfect, past perfect, modals, gerunds, infinitives, questions and negative statements, pronouns and prepositions, active and passive voice
Compound and complex sentences

*The outcomes will be adjusted in depth and intensity depending on the credits for which the classes are offered. More intensity and depth can include multi-level cohort activities, class projects, guest speakers, field trips, and expanded language development and application in speaking, listening, reading, and writing.

Program Outcomes

We are now using the Career and College Readiness Standards from the National

Reporting System. When students are ready to leave our program in level 6, they can do the following:

In Reading

Cite evidence from the text to analyze and draw inferences

Summarize

Use context to determine meaning

Analyze how texts are organized

Determine points of view

Understand graphs, charts, diagrams, maps

Delineate and evaluate arguments

Compare and contrast texts

Be familiar with affixes and roots

Produce clear and coherent writing in which the development, organization, and style are appropriate to the task and audience

Write to inform, explain, examine and convey ideas

Write arguments with reasons and evidence

Write narratives

Introduce and develop a topic

Create cohesion and clarify relationships between ideas

Revise, edit, rewrite

Do short research project drawing on several cited sources

In Speaking & Listening

Actively participate in conversations

Analyze arguments

Build on the ideas of others

Express opinions clearly and persuasively

Work in groups to discuss, pose, and answer questions

Contribute relevant comments and observations

Evaluate soundness of speakers' reasoning and sufficiency of evidence

Adapt speech to formal/informal circumstances

Give clear, effective presentations integrating multi-media

By the time you leave level 6, you should have control over these parts of grammar: punctuation, present, past, future, continuous, present perfect, past perfect, modals, gerunds, infinitives, questions and negative statements, pronouns and prepositions, active and passive voice, compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those

responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 62 - ELL Summer Institute Conversation Level 6

Credits: 5

Provides advanced ELL students with conversation and pronunciation language practice. This is a pass/no credit course.

Enrollment Requirement: ELL 50; and placement test; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Speak more fluently with increased vocabulary and improved pronunciation, intonation and word stress.
- Know the differences between formal and informal speech. Use your conversational skills to actively participate in class, other classes and outside of class at work, home, and within the community.
- Enhance your active listening skills. Improve your ability to manage conversations, recognize when listeners don't understand and be able to provide clarification, have a positive attitude toward speaking and an increased confidence in speaking, as well as be self-motivated, independent learners.

Program Outcomes

We are now using the Career and College Readiness Standards from the National Reporting System. When students are ready to leave our program, they can do the following:

In Reading

- Cite evidence from the text to analyze and draw inferences
- Summarize
- Use context to determine meaning
- Analyze how texts are organized
- Determine points of view
- Understand graphs, charts, diagrams, maps
- Delineate and evaluate arguments
- Compare and contrast texts
- Be familiar with affixes and roots
- Understand similes and metaphors

In Writing

- Produce clear and coherent writing in which the development, organization, and style

are appropriate to the task and audience
Write to inform, explain, examine and convey ideas
Write arguments with reasons and evidence
Write narratives
Introduce and develop a topic
Create cohesion and clarify relationships between ideas
Revise, edit, rewrite
Do short research project drawing on several cited sources

In Speaking & Listening
Actively participate in conversations
Analyze arguments
Build on the ideas of others
Express opinions clearly and persuasively
Work in groups to discuss, pose, and answer questions
Contribute relevant comments and observations
Evaluate soundness of speakers' reasoning and sufficiency of evidence
Adapt speech to formal/informal circumstances
Give clear, effective presentations integrating multi-media

compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

ELL 63 - ELL Summer Institute Writing Level 6

Credits: 5

Advanced ELL students who want to focus on their fluency and accuracy in writing through project-based learning. This is a pass/no credit course.

Enrollment Requirement: ELL 50; placement test; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

Write with increased fluency.
Use feedback to rewrite.

Edit your own writing.
Use correct spelling and punctuation.
Control verb tenses, subject-verb agreement, word order, pronouns.
Use details.
Understand the function of an introduction, a conclusion, and an organizing principle in your writing of a narrative essay.
Have a positive attitude toward writing and increased confidence in your writing.
Be a self-motivated, independent learner.
Use writing as a tool for critical thinking.
Use written English to explore what you have to say.

Program Outcomes

We are now using the Career and College Readiness Standards from the National Reporting System. When students are ready to leave our program, they can do the following:

In Reading

Cite evidence from the text to analyze and draw inferences
Summarize
Use context to determine meaning

- Understand similes and metaphors

In Writing

- Produce clear and coherent writing in which the development, organization, and style are appropriate to the task and audience
- Write to inform, explain, examine and convey ideas
- Write arguments with reasons and evidence
- Write narratives
- Introduce and develop a topic
- Create cohesion and clarify relationships between ideas
- Revise, edit, rewrite
- Do short research project drawing on several cited sources

In Speaking & Listening

- Actively participate in conversations
- Analyze arguments
- Build on the ideas of others
- Express opinions clearly and persuasively

Work in groups to discuss, pose, and answer questions
Contribute relevant comments and observations
Evaluate soundness of speakers' reasoning and sufficiency of evidence
Adapt speech to formal/informal circumstances
Give clear, effective presentations integrating multi-media

By the time you leave level 6, you should have control over these parts of grammar: punctuation, present, past, future, continuous, present perfect, past perfect, modals, gerunds, infinitives, questions and negative statements, pronouns and prepositions, active and passive voice, compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

ELL 71 - Reading Support for Level 1

Credits: 1-5

Reading class for beginning ELL students. Students will improve their basic reading skills including letter sound recognition, basic vocabulary, fluency and comprehension. This is a pass/no credit course.

Enrollment Requirement: Placement test and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

Improve phonemic awareness and decoding skills.

Build basic vocabulary.

Read and comprehend learned words in a few simple phrases and basic personal information slowly and with some effort but with few errors, to independently accomplish simple, well defined, and structured reading activities in a few comfortable and familiar settings.

Identify the main topic and retell key details of a text. Ask and answer questions to help determine or clarify the meaning of words and phrases in a text.

Know and use various text features to locate key facts or information in a text. Use the illustrations and details in a text to describe its key ideas.

The outcomes will be adjusted in depth and intensity depending on the credits for which the classes are offered. More intensity and depth can include multi-level cohort activities, class projects, guest speakers, field trips, and expanded language development and application in reading.

Program Outcomes

We are now using the Career and College Readiness Standards from the National Reporting System. When students are ready to leave our program in level 6, they can do the following:

In Reading

Cite evidence from the text to analyze and draw inferences

Summarize

Use context to determine meaning

Analyze how texts are organized

Determine points of view

Understand graphs, charts, diagrams, maps

Delineate and evaluate arguments

Compare and contrast texts

Be familiar with affixes and roots

Understand similes and metaphors

In Writing

Produce clear and coherent writing in which the development, organization, and style are appropriate to the task and audience

Write to inform, explain, examine and convey ideas

Write arguments with reasons and evidence

Write narratives

Introduce and develop a topic

Create cohesion and clarify relationships between ideas

Revise, edit, rewrite

Do short research project drawing on several cited sources

In Speaking & Listening

Actively participate in conversations

Analyze arguments

Build on the ideas of others

Express opinions clearly and persuasively

Work in groups to discuss, pose, and answer questions

Contribute relevant comments and observations

Evaluate soundness of speakers' reasoning and sufficiency of evidence

Adapt speech to formal/informal circumstances

Give clear, effective presentations integrating multi-media

By the time you leave level 6, you should have control over these parts of grammar: punctuation, present, past, future, continuous, present perfect, past perfect, modals, gerunds, infinitives, questions and negative statements, pronouns and prepositions, active and passive voice
compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

ELL 72 - Reading Support for Level 2

Credits: 1-5

Reading class for high-beginning ELL students. Students will improve their basic reading skills including letter sound recognition, basic vocabulary, fluency and comprehension. This is a pass/no credit course.

Enrollment Requirement: ELL 8, 9 or 10; and placement test; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Improve phonemic awareness and decoding skills.

- Build vocabulary.

- Ask and answer questions about key details in a text. Identify the main topic and retell key details of a text. Ask and answer questions to help determine or clarify the meaning of words and phrases in a text.

- Know and use various text features to locate key facts or information in a text. Use the illustrations and details in a text to describe its key ideas.

The outcomes will be adjusted in depth and intensity depending on the credits for which the classes are offered. More intensity and depth can include multi-level cohort activities, class projects, guest speakers, field trips, and expanded language development and application in reading.

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

ELL 76 - ELL Summer Institute Conversation Literacy Level

Credits: 1-10

Provides literacy level ELL students with conversation and pronunciation language practice.

Enrollment Requirement: Placement test and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

Begin to participate in collaborative conversations with diverse partners in small and larger groups.

Begin to follow agreed-upon rules for discussions (e.g., listening to others with care, speaking one at a time about the topics under discussion.)

Begin to ask and answer questions in order to seek help, get information, or clarify something that is not understood.

Speak audibly, and begin to describe people, places, things, and events with some errors.

Start to express ideas and feelings.

Produce complete sentences when appropriate to task and situation.

*The outcomes will be adjusted in depth and intensity depending on the credits for which the classes are offered. More intensity and depth can include multi-level cohort activities, class projects, guest speakers, field trips, and expanded language development and application in speaking and listening

Program Outcomes

By the time you leave level 6, you should have control over these parts of grammar: punctuation, present, past, future, continuous, present perfect, past perfect, modals, gerunds, infinitives, questions and negative statements, pronouns and prepositions, active and passive voice compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

ELL 82 - English for Women's Health Level 2

Credits: 1-5

Provides high-beginning ELL students with opportunity to practice and improve speaking, listening, reading and writing skills in the context of women's health. This is a pass/no credit course.

Enrollment Requirement: ELL 1 or 10; and placement test; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Begin to express basic concerns with level appropriate vocabulary in a women's health context.
- Begin to describe symptoms with level appropriate vocabulary that occur in a women's health context.
- Begin to share experiences with level appropriate vocabulary that relate to a women's health context.
- Begin to ask and answer questions to seek help about women's health issues.
- Respond to basic written questions in a women's health context.
- Use basic reading strategies to understand important information in a text.
- Begin to improve communication skills to interact with health professionals and advocate for oneself.
- Begin to learn to navigate community resources regarding women's health.

Program Outcomes

We are now using the Career and College Readiness Standards from the National Reporting System. When students are ready to leave our program in level 6, they can do the following:

In Reading

Cite evidence from the text to analyze and draw inferences

Summarize

Use context to determine meaning

Adapt speech to formal/informal circumstances

Give clear, effective presentations integrating multi-media

By the time you leave level 6, you should have control over these parts of grammar:

punctuation ,present, past, future, continuous, present perfect, past perfect ,
modals, gerunds, infinitives, questions and negative statements , pronouns and
prepositions , active and passive voice
compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 83 - English for Women's Health Level 3

Credits: 1-5

Provides low-intermediate ELL students with opportunity to practice and improve speaking, listening, reading and writing skills in the context of women's health. This is a pass/no credit course.

Enrollment Requirement: ELL 2, 20, 21 or 28; and placement test; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Express basic concerns with level appropriate vocabulary in a women's health context.
- Describe symptoms with level appropriate vocabulary that occur in a women's health context.
- Share experiences with appropriate vocabulary and relevant details that relate to a women's health context.
- Ask and answer basic questions to seek help about women's health issues.
- Respond to written questions in a women's health context.
- Use reading strategies to understand important information in a text.
- Improve communication skills to speak with health professionals and advocate for oneself.
- Learn how to navigate community resources regarding women's health.

Program Outcomes

- Cite evidence from the text to analyze and draw inferences
- Summarize texts
- Use context to determine meaning
- Analyze how texts are organized
- Determine points of view

Comprehend graphs, charts, diagrams, maps
Delineate and evaluate arguments
Compare and contrast texts
Identify affixes and roots
Use similes and metaphors
Produce clear and coherent writing in which the development, organization, and style are appropriate to the task and audience
Write to inform, explain, examine and convey ideas
Write arguments with reasons and evidence
Write narratives
Introduce and develop a topic
Create cohesion and clarify relationships between ideas
Revise, edit, rewrite
Complete short research project drawing on several cited sources
Actively participate in conversations
Analyze arguments
Build on the ideas of others
Express opinions clearly and persuasively
Work in groups to discuss, pose, and answer questions
Contribute relevant comments and observations
Evaluate soundness of speakers' reasoning and sufficiency of evidence
Adapt speech to formal/informal circumstances
Give clear, effective presentations integrating multi-media
Demonstrate control over these parts of grammar: punctuation, present, past, future, continuous, present perfect, past perfect, modals, gerunds, infinitives, questions and negative statements, pronouns and prepositions, active and passive voice
Compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 84 - English for Women's Health Level 4

Credits: 1-5

Provides intermediate ELL with opportunity to practice and improve speaking, listening, reading and writing skills in the context of women's health. This is a pass/no credit course.

Enrollment Requirement: ELL 3, 30, 31 or 38; and placement test; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Express concerns with level appropriate vocabulary in a women's health context.
- Describe symptoms with level appropriate vocabulary that occur in women's health
- Share experiences with appropriate vocabulary and relevant details that relate to a women's health context.
- Ask and answer questions to seek help about women's health issues.
- Respond to written questions in a women's health context with appropriate detail.
- Use reading strategies to understand important information in a text.
- Improve communication skills when interacting with health professionals and advocating for oneself.
- Learn how to navigate community resources regarding women's health.

Program Outcomes

- Cite evidence from the text to analyze and draw inferences
- Summarize texts
- Use context to determine meaning
- Analyze how texts are organized
- Determine points of view
- Comprehend graphs, charts, diagrams, maps
- Delineate and evaluate arguments
- Compare and contrast texts

- Build on the ideas of others
- Express opinions clearly and persuasively
- Work in groups to discuss, pose, and answer questions
- Contribute relevant comments and observations
- Evaluate soundness of speakers' reasoning and sufficiency of evidence

Adapt speech to formal/informal circumstances
Give clear, effective presentations integrating multi-media
Demonstrate control over these parts of grammar: punctuation, present, past, future, continuous, present perfect, past perfect, modals, gerunds, infinitives, questions and negative statements, pronouns and prepositions, active and passive voice
Compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL 85 - English For Women's Health Level 5

Credits: 1-5

Provides high-intermediate ELL students with opportunity to practice and improve speaking, listening, reading and writing skills in the context of women's health. This is a pass/no credit course.

Enrollment Requirement: ELL 40 or 41 or 48; and placement test; and instructor consent.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Use level appropriate vocabulary to express concerns, describe symptoms and share experiences related to women's health.
- Ask and answer questions to seek help about women's health issues.
- Respond to written questions in a women's health context with appropriate detail.
- Use reading strategies to understand important information in a text.
- Improve communication skills when interacting with health professionals and advocating for oneself.
- Demonstrate ability to navigate community resources regarding women's health.
- Practice level appropriate listening strategies while interacting with women's health guest speakers.

Program Outcomes

Cite evidence from the text to analyze and draw inferences

Summarize texts
 Use context to determine meaning
 Analyze how texts are organized
 Determine points of view
 Comprehend graphs, charts, diagrams, maps
 Delineate and evaluate arguments
 Compare and contrast texts
 Identify affixes and roots
 Use similes and metaphors
 Produce clear and coherent writing in which the development, organization, and style
 are appropriate to the task and audience
 Write to inform, explain, examine and convey ideas
 Write arguments with reasons and evidence

 Introduce and develop a topic
 Create cohesion and clarify relationships between ideas
 Revise, edit, rewrite
 Complete short research project drawing on several cited sources
 Actively participate in conversations
 Analyze arguments
 Build on the ideas of others
 Express opinions clearly and persuasively
 Work in groups to discuss, pose, and answer questions
 Contribute relevant comments and observations
 Evaluate soundness of speakers' reasoning and sufficiency of evidence
 Adapt speech to formal/informal circumstances
 Give clear, effective presentations integrating multi-media
 Demonstrate control over these parts of grammar: punctuation, present, past, future,
 continuous, present perfect, past perfect, modals, gerunds, infinitives, questions
 and negative statements, pronouns and prepositions, active and passive voice,
 compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions
 necessary for students to be effective members of a community. This outcome is
 designed to help students recognize the value of a commitment to those
 responsibilities which will enable them to work successfully individually and with
 others.

Written Communication - Written Communication encompasses all the abilities
 necessary for effective expression of thoughts, feelings, and ideas in written
 form.

ELL 86 - English for Women's Health Level 6

Credits: 1-5

Provides high level ELL with opportunity to practice and improve speaking, listening, reading and writing skills in the context of women's health. This is a pass/no credit course.

Enrollment Requirement: ELL 50; and placement test; and instructor consent.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Use level appropriate vocabulary to express concerns, describe symptoms, and share experiences related to women's health.

- Ask and answer questions to seek help about a broader range of women's health issues.

- Respond to written questions in a women's health context with appropriate detail.

- Use reading strategies to understand important information in a text.

- Improve communication skills using more comprehensive vocabulary when interacting with health professionals and advocating for oneself.

- Demonstrate ability to navigate community resources regarding women's health.

- Practice level appropriate listening strategies while interacting with women's health guest speakers.

Program Outcomes

- Cite evidence from the text to analyze and draw inferences

- Summarize texts

- Use context to determine meaning

- Analyze how texts are organized

- Determine points of view

- Comprehend graphs, charts, diagrams, maps

- Delineate and evaluate arguments

- Compare and contrast texts

- Identify affixes and roots

- Use similes and metaphors

- Produce clear and coherent writing in which the development, organization, and style are appropriate to the task and audience

- Write to inform, explain, examine and convey ideas

- Write arguments with reasons and evidence

- Write narratives

- Introduce and develop a topic

- Create cohesion and clarify relationships between ideas

- Revise, edit, rewrite

- Complete short research project drawing on several cited sources

Demonstrate control over these parts of grammar: punctuation, present, past, future, continuous, present perfect, past perfect, modals, gerunds, infinitives, questions and negative statements, pronouns and prepositions, active and passive voice, compound and complex sentences.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

English Language Learning-Online

ELL-O 9 - English Language Learning Online Literacy Level

Credits: 12

Online literacy level of ELL. Students study contextualized content to improve fluency.

This is a pass/no credit course.

Enrollment Requirement: Instructor consent.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

Recognize and reproduce
letter names and sounds
short vowel sounds and a variety of long vowel sounds
consonant blends (ch, sh, th, etc.
Digraphs ph, ey, etc., in basic sight words (they, phone)

Demonstrate ability to sound out short and some long vowel words, reading from left to right within a word.

Read short vowel sound and sight word passages with some fluency.

Recognize beginnings and endings of sentences.

Confirm understanding of a text by answering questions about key details.

Begin to use capitals and periods when writing complete sentences and start to write short answers to basic personal information questions.

Spell short vowel words and simple sight words, such as go to, it, she with few errors, and write numbers 1-100 in numerals and numbers 1-10 in words.

Participate in guided discussions with diverse partners with instructor support.

Speak learned and rehearsed words and phrases with hesitation and some inaccuracy, using a high level of support.

Communicate some basic needs to instructor and other students in English.

Comprehend the gist of short, simple conversations with highly structured supports.

Use video conferencing tools such as mute/unmute buttons to participate in class discussions.

Start to use the digital tools in Canvas to complete online classwork.

Use messaging applications to ask for help from instructors.

Program Outcomes

Reading

Identify the main purpose of a text, including what the author wants to answer, explain, or describe.

Determine the main idea of a text; recount the key details and explain how they support the main idea.

Use information gained from illustrations and the words in a text to demonstrate understanding of the text.

Use linking words and phrases to connect ideas within categories of information.

Determine a theme or central idea of a text and how it is conveyed through particular details; provide a summary of the text distinct from personal opinions or judgments.

Cite several pieces of textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.

Writing

Write narratives in which they recount a well-elaborated event or short sequence of events, include details to describe actions, thoughts, and feelings, use temporal words to signal event order, and provide a sense of closure.

With guidance and support from peers and others, develop and strengthen writing as needed by planning, revising, and editing.

Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

Demonstrate command of the conventions of standard English capitalization, punctuation, spelling and standard English grammar when writing.

Write arguments to support claims with clear reasons and relevant evidence.
Speaking/Listening

Speak more fluently with increased vocabulary and improved pronunciation, intonation and word stress.

Ask and answer such questions as who, what, where, when, why.

Improve ability to manage conversations, recognize when listeners don't understand and be able to provide clarification.

Demonstrate command of the conventions of standard English grammar and usage when speaking.

Engage effectively in a range of collaborative discussions (one on-one, in groups, and teacher led) with diverse partners, building on others' ideas and expressing their own clearly.

Build on the ideas of others.

Express opinions clearly and persuasively.

Technology

Use video conferencing tools such as mute/unmute buttons, chat, screen sharing, and breakout rooms to participate in class discussions.

Use the digital tools in Canvas to complete online classwork and participate in written and recorded discussions.

Log in to and use multiple applications or computer programs simultaneously.

Use email, discussion, and messaging applications to ask for help from instructors, classmates, and college staff.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

ELL-O 10 - English Language Learning Online Level 1

Credits: 12

Online beginning level of English Language Learning. Students study contextualized content to improve fluency. This is a pass/no credit course.

Enrollment Requirement: ELL-O 9; or ELL 8 or 9; or placement test; and instructor consent.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Recognize and reproduce letter names and sounds.
- Read basic sight words and short and long vowel words with some fluency.
- Identify the main topic, read and comprehend short passages on familiar topics.
- Use the illustrations and information in a text to understand its key details.
- Understand and respond to verbal and written questions on reading passages.
- Produce complete sentences when appropriate to task and situation and use capitals and periods with few errors.
- Write and spell basic sight words and simple short and long vowel words with minimal errors.
- Create simple verbal statements concerning personal information without prompting and produce complete sentences when appropriate to task and situation.
- Participate in guided discussions with diverse partners, following agreed upon rules, such as listening to others with care, speaking one at a time, etc.
- Communicate basic needs to instructor and other students in English.
- Answer basic personal information questions and respond to questions with limited guidance or repetition.
- Comprehend the gist of simple conversations with aid from some visual cues and pre-learned vocabulary and phrases.
- Use video conferencing tools such as mute/unmute buttons, and chat to participate in class discussions.
- Use the digital tools in Canvas to complete online classwork.
- Use email, and messaging applications to ask for help from instructors.

Program Outcomes

Reading

- Identify the main purpose of a text, including what the author wants to answer, explain, or describe.
- Determine the main idea of a text; recount the key details and explain how they support the main idea.
- Use information gained from illustrations and the words in a text to demonstrate understanding of the text.

This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

ELL-O 20 - English Language Learning Online Level 2

Credits: 12

Online high-beginning level of ELL. Students study contextualized content to improve fluency. This is a pass/no credit course.

Enrollment Requirement: ELL-O 10; or ELL 10; or placement test; or instructor

consent.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

Reading

- Identify the main topic and retell key details of a text.
- Ask and answer questions about key details in a text.
- Use context clues and instructor provided resources to help determine or clarify the meaning of words and phrases in a text.
- Know and use various text features to locate key facts or information in a text.
- Confirm understanding of a text by asking and answering questions about key details and requesting clarification if something is not understood.
- Describe the connection between individuals, events, ideas, or pieces of information in a text.

Writing

- Write short compositions which sequence events, include some details, use temporal words to signal event order, and provide some sense of closure.
- Describe people, places, things, and events with relevant details, start to express ideas and feelings clearly.
- Produce complete sentences when appropriate to task and situation.

Speaking and Listening

- Participate in guided discussions with diverse partners in small and larger groups.
- Follow agreed-upon rules for discussions (e.g., listening to others with care, speaking one at a time about the topics and texts under discussion).
- Build on others' talk in conversations by responding to the comments of others through multiple exchanges.

Technology

- Use video conferencing tools such as mute/unmute buttons, chat, screen sharing, and breakout rooms to participate in class discussions.
- Use the digital tools in Canvas to complete online classwork and participate in written and recorded discussions.
- Log in to and use multiple applications or computer programs simultaneously.
- Use email, discussion, and messaging applications to ask for help from instructors, classmates, and college staff.

Program Outcomes

Cite several pieces of textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.

Writing

Write narratives in which they recount a well-elaborated event or short sequence of events, include details to describe actions, thoughts, and feelings, use temporal words to signal event order, and provide a sense of closure.

With guidance and support from peers and others, develop and strengthen writing as needed by planning, revising, and editing.

Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

Demonstrate command of the conventions of standard English capitalization, punctuation, spelling and standard English grammar when writing.

Write arguments to support claims with clear reasons and relevant evidence.

Speaking and Listening

Speak more fluently with increased vocabulary and improved pronunciation, intonation and word stress.

Ask and answer such questions as who, what, where, when, why.

Improve ability to manage conversations, recognize when listeners don't understand and be able to provide clarification.

Demonstrate command of the conventions of standard English grammar and usage when speaking.

Engage effectively in a range of collaborative discussions (one on-one, in groups, and teacher led) with diverse partners, building on others' ideas and expressing their own clearly.

Build on the ideas of others.

Express opinions clearly and persuasively.

Technology

Use video conferencing tools such as mute/unmute buttons, chat, screen sharing, and breakout rooms to participate in class discussions.

Use the digital tools in Canvas to complete online classwork and participate in written and recorded discussions.

Log in to and use multiple applications or computer programs simultaneously.

Use email, discussion, and messaging applications to ask for help from instructors, classmates, and college staff.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL-O 30 - English Language Learning Online Level 3

Credits: 12

Online Low-intermediate level of ELL. Students study contextualized content to improve fluency. This is a pass/no credit course.

Enrollment Requirement: ELL-O 20; or ELL 20, 21 or 28; or placement test; and instructor consent.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

Reading

Ask and answer questions about key details in a text.

Identify the main topic and retell key details of a text.

Ask and answer questions to help determine or clarify the meaning of words and phrases in a text.

Know and use various text features to locate key facts or information in a text.

Use the illustrations and details in a text to describe its key ideas.

Identify the reasons an author gives to support points in a text.

Writing

Write informative/explanatory texts in which they name a topic, supply some facts about the topic, and provide some sense of closure.

Speaking and Listening

With guidance and support, recall information from experiences.

Participate in collaborative conversations with diverse partners in small and larger groups.

Follow agreed-upon rules for discussions (e.g., listening to others with care, speaking one at a time about the topics and texts under discussion, and gaining the floor in respectful ways).

Build on others' talk in conversations by responding to the comments of others through multiple exchanges.

Ask and answer questions in order to seek help, get information, or clarify something that is not understood.

Ask questions to check understanding of information presented and stay on topic.

Describe people, places, things, and events with relevant details.

Speak audibly and start to express thoughts, feelings, and ideas clearly.

Produce complete sentences when appropriate to task and situation.

Technology

Use video conferencing tools such as mute/unmute buttons, chat, screensharing, and breakout rooms to participate in class discussions.

Use the digital tools in Canvas to complete online classwork and participate in written and recorded discussions.

Log in to and use multiple applications or computer programs simultaneously.

Use email, discussion, and messaging applications to ask for help from instructors, classmates, and college staff.

Program Outcomes

Reading

Identify the main purpose of a text, including what the author wants to answer, explain, or describe.

Determine the main idea of a text; recount the key details and explain how they support the main idea.

Use information gained from illustrations and the words in a text to demonstrate understanding of the text.

Use linking words and phrases to connect ideas within categories of information.

Determine a theme or central idea of a text and how it is conveyed through particular details; provide a summary of the text distinct from personal opinions or judgments.

Cite several pieces of textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.

Writing

Write narratives in which they recount a well-elaborated event or short sequence of events, include details to describe actions, thoughts, and feelings, use temporal words to signal event order, and provide a sense of closure.

With guidance and support from peers and others, develop and strengthen writing as needed by planning, revising, and editing.

Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

Demonstrate command of the conventions of standard English capitalization, punctuation, spelling and standard English grammar when writing.

Write arguments to support claims with clear reasons and relevant evidence.

Speaking/Listening

Speak more fluently with increased vocabulary and improved pronunciation, intonation and word stress.

Ask and answer such questions as who, what, where, when, why.

Improve ability to manage conversations, recognize when listeners don't understand and be able to provide clarification.

Demonstrate command of the conventions of standard English grammar and usage when speaking.

Engage effectively in a range of collaborative discussions (one on-one, in groups, and teacher led) with diverse partners, building on others' ideas and expressing their own clearly.

Build on the ideas of others.

Express opinions clearly and persuasively.

Technology

1. Use video conferencing tools such as mute/unmute buttons, chat, screen sharing, and breakout rooms to participate in class discussions.

2. Use the digital tools in Canvas to complete online classwork and participate in written and recorded discussions.

3. Log in to and use multiple applications or computer programs simultaneously.

4. Use email, discussion, and messaging applications to ask for help from instructors, classmates, and college staff.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those

responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

ELL-O 40 - English Language Learning Online Level 4

Credits: 12

Online intermediate level of ELL. Students study contextualized content to improve fluency. This is a pass/no credit course.

Enrollment Requirement: ELL-O 30; or ELL 30; or placement test; and instructor consent.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

Environmental Science

ENV S 194 - Special Topics-Environmental Science

Credits: 1-5

Investigates the interaction of physical and biological systems in the environment. Examines the scientific principles which are involved in modern environmental problems and issues. Scientific topics could include energy, climate, soils, water, animal studies, local plants, and the dynamics of plants and animal populations and the communities they form. For students wishing to obtain a broad picture of human activities and their relationship to basic processes of ecosystems. Classes are conducted through lectures, class and group discussion and/or readings. May be repeated when a different topic is presented. This class does not meet the lab requirement.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify and evaluate important environmental issues that face us today.
- Recognize how we directly and indirectly affect the environment.
- Develops concepts describing a sustainable society.
- Interpret statements made about the environment in the media.
- Work effectively with peers in finding solutions to environmental problems.

Program Outcomes

- Recognize how scientists use the Scientific Method to guide their inquiry, generate hypotheses, experimental design, reasoning, and draw conclusions based on empirical data.
- Students will learn the steps of the scientific Method and be able to use the steps to design an experiment, collect data, and analyze the data.

College-wide Outcomes

- Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

ENV S 204 - Natural Science and the Environment

Credits: 5

Investigates the interaction of physical and biological systems in the environment. Examines the scientific principles which are involved in modern environmental problems and issues. Scientific topics could include energy, climate, soils, water, animal studies, local plants, and the dynamics of plants and animal populations and the communities they form. For students wishing to obtain a broad picture of human activities and their relationship to basic processes of ecosystems. This class does not meet the lab requirement.

Enrollment Requirement: MATH 97 with a grade of 2.0 or higher; and eligible for ENGL& 101.

Satisfies Requirement: Natural Science

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify and evaluate important environmental issues that face us today.
- Recognize how we directly and indirectly affect the environment.
- Develop concepts describing a sustainable society.
- Interpret statements made about the environment in the media.

Work effectively with peers in finding solutions to environmental problems.

Program Outcomes

Students will learn the scientific method to recognize how scientists use this method to guide their inquiry, generate hypotheses, experimental design, reasoning, and draw conclusions based on empirical data.

Students will learn the steps of the scientific Method and be able to use the steps to design an experiment, collect data, and analyze the data.

College-wide Outcomes

Critical Thinking - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

Film

FILM 101 - Introduction to Film Studies

Credits: 5

Explores the nature, function, and value of film. Through the study of film, students will come to understand the range of imaginative worlds that could not exist in any other form in quite the same way these worlds do in film. Both form and content will be explored to understand the impact of film as a mirror of society.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Outcomes:

Students who successfully complete this class will be able to:

Explain important critical tools currently in use in film studies.

Break down what film can be in a broader sense beyond its entertainment factor.

Evaluate film in a critical fashion to better understand how film influences our understanding of diverse populations (ethnic, religious, sexual, gender, class, etc.)

Explain their comprehension of the social, political, and/or economic contexts of film.

College-wide Outcomes

Critical Thinking - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes

and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

FILM 120 - The Art of the Film

Credits: 5

Course is an introduction to the art of film. The goal is to instill an appreciation for film as an art form. Course looks at the breadth of film as an art form by covering aspects of film from the style, theme, genre, cinematic techniques, etc.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate an understanding of the techniques in film-making--such as mise-en-scène, cinematography, editing, sound, sources for films, and types of films.

- Examine diversity in our culture, as expressed in current films.

- Demonstrate an understanding of creativity in cinematic production, with respect to style, cinematic technique, genre, and theme.

- Demonstrate proficiency in the ability to respond to and evaluate film production using reasoned judgment.

College-wide Outcomes

Critical Thinking - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

FILM 121 - Contemporary American Film

Credits: 5

Examines contemporary American movies: directors, actors, style, and themes of cultural diversity. Focuses on the examination of popular films for greater understanding of cinematic aesthetics and greater awareness of how movies today both reflect and influence values of our culture, with special focus on diversity of gender, ethnicity and

class.

Satisfies Requirement: Humanities/Fine Arts/English and Diversity

Course Outcomes:

Students who successfully complete this class will be able to:

- Gain an enhanced awareness of, and appreciation for, the cinematic qualities of contemporary American movies.

- Examine diversity in our culture, as expressed in current films.

- Identify and examine prevailing themes and images in contemporary American films.

- Engage interactively with contemporary cultural issues through discussions and analysis of course concepts.

College-wide Outcomes

Critical Thinking - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

FILM 122 - Introduction to Film: Genres

Credits: 5

Introduces film genres such as thrillers, film noir, melodramas, westerns, documentary or culturally specific films. Examines the literary, mythic and historical aspects of the different genres. Examines the social and political significance of different genres through the use of specific films watched in class.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify and describe the characteristics and qualities of various film genres.

- Apply and analyze the theoretical elements of film genre to specific films.

College-wide Outcomes

Critical Thinking - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes

and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

FILM 151 - Asian Film Studies

Credits: 5

Examine and analyze specific examples of films from Asian, East Asian and/or Southeast Asian countries. Learn and apply the following film studies concepts to analyzing the films: film terms and techniques, director and setting analysis, and thematic and cultural analysis. Examine the intersectionality of these multiple identities as portrayed through Asian film (including cultural identity/race, class/economics, politics/national identity, and gender lenses).

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Diversity

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Analyze a representative selection of Asian film for cultural contexts.
- Analyze a representative selection of Asian film in historical contexts.
- Apply literary/film criticism methodologies to Asian film.
- Evaluate Asian films using film studies techniques.
- Evaluate the narrative structure of Asian films.
- Evaluate the composition of Asian films.

Program Outcomes

- Create message appropriate to the audience, purpose, and context.
- Use, synthesize, or produce needed information ethnically.
- Form, analyze, and assess beliefs while demonstrating intellectual humility and respect towards the beliefs of others.
- Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

Critical Thinking - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

FILM 162 - Gender in Film

Credits: 5

Examines social and political gender codes, gender and identity, power structures and inequities, and intersectionality by viewing and analyzing films that are about the constructions of gender and films that are about and/or directed by women, including women of color, and films by or about those who identify as LGBTQ+. Learn and apply the following concepts to analyzing the films: film terms and techniques, director and setting analysis, and thematic and cultural analysis and the intersectionality of these multiple identities as portrayed through film.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Diversity

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Analyze a representative selection of films related to gender issues and identity for women, women of color, and the LGBTQ community.

- Examine the cultural contexts of these films.

- Analyze films for key aspects related to the representations of gender (for constructions of gender and codes of masculinity/femininity, for women, and for those who identify as LGBTQ+) in areas such as identity, roles, codes, race, discrimination, inequity, laws, class/economics, and other power inequities and intersections among these.

- Evaluate the construction of the films' storylines through a gender perspective.

- Apply various critical approaches (e.g. Feminist Criticism, Queer Theory, and Marxist, postcolonial, and critical race approaches) to their analyses of the films.

Program Outcomes

- Create messages appropriate to the audience, purpose, and context.

- Use, synthesize, or produce needed information ethically.

- Form, analyze, and assess beliefs while demonstrating intellectual humility and respect towards the beliefs of others

- Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the

role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

FILM 191 - Latin America in Film

Credits: 5

Explores the relationship between film and cultural interpretation and understanding of Latin America. Considers the history of cinema in Latin America. Focuses on how film has been used to interpret Latin American culture and how we can use it to understand Latin American past and present with special emphasis on discussing the complex history and social problems of the region. Also explores common stereotypes with which Latin America has been portrayed in mainstream U.S. movies. No knowledge of Spanish language required. Cross-listed with LAS 191.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English and Diversity

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Interpret and discuss art movies that deal with cultural and historical issues relating to multiple identities, histories cultures, perspectives, contributions, knowledge, struggles and strategies of historically excluded groups in Latin America.

- Acquire a general knowledge of Latin American history and culture.

- Identify the stereotypes with which Latin America has been portrayed in mainstream US movies and will be able to discuss their own preconceptions and/or experiences.

- Use movies as a tool for understanding complex social realities.

- Connect theoretical reading with movies.

French

FRCH& 121 - French I

Credits: 5

Begins the systematic study of French with an emphasis on speaking and listening.

Includes basic grammar, vocabulary, reading, writing, and conversation practice.

Students acquire basic knowledge of the diversity of the French speaking world, its

history, and cultures.

Enrollment Requirement: No previous background in French, or no more than one year of high school French, or no more than two years of high school French with a "C" average or less; and eligible for ENGL 99.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Distinguish between formal (F) and informal (I) greetings, introductions and questions.

- Use major regular and irregular verbs to communicate preference, origin, adjectives, personal belongings, family, work, and climate.

- Use three verb groups -ER, -IR, -RE present tense regular & irregular verbs in written and oral.

- Differentiate between present and immediate future in written and oral.

- Use language and intercultural skills to communicate with native speakers of French.

Program Outcomes

Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

Critical Thinking - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

FRCH& 122 - French II

Credits: 5

A systematic study of French using the four basic skills of listening, speaking, reading, and writing. Students acquire basic knowledge of the diversity of the French speaking world, its history, and cultures.

Enrollment Requirement: FRCH& 121 with a grade of 2.0 or higher; and eligible for ENGL 99; or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

Discuss daily routine, food, countries, the body, illnesses and remedies.

Use both forms of the past tense, passé composé and imparfait to write and speak about the past.

Manipulate sentences to avoid repetition through the use of pronouns.

Use language and intercultural skills to communicate with native speakers of French.

Describe ways in which one's own native language(s) and culture(s) are different from and similar to the French language and Francophone cultures.

Program Outcomes

Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

Critical Thinking - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

FRCH& 123 - French III

Credits: 5

Completion of basic system grammar, vocabulary, reading, writing, and conversation. Students acquire basic knowledge of the diversity of the French speaking world, its history, and cultures. Fulfills University of Washington College of Arts and Sciences graduation requirement.

Enrollment Requirement: FRCH& 122 with a grade of 2.0 or higher; and eligible for ENGL 99; or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

Discuss hobbies and sports, vacations, moments in one's life, personal qualities with comparisons.

Use the present subjunctive of regular and irregular verbs in written and oral.

Use future tense to report vacation activities in contrast with the conditional tense in hypothetical situations in written and oral.

Use the imperative tense.

Use a third past tense, the Plus-que-Parfait, in written and oral.

Use language and intercultural skills to communicate with native speakers of French.

Describe ways in which one's own native language(s) and culture(s) are different from and similar to the French language and Francophone cultures.

Program Outcomes

Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

Critical Thinking - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

FRCH 193 - Introduction to Francophone Life and Culture

Credits: 5

An introductory course where cultures of the Francophone world - the Caribbean, the Maghreb, Middle East South-East Asia, Canada, sub-Saharan Africa - and their relationship to France are examined. Historical, literary texts, articles, music and films are studied to understand the linguistic and cultural complexities of the French-speaking world today. Students explore the evolution of the term francophone from colonial to post-colonial times. In English. Previously HUMAN 193.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English and Diversity

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify the term francophone by understanding the diversity within its unifying thread.
- Demonstrate the ability to differentiate various levels of francophone visibility globally.
- Analyze various literary and cinematic genres presented within the historical framework of French colonialism and its aftermath.

Recognize intersectionality as a tool to understand linguistic oppression through the study of past and current events.

Compare and contrast francophone communities inside and outside of the Hexagon (France).

Demonstrate the cultural sensitivity to travel, study and work in francophone regions and/or countries around the world.

Program Outcomes

Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

Critical Thinking - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

FRCH& 221 - French IV

Credits: 5

Systematic review of French grammar. Intensive practice in listening, speaking, reading, and writing, with special emphasis on reading and writing. Oral practice through drills and discussion of selected pieces of French written materials.

Enrollment Requirement: FRCH& 123 or placement by language instructor and eligible for ENGL 99.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

Demonstrate knowledge of the Francophone world including issues related to colonization, independence and post-colonization both within France and the French-speaking world.

Communicate in French both orally and in writing using the present and the past tenses at a level allowing complex interactions.

Read and understand excerpts of Francophone literature.

Practice language skills in real life situations with French speakers.

Present a project in French.

Generate an assessment in a professional context, including suggestions for a successful integration.

Program Outcomes

Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

Critical Thinking - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

FRCH& 222 - French V

Credits: 5

Systematic review of French grammar aimed at communicative competency at an intermediate level. Intensive practice in listening, speaking, reading, and writing with special emphasis on reading and reacting to texts that explore the diversity of the French speaking world, as well as the global and local implications of gender, racial and cultural interdependence. Includes oral practice through discussion of abovementioned materials.

Enrollment Requirement: FRCH& 221 with a grade of 2.0 or higher; or equivalent, FRCH& 221 is four years in high school with a grade of B or above higher; and eligible for ENGL 99; or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

Demonstrate knowledge of the Francophone world including issues related to colonization, independence and post-colonization both within France and the French-speaking world.

Communicate in French both orally and in writing using present, past tenses, and future at a level allowing complex interactions.

Generate sophisticated sentences using present and past subjunctive.

Read and understand excerpts of Francophone literature.

Practice language skills in real life situations with French speakers.

Present a project in French.

Create a market study, including a survey, a plan, teamwork and organization.

Program Outcomes

Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

Critical Thinking - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

FRCH& 223 - French VI

Credits: 5

Systematic review of French grammar aimed at communicative competency at an upper intermediate level. Intensive practice in listening, speaking, reading, and writing with special emphasis on reading and reacting to texts that explore the diversity of the French speaking world, as well as the global and local implications of gender, racial and cultural interdependence. Includes oral practice through discussion of above-mentioned materials.

Enrollment Requirement: FRCH& 222 with a grade of 2.0 or higher; and eligible for ENGL 99; or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate knowledge of the Francophone world including issues related to colonization, independence and post-colonization both within France and the French-speaking world.

- Communicate in French both orally and in writing using present, past tenses, future and conditional at a level allowing complex interactions.

- Generate sophisticated sentences using present and past subjunctive as well as hypothetical situations.

- Read and understand excerpts of Francophone literature.

- Practice language skills in real life situations with French speakers.

- Present a project in French.

- Discuss a work contract.

Participate in a hiring assessment.

Program Outcomes

Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

Critical Thinking - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

Written Communication - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

Geography

GEOG& 100 - Introduction to Geography

Credits: 5

Survey of elements, major concepts, and methods of the field of geography. Topics include weather, climate, soils, wild vegetation, settlement, population, agricultural systems, and other selected topics.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Social Science

Course Outcomes:

Students who successfully complete this class will be able to:

- Use maps and other geographic representations, geospatial technologies, and spatial thinking to understand and communicate information.
- Use mental maps to organize information about people, places, and environments in a spatial context.
- Analyze the spatial organization of people, places, and environments on Earth's surface.

Program Outcomes

Identify and describe a current geographic problem or inequity at a global or regional scale.

Identify and describe an individual action one can undertake to solve a current geographic problem or inequity.

GEOG 120 - Introduction to Physical Geography

Credits: 5

Analyses the physical structure of the earth's surface, including landforms, weather, climate, and biogeography. Emphasizes understanding of what makes each point on Earth unique and how humans interact with physical systems in multiple ways.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent. **Recommended:** Eligible for ENGL& 101.

Satisfies Requirement: Social Science

Course Fee: \$3.00

Program Outcomes

Identify and describe a current geographic problem or inequity at a global or regional scale.

Identify and describe an individual action one can undertake to solve a current geographic problem or inequity.

GEOG 123 - Globalization

Credits: 5

Examines globalization from a geographic perspective, including the cultural and economic effects of rapid communication and transportation networks. Topics include the globalization of popular culture, economic systems, trade agreements, and arguments both for and against globalization.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science

Course Fee: \$3.00

Program Outcomes

Identify and describe a current geographic problem or inequity at a global or regional scale.

Identify and describe an individual action one can undertake to solve a current geographic problem or inequity.

GEOG 190 - Geographic Exploration

Credits: 1-10

Field course designed to allow students to study the components that make up and contribute to the character of various selected, distinct landscapes while in the field. Skill training (kayak, glacier climbing, scuba, wilderness camping) and subject briefing sessions are usually a part of this course.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Social Science

Course Fee: \$30.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Learn and practice field research methods, including field observation, note-taking, and mapping.

- Apply the "cultural landscape concept to multiple places.

- Discuss the ways in which cultural landscapes represent unique combinations of physical and cultural characteristics.

Program Outcomes

- Identify and describe a current geographic problem or inequity at a global or regional scale.

- Identify and describe an individual action one can undertake to solve a current geographic problem or inequity.

College-wide Outcomes

- Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

GEOG& 200 - Human Geography

Credits: 5

The spatial study of cultural phenomena on earth. Examines the distribution of diverse cultures, ethnicities, languages, religions and economies at a global, as well as regional, scale. Analyzes current geographic problems in the context of migration, population growth, ethnic and religious identities, the colonial legacy and the growing forces of globalization.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science and Diversity

Course Fee: \$3.00

Program Outcomes

- Identify and describe a current geographic problem or inequity at a global or regional scale.

Identify and describe an individual action one can undertake to solve a current geographic problem or inequity.

GEOG 201 - World Regional Geography

Credits: 5

Study of the world's regional structure; analysis and interpretation of the world's cultural, economic, and resource patterns.

Enrollment Requirement: Eligible for ENGL& 101.

Satisfies Requirement: Social Science

Course Outcomes:

Students who successfully complete this class will be able to:

- Use maps and other geographic representations, tools, and technologies to acquire, process, and report information.

- Use mental maps to organize information about people, places, and environments.

- Analyze the spatial organization of people, places, and environments on Earth's surface.

- Analyze the physical and human characteristics of places.

- Analyze how people create regions to interpret Earth's complexity.

- Analyze how culture and experience influence people's perception of places and regions.

- Analyze the characteristics, distribution, and migration of human populations on Earth's surface.

- Analyze the patterns and networks of economic interdependence on Earth's surface.

- Analyze how forces of cooperation and conflict among people influence the division and control of Earth's surface.

- Analyze how human actions modify the physical environment.

- Analyze the changes that occur in the meaning, use, distribution, and importance of resources.

- Apply geography to interpret the past.

- Apply geography to interpret the present and plan for the future.

Program Outcomes

- Identify and describe a current geographic problem or inequity at a global or regional scale.

- Identify and describe an individual action one can undertake to solve a current geographic problem or inequity.

GEOG 205 - Environmental Geography

Credits: 5

Studies the relationship between humans and the natural world. Topics include

population, consumption, resources, pollution, agriculture, and sustainability. Emphasizes global climate change and the environmental systems of the Puget Sound bioregion.

Enrollment Requirement: Eligible for ENGL& 101 and MATH& 141; or instructor consent.

Satisfies Requirement: Social Science

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Analyze the spatial organization of people, places, and environments on Earth's surface.

- Analyze the physical and human characteristics of places.

- Analyze the physical processes that shape the patterns of Earth's surface.

- Analyze the characteristics and spatial distribution of ecosystems on Earth's surface.

- Analyze the characteristics, distribution, and migration of human populations on Earth's surface.

- Analyze the patterns and networks of economic interdependence on Earth's surface.

- Analyze the process, patterns, and functions of human settlement.

- Analyze how human actions modify the physical environment.

- Analyze how physical systems affect human systems.

- Analyze the changes that occur in the meaning, use, distribution, and importance of resources.

- Apply geography to interpret the past.

- Apply geography to interpret the present and plan for the future.

Program Outcomes

- Identify and describe a current geographic problem or inequity at a global or regional scale.

- Identify and describe an individual action one can undertake to solve a current geographic problem or inequity.

GEOG 210 - Mountain Geography

Credits: 5

Provides a geographic overview of mountains including the importance of mountain regions to humans, the formation, geomorphology, weather, climate, and biology of mountain regions. May include a one-day field trip on a Saturday.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Acknowledge the importance of mountain environments to human society.
- Analyze the role of plate tectonics in mountain building.
- Describe the weather and climate unique to mountain ranges.
- Outline impacts on mountain environments due to climate change.
- Identify landforms resulting from glaciation.
- Explain how glaciers form and create landforms.
- Discuss safe travel in snow avalanche terrain.
- Paraphrase all of the various ways rocks are weathered.
- Demonstrate how water, ice, and mass wasting shape mountains.
- Assess what factors vegetation and wildlife must possess to thrive in the mountain environment.
- Evaluate the use of resources by human societies in mountain regions.

Program Outcomes

- Identify and describe a current geographic problem or inequity at a global or regional scale.
- Identify and describe an individual action one can undertake to solve a current geographic problem or inequity.

GEOG 298 - Independent Study-Geography 1

Credits: 1-5

Permits students to individually pursue a special field of interest under the guidance of an instructor.

Enrollment Requirement: Instructor consent.

Program Outcomes

- Identify and describe a current geographic problem or inequity at a global or regional scale.
- Identify and describe an individual action one can undertake to solve a current geographic problem or inequity.

GEOG 299 - Independent Study-Geography 2

Credits: 1-5

Permits students to individually pursue a special field of interest under the guidance of an instructor.

Enrollment Requirement: Instructor consent.

Program Outcomes

Identify and describe a current geographic problem or inequity at a global or regional scale.

Identify and describe an individual action one can undertake to solve a current geographic problem or inequity.

Geology

GEOL& 101 - Introduction to Physical Geology

Credits: 5

Survey of the physical systems that give the Earth its form. Emphasizes the dynamic nature of interior and exterior processes and their relevance to humans. Laboratory class with field trips.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Natural Science or Lab Science

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

Apply information presented during the lectures to the solutions of open-ended questions.

Identify common rocks and the processes which form them along with relative age history principles to discuss the history of a geological map.

Make observations (in class and on field trips) and correctly link those observations to information from the course.

Use a computer to analyze or obtain geological data.

Work effectively with peers in finding solutions to geological problems.

Program Outcomes

Produce written interpretations of earth science materials.

Make geological inferences from newly presented materials.

College-wide Outcomes

Critical Thinking - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes

and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

GEOL 106 - Dinosaurs

Credits: 5

An introduction to the biology, behavior, evolution, and extinction of the dinosaurs and the ancient world they lived in. Examines the history of how dinosaurs have been studied and the ways that scientific ideas about dinosaurs have been formulated, tested, and changed over time. Includes the chance to examine fossils of dinosaurs, other prehistoric animals, and ancient plants.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Natural Science

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe and explain the Scientific Method and the basic terminology, principles, concepts, and theories of geology, biology, and paleontology as they apply to the study of dinosaurs.

- Apply critical thinking, observations, and problem-solving skills (in class) to accurately describe fossil samples, and use these observations to make and support interpretations linked to information presented in the class.

- Illustrate a scientific understanding of the methods used to find and reconstruct dinosaur fossils and their environments, and of basic related scientific theories such as evolution.

- Examine the history of paleontology in order to explain how and why theories about dinosaurs have changed through time as well as how scientific information is presented in popular culture.

- Demonstrate the ability to work effectively with peers in making and supporting scientific interpretations.

Program Outcomes

- Produce written interpretations of earth science materials.

- Make geological inferences from newly presented materials.

College-wide Outcomes

- Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes

and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

GEOL 107 - Fossils and Ancient Earth

Credits: 5

Introduces fossil animals, examines how life changed over geologic time, and discusses how dramatic changes in climates and other environmental conditions have impacted life on our planet. Topics covered include: how Earth formed and the first life evolved; how fossil and rocks form; patterns of extinction and evolution; and how fossils are used to reconstruct ancient geographic and environmental patterns.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Natural Science or Lab Science

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe and explain the Scientific Method and the basic terminology, principles, concepts, and theories of geology and biology, as they apply to the study of paleontology and ancient Earth environments.

- Apply critical thinking, observations, and problem-solving skills (in class) to accurately describe samples of fossil and modern organisms, and to use these observations to make and support interpretations linked to the information presented in the class.

- Illustrate a scientific understanding of the methods used to find and reconstruct fossils and their environments and of basic related scientific theories, such as evolution.

- Examine the ways in which geologic processes affected the history of life and the ways in which the evolution of life affected geologic processes.

- Demonstrate the ability to work effectively with peers in scientifically describing samples and supporting interpretations.

Program Outcomes

- Produce written interpretations of earth science materials.

- Make geological inferences from newly presented materials.

College-wide Outcomes

- Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes

and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

GEOL 117 - Natural Disasters with Lab

Credits: 5

An in-depth examination of the science behind natural disasters. Examines the causes and impacts of natural disasters, including volcanic eruptions, earthquakes, tsunamis, landslides, floods, global climate change, and meteorite impacts. Presents case studies with emphasis on the relative risks and mitigation strategies used in the Pacific Northwest.

Enrollment Requirement: Eligible for ENGL& 101. **Recommended:** Eligible for MATH 97.

Satisfies Requirement: Natural Science or Lab Science

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe and explain the Scientific Method and the basic terminology, principles, concepts, and theories of geology as they apply to natural disasters.
- Apply critical thinking, observations, and problem-solving skills (in class and/or on field trips) to describe and assess potential risks of natural disasters, analyze the costs and benefits of potential solutions, and link such interpretations to information presented in class.
- Illustrate a scientific understanding of the causes, processes, and effects of geologic hazards, including earthquakes, volcanoes, tsunamis, flooding, mass wasting, climate change, and meteorite impacts.
- Analyze how natural hazards impact human societies and examine how human activities can increase the risks natural hazards.
- Demonstrate the ability to work effectively with peers in scientifically describing samples or images, supporting interpretations, and finding solutions to problems related to natural disasters.

Program Outcomes

- Produce written interpretations of earth science materials.
- Make geological inferences from newly presented materials.

College-wide Outcomes

- Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes

and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

GEOL 150 - Field Trips in Geology 1

Credits: 1

Investigates the geology of the Pacific Northwest. Locations of field trips vary from quarter to quarter. Some of the trips involve hiking up to three or four miles on variable terrain. This is a pass/no credit course.

Enrollment Requirement: Concurrent enrollment in GEOL, or GEOL& 101; or instructor consent. Eligible for ENGL& 101.

Course Fee: \$35.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Record important geological information from various locations along the field trip.
- Develop skills to work effectively with peers in finding solutions to geological problems posed on field trips.

Program Outcomes

- Produce written interpretations of earth science materials.
- Make geological inferences from newly presented materials.

College-wide Outcomes

- Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

GEOL 151 - Dinosaurs: Museum Field Trips in Geology

Credits: 1

Students learn about dinosaur biology, behavior, and the reasons behind their extinction. Students examine fossils of dinosaurs and other prehistoric animals during classroom discussions and students are guided through dinosaur exhibits at museums in the Puget Sound region. Students are responsible for any museum entry fees and transportation to and from museums. This is a pass/no credit course.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe fossil samples and use these observations to make and support interpretations linked to information presented in the class.
- Illustrate a scientific understanding of the methods used to reconstruct fossils animals and their environments.
- Develop skills to work effectively with peers in finding solutions to paleontological problems posed on field trips.

Program Outcomes

- Produce written interpretations of earth science materials.
- Make geological inferences from newly presented materials.

College-wide Outcomes

- Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

GEOL 152 - Field Trips in Geology 2

Credits: 1

Investigates the geology of the Pacific Northwest. Locations of field trips vary from quarter to quarter. Some of the trips involve hiking up to 3 or 4 miles on variable terrain. This is a pass/no credit course.

Enrollment Requirement: Concurrent enrollment in GEOL, or GEOL& 101, or instructor consent. Eligible for ENGL& 101.

Course Fee: \$35.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Record important geological information from various locations along the field trip.
- Develop skills to work effectively with peers in finding solutions to geological problems posed on field trips.

Program Outcomes

- Produce written interpretations of earth science materials.
- Make geological inferences from newly presented materials.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

GEOL 153 - Field Trips in Geology 3

Credits: 1

Investigates the geology of the Pacific Northwest. Locations of field trips vary from quarter to quarter. Some of the trips involve hiking up to 3 or 4 miles on variable terrain. This is a pass/no credit course.

Enrollment Requirement: Concurrent enrollment in GEOL, or GEOL& 101, or instructor consent. Eligible for ENGL& 101.

Course Fee: \$35.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Record important geological information from various locations along the field trip.
- Develop skills to work effectively with peers in finding solutions to geological problems posed on field trips.

Program Outcomes

- Produce written interpretations of earth science materials.
- Make geological inferences from newly presented materials.

College-wide Outcomes

Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

GEOL 200 - Geological Investigations of the National Parks

Credits: 5

An investigation of the geology of national parks of the U.S. and Canada. The primary emphasis is on the geology of the western park.

Enrollment Requirement: GEOL& 101 with a grade of 2.0 or higher; and eligible for ENGL& 101.

Satisfies Requirement: Natural Science

Course Fee: \$15.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify significant geological processes in the history of the National Parks discussed during class.

- Solve geological questions posed during class and on assignments.

- List the Geological Time Scale.

- Locate the National Parks discussed during class on a map of North America.

- Practice appropriate geological research skills and use standard geological writing format.

- Work effectively with peers in problems finding solutions to geological problems.

Program Outcomes

- Produce written interpretations of earth science materials.

- Make geological inferences from newly presented materials.

College-wide Outcomes

Critical Thinking - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

GEOL 206 - Earth History

Credits: 5

A study of the geological theories of the evolution of the earth, the oceans, the atmospheres, and life. Includes principles of physical stratigraphy, biostratigraphy, geochronology, plate tectonics, fossil identification, and the paleogeographic changes in North America through time.

Enrollment Requirement: GEOL& 101 with a grade of 2.0 or higher; and eligible for ENGL& 101.

Satisfies Requirement: Natural Science or Lab Science

Course Fee: \$6.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify significant geological events and processes occurring throughout the history of the Earth and will be able to discuss their impact on the life forms at the time.

Discuss the geological/paleontological evidence for evolution.
Identify the major invertebrate fossil groups and know the geological time periods during which they were a major component.
Solve geological questions posed during class and on assignments.
List the Geological Time Scale.
Practice appropriate geological research skills and use standard geological writing format.
Work effectively with peers in problems finding solutions to geological problems.

Program Outcomes

Produce written interpretations of earth science materials.
Make geological inferences from newly presented materials.

College-wide Outcomes

Critical Thinking - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

GEOL& 208 - Geology of the Pacific Northwest

Credits: 5

Covers the geological history of Washington, Oregon, and Idaho. Emphasizes the use of geologic principles in interpreting evidence found in landscapes and rocks. Includes field trips.

Enrollment Requirement: GEOL& 101 with a grade of 2.0 or higher; and eligible for ENGL& 101.

Satisfies Requirement: Natural Science or Lab Science

Course Fee: \$30.00

Course Outcomes:

Students who successfully complete this class will be able to:

Records data and interprets field data about the geologic history of the Pacific Northwest.

Identify important geological events in the following regions of the Pacific Northwest: Northern Rockies, Okanogan Mountains and northeastern Washington, Columbia Basin, eastern Oregon, North Cascades, southern Washington Cascades, Oregon and northern California Cascades, Puget lowlands, San Juan Islands, and The Olympic Mountains and the Coast Range.

Correlates past geological events from one part of the Pacific Northwest to another.

Investigate a region or geologic process in the Pacific Northwest through library research or collection of data in the field.
Identifies common rocks of the Pacific Northwest.
Use the Geological Time Scale.

Program Outcomes

Produce written interpretations of earth science materials.
Make geological inferences from newly presented materials.

College-wide Outcomes

Critical Thinking - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

GEOL 299 - Independent Study-Geology

Credits: 1-5

Allows and encourages students to study independently in their special interest in geology. Course contents, type and scope of project are decided in conference between student and instructor.

Enrollment Requirement: GEOL& 101 with a grade of 2.0 or higher; and eligible for ENGL& 101.

Course Outcomes:

Students who successfully complete this class will be able to:
Complete goals the instructor determined for the specific student and for that quarter.

Program Outcomes

Produce written interpretations of earth science materials.
Make geological inferences from newly presented materials.

College-wide Outcomes

Critical Thinking - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

German

GERM& 121 - German I

Credits: 5

Introduces the systematic study of German with emphasis on speaking and listening. Includes basic grammar, vocabulary, reading, writing, and conversation practice.

Enrollment Requirement: No previous background in German, or no more than one year of high school German, or no more than two years of high school German with a grade of "C" average or less.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate basic proficiency four basic skills: listening, reading, speaking, and writing.
- Interpret and illustrate cultural concepts and historical background materials as occasion arises.

Program Outcomes

- Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- Written **Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

GERM& 122 - German II

Credits: 5

Continues the systematic study of the language using the four basic skills of listening, speaking, reading, and writing.

Enrollment Requirement: GERM& 121 or two years of high school German with a grade of "B" or higher or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate basic proficiency four basic skills: listening, reading, speaking, and writing.
- Interpret and illustrate cultural concepts and historical background materials as occasion arises.

Program Outcomes

- Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- Written **Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

GERM& 123 - German III

Credits: 5

Introduces the systematic study of German with emphasis on speaking and listening. Includes basic grammar, vocabulary, reading, writing, and conversation practice. Fulfills University of Washington College of Arts and Sciences graduation requirements.

Enrollment Requirement: GERM& 122 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate basic proficiency four basic skills: listening, reading, speaking, and writing.
- Interpret and illustrate cultural concepts and historical background materials as occasion arises.

Program Outcomes

- Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- Written **Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

GERM 128 - German Life & Culture

Credits: 5

Explores various elements of culture in Germany and other German-speaking countries. Focuses on modern life in relation to cultural priorities, traditions, and popular culture. Features key cultural topics such as the arts, literature, food, innovation, and

sustainability. Analyzes the persisting differences between former East and West Germany post-reunification and its evolution into the modern-day crossroads of Europe. Examines Germany's changing social dynamics as influenced by its status as a primary destination for immigrants and refugees, both in recent times and in previous eras. Course instructed in English.

Enrollment Requirement: Eligible for ENGL 99.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Compare and contrast traditional and modern German culture and society.
- Assess contributions of women in recent German history.
- Examine "Vergangenheitsbewältigung" or how Germans come to terms with their own history.
- Analyze popular works representing German culture in music, film, architecture, literature, and influential thinkers of the time.
- Identify differences in life between East and West Germany and the effects of German reunification.
- Demonstrate intercultural competence to work and/or live in a German-speaking country.

Program Outcomes

- Analyze cultural perspectives and values of a multicultural world.
- Form, analyze, and assess beliefs while demonstrating intellectual humility and respect towards the beliefs of others.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

GERM 194 - Special Studies-German

Credits: 1-5

Offers special subject matter that is not part of the regular German curriculum. Content varies depending upon requests from students or the opportunity to present unusual

topics.

Course Outcomes:

Students who successfully complete this class will be able to:

- Course outcomes to be mutually agreed upon between instructor and student.

Program Outcomes

Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- Written **Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

GERM& 221 - German IV

Credits: 5

Systematic review of German grammar. Practice in listening, speaking, reading, and writing. Oral practice through scaffolded conversations and discussions of selected German texts.

Enrollment Requirement: GERM& 123 with a grade of 2.0 or higher or placement by language instructor; eligible for ENGL 99.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate the ability to use oral and written German in real life scenarios.
- Make comparisons and express opinions.
- Narrate events using the present and the past tenses.
- Examine texts in German from literature and media.
- Demonstrate knowledge of the historical and lingering impacts of World War 2 and the post-war era.

Program Outcomes

Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- Written **Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.
- Responsibility - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

GERM& 222 - German V

Credits: 5

Systematic review of German grammar. Practice in listening, speaking, reading, and writing at an intermediate level. Oral practice through scaffolded conversations and discussions of selected German texts and media.

Enrollment Requirement: GERM& 221 with a grade of 2.0 or higher or placement by a language instructor; eligible for ENGL 99.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Discuss the historical and lingering impacts of Cold War and reunification.
- Improve oral and written fluency by using conjunctions and relative clauses.
- Analyze texts in German from literature and media.
- Use the hypothetical in all tenses.

Program Outcomes

Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

GERM& 223 - German VI

Credits: 5

Systematic review of German grammar aimed at an upper intermediate level. Intensive practice in listening, speaking, reading, and writing with special emphasis on reading and reacting to texts and media in German.

Enrollment Requirement: GERM& 222 with a 2.0 or higher or instructor approval; eligible for ENGL 99.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Examine historical events that have spurred immigration to and away from Germany and how that has shaped modern German identity
- Use reported speech to explain past events in formal situations.
- Make predictions and set goals using subjunctive and future perfect.
- Use the genitive case.

Program Outcomes

Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

Health**HEALTH 102 - Fundamentals of Healthcare and the Human Body**

Credits: 5

Covers the basics of human anatomy and physiology including anatomical terminology, basic biochemistry, cells and tissues, and the integumentary, skeletal, muscular, nervous, endocrine, cardiovascular, lymphatic/immune, respiratory, digestive, urinary, and reproductive systems. Introduces common human disease processes and general medical terminology. Includes an introduction to the foundational skills necessary to work in healthcare including critical thinking, communication, legal and ethical responsibilities, safety, and professional development. Previously HEALTH 101.

Enrollment Requirement: Instructor consent.

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Explain the organization of the human body, role of genetics, lifestyle and aging in health.
- Explain growth and development across the lifespan.
- Explain the large organ system and the basic anatomy and physiology of common diseases and disabilities.
- Demonstrate basic professional communication skills needed to work effectively with supervisors, fellow staff members and patients/clients.

- Identify responsibilities relative to legal issues, which include patient client confidentiality and HIPAA compliance.
- Demonstrate an awareness of different cultural health practices and the importance of respecting a variety of cultural beliefs in the workplace.
- Demonstrate the healthcare worker's role and responsibilities regarding ethics, legal obligations, and abuse laws.
- Demonstrate basic medical math skills and describe the necessity for accuracy with medication calculations and dosages.
- Define social determinants of health and vulnerable populations.
- Define the importance of advocacy for the populations we care for within the scope of practice.

Program Outcomes

- Demonstrate problem solving, critical thinking approaches utilized in patient care settings.
- Use ethical principles in practice, conduct, and relationships with patients, staff, and families.
- Identify with the values of the profession and incorporate them into practice.
- Promote a positive public image of nursing assistant as a positive role model.
- Utilize communication skills to establish and maintain a therapeutic relationship with patients, families, and staff.
- Execute competencies required for beginning practice as a nursing assistant.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

HEALTH 104 - Safety, Basic Life Support and Infection Control

Credits: 2

Education and training for health care providers on workplace safety, infection control measures, and cardiopulmonary resuscitation (CPR). Students learn about healthcare-acquired infections and other serious infections from a variety of microorganisms and learn how to protect themselves and others from these infections. Students learn theory and practice of infant, child, and adult CPR, automated external defibrillation (AED), and bag-mask valve techniques for individuals who are responsible for delivering emergency care. CPR is taught according to American Heart Association guidelines for Health Care Providers. An American Heart Association Health Care Provider card will be awarded upon successful completion of the course. Previously HEALTH 127.

Enrollment Requirement: Instructor consent.

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify the signs, symptoms, and chain of survival of heart and brain attack.
- Describe the chain of infection and apply the chain of infection model to various infectious pathogens.
- State the precautions healthcare workers use to prevent transmission of blood-borne pathogens, airborne pathogens, aerosol pathogens, and contact pathogens.
- Identify risk factors and clinical manifestations for specific serious infectious pathogens such as HIV/AIDS, Hepatitis B & C, tuberculosis, influenza, MRSA, C. diff and COVID-19.
- Critically explore the importance of vaccination programs and proper antibiotic stewardship in healthcare.
- Demonstrate proper CPR techniques and understanding of signs and symptoms of cardiac attack.

Program Outcomes

- Demonstrate problem solving, critical thinking approaches utilized in patient care settings.
- Use ethical principles in practice, conduct, and relationships with patients, staff, and families.
- Identify with the values of the profession and incorporate them into practice.
- Promote a positive public image of nursing assistant as a positive role model.
- Utilize communication skills to establish and maintain a therapeutic relationship with patients, families, and staff.
- Execute competencies required for beginning practice as a nursing assistant.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Health Education

HL ED 150 - Total Wellness

Credits: 5

Explores wellness and provides students with the information necessary to make informed choices and decisions regarding physical activity, diet/weight control, nutrition, death and dying, recognizing and reducing stress, relaxation techniques, relationships, environmental issues, and risk factors for disease. Taught by a team of instructors.

Course Fee: \$2.50

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate an enhanced awareness of the relationship between lifestyle behaviors and disease.
- Define the various components of wellness.
- Recognize and define the impacts of stress, nutrition and exercise on overall health and wellness.
- Develop strategies to manage their stress, improve nutrition, and incorporate exercise into their daily lives.
- Recognize and define the impact of behavior and lifestyle habits on cardiovascular health, cancer, and sexually transmitted diseases.
- Develop strategies to reduce their risk of cardiovascular disease, cancer and sexually transmitted diseases.
- Demonstrate an enhanced understanding of death and dying including personal wishes/values, expenses, preparation, media influence, and perspective.
- Evaluate their personal health and wellness.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

HL ED 180 - Food and Health

Credits: 3

Explores diet and its relationship to the health and vitality of the individual. Provides practical information necessary for evaluating nutritional needs, obtaining essential nutrients, gaining strategies for improving dietary intake, practicing food safety, and understanding food labeling. Also focuses on diet and weight control, body image, and eating disorders, along with diet and disease.

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate an enhanced awareness of the relationship between food and health.
- Understand the recommended intake and function of specific nutrients such as carbohydrates, proteins, fats, vitamins, minerals and water.
- Define how nutrition impacts weight status, eating disorders, body image, and lifestyle risk factors for chronic disease such as diabetes, heart disease and stroke, and cancer.
- Identify lifestyle risk factors for chronic disease such as osteoporosis, diabetes, cardiovascular disease and cancer.
- Develop strategies to reduce their risk of chronic disease such as osteoporosis, diabetes, heart disease and stroke.
- Track and analyze their dietary intake.
- Evaluate their personal health.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

HL ED 190 - Standard First Aid/CPR

Credits: 3

American Red Cross requirement for First Aid and CPR certification may be met. Covers adult, child, and infant first aid, CPR, rescue breathing, medical emergencies, bandaging, splinting and transporting.

Course Fee: \$35.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply American Red Cross First Aid and personal safety procedures for infants, children and adults.
- Recognize emergencies and prevent accidents.
- Deal more efficiently with emergency situations.
- Practice and develop skill in checking a victim.
- Practice and develop skill in rescue breathing.
- Practice and develop skill in aiding a choking victim.
- Practice and develop skill in CPR.
- Practice and develop skill in splinting and bandaging a victim.
- Practice and develop skill in moving/transporting victims.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

HL ED 198 - Independent Study-Health

Credits: 3

For any student wishing to develop a basic knowledge in health when there is no offering in the regular curriculum.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate an enhanced awareness of various components of health/wellness.
- Increase knowledge in and understanding of various components of health/wellness.
- Develop strategies to reduce their risk of chronic disease such as osteoporosis, diabetes, heart disease, stroke or cancer.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Health Science

H SCI 110 - Exploring Healthcare Careers

Credits: 3

Explores career options in the healthcare field. Covers qualities of the health care worker, how to prepare for a career in health care, cultural issues in health care, and an overview of the many health care career options.

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe the personal characteristics necessary to be an effective health care worker.
- Describe the responsibilities of the different health care careers.
- Compare and contrast the following factors among professions: educational requirements, employment trends, opportunities for advancement, salary potential, career ladders.

- Identify the professionals who do similar tasks or have similar responsibilities.
- Discuss the impact of culture on health care.
- Describe the life-span perspective as it relates to health care.
- Identify the steps necessary to prepare for a career in health care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

H SCI 112 - Introduction to Healthcare Skills and Functions

Credits: 2

Students are instructed in general patient care basics including infection control and measuring vital signs, body mechanics and transfers along with professional behavior and awareness. Students also earn CPR/First Aid for healthcare professionals and HIV/AIDS certification and HIPAA certificates upon completion of the course.

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate basic professional communication skills needed to work effectively with supervisors, fellow staff members and patients/ clients.
- Identify responsibilities relative to legal issues, which include patient client confidentiality and HIPAA compliance.
- Demonstrate an awareness of different cultural health practice and the importance of respecting a variety of cultural beliefs in the workplace.
- Demonstrate good hand washing skills and donning and doffing gloves for knowledge of universal precautions and blood borne pathogens.
- Demonstrate basic ability to accurately measure and record vital signs, which include pulse, blood pressure, body temperature and respiration.
- Describe and demonstrate the principles of correct body mechanics.
- Demonstrate the ability to perform and assist with turning and repositioning of patients.
- Demonstrate the ability to perform and assist with transfers.
- Earn mandatory 7-hour HIV/Aids certification.

- Earn certified CPR/First aid for Healthcare Professionals card/certificate.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

H SCI 113 - Introduction to Anatomy and Physiology

Credits: 3

Covers the basics of human anatomy and physiology including anatomical terminology, basic biochemistry, cells and tissues, and the integumentary, skeletal, muscular, nervous, endocrine, cardiovascular, lymphatic/immune, respiratory, digestive, urinary, and reproductive systems. Introduces common human disease processes and general medical terminology. Prepare students to take advanced anatomy and physiology courses.

Course Outcomes:

Students who successfully complete this class will be able to:

- Understand the organization of the human body, role of genetics, lifestyle and aging in health.
- Understand the growth and development across the lifespan.
- Understand the large organ system and the basic anatomy and physiology and diseases.
- Understand common physical and mental disabilities.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

High School Completion

HSC 25 - Civics and Government

Credits: 3-5

Introduces students to the American political system; its core values and principles as set forth in foundational documents, as well as its origins, institutions and operations. Includes brief treatments of political parties, historic development of American politics, civil liberties, plus taxes and budgets. Introduces students to the rights and

responsibilities of citizenship and of democratic civic involvement.

Enrollment Requirement: Eligible for ENGL 97; or TS 75; or instructor consent.

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Understand and be able to explain the core values and principles of U.S. democracy as set forth in foundational documents, including the Declaration of Independence and the Constitution; analyze the purposes and organization of governments and laws; understand the rights and responsibilities of citizenship and the principles of democratic civic involvement, and; understand basic economic concepts and analyze the effect of economic systems on individuals, groups, and society.
- Civics and Government addresses the examining diversity outcome, which encompasses the knowledge, attitudes and skills necessary for students to understand power; to function responsibly in a diverse, global society; and to gain a critical awareness of the social construction of race, ethnicity, gender, class, sexual orientation, disability, culture, religion, and age ' in local, national and global contexts.
- Recognize one's social position and geopolitical location, along with the consequences of both.
- Examine economic, political, and social inequalities and their effects on communities.
- Analyze the multiple histories, cultures, perspectives, contributions and/or struggles of various peoples, and.
- Collaborate and interact effectively, equitably and respectfully in diverse groups within the classroom or campus-related workplaces and practice areas.

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

HSC 97 - High School Completion World Languages PLA

Credits: 5-20

This course awards prior learning credit for high school World Languages based on student's ability to demonstrate competency via assessment. This is a pass/no credit

course.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate at least novice mid-level of proficiency in World Language communication skills (listening, speaking, reading, and writing) determined through the guidelines set up by the American Council on the Teaching of Foreign Languages (ACTFL).

Program Outcomes

Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

History

HIST 21 - U.S. History 1

Credits: 5

Covers U.S. history from pre-Colombian times through Reconstruction. Explores topics in political, economic, social, intellectual, cultural, diplomatic and military history.

Course Outcomes:

Students who successfully complete this class will be able to:

- Gain considerable knowledge of issues, groups and personalities in U.S. history through (a) reading good historical literature, (b) researching topics of current and historical interest, (c) observing the national experience through films, video and other media, (d) discussing reading and findings, and (e) writing papers to refine readings, research, and discussions.

Program Outcomes

- Analyze how historical developments have various effects on people based on one or more of the following areas: geographical location, race, ethnicity, cultural traditions, gender and class.
- Distinguish between opinions, facts, and evidence-based interpretations.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of

emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

HIST 22 - U.S. History 2

Credits: 5

Covers U.S. History from Reconstruction to contemporary times. Explores topics in political, economic, social, intellectual, cultural, diplomatic and military history.

Course Outcomes:

Students who successfully complete this class will be able to:

- Gain considerable knowledge of issues, groups and personalities in U.S. history through (a) reading good historical literature, (b) researching topics of current and historical interest, (c) observing the national experience through films, video and other media, (d) discussing reading and findings, and (e) writing papers to refine readings, research, and discussions.

Program Outcomes

- Analyze how historical developments have various effects on people based on one or more of the following areas: geographical location, race, ethnicity, cultural traditions, gender and class.
- Distinguish between opinions, facts, and evidence-based interpretations.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

HIST 24 - Pacific Northwest and Washington State History

Credits: 5

Examines the emergence of the modern Pacific Northwest beginning with the earliest geological creation of the region and continuing with Native American habitation, contact with Euro-Americans, the development of trade and early settlement, the development of an industrial economy, the cycle of 20th century wars and depression, and the post-

World War II emergence of the Pacific Northwest.

Course Outcomes:

Students who successfully complete this class will be able to:

- Develop an understanding of the environmental, political, social, and economic issues that have led to the creation of the modern Pacific Northwest.
- Read important historical literature and documents to enhance their understanding of the region.
- Explore topics of current and historical interest in the region.
- Observe regional and local conditions in the historic and modern PNW through personal observation.
- Write short papers and essay exams to refine their understanding of readings, observations, and field experiences.

Program Outcomes

- Analyze how historical developments have various effects on people based on one or more of the following areas: geographical location, race, ethnicity, cultural traditions, gender and class.
- Distinguish between opinions, facts, and evidence-based interpretations.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

HIST 120 - History of the Movies

Credits: 5

Examines the emergence of movies as a form of popular culture during the early decades of the 20th century, traces their development through the introduction of sound and color, the competition with the new medium of television, and concludes with the movie's emergence as a pervasive world culture at the beginning of the 21st century.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Social Science

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify and describe basic film terminology.

- Identify and describe basic film techniques and styles.
- Identify and describe key attributes of American film movements by thematic, visual, and aural traits.
- Describe and analyze the economic, social, and political factors that shape major film/film movements.
- Analyze significant films within their historical and cultural contexts through technological advances of motion pictures throughout history.

Program Outcomes

- Distinguish between opinions, facts, and evidence-based interpretations.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

HIST 122 - History of Australian Movies

Credits: 5

Examines the emergence of a unique Australian cinema during the early decades of the 20th century, the struggle to maintain independence from the Hollywood and British film industry, and the development of an internationally recognized Australian style in the later decades of the 20th century.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Social Science

Course Outcomes:

Students who successfully complete this class will be able to:

- Discuss the historical development of the film industry in Australia.
- Identify and provide examples of a uniquely Australian cinema.
- Critically and aesthetically evaluate Australian cinema within the context of Australian film, Hollywood films, and World Cinema.
- Place specific Australian films within the historical context of the development of a unique Australian cinema.

Program Outcomes

- Analyze how historical developments have various effects on people based on one or more of the following areas: geographical location, race, ethnicity, cultural traditions, gender and class.
- Distinguish between opinions, facts, and evidence-based interpretations.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

HIST& 126 - World Civilizations I

Credits: 5

Introduces the major world civilizations from pre-history through the medieval epoch, approximately 1300. Emphasizes socio-political formations, cultural and religious expressions of Mesopotamia, Egypt, India, Asia, Africa, and Europe. Previously HIST 101.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Social Science

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify, describe and compare human settlement and the emergence of civilizations.
- Analyze and compare ancient urban development, including architecture and public works.
- Analyze and compare the various forms of ancient socio-political groupings.
- Describe, analyze and compare the major ancient world religious expressions/philosophies.
- Describe and evaluate basic patterns of war, conquest, and empire.

Program Outcomes

- Distinguish between opinions, facts, and evidence-based interpretations.

College-wide Outcomes

- **Critical Thinking** -Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as

necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

HIST& 127 - World Civilizations II

Credits: 5

Introduces the major world civilizations from the medieval to the modern epoch, approximately 1800. Emphasizes the Renaissance and Reformation, Age of Science and Enlightenment, Colonial and Trans-Atlantic Age, Age of Revolution, Ming and Qing China, and Age of Empire in the Middle East. Previously HIST 102.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Social Science

Course Outcomes:

Students who successfully complete this class will be able to:

- Analyze and synthesize traditional and early modern folk practices, religious beliefs and challenges of the period 1350-1800.
- Describe scientific innovation and economic expansion 1350-1800.
- Describe, compare and contrast distinctive global regional cultures.
- Describe, analyze and evaluate contact between regional powers.

Program Outcomes

- Distinguish between opinions, facts, and evidence-based interpretations.

College-wide Outcomes

- **Critical Thinking** -Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

HIST& 128 - World Civilizations III

Credits: 5

Introduces world history in the 19th and 20th centuries. Themes include industrialization, cultural revolutions, political modernization, colonialism and decolonization, world wars, Cold War, globalization, terrorism, and other contemporary problems. Previously HIST 103.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Social Science and Diversity

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe, analyze, and compare revolutions of modernization, basic political ideologies of liberalism, socialism, communism, conservatism, and fascism.
- Describe and evaluate social change in relation to industry and technology.
- Compare and contrast patterns of imperialism, decolonization, and nationalism.
- Describe, analyze, and interpret the causes and consequences of World Wars.
- Describe, analyze, and assess global politics and economics of development; multi-culturalism vs mass culture; and global urbanization and environmental concerns.

Program Outcomes

Distinguish between opinions, facts, and evidence-based interpretations.

College-wide Outcomes

- **Critical Thinking** -Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

HIST 135 - The United States Since 1940

Credits: 5

Surveys U.S. history since 1940. Explores topics in social, cultural, intellectual, economic, political, military and foreign affairs history. Studies the contributions of minorities and women to U.S. history.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Social Science

Course Outcomes:

Students who successfully complete this class will be able to:

- Explain and analyze the U.S. role in World War II and the significant attitudes about U.S. power that emerged from the victory.
- Understand and compare major interpretations of the Cold War including its origins, key events, and demise.
- Understand the principal social, economic, cultural, political, and intellectual changes that define the period under study.

- Identify and describe the major political events and leading personalities that helped to shape the contemporary United States.

Program Outcomes

- Analyze how historical developments have various effects on people based on one or more of the following areas: geographical location, race, ethnicity, cultural traditions, gender and class.
- Distinguish between opinions, facts, and evidence-based interpretations.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

HIST& 136 - U.S. History I

Credits: 5

First quarter survey of U.S. history commencing with Native American origins and concluding with Reconstruction. Emphasizes the contributions of minority groups in the development of U.S. society. Focuses on major interpretations and revisionist schools of historical literature.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Social Science

Course Outcomes:

Students who successfully complete this class will be able to:

- Understand the major ideas, values, beliefs, and experiences that shaped colonial and 19th century American history and society.
- Understand the relationship between the individual and the politics, economics, society, and culture of America.
- Understand the methods by which historians study individuals, cultures, and society.
- Better understand the basis for political, racial, societal, and economic issues in contemporary America.

Program Outcomes

- Analyze how historical developments have various effects on people based on one or more of the following areas: geographical location, race, ethnicity, cultural traditions, gender and class.
- Distinguish between opinions, facts, and evidence-based interpretations.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

HIST& 137 - U.S. History II

Credits: 5

Second quarter survey of U.S. history, commencing in 1877 and ending with contemporary affairs. Emphasizes the contributions of minority groups to the development of American society. Focuses on major interpretations and revisionist schools of historical literature.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Social Science

Course Outcomes:

Students who successfully complete this class will be able to:

- Understand the major ideas, values, beliefs, and experiences that shaped 19th-century American history and society to the present.
- Understand the relationship between the individual and the politics, economics, society, and culture of America.
- Understand the methods by which historians study individuals, cultures, and society.
- Understand the basis for political, racial, societal, and economic issues in contemporary America.

Program Outcomes

- Analyze how historical developments have various effects on people based on one or more of the following areas: geographical location, race, ethnicity, cultural traditions, gender and class.
- Distinguish between opinions, facts, and evidence-based interpretations.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

HIST 194 - Special Topics - History

Credits: 1-5

An in-depth study of specific topics in history or direct involvement in a historically oriented project. May be in a seminar format, research focused or service learning.

Course Outcomes:

Students who successfully complete this class will be able to:

- Achieve an in-depth understanding of a specific topic or area of history.

Program Outcomes

- Analyze how historical developments have various effects on people based on one or more of the following areas: geographical location, race, ethnicity, cultural traditions, gender and class.
- Distinguish between opinions, facts, and evidence-based interpretations.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

HIST& 214 - Pacific Northwest History

Credits: 5

Examines the emergence of the modern Pacific Northwest beginning with the earliest geological creation of the region and continuing with Native American habitation, contact with Euro-Americans, the development of trade and early settlement, the development of an industrial economy, the cycle of 20th century wars and depression, and the post-World War II emergence of the Pacific Northwest.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe and compare how different nations colonized the Pacific Northwest and the relationships that formed between Native Peoples and those nations.
- Explain how, when, and why the Pacific Northwest developed from a resource-based economy, to an industrial, to a post-industrial economy.
- Describe and explain the historical factors that created the social, political, and economic variation that exists within the contemporary Northwest.
- Describe and explain how and why the relationship between people and the natural environment of the Pacific Northwest has changed over time.

Program Outcomes

- Analyze how historical developments have various effects on people based on one or more of the following areas: geographical location, race, ethnicity, cultural traditions, gender and class.
- Distinguish between opinions, facts, and evidence-based interpretations.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

HIST& 215 - Women in U.S. History

Credits: 5

A survey of women's lives and gender systems in US history from the Civil War to the present. Explores topics from women's participation in politics, social roles, labor and family history. Course focuses on diverse experiences based on race, social class, sexual orientation and religion.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science and Diversity

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify and describe gender as an analytic category in the study of US History to the present, including historical phenomena such as the construction of gender roles (feminine and masculine), religious beliefs and practices, race, social class, and sexual identities.
- Identify and explain the major contours of women's history in the US up to the present in regard to matters such as: family life, reproduction and health, sex and sexuality, race and ethnicity, education, labor, politics, and religion.
- Demonstrate knowledge of how women helped shape and were shaped by major historical episodes in US History such as the American Revolution, Civil War, Reconstruction, Progressive Age, economic depressions and world wars, cultural and racial upheavals of the 50s and 60s to present.

Program Outcomes

- Analyze how historical developments have various effects on people based on one or more of the following areas: geographical location, race, ethnicity, cultural traditions, gender and class.
- Distinguish between opinions, facts, and evidence-based interpretations.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as

necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

HIST& 220 – African American History

Credits: 5

A broad survey of African American history. Begins with an overview of West African cultures prior to the rise of the slave trade and ends with a discussion of modern events. Topics include the rise of slavery in the Americas, the origin and development of American ideas about race, the formation of an African American culture, the Civil War and emancipation, the era of Jim Crow, and the struggle for civil rights from the 18th century to the present. Explores various interpretations and theoretical ideas about African American history. Shows that African American history is central to U.S. history. Previously HIST 224.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science and Diversity

Course Outcomes:

Students who successfully complete this class will be able to:

- Understand the main themes and events in African American history.
- Understand that African American history is central to the American experience and the development of U.S. history.
- Examine how ideas and definitions of race originated and have developed throughout U.S. history.
- Understand how and why interpretations of African American culture have changed over time.

Program Outcomes

- Analyze how historical developments have various effects on people based on one or more of the following areas: geographical location, race, ethnicity, cultural traditions, gender and class.
- Distinguish between opinions, facts, and evidence-based interpretations.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

HIST 228 - Latinos in the United States

Credits: 5

Examines the historical, social and economic experience of Latinos in the United States. Begins with the Spanish borderlands in the 16th century and ends with contemporary affairs. Explores the histories of Mexicans, Puerto Ricans, Cubans, Dominicans and Central Americans in the United States within the context of U.S. relations with the countries of origin and changes over time in the U.S. society and economy. Assesses the historical construction of race and ethnicity, gender, and the changing forms of identity.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science and Diversity

Course Outcomes:

Students who successfully complete this class will be able to:

- Assess the historical construction of race and ethnicity, gender and changing forms of identity among Latinos/as/x in the United States.
- Explore the history of Latinos/as/x immigration within the context of U. S. relations with the countries of origin.
- Examine the process of Latino/a/x immigrants becoming Americans.
- Explore the diversity of Latino/a/x communities in the United States.

Program Outcomes

- Analyze how historical developments have various effects on people based on one or more of the following areas: geographical location, race, ethnicity, cultural traditions, gender and class.
- Distinguish between opinions, facts, and evidence-based interpretations.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

HIST 230 - Modern Europe

Credits: 5

Offers a broad survey of European history in the twentieth century. Covers events such as World War I; the Bolshevik Revolution and the ensuing Soviet experiment; the Spanish Civil War; Nazism, World War II, and the Holocaust; the post-colonial legacy; the Cold War in Europe; the collapse of communism; and the Balkan Wars in the 1990's. Focuses on primary documents, including memoirs, novels, political manifestos, and government and other official documents. Includes Model European Parliament, Model United Nations, and/or Model International Court of Justice.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science

Course Outcomes:

Students who successfully complete this class will be able to:

- Explain how and why various groups, including communists and fascists, undermined parliamentary democracy through the establishment of regimes that maintained dictatorial control while manipulating democratic processes.
- Explain how new ideas of political authority and the failure of diplomacy led to world wars, political revolutions, and the establishment of totalitarian regimes.
- Assess the role of European colonization and de-colonization in non-European societies from both European and non-European perspectives.
- Evaluate the role of nationalism in altering the European balance of power, and explain attempts made to limit nationalism as a means to ensure continental stability.

- Analyze the origins, characteristics, and effects of the post-WWII economic, political and judicial integration of Europe.
- Trace the changing relationship between states and ecclesiastical authority and the emergence of the principle and practice of religious toleration.
- Analyze how various movements for political and social equality - such as feminism, anticolonialism, and campaigns for immigrants' rights - pressured governments and redefined national citizenship.

Program Outcomes

- Analyze how historical developments have various effects on people based on one or more of the following areas: geographical location, race, ethnicity, cultural traditions, gender and class.
- Distinguish between opinions, facts, and evidence-based interpretations.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

HIST 231 - Modern Asia

Credits: 5

Deals with the historical factors that shaped the domestic and international relations of China, Japan, and Korea. Focuses on the evolution of political and economic power of those countries from 1850 to the present. Gives attention to the role of religious and philosophical backgrounds and to the changes that occurred in the economic, social and political structures of these societies.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science

Course Outcomes:

Students who successfully complete this class will be able to:

- Explain the broad political history of Modern Asia, including imperialism, nationalism and modernization.
- Describe relations between Asian cultures and nations and explain how new ideas of political authority, ideology and nationalism led to war and peace.
- Describe and evaluate the process, successes and challenges of postcolonial development.

- Analyze how various movements for political and social equality - such as anticolonialism, and immigrants' rights, for examples - pressured governments and redefined national citizenship.
- Describe major cultural movements of Modern Asia.

Program Outcomes

- Analyze how historical developments have various effects on people based on one or more of the following areas: geographical location, race, ethnicity, cultural traditions, gender and class.
- Distinguish between opinions, facts, and evidence-based interpretations.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

HIST 233 - History of Latin America

Credits: 5

Surveys the history of Latin America from its indigenous, Iberian, and African roots through contemporary affairs. Assesses the historical construction of racial, class, and gender inequalities. Emphasizes the historical diversity of the region and examines common social, economic and political problems.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science and Diversity

Course Outcomes:

Students who successfully complete this class will be able to:

- Examine indigenous, Iberian and African societies and cultures before the age of conquest.
- Assess the social, political, cultural and economic consequences of the European conquest.
- Examine the construction of racial, class, and gender inequalities that emerged from pre-colonial and colonial times and their impact on the lives of Latin Americans.
- Examine the struggle to create nations in the nineteenth century and the pervasiveness of social inequality.
- Explore popular mobilization and social revolution against neocolonial social hierarchies.
- Assess the impact of neoliberalism on contemporary Latin America.

Program Outcomes

- Analyze how historical developments have various effects on people based on one or more of the following areas: geographical location, race, ethnicity, cultural traditions, gender and class.
- Distinguish between opinions, facts, and evidence-based interpretations.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

HIST 237 - History of Australia and New Zealand

Credits: 5

Examines the history of the Australasian nations of Australia and New Zealand from the first human inhabitation of Australia some 60,000 years ago and the Maori settlement of New Zealand some 900 years ago through the long and often difficult processes of becoming the modern island nations of Australia and New Zealand. Gives attention to the various groups who have migrated to Australasia, the European exploration and colonization of the area, the development of settlements and colonial governments, the move to nationhood in the late 19th century, and the emergence of the modern nations of Australia and New Zealand in the 20th century

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science

Course Outcomes:

Students who successfully complete this class will be able to:

- Understand the historical development of Australia and New Zealand as island nations.
- Identify and recognize events that are uniquely Australian and New Zealand.
- Place Australian and New Zealand history within the larger context of World and Regional history.
- Critically and aesthetically evaluate the development of uniquely Australian and New Zealand culture.

Program Outcomes

- Analyze how historical developments have various effects on people based on one or more of the following areas: geographical location, race, ethnicity, cultural traditions, gender and class.
- Distinguish between opinions, facts, and evidence-based interpretations.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

HIST 240 - The Civil War

Credits: 5

Studies the events and conditions leading to the Civil War, the conflict itself, and the war's legacy. Begins with a review of the roots of slavery in the British colonies, the consolidation of slavery as a major institution, and its increasing influence in the polarization of the young republic. Examines a number of important developments such as the Missouri Compromise, Manifest Destiny, the divisive events of the 1850s, the election of Abraham Lincoln, the constitutional crisis and secession, the Confederacy and Unions political, economic, and military strategies, the reality of total war, the military campaigns and decisive battles. Concludes with an examination of the legacy of conflict.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science

Course Outcomes:

Students who successfully complete this class will be able to:

- Understand the major causes of the Civil War.
- Understand the history of slavery in the United States.
- Understand the key phases of the conflict and their significance.
- Understand the main constitutional questions raised by the war and its aftermath.
- Understand the era of Reconstruction.
- Understand various historical interpretations of the Civil War and its legacy.

Program Outcomes

- Analyze how historical developments have various effects on people based on one or more of the following areas: geographical location, race, ethnicity, cultural traditions, gender and class.
- Distinguish between opinions, facts, and evidence-based interpretations.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as

necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

HIST 250 - The Vietnam War

Credits: 5

Traces the background of the Vietnam War to the eventual direct involvement of the United States, Russia and China in the revolt of the Vietnamese against French colonialism in Indo-China. A major portion of the course deals with the period from the defeat of the French at Dienbienphu in 1954 to the defeat of South Vietnam by the North in April 1975. Examines recent historical interpretations and debates over the war.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science

Course Outcomes:

Students who successfully complete this class will be able to:

- Understand the geographical and cultural complexity within the region.
- Learn both short- and long-range cause and effect of the historical forces at work upon the Vietnamese in particular.
- Learn the cause and effect of the first and second Vietnam War.
- Learn the sequence of major historical events during the wars.
- Study various historical interpretations of the war and the debate over legacies of the wars.

Program Outcomes

- Analyze how historical developments have various effects on people based on one or more of the following areas: geographical location, race, ethnicity, cultural traditions, gender and class.
- Distinguish between opinions, facts, and evidence-based interpretations.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work

products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

Humanities

HUMAN 110 - Background for the Humanities

Credits: 5

Study of the common language of the arts and humanities and their relationship to the societies in which they were created. Includes the study of critical concepts and vocabulary, as well as common motifs and elements in the humanities. Also includes the study of the relationship between arts and humanities of a culture and that culture's economic, political and technological environment.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Outcomes:

Students who successfully complete this class will be able to:

- Know the sources to find material for understanding artistic works and other areas of the humanities.
- Acquire factual background information through a study of critical terms.
- Understand relationship within the arts and other humanities.
- Apply above knowledge to specific works.

Program Outcomes

- Demonstrate intellectual humility in forming and defending their own beliefs while being respectful of the views of others.
- Systematically formulate, develop, and defend non-trivial answers to philosophical questions by applying rational standards.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of

emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

HUMAN 133 - People, Language and Culture

Credits: 5

Examines the relationship between people, language and culture, in particular how the language of a national or ethnic group provides a key to understanding the people who speak that language. Explores the fundamentals of cross-linguistic writing systems and language change. Pulls from the disciplines of linguistics, literature, religion, mythology, art, music and /or history as a basis to study modern people, language and culture.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Discuss the global relationship between people, language and culture.
- Identify the cross-linguistic connection of the world's languages.
- Examine some of the differences among the world's peoples, languages and cultures.
- Relate oneself to languages and cultures of the world in a multicultural context.
- Discuss global writing systems and the process they have undergone to produce modern systems.
- Express viewpoints that demonstrate growth in intercultural competence.

Program Outcomes

- Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

HUMAN 160 - Introduction to Gender Studies

Credits: 5

Examines theoretical concepts and themes of gender through the lens of the Humanities (including literature, philosophy, film, communication studies, and popular culture, among other subjects). Course synthesizes historical and social analyses into inquiry about the human experience and expression of gender. Course specifically examines issues such as language, media's treatment of gender, and gender and power, relating each of these to the formation of our gendered and human identities.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate command of important philosophical terminology, themes, and arguments related to sex, gender, and sexuality.
- Identify the influence of sex, gender, and sexuality on identity, language, communication (both verbal and nonverbal), values, media, power, and violence.
- State and evaluate non-trivial theories and arguments related to sex, gender, and sexuality.
- Recognize the dominance of Essentialist/Biological philosophical perspectives.
- Evaluate the suppression or denigration of identities which are intersectional, multiple, and fluid.

Program Outcomes

- Demonstrate intellectual humility in forming and defending their own beliefs while being respectful of the views of others.
- Systematically formulate, develop, and defend non-trivial answers to philosophical questions by applying rational standards.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

Integrated Basic Education and Skills Training

IBEST 2 - Introduction to Careers for ELL 2

Credits: 3-15

Provides an introduction for students interested in participating in an IBEST. Allows students to learn about each IBEST program and its' requirements. Gives students the necessary information to choose a program, while teaching the students study skills, employability skills, and improve their English in reading, writing, listening, and speaking. This is a pass/no credit course.

Enrollment Requirement: ELL 10 or appropriate CASAS score; or instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Ask and answer questions about key details in a text related to I-BEST as well as identify the main topic and retell those key details.
- Describe the connection between two events, ideas, or pieces of information in a text.
- Ask and answer questions to help determine or clarify the meaning of words and phrases in a text.
- Use various text features, illustrations and details to locate and describe key facts or information in a text.
- Write informative/explanatory texts in which they name a topic related to I-BEST, supply some facts about the topic, and provide some sense of closure.
- Write short narratives in which they include some details about their work history, education and future goals, and they will use a variety of digital tools to produce and publish writing, including in collaboration with peers.
- Ask and answer questions in order to seek help, get information, or clarify something that is not understood.
- Describe people, places, things, and events related to I-BEST with relevant details, expressing ideas and feelings clearly.
- Speak audibly and express thoughts, feelings, and ideas with increasing clarity.
- Use self-awareness and workplace skills to make decisions, work in teams, problem solve and present information.

Program Outcomes

Utilize language, math, and soft skills to move ahead in college and land high-demand, living wage jobs.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

IBEST 3 - Introduction to Careers for ELL 3

Credits: 3-15

Provides an introduction for ELL level 3 students interested in participating in an IBEST. Allows students to learn about each IBEST program and its requirements. Gives students the necessary information to choose a program, while teaching the students study skills, employability skills, and improve their English in reading, writing, listening, and speaking. This is a pass/no credit course.

Enrollment Requirement: ELL 20 or appropriate CASAS score; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Ask and answer questions about key details in a text related to I-BEST as well as identify the main topic and retell those key details.
- Describe with support the connection between two events, ideas, or pieces of information in a text.
- Ask and answer questions to help determine or clarify the meaning of words and phrases in a text.
- Use various text features, illustrations and details to locate and describe key facts or information in a text.
- Write informative/explanatory texts in which they name a topic related to I-BEST, supply some facts about the topic, and provide some sense of closure.
- Write short narratives in which they include some details about their work history, education and future goals, and they will use a variety of digital tools to produce and publish writing, including in collaboration with peers.
- Ask and answer questions in order to seek help, get information, or clarify something that is not understood.
- Describe people, places, things, and events related to I-BEST with relevant details, expressing ideas and feelings clearly.
- Speak audibly and express thoughts, feelings, and ideas with increasing clarity.
- Use self-awareness and workplace skills to make decisions, work in teams, problem solve and present information.

Program Outcomes

Demonstrate the language, math, and soft skills to move ahead in college and land high-demand, living wage jobs.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

IBEST 4 - Introduction to Careers for ELL 4

Credits: 3-15

Provides an introduction for ELL Level 4 students interested in participating in an IBEST. Allows students to learn about each IBEST program and its requirements. Gives students the necessary information to choose a program, while teaching the students study skills, employability skills, and improve their English in reading, writing, listening, and speaking. This is a pass/no credit course.

Enrollment Requirement: ELL 20 or appropriate CASAS score; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Ask and answer questions about key details in a text related to I-BEST as well as identify the main topic and retell those key details.
- Describe using support the connection between two events, ideas, or pieces of information in a text.
- Ask and answer questions to help determine or clarify the meaning of words and phrases in a text.
- Use various text features, illustrations and details to locate and describe key facts or information in a text.
- Write informative/explanatory texts in which they name a topic related to I-BEST, supply some facts about the topic, and provide some sense of closure.
- Write narratives in which they include some details about their work history, education and future goals, and they will use a variety of digital tools to produce and publish writing, including in collaboration with peers.
- Ask and answer questions in order to seek help, get information, or clarify something that is not understood.
- Describe people, places, things, and events related to I-BEST with relevant details, expressing ideas and feelings clearly.
- Speak audibly and express thoughts, feelings, and ideas with increasing clarity.
- Use self-awareness and workplace skills to make decisions, work in teams, problem solve and present information.

Program Outcomes

Demonstrate the language, math, and soft skills to move ahead in college and land high-demand, living wage jobs.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

IBEST 32 - Early Childhood Education Success for ELL 5

Credits: 3-10

A transitional studies course taught in the IBEST option for ECE where students receive additional instruction needed to succeed in the program and find employment. Students research and prepare presentations, utilize critical thinking strategies and study skills, effectively read course materials, comprehend skills demonstrations and participate in workplace discussions, and increase job search skills. This is a pass/no credit course.

Enrollment Requirement: Placement based on assessment measure; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Refer to details and examples in an ECE text when explaining what the text says explicitly and when drawing inferences from the text.
- Determine the main idea of written course materials for ECE recount the key details and explain how they support the main idea; summarize the text.
- Determine the meaning of general academic and domain-specific words and phrases in an ECE text.
- Write informative/explanatory texts to examine a topic regarding child development and convey ideas and information clearly.
- Produce clear and coherent writing in which the development and organization are appropriate to the task assigned.
- Develop and strengthen writing as needed by planning, revising, and editing, rewriting, or trying a new approach.
- Use technology, including the Internet, to produce and publish writing (using keyboarding skills) as well as to interact and collaborate with others.
- Gather information from print and digital sources; summarize or paraphrase information in notes and finished work, and provide a list of sources.
- Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners, building on others' ideas and expressing their own clearly.
- Verbally report on an assigned topic or text with appropriate facts and relevant, descriptive details, speaking clearly at an understandable pace.

Program Outcomes

Demonstrate the language, math, and soft skills to move ahead in college and land high-demand, living wage jobs.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

IBEST 33 - Early Childhood Education Success for ELL 6

Credits: 3-10

A transitional studies course taught in the IBEST option for ECE where students receive additional instruction needed to succeed in the program and find employment. Students research and prepare presentations, utilize critical thinking strategies and study skills, effectively read course materials, comprehend skills demonstrations and participate in workplace discussions, and increase job search skills. This is a pass/no credit course.

Enrollment Requirement: Placement based on assessment measure; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Cite several pieces of textual evidence from ECE text to support analysis of what the text says explicitly as well as inferences from the text.
- Determine the central idea of written course materials for ECE, provide summary of the text distinct from personal opinions or judgments.
- Determine the meaning of words and phrases as they are used in an ECE text.
- Write informative/explanatory texts to examine a topic about childhood development, health, and safety and convey ideas and information through the selection, organization, and analysis of relevant content.
- Produce clear and coherent writing in which the development and organization are appropriate to the task assigned.
- Develop and strengthen writing as needed by planning, revising, and editing, rewriting , or trying a new approach focusing on how well purpose and audience have been addressed.
- Use technology, including the Internet, to produce and publish writing and link to and cite sources as well as to interact and collaborate with others.
- Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source, and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
- Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners, building on others' ideas and expressing their own clearly.
- Present claims and findings emphasizing salient points in a focused, coherent manner with relevant evidence, valid reasoning, and well-chosen details; use appropriate eye contact, adequate volume, and clear pronunciation.
- Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.

Program Outcomes

Demonstrate the language, math, and soft skills to move ahead in college and land high-demand, living wage jobs.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

IBEST 35 - Early Childhood Education Success for TS 3

Credits: 3-10

A transitional studies course taught in the IBEST option for ECE where students receive additional instruction needed to succeed in the program and find employment. Students research and prepare presentations, utilize critical thinking strategies and study skills, effectively read course materials, comprehend skills demonstrations and participate in workplace discussions, and increase job search skills. This is a pass/no credit course.

Enrollment Requirement: Placement based on assessment measure; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Refer to details and examples in an ECE text when explaining what the text says explicitly and when drawing inferences from the text.
- Determine the main idea of written course materials for ECE recount the key details and explain how they support the main idea; summarize the text.
- Determine the meaning of general academic and domain-specific words and phrases in an ECE text.
- Write informative/explanatory texts to examine a topic regarding child development and convey ideas and information clearly.
- Produce clear and coherent writing in which the development and organization are appropriate to the task assigned.
- Develop and strengthen writing as needed by planning, revising, and editing, rewriting, or trying a new approach.
- Use technology, including the Internet, to produce and publish writing (using keyboarding skills) as well as to interact and collaborate with others.
- Gather information from print and digital sources; summarize or paraphrase information in notes and finished work, and provide a list of sources.
- Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners, building on others' ideas and expressing their own clearly.

- Verbally report on an assigned topic or text with appropriate facts and relevant, descriptive details, speaking clearly at an understandable pace.

Program Outcomes

Demonstrate the language, math, and soft skills to move ahead in college and land high-demand, living wage jobs.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

IBEST 36 - Early Childhood Education Success for TS 4

Credits: 3-10

A transitional studies course taught in the IBEST option for ECE where students receive additional instruction needed to succeed in the program and find employment. Students research and prepare presentations, utilize critical thinking strategies and study skills, effectively read course materials, comprehend skills demonstrations and participate in workplace discussions, and increase job search skills. This is a pass/no credit course.

Enrollment Requirement: Placement based on assessment measure; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Cite several pieces of textual evidence from ECE text to support analysis of what the text says explicitly as well as inferences from the text.
- Determine the central idea of written course materials for ECE, provide summary of the text distinct from personal opinions or judgments.
- Determine the meaning of words and phrases as they are used in an ECE text.
- Write informative/explanatory texts to examine a topic about childhood development, health, and safety and convey ideas and information through the selection, organization, and analysis of relevant content.
- Produce clear and coherent writing in which the development and organization are appropriate to the task assigned.
- Develop and strengthen writing as needed by planning, revising, and editing, rewriting, or trying a new approach focusing on how well purpose and audience have been addressed.
- Use technology, including the Internet, to produce and publish writing and link to and cite sources as well as to interact and collaborate with others.

- Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source, and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
- Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners, building on others' ideas and expressing their own clearly.
- Present claims and findings emphasizing salient points in a focused, coherent manner with relevant evidence, valid reasoning, and well-chosen details; use appropriate eye contact, adequate volume, and clear pronunciation.
- Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.

Program Outcomes

Demonstrate the language, math, and soft skills to move ahead in college and land high-demand, living wage jobs.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

IBEST 37 - Early Childhood Education Success for TS 5

Credits: 3-10

A transitional studies course taught in the IBEST option for ECE where students receive additional instruction needed to succeed in the program and find employment. Students research and prepare presentations, utilize critical thinking strategies and study skills, effectively read course materials, comprehend skills demonstrations and participate in workplace discussions, and increase job search skills.

Enrollment Requirement: Placement based on assessment measure; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Cite strong and thorough textual evidence to support analysis of what the ECE text says explicitly as well as inferences drawn from the text.
- Determine the central idea of written course materials for ECE; provide an objective summary of the text.
- Determine the meaning of words and phrases as they are used in an ECE text.

- Write informative/explanatory texts to examine and convey complex ideas and information about child development, health, and safety clearly and accurately through the effective selection, organization, and analysis of relevant content.
- Produce clear and coherent writing in which the development and organization are appropriate to the task assigned.
- Develop and strengthen writing as needed by planning, revising, and editing, rewriting, or trying a new approach addressing what is most significant for a specific purpose and audience.
- Use technology, including the Internet, to produce and publish writing and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibility and dynamically.
- Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess credibility and accuracy of each source, and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
- Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners, building on others' ideas and expressing their own clearly.
- Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.

Program Outcomes

Demonstrate the language, math, and soft skills to move ahead in college and land high-demand, living wage jobs.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

IBEST 38 - Early Childhood Education Success for TS 6

Credits: 3-10

A transitional studies course taught in the IBEST option for ECE where students receive additional instruction needed to succeed in the program and find employment. Students research and prepare presentations, utilize critical thinking strategies and study skills, effectively read course materials, comprehend skills demonstrations and participate in workplace discussions, and increase job search skills.

Enrollment Requirement: Placement based on assessment measure; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Cite strong and thorough textual evidence to support analysis of what the ECE text says explicitly as well as inferences drawn from the text.
- Determine the central idea of written course materials for ECE; provide an objective summary of the text.
- Determine the meaning of words and phrases as they are used in an ECE text.
- Write informative/explanatory texts to examine and convey complex ideas and information about child development, health, and safety clearly and accurately through the effective selection, organization, and analysis of relevant content.
- Produce clear and coherent writing in which the development and organization are appropriate to the task assigned.
- Develop and strengthen writing as needed by planning, revising, and editing, rewriting, or trying a new approach addressing what is most significant for a specific purpose and audience.

- Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.

Program Outcomes

Demonstrate the language, math, and soft skills to move ahead in college and land high-demand, living wage jobs.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

IBEST 43 - BTAC Success for ELL 6

Credits: 3-10

A transitional studies course taught in the IBEST option for BTAC where students receive additional instruction needed to succeed in the program and find employment. Students research and prepare presentations, utilize critical thinking strategies and study skills, effectively read course materials, comprehend skills demonstrations and participate in workplace discussions, and increase job search skills. This is a pass/no credit course.

Enrollment Requirement: Placement based on assessment measure; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Cite several pieces of textual evidence from BTAC text to support analysis of what the text says explicitly as well as inferences from the text.
- Determine the central idea of written course materials for BTAC; provide summary of the text distinct from personal opinions or judgments.
- Determine the meaning of words and phrases as they are used in a BTAC text. Write informative/explanatory texts to examine a topic and convey ideas and information through the selection, organization, and analysis of relevant content.
- Produce clear and coherent writing in which the development and organization are appropriate to the task assigned.
- Develop and strengthen writing as needed by planning, revising, and editing, rewriting, or trying a new approach focusing on how well purpose and audience have been addressed.
- Use technology, including the Internet, to produce and publish writing and link to and cite sources as well as to interact and collaborate with others.
- Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source, and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
- Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners, building on others' ideas and expressing their own clearly.
- Present claims and findings emphasizing salient points in a focused, coherent manner with relevant evidence, valid reasoning, and well-chosen details.
- Use appropriate eye contact, adequate volume, and clear pronunciation.
- Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.
- Identify relevant mathematical resources, such as a calculator or digital content located on a website, and use them to pose or solve problems.
- Use the four operations with whole numbers to solve problems.

Program Outcomes

Demonstrate the skills necessary to earn a college credential and acquire employment in a high-demand, living wage job.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

IBEST 46 - BTAC Success for TS 4

Credits: 3-10

A transitional studies course taught in the IBEST option for BTAC where students receive additional instruction needed to succeed in the program and find employment. Students research and prepare presentations, utilize critical thinking strategies and study skills, effectively read course materials, comprehend skills demonstrations and participate in workplace discussions, and increase job search skills. This is a pass/no credit course.

Enrollment Requirement: Placement based on assessment measure; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Cite several pieces of textual evidence from BTAC text to support analysis of what the text says explicitly as well as inferences from the text.
- Determine the central idea of written course materials for BTAC; provide summary of the text distinct from personal opinions or judgments.
- Determine the meaning of words and phrases as they are used in a BTAC text.
- Write informative/explanatory texts to examine a topic and convey ideas and information through the selection, organization, and analysis of relevant content.
- Produce clear and coherent writing in which the development and organization are appropriate to the task assigned.
- Develop and strengthen writing as needed by planning, revising, and editing, rewriting, or trying a new approach focusing on how well purpose and audience have been addressed.
- Use technology, including the Internet, to produce and publish writing and link to and cite sources as well as to interact and collaborate with others.

- Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source, and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
- Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners, building on others' ideas and expressing their own clearly.
- Present claims and findings emphasizing salient points in a focused, coherent manner with relevant evidence, valid reasoning, and well-chosen details.

- Identify relevant mathematical resources, such as a calculator or digital content located on a website. and use them to pose or solve problems.
- Use the four operations with whole numbers to solve problems.

Program Outcomes

Demonstrate the skills necessary to earn a college credential and acquire employment in a high-demand, living wage job.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

IBEST 47 - BTAC Success for TS 5

Credits: 3-10

A transitional studies course taught in the IBEST option for BTAC where students receive additional instruction needed to succeed in the program and find employment. Students research and prepare presentations, utilize critical thinking strategies and study skills, effectively read course materials, comprehend skills demonstrations and participate in workplace discussions, and increase job search skills. This is a pass/no credit course.

Enrollment Requirement: Placement based on assessment measure; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Cite strong and thorough textual evidence to support analysis of what the BTAC text says explicitly as well as inferences drawn from the text.
- Determine the central idea of written course materials for BTAC; provide an objective summary of the text.
- Determine the meaning of words and phrases as they are used in a BTAC text.
- Write informative/explanatory texts to examine and convey complex ideas and information clearly and accurately through the effective selection, organization, and analysis of relevant content.
- Produce clear and coherent writing in which the development and organization are appropriate to the task assigned.
- Develop and strengthen writing as needed by planning, revising, and editing, rewriting, or trying a new approach addressing what is most significant for a specific purpose and audience.
- Use technology, including the Internet, to produce and publish writing and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.
- Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess credibility and accuracy of each source, and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
- Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners, building on others' ideas and expressing their own clearly.
- Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
- Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.
- Identify relevant mathematical resources, such as a calculator or digital content located on a website, and use them to pose or solve problems.
- Use the four operations with whole numbers to solve problems.
- Perform operations with multi-digit whole numbers and with decimals to hundredths.
- Understand decimal notation for fractions, and compare decimal fractions.
- Generate and analyze patterns.

Program Outcomes

Demonstrate the skills necessary to earn a college credential and acquire employment in a high-demand, living wage job.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is

designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

IBEST 48 - BTAC Success for TS 6

Credits: 3-10

A transitional studies course taught in the IBEST option for BTAC where students receive additional instruction needed to succeed in the program and find employment. Students research and prepare presentations, utilize critical thinking strategies and study skills, effectively read course materials, comprehend skills demonstrations and participate in workplace discussions, and increase job search skills. This is a pass/no credit course.

Enrollment Requirement: Placement based on assessment measure; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Cite strong and thorough textual evidence to support analysis of what the BTAC text says explicitly as well as inferences drawn from the text.
- Determine the central idea of written course materials for BTAC; provide an objective summary of the text. Determine the meaning of words and phrases as they are used in a BTAC text.

- Use the four operations with whole numbers to solve problems.
- Perform operations with multi-digit whole numbers and with decimals to hundredths.
- Understand decimal notation for fractions, and compare decimal fractions.
- Generate and analyze patterns.

Program Outcomes

Demonstrate the skills necessary to earn a college credential and acquire employment in a high-demand, living wage job.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

IBEST 51 - Student Success in the Trades for ELL 4

Credits: 3-10

A transitional studies course taught in the I-BEST program for students in the trades programs. Students receive additional instruction needed to succeed in the program and find employment. Students research and prepare safety presentations, utilize critical thinking strategies and study skills, effectively read course materials, comprehend skill demonstrations and participate in workplace discussions, apply math skills, and increase job search skills.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Ask and answer such questions as who, what, where, when, why, and how to demonstrate understanding of key details in the written course materials.
- Find the main idea of written course materials and explain how it is supported by key details.
- Create study notes on written course materials which summarize the main ideas and key details.
- Find and discuss events, procedures, ideas, or concepts in technical trades materials based on specific information in the text.
- Show how these materials support the same approach or differ.
- Learn and use technical vocabulary (words and phrases) specific to area of study in spoken and written in texts.
- Identify how an author supports specific points the author makes in the trades written materials
- Write on technical topics while utilizing clear reasoning, evidence, development, and analysis to support one's ideas.
- Utilize critical thinking strategies to apply demonstrated concepts and techniques to practical problems presented in the trades course.
- Use what is taught to solve construction problems.
- Demonstrate listening comprehension of trades topics and techniques taught in the course.
- Effectively engage in classroom workplace discussions to achieve course learning objectives.
- Learn and apply math concepts and techniques for the practical purposes in area of study.
- Effectively use an appropriate calculator for course objectives.
- Explore job opportunities in the selected field and prepare to apply and interview for these career openings.

Program Outcomes

Demonstrate the skills necessary to earn a college credential and acquire employment in a high-demand, living wage job.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

IBEST 52 - Student Success in the Trades for ELL 5

Credits: 3-10

A transitional studies course taught in the I-BEST program for students in the trades

programs. Students receive additional instruction needed to succeed in the program and find employment. Students research and prepare safety presentations, utilize critical thinking strategies and study skills, effectively read course materials, comprehend skill demonstrations and participate in workplace discussions, apply math skills, and increase job search skills.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Refer to details in the written course materials for trades when explaining what the materials say and when drawing inferences from the materials.
- Identify the main idea of written course materials and explain how it is supported by key details.
- Create objective study notes on written course materials which summarize the main ideas and key details.
- Explain events, procedures, ideas, or concepts in technical trades materials based on specific information in the text.
- Show how these materials support the same approach or differ.
- Learn and use technical vocabulary (words and phrases) specific to area of study in spoken and written texts.
- Identify various technical approaches in the written materials and determine how an author may agree or disagree with others on the same topics.
- Explain how an author uses reasons and evidence to support particular points in the written materials.
- Write informative or explanatory texts on technical topics while utilizing clear reasoning , evidence, development, and analysis to support one's claims.
- Utilize critical thinking strategies to apply demonstrated concepts and techniques to practical problems presented in the trades course.
- Use what is taught to solve construction problems.
- Demonstrate listening comprehension of trades topics and techniques taught in the course.
- Effectively engage in classroom workplace discussions to achieve the trades course learning objectives.
- Learn and apply math concepts and techniques for the practical purposes of trades concentration.
- Effectively use an appropriate calculator for course objectives.
- Explore job opportunities in the trades field and prepare to apply and interview for these career openings.

Program Outcomes

Demonstrate the skills necessary to earn a college credential and acquire employment in

a high-demand, living wage job.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

IBEST 53 - Student Success in the Trades for ELL 6

Credits: 3-10

A transitional studies course taught in the I-BEST program for students in the trades programs. Students receive additional instruction needed to succeed in the program and find employment. Students research and prepare safety presentations, utilize critical thinking strategies and study skills, effectively read course materials, comprehend skill demonstrations and participate in workplace discussions, apply math skills, and increase job search skills.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Find evidence in written course materials to support major ideas and inferences.
- Understand the major trades concepts and how they are applied for specific course objectives.
- Locate a theme or central idea in the written course materials and how that theme is supported through detailed information.
- Find the central theme for each unit studied and how the details of the texts support that theme.
- Provide notes which summarize the written course materials without giving personal opinions or judgments.
- Take notes on texts to align with units taught in the course.
- Find connections and distinctions in various trades course written materials.
- Explain how materials support similar ideas or present variant concepts.
- Determine the meaning of words and phrases as they are used in a text, particularly connotative, and technical meanings for the context of trades are being taught.
- Identify various technical approaches in the written materials and determine how an author may agree or disagree with others on the same topics.
- Assess the claims and approaches of authors on relevant topics using one's theoretical, personal and practical knowledge of the trades area.
- Determine the reasoning and use of authors to support claims made on issues relating to industry techniques.

- Write explanatory texts on technical topics relating to area of study while utilizing clear reasoning, evidence, development, and analysis to support one's claims.
- Utilize critical thinking strategies to apply demonstrated concepts and techniques to practical problems presented in the trades course.
- Use what is taught to solve construction problems
- Demonstrate listening comprehension of topics studied and techniques taught in the course.
- Engage in classroom workplace discussions to achieve the trades course learning objectives.
- Apply math concepts and techniques for the practical purposes of building.
- Use an appropriate calculator for course objectives.
- Explore job opportunities in the trades field and prepare to apply and interview for these career openings.

Program Outcomes

Demonstrate the skills necessary to earn a college credential and acquire employment in a high-demand, living wage job.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

IBEST 54 - Student Success in the Trades for TS 2

Credits: 3-10

A transitional studies course taught in the I-BEST program for students in the trades programs. Students receive additional instruction needed to succeed in the program and find employment. Students research and prepare safety presentations, utilize critical thinking strategies and study skills, effectively read course materials, comprehend skill demonstrations and participate in workplace discussions, apply math skills, and increase job search skills.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Ask and answer such questions as who, what, where, when, why, and how to demonstrate understanding of key details in the written course materials.
- Find the main idea of written course materials and explain how it is supported by key details.

- Create study notes on written course materials which summarize the main ideas and key details.
- Find and discuss events, procedures, ideas, or concepts in technical trades materials based on specific information in the text. Show how these materials support the same approach or differ.
- Use technical vocabulary specific to area of study in spoken and written contexts.
- Identify how an author supports specific points in the trades written materials.
- Write about technical topics while utilizing clear reasoning, evidence, development, and analysis to support one's ideas.
- Utilize critical thinking strategies to apply demonstrated concepts and techniques to practical problems presented in the trades course.
- Use what is taught to solve construction problems.
- Demonstrate listening comprehension of trades topics and techniques taught in the course.
- Engage in classroom workplace discussions to achieve course learning objectives.
- Apply math concepts and techniques for the practical purposes in area of study.
- Use an appropriate calculator for course objectives.
- Explore job opportunities in the selected field and prepare to apply and interview for these career openings.

Program Outcomes

Demonstrate the skills necessary to earn a college credential and acquire employment in a high-demand, living wage job.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

IBEST 55 - Student Success in the Trades for TS 3

Credits: 3-10

A transitional studies course taught in the I-BEST program for students in the trades programs. Students receive additional instruction needed to succeed in the program and find employment. Students research and prepare safety presentations, utilize critical thinking strategies and study skills, effectively read course materials, comprehend skill demonstrations and participate in workplace discussions, apply math skills, and increase job search skills.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Refer to details in the written course materials for trades when explaining what the materials say and when drawing inferences from the materials.
- Identify the main idea of written course materials and explain how it is supported by key details.
- Create objective study notes on written course materials which summarize the main ideas and key details.
- Explain events, procedures, ideas, or concepts in technical trades materials based on specific information in the text.
- Show how these materials support the same approach or differ.
- Use technical vocabulary (words and phrases) specific to area of study in spoken and written contexts.
- Identify various technical approaches in the written materials and determine how an author may agree or disagree with others on the same topics.
- Explain how an author uses reasons and evidence to support particular points in the written materials.
- Write informative or explanatory texts on technical topics while utilizing clear reasoning , evidence, development, and analysis to support one's claims.
- Utilize critical thinking strategies to apply demonstrated concepts and techniques to practical problems presented in the trades course.
- Use what is taught to solve construction problems.
- Demonstrate listening comprehension of trades topics and techniques taught in the course.
- Engage in classroom workplace discussions to achieve the trades course learning objectives.
- Apply math concepts and techniques for the practical purposes of trades concentration.
- Effectively use an appropriate calculator for course objectives.
- Explore job opportunities in the trades field and prepare to apply and interview for these career openings.

Program Outcomes

Demonstrate the skills necessary to earn a college credential and acquire employment in a high-demand, living wage job.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

IBEST 56 - Student Success in the Trades for TS 4

Credits: 3-10

A transitional studies course taught in the I-BEST program for students in the trades programs. Students receive additional instruction needed to succeed in the program and find employment. Students research and prepare safety presentations, utilize critical thinking strategies and study skills, effectively read course materials, comprehend skill demonstrations and participate in workplace discussions, apply math skills, and increase job search skills.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Find evidence in written course materials to support major ideas and inferences. Understand the major trades concepts and how they are applied for specific course objectives.
- Locate a theme or central idea in the written course materials and how that theme is supported through detailed information.
- Find the central theme for each unit studied and how the details of the texts support that theme.
- Provide notes which summarize the written course materials without giving personal opinions or judgments.
- Take notes on texts to align with units taught in the course.
- Find connections and distinctions in various trades course written materials.
- Explain how materials support similar ideas or present variant concepts.
- Determine the meaning of words and phrases as they are used in a text, particularly connotative, and technical meanings for the context of trades are being taught.
- Identify various technical approaches in the written materials and determine how an author may agree or disagree with others on the same topics.
- Assess the claims and approaches using one's theoretical, personal and practical knowledge of the trades area.
- Determine the reasoning and use of authors to support claims made on issues relating to industry techniques.
- Write explanatory texts on technical topics relating to area of study while utilizing clear reasoning, evidence, development, and analysis to support one's claims.
- Utilize critical thinking strategies to apply demonstrated concepts and techniques to practical problems presented in the trades course.
- Use what is taught to solve construction problems.
- Demonstrate listening comprehension of topics studied and techniques taught in the course.
- Engage in classroom workplace discussions to achieve the trades course learning objectives.

- Learn and apply math concepts and techniques for the practical purposes of building.
- Effectively use an appropriate calculator for course objectives.
- Explore job opportunities in the trades field and prepare to apply and interview for these career openings.

Program Outcomes

Demonstrate the skills necessary to earn a college credential and acquire employment in a high-demand, living wage job.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

IBEST 57 - Student Success in the Trades for TS 5

Credits: 3-10

A transitional studies course taught in the I-BEST program for students in the trades programs. Students receive additional instruction needed to succeed in the program and find employment. Students research and prepare safety presentations, utilize critical thinking strategies and study skills, effectively read course materials, comprehend skill demonstrations and participate in workplace discussions, apply math skills, and increase job search skills.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Find and cite evidence in written course materials to support major ideas and inferences. Understand the major trades concepts and how they are applied for specific course objectives.
- Locate a theme or central idea in the written course materials and how that theme is supported through detailed information.
- Find the central theme for each unit studied and how the details of the texts support that theme. If the theme of a unit is about a construction process, be able to locate the specific sequences involved in that process and determine how these sequences are interrelated.
- Provide notes which summarize the written course materials without giving personal opinions or judgments.
- Take notes on texts to align with units taught in the course.
- Find connections and distinctions in various course written materials.

- Explain how materials support similar ideas or present variant concepts.
- Determine the meaning of words and phrases as they are used in a text, particularly connotative, and technical meanings for carpentry.
- Identify various technical approaches in the trades written materials and determine how an author may agree or disagree with others on the same topics.
- Assess the claims and approaches of authors on relevant topic using one's theoretical, personal and practical knowledge of the trades area.
- Determine the reasoning and use of authors to support claims made on issues relating to industry techniques.
- Write explanatory texts on technical topics while utilizing clear reasoning, evidence, development, and analysis to support one's claims.
- Utilize relevant information from multiple print and digital sources to answer a research question and present information learned to the instructor and other students to complete a course assignment on safety.
- Follow standards of citation and avoid plagiarism.
- Utilize critical thinking strategies to apply demonstrated concepts and techniques to practical problems presented in the trades course.
- Use what is taught to solve technical problems.
- Demonstrate listening comprehension of carpentry topics and techniques taught in the course.
- Engage in classroom workplace discussions to achieve the course learning objectives.
- Apply math concepts and techniques for the practical purposes of building.
- Use an appropriate calculator for course objectives.
- Explore job opportunities in the field of study and prepare to apply and interview for these career openings.

Program Outcomes

Demonstrate the skills necessary to earn a college credential and acquire employment in a high-demand, living wage job.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

IBEST 58 - Student Success in the Trades for TS 6

Credits: 3-10

A transitional studies course taught in the I-BEST program for students in the trades programs. Students receive additional instruction needed to succeed in the program and find employment. Students research and prepare safety presentations, utilize critical

thinking strategies and study skills, effectively read course materials, comprehend skill demonstrations and participate in workplace discussions, apply math skills, and increase job search skills.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Analyze various written materials relating to trades area and integrate that with information presented in course discussions, presentations and demonstrations.
- Find and cite evidence in written course materials to support major ideas and inferences. Understand the major course concepts and how they are applied for specific course objectives.
- Analyze a theme or central idea in the written course materials and how that theme is supported through detailed information.
- Find the central theme for each unit studied and how the details of the texts support that theme. If the theme of a unit is about a construction process. Be able to locate the specific sequences involved in that process and determine how these sequences are interrelated.
- Provide notes which summarize the written course materials without giving personal opinions or judgments.
- Take notes on texts to align with units taught in the course.
- Find connections and distinctions in various course written materials.
- Explain how materials support similar ideas or present variant concepts.
- Determine the meaning of words and phrases as they are used in a text, particularly connotative, and technical meanings.
- Identify various technical approaches in the written materials and determine how an author may agree or disagree with others on the same topics.
- Assess the claims and approaches-Using one's theoretical, personal and practical knowledge of the trades area.
- Determine the reasoning and use of authors to support claims made on issues relating to carpentry techniques.
- Write explanatory texts on technical topics relating to trades area while utilizing clear reasoning, evidence, development, and analysis to support one's claims.
- Utilize relevant information from multiple print and digital sources to answer a research question and present information learned to the instructor and other students to complete a course assignment on safety as it relates to trades area.
- Follow standards of citation and avoid plagiarism.
- Utilize critical thinking strategies to apply demonstrated concepts and techniques to practical problems presented in the trades course.
- Use what is taught to solve construction problems.
- Demonstrate listening comprehension of trades topics and techniques taught in the course.

- Engage in classroom workplace discussions to achieve the trades course learning objectives.
- Apply math concepts and techniques for the practical purposes of trades area.
- Effectively use an appropriate calculator for course objectives.
- Explore job opportunities in the trades field and prepare to apply and interview for these career openings.

Program Outcomes

Demonstrate the skills necessary to earn a college credential and acquire employment in a high-demand, living wage job.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

IBEST 63 - Nursing Assistant Success for ELL 6

Credits: 3-10

A transitional studies course taught in the IBEST option for NA where students receive additional instruction needed to succeed in the program and find employment. Students research and prepare presentations, utilize critical thinking strategies and study skills, effectively read course materials, comprehend skills demonstrations and participate in workplace discussions, and increase job search skills. This is a pass/no credit course.

Enrollment Requirement: Placement based on assessment measure; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Refer to details and examples in nursing assistant text to explain what the text says.
- Determine the main idea of the nursing assistant text and explain how it is supported by key details.
- Follow precisely a multi-step procedure when taking vitals, or performing nursing tasks.
- Interpret information presented visually or quantitatively (e.g., in a flowchart, diagram, model, graph, or table.)
- Write informative/explanatory texts to examine a technical topic and convey ideas and information clearly.
- Produce clear and coherent writing in which the development and organization are appropriate to the task assigned.

- Develop and strengthen writing as needed by planning, revising, and editing, rewriting, or trying a new approach.
- Use technology, including the Internet, to produce and publish writing as well as to interact and collaborate with others.
- Conduct short research projects to answer a technical question in the nursing assistant field to build knowledge through investigation of different aspects of a topic.
- Gather relevant information from print and digital sources; summarize or paraphrase information in notes and finished work and provide a list of sources.
- Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners, building on others' ideas and expressing their own clearly.
- Use the four operations with whole numbers to solve problems.

Program Outcomes

Demonstrate the skills necessary to earn a college credential and acquire employment in a high-demand, living wage job.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

IBEST 66 - Nursing Assistant Success for TS 4

Credits: 3-10

A transitional studies course taught in the IBEST option for NA where students receive additional instruction needed to succeed in the program and find employment. Students research and prepare presentations, utilize critical thinking strategies and study skills, effectively read course materials, comprehend skills demonstrations and participate in workplace discussions, and increase job search skills. This is a pass/no credit course.

Enrollment Requirement: Placement based on assessment measure; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Refer to details and examples in nursing assistant text to explain what the text says.
- Determine the main idea of the nursing assistant text and explain how it is supported by key details.

- Follow precisely a multi-step procedure when taking vitals, or performing nursing tasks.
- Interpret information presented visually or quantitatively (e.g., in a flowchart, diagram, model, graph, or table.)
- Write informative/explanatory texts to examine a technical topic and convey ideas and information clearly.
- Produce clear and coherent writing in which the development and organization are appropriate to the task assigned.
- Develop and strengthen writing as needed by planning, revising, and editing, rewriting, or trying a new approach.
- Use technology, including the Internet, to produce and publish writing as well as to interact and collaborate with others.
- Conduct short research projects to answer a technical question in the nursing assistant field to build knowledge through investigation of different aspects of a topic.
- Gather relevant information from print and digital sources; summarize or paraphrase information in notes and finished work and provide a list of sources.
- Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners, building on others' ideas and expressing their own clearly.
- Use the four operations with whole numbers to solve problems.

Program Outcomes

Demonstrate the skills necessary to earn a college credential and acquire employment in a high-demand, living wage job.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

IBEST 67 - Nursing Assistant Success for TS 5

Credits: 3-10

A transitional studies course taught in the IBEST option for NA where students receive additional instruction needed to succeed in the program and find employment. Students research and prepare presentations, utilize critical thinking strategies and study skills, effectively read course materials, comprehend skills demonstrations and participate in workplace discussions, and increase job search skills.

Enrollment Requirement: Placement based on assessment measure; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Cite specific textual evidence to support analysis of technical nursing assistant text.
- Determine the central ideas or conclusions of the nursing assistant text; provide an accurate summary distinct from prior knowledge or opinions.
- Follow precisely a multi-step procedure when taking vitals, or performing nursing tasks.
- Integrate quantitative or technical information expressed in words in a nursing assistant text with a version of that information expressed visually (e.g., in a flowchart, diagram, model, graph, or table.)
- Write informative/explanatory texts to examine and convey complex ideas and information clearly and accurately through the effective selection, organization, and analysis of relevant content. Produce clear and coherent writing in which the development and organization are appropriate to the task assigned.
- Develop and strengthen writing as needed by planning, revising, and editing, rewriting, or trying a new approach addressing what is most significant for a specific purpose and audience.
- Use technology, including the Internet, to produce and publish writing and update individual or shared writing products, linking to other information and to display information flexibility and dynamically.
- Conduct short research projects to answer a technical question in the nursing assistant field; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
- Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess credibility and accuracy of each source, and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
- Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners, building on others' ideas and expressing their own clearly.
- Use the four operations with whole numbers to solve problems.
- Perform operations with multi-digit whole numbers and with decimals to hundredths. Understand decimal notation for fractions, and compare decimal fractions.
- Solve problems involving measurement and estimation of Intervals of time (respiration, blood pressure), liquid volumes, and weight. Understand ratio concepts and use ratio reasoning to solve problems.
- Use ratio reasoning to convert measurement units (e.g., ounces to millimeters).

Program Outcomes

Demonstrate the skills necessary to earn a college credential and acquire employment in a high-demand, living wage job.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

IBEST 68 - Nursing Assistant Success for TS 6

Credits: 3-10

A transitional studies course taught in the IBEST option for NA where students receive additional instruction needed to succeed in the program and find employment. Students research and prepare presentations, utilize critical thinking strategies and study skills, effectively read course materials, comprehend skills demonstrations and participate in workplace discussions, and increase job search skills.

Enrollment Requirement: Placement based on assessment measure; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Cite specific textual evidence to support analysis of the technical nursing assistant text attending to the precise details of explanations or description.
- Determine the central ideas or conclusions of the nursing assistant text: provide an accurate summary of the complex concepts and processes distinct from prior knowledge or opinions by paraphrasing accurately.
- Follow precisely a multi-step procedure when taking vitals. or performing nursing tasks attending to special cases. Integrate quantitative or technical information expressed in words in a nursing assistant text with a version of that information expressed visually (e.g., in a flowchart, diagram, model, graph, or table.)
- Write informative/explanatory texts to examine and convey complex ideas and information clearly and accurately
- through the effective selection, organization, and analysis of relevant content.
- Produce clear and coherent writing in which the development and organization are appropriate to the task assigned.
- Develop and strengthen writing as needed by planning, revising, and editing, rewriting, or trying a new approach addressing what is most significant for a specific purpose and audience.

- Use technology, including the Internet, to produce and publish writing and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibility and dynamically.
- Conduct short as well as more sustained research projects to answer a technical question in the nursing assistant field; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
- Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess credibility and accuracy of each source, and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
- Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners. building on others' ideas and expressing their own clearly.
- Use the four operations with whole numbers to solve problems.
- Perform operations with multi-digit whole numbers and with decimals to hundredths.
- Demonstrate decimal notation for fractions, and compare decimal fractions.
- Solve problems involving measurement and estimation of intervals of time (respiration, blood pressure), liquid volumes, and weight.

Program Outcomes

Demonstrate the skills necessary to earn a college credential and acquire employment in a high-demand, living wage job.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

IBEST 73 - Medical Assistant Phlebotomy Success for ELL 6

Credits: 2-5

A transitional studies course taught in the IBEST option for Medical Assistant Phlebotomy where students receive additional instruction needed to succeed in the program and find employment. Students utilize critical thinking strategies and study skills, increase vocabulary, use basic mathematical skills as needed for phlebotomy, effectively read course materials, comprehend skills demonstrations, participate in workplace discussions, and increase job search skills. This is a pass/no credit course.

Enrollment Requirement: Placement based on assessment measure and instructor's

permission.

Course Outcomes:

Students who successfully complete this class will be able to:

- Refer to details and examples in phlebotomy text to explain what the text says.
- Determine the main idea of the phlebotomy text and explain how it is supported by key details.
- Follow precisely a multi-step procedure when taking vitals, or performing phlebotomy-related tasks.
- Interpret information presented visually or quantitatively (e.g., in a flowchart, diagram, model, graph, or table.)
- Write informative/explanatory texts to examine a technical topic and convey ideas and information clearly.
- Produce clear and coherent writing in which the development and organization are appropriate to the task assigned.
- Develop and strengthen writing as needed by planning, revising, and editing, rewriting, or trying a new approach.
- Use technology, including the Internet, to produce and publish writing as well as to interact and collaborate with others.
- Conduct short research projects to answer a technical question in the phlebotomy field to build knowledge through investigation of different aspects of a topic.
- Gather relevant information from print and digital sources; summarize or paraphrase information in notes and finished work and provide a list of sources.
- Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners, building on others' ideas and expressing their own clearly.
- Use the four operations with whole numbers to solve problems.

Program Outcomes

Demonstrate the skills necessary to earn a college credential and acquire employment in a high-demand, living wage job.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

IBEST 74 - Medical Assistant Phlebotomy Success for TS 4

Credits: 2-5

A transitional studies course taught in the IBEST option for Medical Assistant Phlebotomy where students receive additional instruction needed to succeed in the program and find employment. Students utilize critical thinking strategies and study

skills, increase vocabulary, use basic mathematical skills as needed for phlebotomy, effectively read course materials, comprehend skills demonstrations, participate in workplace discussions, and increase job search skills. This is a pass/no credit course.

Enrollment Requirement: Placement based on assessment measure and instructor's permission.

Course Outcomes:

Students who successfully complete this class will be able to:

- Refer to details and examples in phlebotomy text to explain what the text says.
- Determine the main idea of the phlebotomy text and explain how it is supported by key details.
- Follow precisely a multi-step procedure when performing phlebotomy related tasks.
- Interpret information presented visually or quantitatively (e.g., in a flowchart, diagram, model, graph, or table.)
- Write informative/explanatory texts to examine a technical topic and convey ideas and information clearly.
- Produce clear and coherent writing in which the development and organization are appropriate to the task assigned.
- Develop and strengthen writing as needed by planning, revising, and editing, rewriting, or trying a new approach.
- Use technology, including the Internet, to produce writing as well as to interact and collaborate with others.
- Gather relevant information from print and digital sources; summarize or paraphrase information in notes and finished work and provide a list of sources.
- Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners, building on others' ideas and expressing their own clearly.
- Use the four operations with whole numbers to solve problems.

Program Outcomes

Demonstrate the skills necessary to earn a college credential and acquire employment in a high-demand, living wage job.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

IBEST 75 - Medical Assistant Phlebotomy Success for TS 5

Credits: 2-5

A transitional studies course taught in the IBEST option for Medical Assistant

Phlebotomy where students receive additional instruction needed to succeed in the program and find employment. Students utilize critical thinking strategies and study skills, increase vocabulary, use basic mathematical skills as needed for phlebotomy, effectively read course materials, comprehend skills demonstrations, participate in workplace discussions, and increase job search skills. This is a pass/no credit course.

Enrollment Requirement: Placement based on assessment measure and instructor's permission.

Course Outcomes:

Students who successfully complete this class will be able to:

- Cite specific textual evidence to support analysis of technical phlebotomy text.
- Determine the central ideas or conclusions of the phlebotomy text; provide an accurate summary distinct from prior knowledge or opinions.
- Follow precisely a multi-step procedure when taking vitals or performing phlebotomy tasks.

- Solve problems involving measurement and estimation of intervals of time (respiration, blood pressure), liquid volumes, and weight.

Program Outcomes

Demonstrate the skills necessary to earn a college credential and acquire employment in a high-demand, living wage job.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

IBEST 83 - Cardiac Monitor Technician Success for ELL 6

Credits: 2-5

A transitional studies course taught in the IBEST option for Cardiac Monitor Technician where students receive additional instruction needed to succeed in the program and find employment. Students utilize critical thinking strategies and study skills, increase vocabulary, use basic mathematical skills as needed for cardiac monitoring skills, effectively read course materials, comprehend skills demonstrations, participate in workplace discussions, and increase job search skills. This is a pass/no credit course.

Enrollment Requirement: Placement based on assessment measure and instructor's permission

Course Outcomes:

Students who successfully complete this class will be able to:

- Refer to details and examples in cardio technology text to explain what the text says.
- Determine the main idea of the cardio technology text and explain how it is supported by key details.
- Follow precisely a multi-step procedure when taking vitals or performing cardio tech tasks.
- Interpret information presented visually or quantitatively (e.g., in a flowchart, diagram, model, graph, or table.)
- Write informative/explanatory texts to examine a technical topic and convey ideas and information clearly.
- Produce clear and coherent writing in which the development and organization are appropriate to the task assigned.
- Develop and strengthen writing as needed by planning, revising, and editing, rewriting, or trying a new approach.
- Use technology, including the Internet, to produce and publish writing as well as to interact and collaborate with others.
- Conduct short research projects to answer a technical question in cardio technology field to build knowledge through investigation of different aspects of a topic.
- Gather relevant information from print and digital sources; summarize or paraphrase information in notes and finished work and provide a list of sources.
- Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners, building on others' ideas and expressing their own clearly.
- Use the four operations with whole numbers to solve problems.

Program Outcomes

Demonstrate the skills necessary to earn a college credential and acquire employment in a high-demand, living wage job.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

IBEST 84 - Cardiac Monitor Technician Success for TS 4

Credits: 2-5

A transitional studies course taught in the IBEST option for Cardiac Monitor Technician where students receive additional instruction needed to succeed in the program and find employment. Students utilize critical thinking strategies and study skills, increase vocabulary, use basic mathematical skills as needed for cardiac monitoring skills, effectively read course materials, comprehend skills demonstrations, participate in

workplace discussions, and increase job search skills. This is a pass/no credit course.

Enrollment Requirement: Placement based on assessment measure and instructor's permission.

Course Outcomes:

Students who successfully complete this class will be able to:

- Refer to details and examples in cardio technology text to explain what the text says.
- Determine the main idea of the cardio technology text and explain how it is supported by key details.
- Follow precisely a multi-step procedure when taking vitals or performing cardio technology tasks.
- Interpret information presented visually or quantitatively (e.g., in a flowchart, diagram, model, graph, or table.)
- Write informative/explanatory texts to examine a technical topic and convey ideas and information clearly.
- Produce clear and coherent writing in which the development and organization are appropriate to the task assigned.
- Develop and strengthen writing as needed by planning, revising, and editing, rewriting, or trying a new approach.
- Use technology, including the Internet, to produce and publish writing as well as to interact and collaborate with others.
- Conduct short research projects to answer a technical question in the cardio technology field to build knowledge through investigation of different aspects of a topic.
- Gather relevant information from print and digital sources; summarize or paraphrase information in notes and finished work and provide a list of sources.

- Use the four operations with whole numbers to solve problems.

Program Outcomes

Demonstrate the skills necessary to earn a college credential and acquire employment in a high-demand, living wage job.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

IBEST 85 - Cardiac Monitor Technician Success for TS 5

Credits: 2-5

A transitional studies course taught in the IBEST option for Cardiac Monitor Technician where students receive additional instruction needed to succeed in the program and find employment. Students utilize critical thinking strategies and study skills, increase vocabulary, use basic mathematical skills as needed for cardiac monitoring skills, effectively read course materials, comprehend skills demonstrations, participate in workplace discussions, and increase job search skills. This is a pass/no credit course.

Enrollment Requirement: Placement based on assessment measure and instructor's permission.

Course Outcomes:

Students who successfully complete this class will be able to:

- Cite specific textual evidence to support analysis of technical cardio technology text.
- Determine the central ideas or conclusions of the cardio technology text; provide an accurate summary distinct from prior knowledge or opinions.
- Follow precisely a multi-step procedure when taking vitals or performing cardio technology tasks.
- Integrate quantitative or technical information expressed in words in cardio technology text with a version of that information expressed visually (e.g., in a flowchart, diagram, model, graph, or table.)
- Write informative/explanatory texts to examine and convey complex ideas and information clearly and accurately through the effective selection, organization, and analysis of relevant content. Produce clear and coherent writing in which the development and organization are appropriate to the task assigned.
- Develop and strengthen writing as needed by planning, revising, and editing, rewriting, or trying a new approach addressing what is most significant for a specific purpose and audience.
- Use technology, including the Internet, to produce and publish writing and update individual or shared writing products, linking to other information and to display information flexibility and dynamically.
- Conduct short research projects to answer a technical question in the cardio technology field; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
- Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess credibility and accuracy of each source, and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
- Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners, building on others' ideas and expressing their own clearly.
- Use the four operations with whole numbers to solve problems.

- Perform operations with multi-digit whole numbers and with decimals to hundredths. Understand decimal notation for fractions and compare decimal fractions.
- Solve problems involving measurement and estimation of Intervals of time (respiration, blood pressure), liquid volumes, and weight. Understand ratio concepts and use ratio reasoning to solve problems.
- Use ratio reasoning to convert measurement units (e.g., ounces to millimeters).

Program Outcomes

Demonstrate the skills necessary to earn a college credential and acquire employment in a high-demand, living wage job.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

IBEST 86 - Cardiac Monitor Technician Success for TS 6

Credits: 2-5

A transitional studies course taught in the IBEST option for Cardiac Monitor Technician where students receive additional instruction needed to succeed in the program and find employment. Students utilize critical thinking strategies and study skills, increase vocabulary, use basic mathematical skills as needed for cardiac monitoring skills, effectively read course materials, comprehend skills demonstrations, participate in workplace discussions, and increase job search skills. This is a pass/no credit course.

Course Outcomes:

Students who successfully complete this class will be able to:

- Cite specific textual evidence to support analysis of the technical cardio technology text attending to the precise details of explanations or description.
- Determine the central ideas or conclusions of the cardio technology text: provide an accurate summary of the complex concepts and processes distinct from prior knowledge or opinions by paraphrasing accurately.
- Precisely follow a multi-step procedure when taking vitals. or performing cardio technology tasks attending to special cases. Integrate quantitative or technical information expressed in words in a cardio technology text with a version of that information expressed visually (e.g., in a flowchart, diagram, model, graph, or table.)
- Write informative/explanatory texts to examine and convey complex ideas and information clearly and accurately.
- through the effective selection, organization, and analysis of relevant content.
- Produce clear and coherent writing in which the development and organization are appropriate to the task assigned.

- Develop and strengthen writing as needed by planning, revising, and editing, rewriting, or trying a new approach addressing what is most significant for a specific purpose and audience.
- Use technology, including the Internet, to produce and publish writing and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibility and dynamically.
- Conduct short as well as more sustained research projects to answer a technical question in the cardio technology field; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
- Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess credibility and accuracy of each source, and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
- Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners. building on others' ideas and expressing their own clearly.
- Use the four operations with whole numbers to solve problems.
- Perform operations with multi-digit whole numbers and with decimals to hundredths.
- Demonstrate decimal notation for fractions and compare decimal fractions.
- Solve problems involving measurement and estimation of intervals of time (respiration, blood pressure), liquid volumes, and weight.

Program Outcomes

Demonstrate the skills necessary to earn a college credential and acquire employment in a high-demand, living wage job.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

IBEST 93 - Practical Nursing Success for ELL 6

Credits: 3-5

A transitional studies course taught in the IBEST option for Practical Nursing where students receive additional instruction needed to succeed in the program and find employment. Students research and prepare presentations, utilize critical thinking strategies and study skills, effectively read course materials, comprehend skills demonstrations, participate in workplace discussions, and increase job search skills. This is a pass/no credit course.

Enrollment Requirement: Placement based on assessment measure and instructor's permission.

Course Outcomes:

Students who successfully complete this class will be able to:

- Refer to details and examples in Practical Nursing text to explain what the text says.
- Determine the main idea of the Practical Nursing text and explain how it is supported by key details.
- Follow precisely a multistep procedure when performing Practical Nursing tasks.
- Interpret information presented visually or quantitatively (e.g., in a flowchart, diagram, model, graph, or table.)
- Write informative/explanatory texts to examine a technical topic and convey ideas and information clearly.
- Produce clear and coherent writing in which the development and organization are appropriate to the task assigned.
- With guidance and support from peers, develop and strengthen writing as needed by planning, revising, and editing, rewriting, or trying a new approach.
- With some guidance and support, use technology, including the Internet, to produce and publish writing as well as to interact and collaborate with others.
- Conduct short research projects to answer a technical question in the Practical Nursing field to build knowledge through investigation of different aspects of a topic.
- Gather relevant information from print and digital sources; summarize or paraphrase information in notes and finished work and provide a list of sources.
- Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners, building on others' ideas and expressing their own clearly.
- Use the four operations with whole numbers to solve problems.

Program Outcomes

Demonstrate the skills necessary to earn a college credential and acquire employment in a high-demand, living wage job.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

IBEST 94 - Practical Nursing Success for TS 4

Credits: 3-5

A transitional studies course taught in the IBEST option for Practical Nursing where students receive additional instruction needed to succeed in the program and find employment. Students research and prepare presentations, utilize critical thinking strategies and study skills, effectively read course materials, comprehend skills demonstrations, participate in workplace discussions, and increase job search skills. This is a pass/no credit course.

Enrollment Requirement: Placement based on assessment measure and instructor's permission.

Course Outcomes:

Students who successfully complete this class will be able to:

- Refer to details and examples in Practical Nursing text to explain what the text says.
- Determine the main idea of the Practical Nursing text and explain how it is supported by key details.
- Follow precisely a multistep procedure when performing Practical Nursing tasks.
- Interpret information presented visually or quantitatively (e.g., in a flowchart, diagram, model, graph, or table.)
- Write informative/explanatory texts to examine a technical topic and convey ideas and information clearly.
- Produce clear and coherent writing in which the development and organization are appropriate to the task assigned.
- With guidance and support from peers, develop and strengthen writing as needed by planning, revising, and editing, rewriting, or trying a new approach.
- With some guidance and support, use technology, including the Internet, to produce and publish writing as well as to interact and collaborate with others.
- Conduct short research projects to answer a technical question in the Practical Nursing field to build knowledge through investigation of different aspects of a topic.
- Gather relevant information from print and digital sources; summarize or paraphrase information in notes and finished work and provide a list of sources.
- Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners, building on others' ideas and expressing their own clearly.

- Use the four operations with whole numbers to solve problems.

Program Outcomes

Demonstrate the skills necessary to earn a college credential and acquire employment in a high-demand, living wage job.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

IBEST 95 - Practical Nursing Success for TS 5

Credits: 3-5

A transitional studies course taught in the IBEST option for Practical Nursing where students receive additional instruction needed to succeed in the program and find employment. Students research and prepare presentations, utilize critical thinking strategies and study skills, effectively read course materials, comprehend skills demonstrations, participate in workplace discussions, and increase job search skills. This is a pass/no credit course.

Enrollment Requirement: Placement based on assessment measure and instructor's permission.

Course Outcomes:

Students who successfully complete this class will be able to:

- Cite specific textual evidence to support analysis of technical Practical Nursing text.
- Determine the central ideas or conclusions of the Practical Nursing text
- Provide an accurate summary distinct from prior knowledge or opinions.
- Follow precisely a multistep procedure when performing Practical Nursing tasks.
- Integrate quantitative or technical information expressed in words in a Practical Nursing text with a version of that information expressed visually (e.g., in a flowchart, diagram, model, graph, or table.)
- Write informative/explanatory texts to examine and convey complex ideas and information clearly and accurately through the effective selection, organization, and analysis of relevant content.
- Produce clear and coherent writing in which the development and organization are appropriate to the task assigned.

- Develop and strengthen writing as needed by planning, revising, and editing, rewriting, or trying a new approach addressing what is most significant for a specific purpose and audience.
- Use technology, including the Internet, to produce and publish writing and update individual or shared writing products, linking to other information and to display information flexibility and dynamically.
- Conduct short research projects to answer a technical question in the Practical Nursing field; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
- Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess credibility and accuracy of each source, and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
- Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners, building on others' ideas and expressing their own clearly.
- Use the four operations with whole numbers to solve problems.
- Perform operations with multi-digit whole numbers and with decimals to hundredths.
- Understand decimal notation for fractions and compare decimal fractions.
- Solve problems involving measurement and estimation of Intervals of time (respiration, blood pressure), liquid volumes, and weight.
- Understand ratio concepts and use ratio reasoning to solve problems.
- Use ratio reasoning to convert measurement units (e.g., ounces to millimeters)

Program Outcomes

Demonstrate the skills necessary to earn a college credential and acquire employment in a high-demand, living wage job.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

IBEST 96 - Practical Nursing Success for TS 6

Credits: 3-5

A transitional studies course taught in the IBEST option for Practical Nursing where students receive additional instruction needed to succeed in the program and find employment. Students research and prepare presentations, utilize critical thinking strategies and study skills, effectively read course materials, comprehend skills demonstrations, participate in workplace discussions, and increase job search skills. This is a pass/no credit course.

Enrollment Requirement: Placement based on assessment measure and instructor's permission.

Course Outcomes:

Students who successfully complete this class will be able to:

- Cite specific textual evidence to support analysis of the technical Practical Nursing text attending to the precise details of explanations or description.
- Determine the central ideas or conclusions of the Practical Nursing text:
- Provide an accurate summary of the complex concepts and processes distinct from prior knowledge or opinions by paraphrasing accurately.
- Follow precisely a multistep procedure when performing Practical Nursing tasks.
- Integrate quantitative or technical information expressed in words in a Practical Nursing text with a version of that information expressed visually (e.g., in a flowchart, diagram, model, graph, or table.)
- Write informative/explanatory texts to examine and convey complex ideas and information clearly and accurately through the effective selection, organization, and analysis of relevant content.
- Produce clear and coherent writing in which the development and organization are appropriate to the task assigned.
- Develop and strengthen writing as needed by planning, revising, and editing, rewriting, or trying a new approach addressing what is most significant for a specific purpose and audience.
- Use technology, including the Internet, to produce and publish writing and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibility and dynamically.
- Conduct short as well as more sustained research projects to answer a technical question in the Practical Nursing field; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.

- Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess credibility and accuracy of each source, and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
- Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners. building on others' ideas and expressing their own clearly.
- Use the four operations with whole numbers to solve problems.
- Perform operations with multi-digit whole numbers and with decimals to hundredths.
- Demonstrate decimal notation for fractions, and compare decimal fractions.
- Solve problems involving measurement and estimation of intervals of time (respiration, blood pressure), liquid volumes, and weight.

Program Outcomes

Demonstrate the skills necessary to earn a college credential and acquire employment in a high-demand, living wage job.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Integrated Basic Education and Skills Training-Open Doors

IBEST-OD 54 - Carpentry Success for Open Doors

Credits: 3-10

A Open Doors transitional studies course taught in the I-BEST program for students in the trades programs. Students receive additional instruction needed to succeed in the program and find employment. Students research and prepare safety presentations, utilize critical thinking strategies and study skills, effectively read course materials, comprehend skill demonstrations and participate in workplace discussions, apply math skills, and increase job search skills. This is a pass/no credit course.

Enrollment Requirement: Appropriate placement and instructor consent. Students must be admitted through Open Doors.

Course Outcomes:

Students who successfully complete this class will be able to:

- Ask and answer such questions as who, what, where, when, why, and how to demonstrate understanding of key details in the written course materials.
- Find the main idea of written course materials and explain how it is supported by key details.
- Create study notes on written course materials which summarize the main ideas and key details.
- Find and discuss events, procedures, ideas, or concepts in technical trades materials based on specific information in the text. Show how these materials support the same approach or differ.
- Use technical vocabulary specific to area of study in spoken and written contexts.
- Identify how an author supports specific points in the trades written materials.
- Write about technical topics while utilizing clear reasoning, evidence, development, and analysis to support one's ideas.
- Utilize critical thinking strategies to apply demonstrated concepts and techniques to practical problems presented in the trades course.
- Use what is taught to solve construction problems.
- Demonstrate listening comprehension of Carpentry topics and techniques taught in the course.
- Engage in classroom workplace discussions to achieve course learning objectives.
- Apply math concepts and techniques for the practical purposes in Carpentry.
- Use an appropriate calculator for course objectives.
- Explore job opportunities in the selected field and prepare to apply and interview for these career openings.

Program Outcomes

Demonstrate the skills necessary to earn a college credential and acquire employment in a high-demand, living wage job.

College-wide Outcomes

• **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

IBEST-OD 64 - Nursing Assistant Success for Open Doors

Credits: 3-10

An Open Doors basic skills course to support students' skills development as needed to be successful in the Nursing Assistant-Certified program. Students receive contextualized instruction needed to succeed in the program and find employment. Students utilize critical thinking strategies and study skills, increase vocabulary, use basic mathematical skills as needed for nurse assistants' skills, effectively read course materials, comprehend skills demonstrations, participate in workplace discussions, and increase job search skills. This is a pass/no credit course.

Enrollment Requirement: Appropriate placement and instructor consent. Students must be admitted through Open Doors.

Course Outcomes:

Students who successfully complete this class will be able to:

- Refer to details and examples in nursing assistant text to explain what the text says.
- Determine the main idea of the nursing assistant text and explain how it is supported by key details.
- Follow precisely a multi-step procedure when taking vitals, or performing nursing tasks.
- Interpret information presented visually or quantitatively (e.g., in a flowchart, diagram, model, graph, or table.)
- Write informative/explanatory texts to examine a technical topic and convey ideas and information clearly.
- Produce clear and coherent writing in which the development and organization are appropriate to the task assigned.
- Develop and strengthen writing as needed by planning, revising, and editing, rewriting, or trying a new approach.
- Use technology, including the Internet, to produce and publish writing as well as to interact and collaborate with others.
- Conduct short research projects to answer a technical question in the nursing assistant field to build knowledge through investigation of different aspects of a topic.
- Gather relevant information from print and digital sources; summarize or paraphrase information in notes and finished work and provide a list of sources.
- Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners, building on others' ideas and expressing their own clearly.
- Use the four operations with whole numbers to solve problems.

Program Outcomes

Demonstrate the skills necessary to earn a college credential and acquire employment in a high-demand, living wage job.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

IBEST-OD 74 - Medical Assistant Phlebotomy Success for Open Doors

Credits: 2-5

An Open Doors basic skills course to support students' skills development as needed to

be successful in the Phlebotomy program. Students receive contextualized instruction needed to succeed in the program and find employment. Students utilize critical thinking strategies and study skills, increase vocabulary, use basic mathematical skills as needed for phlebotomy skills, effectively read course materials, comprehend skills demonstrations, participate in workplace discussions, and increase job search skills. This is a pass/no credit course.

Enrollment Requirement: Appropriate placement and instructor consent. Students must be admitted through Open Doors.

Course Outcomes:

Students who successfully complete this class will be able to:

- Refer to details and examples in phlebotomy text to explain what the text says.
- Determine the main idea of the phlebotomy text and explain how it is supported by key details.
- Follow precisely a multi-step procedure when performing phlebotomy related tasks.
- Interpret information presented visually or quantitatively (e.g., in a flowchart, diagram, model, graph, or table.)
- Write informative/explanatory texts to examine a technical topic and convey ideas and information clearly.
- Produce clear and coherent writing in which the development and organization are appropriate to the task assigned.
- Develop and strengthen writing as needed by planning, revising, and editing, rewriting, or trying a new approach.
- Use technology, including the Internet, to produce writing as well as to interact and collaborate with others.
- Gather relevant information from print and digital sources; summarize or paraphrase information in notes and finished work and provide a list of sources.
- Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners, building on others' ideas and expressing their own clearly.
- Use the four operations with whole numbers to solve problems.

Program Outcomes

Demonstrate the skills necessary to earn a college credential and acquire employment in a high-demand, living wage job.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

IBEST-OD 84 - Cardiac Monitor Technician Success for Open Doors

Credits: 2-5

An Open Doors basic skills course to support students' skills development as needed to be successful in the Cardiac Monitor Technician program. Students receive contextualized instruction needed to succeed in the program and find employment. Students utilize critical thinking strategies and study skills, increase vocabulary, use basic mathematical skills as needed for cardiac monitoring technician skills, effectively read course materials, comprehend skills demonstrations, participate in workplace discussions, and increase job search skills. This is a pass/no credit course.

Enrollment Requirement: Students must be accepted into Open Doors and into the Cardiac Monitoring Technician programs.

Course Outcomes:

Students who successfully complete this class will be able to:

- Refer to details and examples in cardio technology text to explain what the text says.
- Determine the main idea of the cardio technology text and explain how it is supported by key details.
- Follow precisely a multi-step procedure when taking vitals or performing cardio technology tasks.
- Interpret information presented visually or quantitatively (e.g., in a flowchart, diagram, model, graph, or table.)
- Write informative/explanatory texts to examine a technical topic and convey ideas and information clearly.
- Produce clear and coherent writing in which the development and organization are appropriate to the task assigned.
- Develop and strengthen writing as needed by planning, revising, and editing, rewriting, or trying a new approach.
- Use technology, including the Internet, to produce and publish writing as well as to interact and collaborate with others.
- Conduct short research projects to answer a technical question in the cardio technology field to build knowledge through investigation of different aspects of a topic.
- Gather relevant information from print and digital sources; summarize or paraphrase information in notes and finished work and provide a list of sources.
- Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners, building on others' ideas and expressing their own clearly.
- Use the four operations with whole numbers to solve problems.

Program Outcomes

Demonstrate the skills necessary to earn a college credential and acquire employment in a high-demand, living wage job.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Industrial Education

INDUS 101 - Basic Woodworking

Credits: 1-4

Develops a working knowledge of woodworking as related to layout, assembling, joining, fastening and finishing, and practical application through the use of hand tools and power tools. Students build and keep a personal wood project.

Course Fee: \$80.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify, label, and list the uses of inventoried hand and power tools with no less than 75% accuracy.
- Accurately measure, transfer layout lines, find centers, and find angles on an assigned project to a level of quality consistent with industry standards.
- Glue, clamp, and square lumber.
- Demonstrate safe work practices to current industry practices.
- Demonstrate each tool presented in the shop by successfully using each tool in a manner consistent with industry standards.

Program Outcomes

- Be employed as a carpenter helper or a union carpentry apprenticeship program.
- Demonstrate efficiency, safety and accuracy in the completion of carpentry tasks.
- Use all basic hand and power tools related to carpentry.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

INDUS 108 - Introduction to Building Construction Trades

Credits: 10

Competency-based course with introduction to carpentry, plumbing, electrical and drywall techniques. Includes the study and practice of building trade computation, OSHA/WISHA construction safety standards, hand and power tool safety and use and workplace ethics and standards.

Course Fee: 75.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply the knowledge and manipulative skills for basic carpentry.
- Apply the knowledge and manipulative skills for basic plumbing techniques.
- Apply the knowledge and manipulative skills for basic electrical techniques.
- Apply the knowledge and manipulative skills for basic drywall techniques.

Program Outcomes

- Demonstrate efficiency, safety, and accuracy in the completion of carpentry tasks.
- Use all basic hand and power tools related to carpentry.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

INDUS 111 - Welding Survey 1

Credits: 3

Includes lecture and lab experiences in arc welding, oxy-acetylene welding, brazing, and cutting. Basic study of MIG and TIG and other special processes.

Enrollment Requirement: Instructor consent.

Course Fee: \$12.50

Course Outcomes:

Students who successfully complete this class will be able to:

- Observe all occupational health and safety rules.
- Demonstrate basic Oxy/Acetylene welding, brazing, and cutting procedures/skills as listed in the student handbook.
- Demonstrate basic Gas Metal Arc welding skills as listed in the student handbook.
- Demonstrate basic Gas Tungsten Arc welding skills as listed in the student handbook.
- Demonstrate basic Shielded Metal Arc welding skills as listed in the student handbook.

Program Outcomes

- Work as an industry standard trade welder.
- Demonstrate OSHA and WISHA standards for safety in the workplace.
- Use multiple welding processes in all positions.
- Identify the cause and effect of various welding processes per welding procedure (WPS).
- Discuss basic theory of welding and the related equipment.
- Conform to AWS and WABO qualification procedures.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

INDUS 112 - Welding Survey 2

Credits: 3

Includes lecture and lab experiences in arc welding, oxy-acetylene welding, brazing, and cutting. Basic study of MIG and TIG and other special processes.

Enrollment Requirement: Instructor consent.

Course Fee: \$12.50

Course Outcomes:

Students who successfully complete this class will be able to:

- Observe all occupational health and safety rules.
- Demonstrate basic Oxy/Acetylene welding, brazing, and cutting procedures/skills as listed in the student handbook.
- Demonstrate basic Gas Metal Arc welding skills as listed in the student handbook.
- Demonstrate basic Gas Tungsten Arc welding skills as listed in the student handbook.
- Demonstrate basic Shielded Metal Arc welding skills as listed in the student handbook.

Program Outcomes

- Work as an industry standard trade welder.
- Demonstrate OSHA and WISHA standards for safety in the workplace.
- Use multiple welding processes in all positions.
- Identify the cause and effect of various welding processes per welding procedure (WPS).
- Discuss basic theory of welding and the related equipment.
- Conform to AWS and WABO qualification procedures.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

INDUS 113 - Welding Survey 3

Credits: 3

Includes lecture and lab experiences in arc welding, oxy-acetylene welding, brazing, and cutting. Basic study of MIG and TIG and other special processes.

Enrollment Requirement: Instructor consent.

Course Fee: \$12.50

Course Outcomes:

Students who successfully complete this class will be able to:

- Observe all occupational health and safety rules.

- Demonstrate basic Oxy/Acetylene welding, brazing, and cutting procedures/skills as listed in the student handbook.
- Demonstrate basic Gas Metal Arc welding skills as listed in the student handbook.
- Demonstrate basic Gas Tungsten Arc welding skills as listed in the student handbook.
- Demonstrate basic Shielded Metal Arc welding skills as listed in the student handbook.

Program Outcomes

- Work as an industry standard trade welder.
- Demonstrate OSHA and WISHA standards for safety in the workplace.
- Use multiple welding processes in all positions.
- Identify the cause and effect of various welding processes per welding procedure (WPS).
- Discuss basic theory of welding and the related equipment.
- Conform to AWS and WABO qualification procedures.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Information Literacy

INFO 104 - Information for the Disciplines

Credits: 2

Introduces students to the professional and research literature in a humanities, social sciences or science discipline. Students develop the ability to locate, evaluate, and effectively and ethically use information sources and information retrieval systems pertinent to the discipline under study. Students gain an understanding of the object and method of study in the discipline and compare scholarly with popular sources. May be offered as a linked course. This is a pass/no credit course.

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify key terms and concepts in an academic discipline.

- Identify and use information retrieval systems appropriate to the academic discipline.
- Construct an appropriate topic for and search strategy in the academic discipline.
- Identify a variety of types and formats of information sources in the academic discipline.
- Critically evaluate information and information sources in the discipline.
- Use information effectively and ethically for academic purposes.

Program Outcomes

- Identify the scope of their information need.
- Access information effectively.
- Evaluate the quality of the information.
- Use, synthesize, or produce the needed information ethically.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

INFO 110 - Information Literacy and Research Skills

Credits: 2

Examines the nature of information and the research process. Topics include locating, retrieving, evaluating, and using information print and electronic resources effectively and ethically. This is a pass/no credit course.

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify an information need and formulate research question(s), scope, and intended audience through an iterative process.
- Construct, implement, and modify a search strategy appropriate to the information need and context.
- Critically evaluate both the retrieved information and its source(s).
- Effectively and ethically use the selected information in one's own work.

Program Outcomes

- Identify the scope of their information need.
- Access information effectively.
- Evaluate the quality of the information.

- Use, synthesize, or produce the needed information ethically.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

Information Technology

IT 101 - Introduction to Information Technology

Credits: 5

Provides an overview of information technology. Introduces computer hardware, software, procedures and systems, and their applications in various segments of society.

Course Fee: \$25.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe the impact of digital technology and the World Wide Web.
- Describe basic computer hardware, operating system and application functionality.
- Explain how to apply security and safety to computer systems.
- Describe program and Web use and development.
- Explain the impact of Networking and Digital Communication in the modern world.

Program Outcomes

- Understand security principles, system and network vulnerabilities, and common mitigation practices.
- Understand network infrastructure, logic, and troubleshooting procedures.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

IT 102 - Scripting for Cybersecurity

Credits: 5

An introductory programming/scripting class for students who have no prior programming experience with a focus on Cybersecurity and automation. Covers flow control, loops, functions, using libraries, version control, and APIs.

Course Fee: \$25.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe basic concepts of scripting including flow control, loops, functions, and variables.
- Create and use scripts with a cybersecurity focus.
- Use libraries to extend capabilities.
- Describe the features and uses of version control software.
- Describe how to perform automation and use APIs.

Program Outcomes

Understand and demonstrate basic programming and database constructs.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

IT 114 - IT and Cybersecurity Essentials

Credits: 5

An introduction to Cybersecurity, PC hardware and Operating Systems.

Course Fee: \$25.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify and describe PC hardware components.
- Understand, install, maintain, and troubleshoot various operating systems.
- Describe basic computer networking concepts.
- Identify cybersecurity concepts and configurations for networks and operating systems.

- Identify and describe emerging technologies.

Program Outcomes

Understand and demonstrate procedures to install, configure, support, and troubleshoot operating systems and networking hardware.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

IT 125 - Fundamentals of IPv4 and IPv6

Credits: 5

Covers IP protocols, subnetting, and number conversion between Base 10 and Binary.

Course Fee: \$25.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe IPv4 and IPv6 protocols.
- Describe subnetting of IPv4 and IPv6 networks.
- Perform subnetting of IPV4 and IPv6 networks.
- Perform network summarization for ranges of IPv4 and IPv6 networks

Program Outcomes

- Understand and demonstrate procedures to install, configure, support, and troubleshoot operating systems and networking hardware.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

IT 131 - Introduction to Networks

Credits: 5

Introduces networking and basic switch and router configuration. This course uses the Cisco CCNA Routing and Switching Introduction to Networks curriculum.

Course Fee: \$25.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Explain the importance of protocols, data networks and the Internet in supporting business communications and everyday activities.
- Calculate, and apply subnet masks and addresses to build a simple network.
- Use Cisco command-line interface (CLI) commands to perform basic router and switch configuration, security and verification.
- Identify the operations and features of the TCP/IP and OSI models.
- Utilize common network utilities to verify and troubleshoot small network operations and view data traffic.

Program Outcomes

- Understand and demonstrate procedures to install, configure, support, and troubleshoot operating systems.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

IT 135 - CompTIA Security+ Certification Preparation

Credits: 5

A preparation course for the CompTIA Security+ certification, an IT industry recognized entry level certification. Provides students with a broad foundation of network security concepts. Topics include security fundamentals, overview of cryptography, security policies and procedures, common types of attacks, and how to implement network security measures. Covers all current CompTIA Security+ certification exam objectives.

Course Fee: \$25.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe cyber security fundamentals.
- Explain how cryptography and PKI is used.
- Develop security policies and procedures.
- Describe common types of vulnerabilities, threats, attacks, and countermeasures.

Program Outcomes

- Describe, configure, secure and troubleshoot computer networking equipment and resources.
- Describe, configure, secure and troubleshoot operating systems.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

IT 160 - Windows Server Administration

Credits: 5

Provides students with the knowledge and skills necessary to configure and manage Microsoft Windows Server and Active Directory Services.

Course Fee: \$25.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Configure and manage Microsoft Windows Server.
- Configure and manage storage solutions and permissions.
- Use Windows PowerShell to perform system administration tasks.
- Configure and maintain Active Directory, Group Policy, DNS, and DHCP.
- Implement and manage virtualization.

Program Outcomes

- Understand and demonstrate procedures to install, configure, support, and troubleshoot operating systems and networking hardware.

- Understand network infrastructure, logic, and troubleshooting procedures.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

IT 178 - IT Work Experience

Credits: 1-5

Allows students to work full- or part-time in jobs directly related to their programs and interests. Students may receive a salary or volunteer. This is a pass/no credit course.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Become acquainted with people in professional settings.
- Work with others in their field of interest.
- Adjust to specific aspects of a career.
- Improve previously acquired skills.

Program Outcomes

- Understand and demonstrate procedures to install, configure, support, and troubleshoot operating systems and networking hardware.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

IT 190 - Introduction to Linux Operating System Security

Credits: 5

Introduces the student to entry level Linux operating system security, file system navigation, user and group administration, software applications, operating system update methods and shell scripting in the Linux operating system environment at the command line using the Terminal.

Course Fee: \$25.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Use the Linux Terminal to perform entry-level administration.
- Understand and implement Linux file and directory permissions.
- Evaluate operating system security and identify points of exploitation.
- Describe the mechanisms for securing computer systems and programs.
- Compare different access control, file protection, and authentication mechanisms.
- Apply appropriate countermeasures to protect computer systems.

Program Outcomes

Understand and demonstrate procedures to install, configure, support, and troubleshoot operating systems and networking hardware.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

IT 201 - Database Fundamentals

Credits: 5

Covers the management of database tables, queries, views, indexes, and constraints using a Database Management System (DBMS) and Structured Query Language (SQL). Hands-on exercises include the analysis, troubleshooting, and problem solving of real-world database scenarios.

Course Fee: \$25.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Understand and manipulate database objects using CREATE, ALTER, and DROP statements.
- Understand and manipulate data using SELECT, INSERT, UPDATE, and DELETE statements.
- Understand, design and implement PRIMARY KEY and FOREIGN KEY constraints.
- Understand, design, and create SQL queries with inner and outer joins.
- Understand, design, and create SQL queries that utilize set operations and subqueries.
- Understand basic concepts of database security and techniques used to secure databases.

Program Outcomes

- Understand and demonstrate basic programming and database constructs.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

IT 210 - Routing and Switching Essentials

Credits: 7

Focuses on the knowledge and skills to implement and configure routing and switching. Topics include device configuration, IPv4, IPv6, Subnetting, virtual local area networks (VLANs), routing protocols, and wide area networking (WAN) technologies.

Enrollment Requirement: IT 131 or instructor consent.

Course Fee: \$25.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Configure routers and switches using the command line interface.
- Perform IPv4 and IPv6 subnetting.
- Implement VLANs, NAT, ACLs, DHCP and network discovery.
- Implement static and dynamic routing.

Program Outcomes

- Understand and demonstrate procedures to install, configure, support, and troubleshoot operating systems.
- Understand security principles, system and network vulnerabilities, and common mitigation practices.
- Understand network infrastructure, logic, and troubleshooting procedures.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

IT 214 - Cisco Certified Support Technician Cybersecurity Certification Preparation

Credits: 5

Covers a variety of cybersecurity topics including security principles, network security and endpoint security concepts, vulnerability assessment and risk management, and incident handling. The activities in this course include many hands-on assignments to help students better understand the technical material presented in the course.

Enrollment Requirement: IT 131 or instructor consent.

Course Fee: \$25.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe essential security principles.
- Describe basic network security practices, and configure basic network security settings.
- Describe and configure endpoint security.
- Describe Vulnerability Assessment and Risk Management.
- Describe Incident Handling, and perform basic Incident handling planning tasks.

Program Outcomes

Describe security principles, system and network vulnerabilities, and common mitigation practices.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

IT 224 - Windows Automation and Scripting

Credits: 5

Introduces PowerShell scripting language for Windows. Students will write, test and execute basic and advanced administrative scripts for Windows.

Enrollment Requirement: IT 160 with a grade of 2.0 or higher; MATH 72 or TS/TS-OD

57 with a grade of 2.5 or higher; or eligible for MATH 97 or higher; or instructor consent.

Course Fee: \$25.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Use PowerShell commands at the command line and in the scripting environment.
- Build objects and collections.
- Develop scripts using flow control, decisions, repetition and pipelines in PowerShell.
- Perform Windows, file system, and Active Directory administration using PowerShell.

Program Outcomes

- Understand and demonstrate procedures to install, configure, support, and troubleshoot operating systems.
- Understand and demonstrate basic programming and database constructs.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

IT 244 - CompTIA Cloud+ Certification Preparation

Credits: 5

Provides students competency in cloud models, virtualization, infrastructure, security, resource management and business continuity.

Enrollment Requirement: IT 131 and 160; or instructor consent.

Course Fee: \$25.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe cloud concepts and models.
- Explain different virtualization types and technologies.
- Describe the infrastructure resources used within clouds.
- Plan resource management and monitoring.
- Explain security requirements in the cloud.
- Perform Systems management and monitoring of cloud resources.
- Plan for business continuity in the cloud.

Program Outcomes

- Understand and demonstrate procedures to install, configure, support, and troubleshoot operating systems.
- Understand security principles, system and network vulnerabilities, and common mitigation practices.
- Understand network infrastructure, logic, and troubleshooting procedures.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

IT 245 - Identity and Access Management

Credits: 5

Provides students with the knowledge and skills necessary to install, configure, and administer advanced directory services. Focuses on performing tasks required to centrally manage users, computers, and resources.

Enrollment Requirement: IT 160 with a grade of 2.0 or higher; or instructor consent.

Course Fee: \$25.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Configure and maintain advanced directory services.
- Apply policies to manage users and resources.
- Utilize certificates for authentication and authorization.
- Plan and implement access management for applications.
- Understand identity federation and access solutions.

Program Outcomes

- Understand and demonstrate procedures to install, configure, support, and troubleshoot operating systems.
- Understand security principles, system and network vulnerabilities, and common mitigation practices.
- Understand network infrastructure, logic, and troubleshooting procedures.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

IT 295 - CompTIA Project+ Certification Preparation

Credits: 5

Covers the foundational project management skills needed for students to manage small to medium sized projects as part of their regular job duties.

Course Fee: \$25.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe the properties of project management, phases, schedules, roles and responsibilities, and cost controls, as well as the basic aspects of Agile methodology.
- Explain the impact of various constraint variables and influences throughout the project and the importance of risk strategies and activities.
- Use appropriate communication methods of influence and change control processes within the context of a project.
- Describe various project management tools and project and partner-centric documentation.

Program Outcomes

Participate in or lead small to medium sized information technology or cybersecurity projects.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

IT 310 - Routing and Switching in the Enterprise

Credits: 7

Builds upon the knowledge and skills attained in IT 210. Covers advanced routing using Open Shortest Path First (OSPF), Router Fail-over, inter-VLAN routing, link aggregation, Software Defined Networking, and VPNs. Hands-on exercises include configuration, installation, and troubleshooting.

Enrollment Requirement: IT 210; and admission into the IT Bachelor's in Cybersecurity and Networking program; or instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Understand and configure inter-VLAN routing.
- Understand, configure, and troubleshoot routing using OSPF and HSRP
- Understand and configure VLANs and inter-switch communication.
- Understand, configure and troubleshoot link aggregation.
- Understand Software Defined Networking
- Understand IPsec VPNs.

Program Outcomes

- Plan, implement, administer, and support appropriate information technologies and systems to help an organization achieve its goals and objectives. Information technologies and systems may include servers, client computers, mobile devices, operating systems, network applications, local area networks, wide area networks, wireless networks, network segments, intranets, and so on.
- Evaluate user needs and use those needs to plan the implementation of information technology systems that meet those needs.
- Prepare for industry certification exams.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

IT 335 - Network Security Foundations and Policies

Credits: 5

Introduces information, business security, and security laws. Covers a variety of security topics that are integral to today's information security professionals, including access

control, cryptography, and security architecture and design.

Enrollment Requirement: Admission into a BAS in IT program; or instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Understand Information Security and Risk Management.
- Understand Access controls, Application Security, Business Continuity and Disaster Recovery Planning.
- Understand basic Cryptography.
- Understand Regulations, Compliance and Investigations relating to Information Technology security.
- Understand basic Operations, Physical and Environmental Security.

Program Outcomes

- Analyze the security vulnerabilities of an organization's information technology resources.
- Plan and implement security measures and practices for an organization's information technology resources.
- Prepare for industry certification exams.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

IT 340 - Network Security and Firewalls

Credits: 5

Equips students with the knowledge and skills needed to prepare for entry-level network security specialist careers. A hands-on, career-oriented e-learning solution that emphasizes practical experience. Various types of hands-on labs provide practical experience, including procedural and trouble-shooting labs, skills integration challenges, and model building.

Enrollment Requirement: Admission into a BAS in IT program; or instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Understand threat mitigation.
- Understand and implement network security management and reporting.
- Understand and Implement High Availability.
- Understand and Implement Application ID.
- Understand the Implementation of site-to-site VPNs.

Program Outcomes

- Plan, implement, administer, and support appropriate information technologies and systems to help an organization achieve its goals and objectives. Information technologies and systems may include servers, client computers, mobile devices, operating systems, network applications, local area networks, wide area networks, wireless networks, network segments, intranets, and so on.
- Analyze the security vulnerabilities of an organization's information technology resources.
- Plan and implement security measures and practices for an organization's information technology resources.
- Evaluate user needs and use those needs to plan the implementation of information technology systems that meet those needs.
- Prepare for industry certification exams.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

IT 360 - Security Operations, Analysis & Forensics

Credits: 5

Provides an introduction to the knowledge and skills needed for a Security Analyst working with a Security Operations Center team. It teaches core security and forensic skills needed for monitoring, detecting, investigating, analyzing and responding to security events, thus protecting systems and organizations from cybersecurity risks, threats and vulnerabilities.

Enrollment Requirement: IT 190; and admission into the BAS in IT program or instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe End Point Threat Analysis.
- Describe Computer Forensics Processes.
- Perform Network Intrusion Analysis.
- Perform Incident Response.
- Perform Data and Event Analysis.
- Explain the Processes involved in Incident Handling.

Program Outcomes

- Plan, implement, administer, and support appropriate information technologies and systems to help an organization achieve its goals and objectives. Information technologies and systems may include servers, client computers, mobile devices, operating systems, network applications, local area networks, wide area networks, wireless networks, network segments, intranets, and so on.
- Analyze the security vulnerabilities of an organization's information technology resources.
- Plan and implement security measures and practices for an organization's information technology resources.
- Prepare for industry certification exams.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

IT 365 - Cyber Data Analysis Using Kibana

Credits: 5

Covers the configuration and use of Kibana to monitor network security traffic and alerts, and to effectively search for information regarding the alerts they are researching. Previously IT 350.

Enrollment Requirement: IT 201 or SDEV 201, and admission into a BAS in IT Cybersecurity and Networking; or instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Configure Kibana Visualizations and Dashboards.
- Configure and use filters and drilldowns.
- Share and present your dashboard information using permalinks and reports.
- Configure machine learning to perform anomaly detection.

Program Outcomes

Analyze the security vulnerabilities of an organization's information technology resources.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

IT 370 - Cloud System Operations: Microsoft Azure

Credits: 5

Prepares students to take the Implementing Microsoft Azure Infrastructure Solutions certification exam.

Enrollment Requirement: IT 244; and admission into the BAS in IT program or instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Design and implement Azure App Service apps.
- Create and manage Azure Resource Manager Virtual Machines.
- Design and implement a storage strategy.
- Implement an Azure Active Directory.
- Implement virtual networks.

Program Outcomes

- Plan, implement, administer, and support appropriate information technologies and systems to help an organization achieve its goals and objectives. Information technologies and systems may include servers, client computers, mobile devices, operating systems, network applications, local area networks, wide area networks, wireless networks, network segments, intranets, and so on.
- Evaluate user needs and use those needs to plan the implementation of information technology systems that meet those needs.

- Prepare for industry certification exams.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

IT 385 - Advanced Scripting and Automation

Credits: 5

Introduces the student to different automation tools such as Ansible and other scripting languages such as Python and PowerShell.

Enrollment Requirement: IT 102 and IT 224; and admission into a BAS in IT program; or instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe and understand the advantages of Automation in IT.
- Perform and explain how to install automation tools such as Ansible.
- Develop simple automation scripts using automation tools such as Ansible using YAML syntax.
- Understand how to use automation tools to handle simple to complex scalable deployments.

Program Outcomes

Plan, implement, administer, and support appropriate information technologies and systems to help an organization achieve its goals and objectives. Information technologies and systems may include servers, client computers, mobile devices, operating systems, network applications, local area networks, wide area networks, wireless networks, network segments, intranets, and so on.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

IT 450 - Cybersecurity Analysis

Credits: 5

Covers cybersecurity analysis from initial implementation to performing actual analysis of potential incidents. Students will perform a variety of tasks, including weekly monitoring and analysis of network traffic, creating tickets, and resolving them.

Enrollment Requirement: IT 340; and IT 360 (or concurrent enrollment); and admission into a Information Technology-Cybersecurity and Networking, BAS program; or instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Compare the methods used to create signature-, reputation-, and anomaly-based alert rules.
- Trace and validate reported alerts to identify false positives and potential incidents.
- Identify and analyze anomalies in network traffic using metadata.
- Provide technical summary of findings in accordance with established reporting procedures.
- Identify placement and implementation options for network monitoring software and hardware.

Program Outcomes

- Analyze the security vulnerabilities of an organization's information technology resources.
- Plan and implement security measures and practices for an organization's information technology resources.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

IT 460 - Threat Analysis

Credits: 5

Provides the student with the ethical hacking knowledge to conduct a threat assessment, secure a network across popular platforms and operating systems, understand various types of threats, intrusion detection systems, and establish auditing and monitoring systems for vulnerabilities and threats without affecting performance.

Enrollment Requirement: Admission into the BAS in IT program or instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Understand Ethical Hacking tools.
- Describe Denial of Service and Buffer Overflows.
- Understand and Describe Linux Operating System Vulnerabilities.
- Understand the methodology for Hacking servers and Wireless Networks.
- Understand Injection and cross-site scripting attacks.

Program Outcomes

- Analyze the security vulnerabilities of an organization's information technology resources.
- Prepare for industry certification exams.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

IT 470 - Cloud System Operations: Amazon Web Services

Credits: 5

Course prepares students to take the AWS Certified SysOps Administrator - Associate certification exam.

Enrollment Requirement: Admission into the BAS in IT program or instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Deploy, manage, and operate scalable, highly available, and fault tolerant systems on AWS.
- Implement and control the flow of data to and from AWS.
- Select the appropriate AWS service based on compute, data, or security requirements.
- Identify appropriate use of AWS operational best practices.
- Estimate AWS usage costs and identify operational cost control mechanisms.
- Migrate on-premises workloads to AWS.

Program Outcomes

- Plan, implement, administer, and support appropriate information technologies and systems to help an organization achieve its goals and objectives. Information technologies and systems may include servers, client computers, mobile devices, operating systems, network applications, local area networks, wide area networks, wireless networks, network segments, intranets, and so on.
- Evaluate user needs and use those needs to plan the implementation of information technology systems that meet those needs.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

IT 480 - Cloud Security (CCSP)

Credits: 5

Covers the design strategy and implementation of cloud security principles and preparation for the Certified Cloud Security Practitioner (CCSP) exam.

Enrollment Requirement: Admission into a BAS in IT program or instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Explain cloud security principles and best practices.
- Apply Data Security Principles in the cloud.
- Implement Cloud Platform, Infrastructure, and Application Security.
- Analyze Legal, Risks and Compliance Requirements in a Cloud environment.
- Design proper Cloud Security Operations.

Program Outcomes

- Analyze the security vulnerabilities of an organization's information technology resources.
- Plan and implement security measures and practices for an organization's information technology resources.
- Evaluate user needs and use those needs to plan the implementation of information technology systems that meet those needs.
- Prepare for industry certification exams.

College-wide Outcomes

- **Critical Thinking** -Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

IT 490 - Capstone: Cybersecurity and Networking

Credits: 5

Students work in teams to plan, implement, secure and document a complete network solution for a real or simulated company. Students implement a proof-of-concept network and present their design and outcomes to an audience.

Enrollment Requirement: Instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Understand stakeholder project requirements.
- Understand and prepare a work breakdown schedule for a project.
- Provide weekly report and status updates to stakeholders.

Program Outcomes

- Plan, implement, administer, and support appropriate information technologies and systems to help an organization achieve its goals and objectives. Information technologies and systems may include servers, client computers, mobile devices, operating systems, network applications, local area networks, wide area networks, wireless networks, network segments, intranets, and so on.
- Analyze the security vulnerabilities of an organization's information technology resources.

- Plan and implement security measures and practices for an organization's information technology resources.
- Evaluate user needs and use those needs to plan the implementation of information technology systems that meet those needs.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Japanese

JAPN& 121 - Japanese I

Credits: 5

Begins the systematic study of Japanese vocabulary and grammar using the four basic skills of speaking, listening, reading and writing. Includes introduction of the hiragana and katakana writing systems. Attained communicative competency can be applied to interactions with peers from diverse cultural backgrounds and native speakers in classroom and real-world situations.

Enrollment Requirement: No previous background in Japanese, or no more than one year of high school Japanese, or no more than two years of high school Japanese with a "C" average or less. Eligible for ENGL 99.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Use hiragana and katakana.
- Use question words for exchanges of personal information.
- Discuss routines and future actions with the polite form of verbs.
- Discuss past actions with the polite past form of verbs.
- Describe the existence and location of places, people, and things.

Program Outcomes

Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

JAPN& 122 - Japanese II

Credits: 5

A direct continuation of JAPN& 121. The focus of the course is the systematic study of Japanese vocabulary, grammar and kanji using the four basic skills of listening, speaking, reading and writing. Attained communicative competency can be applied to interactions with peers from diverse cultural backgrounds and native speakers in classroom and real-world situations.

Enrollment Requirement: A grade of 2.0 or higher in JAPN& 121 or equivalent with instructor consent. Eligible for JAPN& 121. The equivalent of JAPN& 121 is one year in high school with a grade of B or higher.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Use hiragana, katakana, and kanji.
- Discuss requests with the te-form.
- Discuss likes and dislikes with noun phrases.
- Use informal speech with the plain form of verbs and adjectives.
- Discuss reasons with the plain form of verbs and adjectives.

Program Outcomes

Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

JAPN& 123 - Japanese III

Credits: 5

A direct continuation of JAPN& 122. The focus of the course is the systematic study of Japanese vocabulary, grammar and kanji using the four basic skills of listening, speaking, reading and writing. Attained communicative competency can be applied to interactions with peers from diverse cultural backgrounds and native speakers in classroom and real-world situations.

Enrollment Requirement: A grade of 2.0 or higher in JAPN& 122 or equivalent with instructor consent. Eligible for ENGL 99. The equivalent of JAPN& 122 is two years in high school with a grade of B or higher.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Use hiragana, katakana, and kanji.
- Discuss reasons with the plain form of verbs and adjectives.
- Describe people and things with noun-modifying clauses.
- Discuss past experiences with verbs in the plain past form.
- Express hearsay with verbs in the plain present and past forms.

Program Outcomes

Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

JAPN 142 - Introduction to Japanese Life and Culture

Credits: 5

An introduction to traditional and modern Japanese culture. Works of fine/performance art, literature, and architecture throughout history as well as traditional cultural activities such as the tea ceremony will be introduced. Japan's history of marginalization (e.g.

native Ainu, Christians, outcasts), and imperialism and colonialism culminating in the Pacific War will be analyzed. Issues in contemporary Japanese society, namely the gender gap, an aging population, bullying, and social withdrawal will be examined. Modern popular media including film, manga, and anime will be explored. In English.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent. **Recommended:** College-level reading.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$4.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate understanding of elements of traditional Japanese culture such as history, art, and religion.
- Demonstrate understanding of elements of Japanese society such as family, education, and accompanying contemporary problems.
- Demonstrate understanding of elements of popular Japanese culture such as manga, anime, and film.
- Demonstrate intercultural competence for the understanding of a different culture necessary for travel or work.
- Demonstrate critical competencies such as interpersonal, critical thinking, problem solving, and oral and written communication skills acquired by working with peers from diverse backgrounds.

Program Outcomes

Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

JAPN& 221 - Japanese IV

Credits: 5

A direct continuation of JAPN& 123. The focus of the course is the systematic study of Japanese vocabulary, grammar and kanji using the four basic skills of listening, speaking, reading and writing. Attained communicative competency can be applied to interactions with peers from diverse cultural backgrounds and native speakers in classroom and real-world situations.

Enrollment Requirement:

JAPN& 123 with a grade of 2.0 or higher; or instructor consent. Eligible for ENGL 99. The equivalent of JAPN& 123 is three years in high school with a grade of B or higher.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Use hiragana, katakana, and kanji.
- Discuss advice and suggestions.
- Discuss requests and permission in formal situations.
- Discuss future plans with the volitional form and conditionals.
- Describe resultant state and results of intentional actions with intransitive and transitive verbs.

Program Outcomes

Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

JAPN& 222 - Japanese V

Credits: 5

A direct continuation of JAPN& 221. The focus of the course is the systematic study of Japanese vocabulary, grammar and kanji using the four basic skills of listening, speaking, reading and writing. Attained communicative competency can be applied to interactions with peers from diverse cultural backgrounds and native speakers in classroom and real-world situations.

Enrollment Requirement:

JAPN& 221 with a grade of 2.0 or higher; or instructor consent. Eligible for ENGL 99. The equivalent of JAPN& 221 is four years in high school with a grade of B or higher.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Use hiragana, katakana, and kanji.
- Discuss hypothetical situations and natural consequences with conditionals.
- Express giving and receiving depending on perspective and social status.
- Describe negative feelings caused by an event with passive speech.
- Express conjecture based on direct or indirect evidence.

Program Outcomes

Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

JAPN& 223 - Japanese VI

Credits: 5

A direct continuation of JAPN& 222. The focus of the course is the systematic study of Japanese vocabulary, grammar and kanji using the four basic skills of listening, speaking, reading and writing. Attained communicative competency can be applied to interactions with peers from diverse cultural backgrounds and native speakers in classroom and real-world situations.

Enrollment Requirement: JAPN& 222 with a grade of 2.0 or higher; or instructor consent. Eligible for ENGL 99.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Use hiragana, katakana, and kanji.
- Discuss favors and benefits with verbs of giving and receiving.
- Express permission or causation with the causative form.
- Express complaints with the causative-passive form.
- Produce extra polite speech with honorific expressions.
- Produce modest speech with humble expressions.

Program Outcomes

Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

Journalism

JOURN 101 - Multimedia Journalism

Credits: 5

Teaches students how to write for the media, including print, online and broadcast media. Includes writing for public relations. Stresses newswriting mechanics, learning news style and newsroom terminology. Instructor encourages students to enroll in JOURN 104 and join the staff of The Current, Green River's print and online publication.

Satisfies Requirement: Humanities/Fine Arts/English

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate their ability to write in clear, concise, journalistic prose.
- Demonstrate their critical reading skills.
- Demonstrate their willingness to read daily news stories.
- Recognize the elements of professional journalistic writing.

Program Outcomes

Apply relevant criteria and standards when evaluating information in terms of how it will

interest and inform their audience.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

JOURN 103 - Introduction to Public Relations

Credits: 5

Provides an overview of the field of public relations from history to practice. Introduces writing, interviewing and publicity techniques and creating press kits and news releases for a variety of audiences.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Layout and design of print publications.
- Communicate visually through use of typography and graphics.
- Demonstrate good craftsmanship.
- Demonstrate creativity.

Program Outcomes

Apply relevant criteria and standards when evaluating information in terms of how it will interest and inform their audience.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

JOURN 104 - Newswriting

Credits: 3-5

Writing for news media; clarity in use of language, style and punctuation; sentence and paragraph structure and organization of stories; credibility of information and news judgment; basic methods of researching and writing. Weekly news discussions based on current events.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Develop, research and prepare publishable news products, including digital photographs, on deadline.
- Understand and respect the value of multiculturalism and diversity in media writing.
- Write clear and concise news stories and news features.
- Work cooperatively in a newsroom setting.
- Design and layout attractive print and online news products.
- Adhere to specialized style and organization requirements of media writing for print and online platforms.
- Develop, research and prepare news accounts that are accurate, fair, balanced and timely.

Program Outcomes

Apply relevant criteria and standards when evaluating information in terms of how it will interest and inform their audience.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

JOURN 105 - Advanced Newswriting

Credits: 3-5

Advanced writing for news media; clarity in use of language, style and punctuation; sentence and paragraph structure and organization of stories; credibility of information and news judgment; basic methods of researching and writing. Weekly news discussions based on current events.

Enrollment Requirement: JOURN 104 with a grade of 1.0 or higher; or instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Develop, research and prepare publishable news products, including digital photographs, on deadline.
- Understand and respect the value of multiculturalism and diversity in media writing.
- Write clear and concise news stories and news features.
- Work cooperatively in a newsroom setting.
- Design and layout attractive print and online news products.
- Adhere to specialized style and organization requirements of media writing for print and online platforms.
- Develop, research and prepare news accounts that are accurate, fair, balanced and timely.

Program Outcomes

Apply relevant criteria and standards when evaluating information in terms of how it will interest and inform their audience.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

JOURN 106 - News Laboratory 3

Credits: 3-5

Students gain additional experience as they write, edit, design, photograph and produce the digital and print versions of the student publication, The Current.

Enrollment Requirement: JOURN 105 with a grade of 1.0 or higher; or instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Develop, research and prepare publishable news products, including digital photographs, on deadline.

- Understand and respect the value of multiculturalism and diversity in media writing.
- Write clear and concise news stories and news features.
- Work cooperatively in a newsroom setting.
- Design and layout attractive print and online news products.
- Adhere to specialized style and organization requirements of media writing for print and online platforms.
- Develop, research and prepare news accounts that are accurate, fair, balanced and timely.

Program Outcomes

Apply relevant criteria and standards when evaluating information in terms of how it will interest and inform their audience.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

JOURN 107 - Introduction to Video Journalism

Credits: 5

Introduces students to the art of storytelling, stressing techniques such as narrative journalism, conversational interviewing, and use of natural sound and video sequence construction.

Satisfies Requirement: Humanities/Fine Arts/English

Course Outcomes:

Students who successfully complete this class will be able to:

- Recognize and recall the essential elements of good storytelling.
- Think critically by critiquing information in terms of how it may interest and inform audiences.
- Create and produce visually compelling images.
- Capture engaging audio for use on its own or as a component to visual images.

Program Outcomes

Apply relevant criteria and standards when evaluating information in terms of how it will interest and inform their audience.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

JOURN 108 - Mobile and Social Media Journalism

Credits: 5

Critically examines how journalists and news organizations are using emerging forms of social media and mobile platforms. Students gain hands-on experience by experimenting with social media and mobile devices for news gathering, distribution, and audience engagement. Students will also learn how to use analytic tools to monitor and analyze the effectiveness of their mobile and social media activity.

Course Outcomes:

Students who successfully complete this class will be able to:

- Effectively use social media for news gathering, distribution, and audience engagement.
- Research and locate reliable information from social media to enhance your reporting, and identify misleading and unbalanced content.
- Gain the technical skills of mobile news gathering through the use of mobile devices and apps to gather, produce, and distribute news content.
- Create and enhance your own professional brand on social media platforms.
- Use analytics to monitor and analyze social media engagement and success.
- Understand the public's active role in the news production process, and the resulting impact on journalism.

Program Outcomes

Apply relevant criteria and standards when evaluating information in terms of how it will interest and inform their audience.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

JOURN 115 - Multimedia Writing and Creation

Credits: 5

In this hands-on course, students explore the basics of multimedia creation through projects and workshops. They learn an introduction to the theory and practice of podcasting, streaming, radio and TV broadcasting, social media content creation, script

writing, and news reporting.

Course Fee: 60.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe and demonstrate the fundamentals of multimedia creation, including podcasting, streaming, radio and TV broadcasting, social media content creation, script writing, and news reporting.
- Demonstrate proficiency in operating basic broadcast and digital media equipment.
- Apply industry-accepted broadcasting techniques across various multimedia platforms.
- Recall and apply the proper procedures to fill out official FCC paperwork.
- Produce newscasts and implement relevant show prep techniques.
- Use evaluation and assessment practices for multimedia content.

Program Outcomes

Apply relevant criteria and standards when evaluating information in terms of how it will interest and inform their audience.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

JOURN 116 - Advanced Multimedia Writing and Creation

Credits: 5

In this hands-on course, students delve into the theory and practice of multimedia creation through projects and workshops. Building on foundational knowledge, they explore intermediate concepts in podcasting, streaming, radio and TV broadcasting, social media content creation, script writing, and news reporting.

Enrollment Requirement: JOURN 115 or instructor consent.

Course Fee: 60.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate a comprehensive understanding of multimedia creation, including podcasting, streaming, radio and TV broadcasting, social media content creation, script writing, and news reporting.

- Exhibit advanced proficiency in operating broadcast and digital media equipment.
- Apply advanced industry-accepted broadcasting techniques across various multimedia platforms.
- Execute proper procedures for filling out official FCC paperwork related to multimedia broadcasting.
- Produce high-quality newscasts and implement advanced show prep techniques.
- Evaluate and assess multimedia content using industry standards and practices.

Program Outcomes

Apply relevant criteria and standards when evaluating information in terms of how it will interest and inform their audience.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

JOURN 125 - Podcasting Laboratory

Credits: 5

This hands-on course instructs students on how to take an idea for a podcast and make it a reality. Interviewing techniques and strategies for gaining an audience are emphasized. Students learn about developing narratives and how different styles of podcasts are produced while working hands-on with equipment and software. Instruction in podcast promotion, distribution and monetization is also featured.

Course Fee: 60.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Understand different styles of podcasts.
- Apply best practices in creating professional sounding audio.
- Understand and properly use professional audio recording equipment and editing techniques.
- Develop scriptwriting, interview, and content-creation skills for podcasts.
- Identify storytelling techniques and develop a narrative.
- Recognize the principles of distribution, promotion and monetization of podcasts.

Program Outcomes

Apply relevant criteria and standards when evaluating information in terms of how it will

interest and inform their audience.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

JOURN 140 - Audio Editing for Digital Media

Credits: 5

Students are introduced to the fundamentals, technology and methods used in the audio production and broadcast industry. Students use Adobe Audition to learn audio recording and editing techniques for creating professional multitrack media products such as podcasts, interviews, radio promotions and music.

Course Fee: 50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate multitrack editing techniques to produce digital audio content.
- Demonstrate proper microphone technique for voice recordings.
- Integrate voice, music and sound effects into digital audio products.
- Recognize and correct problems in audio recordings.
- Demonstrate basic skills necessary for entry-level audio production jobs.

Program Outcomes

- Use their skills to apply for entrance into the wide field of broadcasting and digital media.
- Transfer to a four-year institution for additional learning in the field of broadcasting, digital media and communications.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

JOURN 150 - Introduction to Broadcasting & Digital Media

Credits: 5

Offers the student an overview of the broadcast and digital media industry from the origin of radio to the domination of television. Continues with the growth of cable TV, satellite radio & TV, as well as digital media and social platforms.

Satisfies Requirement: Humanities/Fine Arts/English

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate an understanding of the basic technical aspects of broadcasting, cable, satellite and digital media.
- Demonstrate an understanding of the history of broadcasting, from the early inventors to the latest developments in the digital media industry.
- Demonstrate an understanding of the fundamental branches of the electronic media business: Management, Programming, Sales, and Technical.
- Demonstrate an understanding and appreciation of the basic radio formats, as well as local, network, cable television and digital media programming.
- Demonstrate an understanding of the role the FCC and U.S. Government play in regulating the broadcast, cable, satellite and digital media industries.

Program Outcomes

Apply relevant criteria and standards when evaluating information in terms of how it will interest and inform their audience.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

JOURN 152 - Broadcasting & Digital Media Management

Credits: 5

Covers radio management practices emphasizing the business of broadcasting. Includes sales, promotion, community relations, government regulations, demographics, programming, and modern applications such as digital delivery and social media usage.

Satisfies Requirement: Humanities/Fine Arts/English

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate a working knowledge of radio as show business, with emphasis on total radio station operations.
- Demonstrate the relationship between radio and the community, and the Federal government.

Program Outcomes

Apply relevant criteria and standards when evaluating information in terms of how it will interest and inform their audience.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

JOURN 156 - Sports Broadcasting and Play-by-Play Announcing

Credits: 3

This course immerses students in the dynamic world of sports broadcasting and play-by-play announcing, cultivating a deep appreciation for the art and science of broadcast and digital media. Emphasizing voice quality, articulation, enunciation, and pronunciation, students receive hands-on guidance to refine their skills. The curriculum covers the nuances of sports announcing for television, radio, and digital platforms.

Course Outcomes:

Students who successfully complete this class will be able to:

- Recognize the essential qualities of a successful sports broadcast professional and integrate them into their own sports media work.
- Analyze the historical evolution of sports broadcast announcing and its relevance in contemporary media landscapes.
- Apply techniques to manage and overcome performance anxiety specific to sports broadcasting and play-by-play.
- Develop effective bullet points and scripts tailored for sports broadcasting contexts.
- Explain the role of commercial endorsements and their integration into sports broadcast and digital media.
- Analyze and adapt accent modification techniques for effective sports broadcasting delivery.

Program Outcomes

Apply relevant criteria and standards when evaluating information in terms of how it will interest and inform their audience.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

JOURN 157 - Social Media & Broadcast Marketing

Credits: 5

Explores the role of social media, digital delivery, and other marketing tools as utilized by broadcast and digital media. Gives students detailed understanding of marketing, research, and sales at radio and television stations as well as new media and digital platforms.

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate a working knowledge of standard industry practices with regards to researching broadcast & digital media audiences, marketing radio, television, cable & satellite stations, and digital media to the audience.
- Demonstrate a working knowledge of selling advertising on radio, television & cable stations as well as on digital platforms.
- Demonstrate an understanding of the potential for expanding the reach of broadcast & digital media through social media, the internet and other digital delivery.

Program Outcomes

Apply relevant criteria and standards when evaluating information in terms of how it will interest and inform their audience.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as

necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

JOURN 165 - Careers in Digital Media

Credits: 2

Examines careers in digital media such as social media manager, video journalist, content editor, multimedia producer, on-air personality and more. Students will learn the expectations and real-world demands to successfully perform and interact in these fast-paced, ever-changing fields. Students will learn about various job pathways and how to showcase their skills and knowledge to future employers.

Course Outcomes:

Students who successfully complete this class will be able to:

- Establish an action plan for a career in digital media.
- Determine best practices and responsibilities of various digital media industry roles.
- Recognize key aspects of daily life at digital media companies.
- Demonstrate productive self-reflection with regard to your professional and personal goals.
- Develop a digital media portfolio to demonstrate your professional abilities to employers, graduate school committees, and friends and family.

Program Outcomes

Apply relevant criteria and standards when evaluating information in terms of how it will interest and inform their audience.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

JOURN 198 - Independent Study-Journalism 1

Credits: 1-5

Encourages students to study and develop independently in journalism. Students develop their own focus area and objectives in consultation with the instructor.

Enrollment Requirement: JOURN 101 and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Complete a special project to be agreed upon by student and instructor, based upon the general objective of further learning and development in the field of journalism.

Program Outcomes

Apply relevant criteria and standards when evaluating information in terms of how it will interest and inform their audience.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

JOURN 199 - Independent Study-Journalism 2

Credits: 1-5

Encourages students to study and develop independently in journalism. Students develop their own focus areas and objectives in consultation with the instructor.

Enrollment Requirement: JOURN 198 and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Complete a special project to be agreed upon by student and instructor, based upon the general objective of further learning and development in the field of journalism.

Program Outcomes

Apply relevant criteria and standards when evaluating information in terms of how it will interest and inform their audience.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

JOURN 205 - Radio Management

Credits: 5

Students will learn additional skills as part of the management team at our broadcast radio stations (KGRG and KGRG-FM). Planning, organizing, managing events and staff are practiced as preparation for advanced careers in broadcasting.

Enrollment Requirement: JOURN 115 or instructor consent.

Course Fee: \$60.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Understand the daily management of a radio station.
- Demonstrate skills of working with others in a pre-professional setting.
- Demonstrate industry-accepted on-the-air techniques.
- Demonstrate management and leadership skills.
- Create a job interview-quality aircheck & resume.

Program Outcomes

Apply relevant criteria and standards when evaluating information in terms of how it will interest and inform their audience.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

JOURN 251 - Journalism Internship 1

Credits: 3

Students work for a local media company 10 hours per week each quarter and meet one hour a week with an instructor to evaluate their on-the-job training.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Work on a newspaper, magazine, radio station or television studio at least 10 hours a week working with professionals.

Program Outcomes

Apply relevant criteria and standards when evaluating information in terms of how it will interest and inform their audience.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

JOURN 252 - Journalism Internship 2

Credits: 3

Students work for a local media company 10 hours per week each quarter and meet one hour a week with an instructor to evaluate their on-the-job training.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Work on a newspaper, magazine, radio station or television studio at least 10 hours a week working with professionals.

Program Outcomes

Apply relevant criteria and standards when evaluating information in terms of how it will interest and inform their audience.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

JOURN 253 - Journalism Internship 3

Credits: 3

Students work for a local newspaper or radio station 10 hours per week each quarter and meet one hour a week with an instructor to evaluate their on-the-job training.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Work on a newspaper, magazine, radio station or television studio at least 10 hours a week working with professionals.

Program Outcomes

Apply relevant criteria and standards when evaluating information in terms of how it will interest and inform their audience.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

JOURN 298 - Independent Study-Journalism 3

Credits: 1-5

Encourages students to study and develop independently in journalism. Students develop their own focus areas and objectives in consultation with the instructor.

Enrollment Requirement: JOURN 199 and instructor consent.

Course Outcomes:

Course outcomes to be mutually agreed upon between instructor and student.

Program Outcomes

Apply relevant criteria and standards when evaluating information in terms of how it will interest and inform their audience.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

JOURN 299 - Independent Study-Journalism 4

Credits: 1-5

Encourages students to study and develop independently in journalism. Students develop their own focus areas and objectives in consultation with the instructor.

Enrollment Requirement: JOURN 199 and instructor consent.

Course Outcomes:

Course outcomes to be mutually agreed upon between instructor and student.

Program Outcomes

Apply relevant criteria and standards when evaluating information in terms of how it will interest and inform their audience.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is

designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Latin American Studies

LAS 190 - Latin American Culture Through Literature

Credits: 5

Introduces the study of Latin American culture through important works of literature that explore the complex social relations and culture of the region. Analyzes how Latin American literature has reflected cultural changes throughout the history of the region such as the impact of the conquest and slavery; the influence of patriarchy/machismo and Marianism in gender relations; the problematic relations with the U.S., the history of dictatorship and social revolution in Latin America. Focuses on preparing students to understand Latin America to be prepared to function in our globalized world. Previously HUMAN 190. Cross-listed with SPAN 290

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English and Diversity

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Comprehend the usefulness of literary works to understand Latin American societies, histories and their complex social mixture of African, European and indigenous American constructions.
- Understand the main periods of the evolution of Latin American literature and their social and political contexts throughout the history of the region.
- Connect the socio-political changes within different Latin American societies with the evolution of its literature.
- Develop critical thinking tools to analyze the multiple identities, histories, cultures, perspectives, contributions, knowledge and/or strategies of historically excluded groups in Latin America in some of the literature they produced;
- Develop skills to travel, work, understand, and be sensitive to our Latin American neighbors.

Program Outcomes

Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as

necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

LAS 191 - Latin America in Film

Credits: 5

Explores the relationship between film and cultural interpretation and understanding of Latin America. Considers the history of cinema in Latin America. Focuses on how film has been used to interpret Latin American culture and how we can use it to understand Latin American past and present with special emphasis on discussing the complex history and social problems of the region. Also explores common stereotypes with which Latin America has been portrayed in mainstream U.S. movies. No knowledge of Spanish language required. Previously HUMAN 191. Cross-listed with FILM 191.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English and Diversity

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Develop the ability to interpret and discuss "art movies" that deal with cultural, political and historical issues.
- Examine questions related to the impact of colonization and imperial relations in Latin America.
- Develop a general knowledge of Latin American history and culture.
- Identify the stereotypes with which Latin America has been portrayed in mainstream U.S. movies.

Program Outcomes

Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

LAS 193 - Andean & Amazonian Culture: Continuity and Change

Credits: 5

An introduction to Andean and Amazonian cultures from both historical and contemporary perspectives, exploring the cultural diversity and resilience of the peoples

within these regions. Focusing on the territories of present-day Bolivia, Ecuador, Peru, Chile, Colombia, Venezuela, the Guianas, and Brazil, the course examines cultural continuities and transformations over time. Topics include symbolic practices across art, ritual, myth, and music; the influence of indigenous knowledge and environmental relationships; the persistence of communal structures like the ayllu; and the cultural dynamics of conquest and colonialism. Through themes such as indigenous cosmovision, Andes-Amazonia connections, cultural syncretism, and contemporary social movements, students will gain a deep understanding of how the region's cultures have been shaped by internal and external forces, fostering an appreciation for their unique contributions to Latin America. Possible thematic rotations include symbolic continuity and ritual practices, representations of colonialism and cultural contact, indigenous knowledge systems, modern social movements, and Andean-Amazonian interactions.

Enrollment Requirement: Eligible for ENGL 99 - Introductory Composition or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Outcomes:

Students who successfully complete this class will be able to:

- **Familiarize** students with key aspects of Andean and Amazonian cultures, including cultural practices, historical narratives, and contemporary social issues.
- **Understand** the impact of social and cultural processes on Andean and Amazonian communities, recognizing influences of indigenous knowledge and environmental adaptations.
- **Critically analyze** continuity and change in Andean and Amazonian social and cultural contexts, with the ability to assess how historical dynamics impact present-day issues.
- **Interpret** the relationships between cultural practices and environmental contexts in the Andes and Amazon, recognizing how these interactions shape worldviews, cosmologies, and social structures within indigenous communities.

Program Outcomes

Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.
- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.

LAS 195 - Special Topics in Latin American Studies: Interdisciplinary Explorations of Culture and Identity

Credits: 5

Provides an in-depth exploration of rotating topics that highlight key issues, narratives, and cultural expressions in Latin America. Each quarter, the course offers a new thematic focus, enabling the examination of diverse subjects ranging from visual and popular cultures, literature, and media to social and historical movements. Possible topics include Latin American comics, photography, folklore, "monstrous" representations, indigenous narratives, and Afro-Latin American identities. By integrating interdisciplinary methods and perspectives, students will engage critically with topics that reflect Latin America's complex cultural landscapes, including identity formation, indigenous and Afro-Latin American traditions, transnationalism, and the representation of marginal voices. Through readings, discussions, and multimedia resources, students will deepen their understanding of Latin American experiences and cultural dynamics.

Enrollment Requirement: Eligible for ENGL 99 - Introductory Composition or instructor consent.

Satisfies Requirement: Diversity

Course Outcomes:

Students who successfully complete this class will be able to:

- **Identify** key cultural, historical, or social themes relevant to the selected topic of the quarter in Latin American Studies.
- **Analyze** how interdisciplinary perspectives (such as cultural studies, visual studies, etc.) contribute to a nuanced understanding of Latin American issues.
- **Critically evaluate** primary and secondary sources to examine Latin American identity, representation, and socio-cultural transformations.

Program Outcomes

Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.
- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.

LAS 200 - Latin American Women: Struggles and Literature

Credits: 5

Introduces the study of Latin American Women's struggles through important literature produced by Latin American women, to explore the historical construction of masculinity and femininity in the region, the role of politics and ideologies in that construction, the intersection of gender, race, class, ethnicity and nationality and the social movements that have impacted the lives of women in the region. Previously HUMAN 200.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English and Diversity

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Discuss the intersections of gender, race, politics, power, social structures and history in Latin America.
- Discuss the relation of Latin American women issues to the conquest and subsequent imperial domination's in the region.
- Understand the impacts of patriarchy/machismo, marianismo/malinchismo in gender relations in Latin America.
- Assess how literature and art produced by Latin American women reflects, question and advance the causes of women.
- Appraise the emergence of feminist ideas and organizations in Latin America, their conflicts with "First World Feminism," and their relations with non-feminist women organizations.
- Recognize and apply the basic principles and conventions of effective written communication about the subject.
- Use their critical thinking abilities by examining the following elements of thought not only in the reading materials but also in the answers provided by other classmates: points of view, purpose, question at issue, implications and consequences, assumptions, concepts, conclusion and solutions.

Program Outcomes

Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

LAS 201 - Africa in Latin America: From Language to Food to Music and Dance

Credits: 5

Introduce students to the study of the socio-cultural experiences of peoples of African descent in the Spanish, French, and Portuguese speaking countries of Latin America and the Caribbean, from the period of the transatlantic slave trade to more recent migration movements. Focusing on the linguistic, literary, culinary, musical, and dancing contributions of Africans and their descendants in this region, the course will deal with issues of enslavement, racism and discrimination, resistance and survival, as well as their contributions to the cultural richness of Latin America.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English and Diversity

Course Outcomes:

Students who successfully complete this class will be able to:

- Discuss the intersections of colonialism, race, gender, politics, power, social structures, language, and history in Latin America and the Caribbean as they relate to the enslavement of Africans and its aftermath in the region.
- Explain the impacts of the enslavement of Africans and its consequences for the development of distinctive cultural characteristics of Latin America and the Caribbean, particularly in relation to the dominant colonial languages (Spanish, French, Portuguese).
- Assess how literature, music, dance, and art produced by Afro-Latin Americans reflect, question, and advance the causes of *Afro-Latinidad* in the region.
- Recognize and apply the basic principles and conventions of effective written communication about the subject.
- Examine the following elements of thought not only in the reading materials but also in the answers provided by other classmates: points of view, purpose, question at issue, implications and consequences, assumptions, concepts, conclusion, and solutions.

Program Outcomes

Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

Machining and Manufacturing Technology

MFG 101 - Introduction to Machining and Manufacturing

Credits: 1-13

Emphasizes beginning conventional machine tool operation and includes use and care of tools and instruments used in measurement, layout and inspection. Safety to self and others is stressed in the operation of pedestal grinders, drill presses, conventional lathes, and milling machines. Occupational health and safety are taught.

Enrollment Requirement: Eligible for READ 104 and Instructor consent.

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Observe all occupational health and safety rules.
- Plan a machining job with the correct sequence of operations to produce a work piece to the specifications on the drawing.
- Calculate correct cutting speeds and feeds on both lathes and milling machines.
- Select the correct tooling for basic lathe and milling machine operations.
- Correctly use micrometers, dial calipers, vernier scales, steel rules, dial indicators, and do precision layout.

Program Outcomes

- Demonstrate accuracy and safety in the completion of manufacturing tasks.
- Produce a manually turned work piece.

- Produce a manually milled work piece.
- Use hand tools correctly and safely.
- Use precision measuring instruments correctly.
- Identify and describe basic tool and project materials.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MFG 102 - Conventional Milling and Turning

Credits: 1-13

Introduces progressively more difficult operations on conventional lathes and milling machines with an emphasis on job planning sequence, attention to blueprint specifications, setting up equipment for safe operation, speeds and feeds calculations, proper selection of tooling and work holding, as well as work piece layout and final inspection processes.

Enrollment Requirement: MFG 101 with a grade of 2.0 or higher; eligible for READ 104 and instructor consent.

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Observe all occupational health and safety rules.
- Plan a machining job with the correct sequence of operations to produce a work piece to the specifications on the drawing.
- Calculate correct cutting speeds and feeds on both lathes and milling machines.
- Select the correct tooling for basic lathe and milling machine operations.
- Correctly use micrometers, dial calipers, vernier scales, steel rules, dial indicators, and do precision layout.

Program Outcomes

- Demonstrate accuracy and safety in the completion of manufacturing tasks.
- Produce a manually turned work piece.
- Produce a manually milled work piece.
- Use hand tools correctly and safely.
- Use precision measuring instruments correctly.
- Identify and describe basic tool and project materials.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MFG 103 - Conventional and Computer Numerical Control (CNC) Machining Level 1

Credits: 1-13

Emphasizes advanced calculations and machining operations on conventional lathes, milling machines, and surface grinders and their accessories. Introduces the basics of CNC programming and machining.

Enrollment Requirement: MFG 102 with a grade of 2.0 or higher; Reading requirement - Eligible for READ 104 and instructor consent.

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Observe all occupational health and safety rules.
- Plan a machining job with the correct sequence of operations to produce a work piece to the specifications on the drawing.
- Calculate correct cutting speeds and feeds on both lathes and milling machines.

- Correctly produce a basic program for a CNC milling machine.
- Correctly use micrometers, dial calipers, vernier scales, steel rules, dial indicators, and do precision layout.

Program Outcomes

- Demonstrate accuracy and safety in the completion of manufacturing tasks.
- Produce a manually turned work piece.
- Produce a manually milled work piece.
- Produce a surface-ground work piece.
- Produce a CNC machined work piece.
- Use precision measuring instruments correctly.
- Identify and describe basic tool and project materials.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MFG 104 - Conventional and Computer Numerical Control (CNC) Machining Level 2

Credits: 1-13

Emphasizes more advanced calculations and machining operations on conventional lathes, milling machines, and surface grinders and their accessories. Includes basic CNC milling and turning operations and introduces CAD/CAM software.

Enrollment Requirement: MFG 103 with a grade of 2.0 or higher; and instructor consent.

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Observe all occupational health and safety rules.
- Plan a machining job with the correct sequence of operations to produce a work piece to the specifications on the drawing.
- Calculate correct cutting speeds and feeds on both lathes and milling machines.
- Correctly produce a basic program for a CNC milling machine.
- Produce parts to drawing specifications on both conventional and CNC machine tools.
- Correctly use micrometers, dial calipers, vernier scales, steel rules, dial indicators, and do precision layout.

Program Outcomes

- Demonstrate accuracy and safety in the completion of manufacturing tasks.
- Produce a manually turned work piece.
- Produce a manually milled work piece.
- Produce a surface-ground work piece.
- Produce a CNC machined work piece.
- Use precision measuring instruments correctly.
- Identify and describe basic tool and project materials.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MFG 105 - Intermediate Computer Numerical Control (CNC) Machining

Credits: 1-13

Emphasizes more advanced calculations and machining operations on CNC milling and turning centers and includes more extensive use of CAD/CAM software.

Enrollment Requirement: MFG 104 with a grade of 2.0 or higher; and instructor consent.

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Observe all occupational health and safety rules.
- Do a CNC machining job with the correct sequence of operations to produce a work piece to the specifications on the drawing.
- Calculate correct cutting speeds and feeds on both lathes and milling machines.
- Correctly produce a basic program for a CNC milling machine.
- Correctly use micrometers, dial calipers, vernier scales, steel rules, dial indicators, and do precision layout.

Program Outcomes

- Demonstrate accuracy and safety in the completion of manufacturing tasks.
- Produce a CNC machined work piece.
- Use precision measuring instruments correctly.
- Identify and describe basic tool and project materials.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MFG 106 - Special Machining Practices

Credits: 1-13

A capstone course in which learners refine their skills working independently to produce final projects using conventional or CNC machine tools and CAD/CAM software.

Enrollment Requirement: MFG 105 with a grade of 2.0 or higher; and instructor consent.

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Observe all occupational health and safety rules.
- Do a machining job with the correct sequence of operations to produce a work piece to the specifications on the drawing.
- Select the correct tooling and work holding devices for more advanced machining operations.
- Correctly use micrometers, dial calipers, vernier scales, steel rules, and dial indicators.

Program Outcomes

- Demonstrate accuracy and safety in the completion of manufacturing tasks.
- Produce a manually turned work piece.
- Produce a manually milled work piece.
- Produce a surface-ground work piece.
- Produce a CNC machined work piece.
- Use hand tools correctly and safely.
- Use precision measuring instruments correctly.
- Identify and describe basic tool and project materials.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MFG 107 - Fundamentals of Additive Manufacturing

Credits: 3

Provides an overview of the build process used in additive manufacturing, and discusses the general steps involved in most additive manufacturing (AM) procedures. Important topics include creating or downloading 3D computer models, converting those models to AM-compatible file formats, setting up and running an AM machine (3D Printer), part removal and post-processing.

Enrollment Requirement: Eligible for READ 104 and instructor consent.

Course Fee: \$75.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe how AM system users can protect themselves against common mechanical, electrical, thermal, and airborne hazards.
- Demonstrate the use and understanding of personal protective equipment (PPE), lockout/tag-out procedures, Hazard Communication Standards (HCS), and Safety Data Sheets (SDS).
- Demonstrate an understanding of the eight basic steps involved in creating an AM product.
- Be able to demonstrate understanding of Spatial Visualization by describing the following terms: Orthogonal Coordinate System, Build Platform, Orientation, and Mental Rotation.
- Apply Computer Aided Design/Computer Aided Manufacturing (CAD/CAM) skills learned to the operation of a 3D printer.
- Demonstrate an understanding of the Cartesian coordinate system.

Program Outcomes

- Demonstrate accuracy and safety in the completion of manufacturing tasks.
- Use precision measuring instruments correctly.
- Produce a correctly sequenced job/build plan.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MFG 108 - Intermediate Additive Manufacturing

Credits: 3

Provides an in depth look at Fused Filament Fabrication (FFF), Stereolithography (SLA) printing and discusses advanced slicer settings used to fine tune printing cycle time and quality. Important topics include material selection, choosing the proper settings to best fit the use of the part(s), printing to reduce post-processing, and additive manufacturing filament recycling.

Enrollment Requirement: MFG 107 with a grade of 2.0 or higher; and instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe how AM system users can protect themselves against common mechanical, electrical, thermal, and airborne hazards.
- Demonstrate the use and understanding of personal protective equipment (PPE), lockout/tag-out procedures, Hazard Communication Standards (HCS), and Safety Data Sheets (SDS).
- Demonstrate material knowledge, and proper application of each material.
- Be able to describe the material recycling theory and application.
- Apply Computer Aided Design/Computer Aided Manufacturing (CAD/CAM) skills learned to the operation of a 3D printer to reduce cycle time.
- Demonstrate variable setups to reduce post-processing and material waste.
- Show, through iterations, how different setting configurations improve print quality.
- Describe proper build plate arrangements to improve printer movement efficiency.

Program Outcomes

- Demonstrate accuracy and safety in the completion of manufacturing tasks.
- Use precision measuring instruments correctly.
- Produce a correctly sequenced job/build plan.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MFG 109 - Advanced Additive Manufacturing

Credits: 3

Provides an in-depth look at Applied Rapid Prototyping and Hybrid Manufacturing. Important topics include: material selection based on prototype function, ensuring dimensional stability of prototypes, maintaining parts surface finish quality, and post-processing prototypes using multi-axis Computer Numerical Controlled (CNC) machining processes.

Enrollment Requirement: MFG 108 and instructor consent.

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe how Additive Manufacturing (AM) system users can protect themselves against common mechanical, electrical, thermal, and airborne hazards.
- Demonstrate the use and understanding of personal protective equipment (PPE), lockout/tag-out procedures, Hazard Communication Standards (HCS), and Safety Data Sheets (SDS).
- Demonstrate material knowledge by selecting the proper material based on prototype form and function.
- Accurately measure printed parts using precision tools such as calipers and micrometers.
- Apply Computer Aided Design/Computer Aided Manufacturing (CAD/CAM) skills learned to the operation of a 3D printer to reduce cycle time.
- Demonstrate variable setups to reduce post-processing and material waste.
- Select print configurations to improve print quality and dimensional stability.
- Process parts to comply with engineering, client and blueprint requirements.

Program Outcomes

- Demonstrate accuracy and safety in the completion of manufacturing tasks.
- Use precision measuring instruments correctly.
- Produce a correctly sequenced job/build plan.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work

products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MFG 115 - Reading Engineering Drawings

Credits: 2

Modular, group-paced course that teaches basic reading and interpretation of orthographic and isometric mechanical drawings specific to the manufacturing industry. Includes basic geometric dimensioning and tolerancing (GD&T). Emphasizes details, relevant manufacturing requirements, and industry standards and terminology.

Enrollment Requirement: Instructor consent.

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Interpret basic orthographic and isometric drawings, including auxiliary and sectional views.
- Interpret current ANSI symbols, terms, abbreviations, lines, materials specifications, notes, thread specifications, tolerances and all title-block information, as well as basic geometric tolerancing and dimensioning features.

Program Outcomes

Read blueprints correctly.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MFG 162 - Applied Materials for Manufacturing

Credits: 2

Modular, group-paced course that includes basic introduction to the manufacture and structure of metals, the effects of alloying elements and heat treatment of steel, as well as various destructive and non-destructive testing methods. Emphasizes metallurgy in manufacturing processes and machinability of various types of materials.

Enrollment Requirement: Instructor consent.

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Use basic vocabulary associated with metals and heat treating processes.
- Interpret the SAE/AISI designation system for steels and aluminums.
- Describe the effects of various heat treatment processes.
- Explain the effects of various alloying elements on machinability of metals.
- Explain the use of Rockwell and Brinell hardness testers and convert between scales.
- Explain the procedure and significance of tensile and other material tests.

Program Outcomes

Identify and describe basic tool and project materials.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

MFG 163 - Training and Practice

Credits: 1-4

Provides training and practice in the safe and efficient set-up and operation of all basic machine tools, including machine accessories, measuring tools and inspection equipment. Instruction is geared toward those interested only in skills rather than certification.

Enrollment Requirement: Instructor consent.

Course Fee: \$11.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Observe all occupational health and safety rules.
- Plan a lathe and a milling machine job with the correct sequence of operations to produce a work piece to the specifications on the blueprint.
- Calculate correct cutting speeds and feeds on both lathe and milling machine.
- Select the correct tooling for basic lathe and milling machine operations.
- Correctly use micrometers, dial calipers, vernier scales, steel rules, dial indicators, and do precision layout.
- Given a detailed drawing and materials, set-up and operate machine tools to produce a work piece within specified tolerances.

Program Outcomes

- Demonstrate accuracy and safety in the completion of manufacturing tasks.
- Produce a manually turned workpiece.
- Produce a manually milled workpiece.
- Produce a surface-ground workpiece.
- Produce a CNC machined workpiece.
- Use hand tools correctly and safely.
- Use precision measuring instruments correctly.
- Read blueprints correctly.
- Produce a correctly sequenced job/build plan.
- Identify and describe basic tools and project materials.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is

designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

MFG 168 - Mastercam Level One

Credits: 1-13

Introduction to Mastercam, including geometry, contouring, and tool paths. No CNC shop machining performed.

Enrollment Requirement: Instructor consent.

Course Fee: \$15.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Create geometry from blueprints in Mastercam.
- Create tool paths in Mastercam.
- Create CNC programs in Mastercam.

Program Outcomes

- Demonstrate accuracy and safety in the completion of manufacturing tasks.
- Read blueprints correctly.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MFG 169 - Mastercam Level Two

Credits: 1-13

Continuation of beginning Mastercam, including geometry, contouring, and tool paths. No CNC shop machining performed.

Enrollment Requirement: Instructor consent.

Course Fee: \$15.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Create two and three-dimensional geometry from blueprints in Mastercam.

- Create tool paths for two and three-dimensional geometry in Mastercam.
- Create CNC programs from two and three-dimensional tool paths in Mastercam.

Program Outcomes

- Demonstrate accuracy and safety in the completion of manufacturing tasks.
- Read blueprints correctly.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MFG 177 - Manufacturing Work Experience

Credits: 1-13

offers learners an opportunity to work full- or part-time in manufacturing jobs directly related to their programs and interests. Students may receive a salary or volunteer.

Enrollment Requirement: MFG 105 with a grade of 2.0 or higher; or instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Course outcomes to be mutually agreed upon between instructor and student.

Program Outcomes

- Demonstrate accuracy and safety in the completion of manufacturing tasks.
- Use precision measuring instruments correctly.
- Produce a correctly sequenced job/build plan.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MFG 178 - Computer Numerical Control CNC Manufacturing Work Experience

Credits: 1-13

Allows students to work full- or part-time in jobs directly related to their programs and interests. Students may receive a salary or volunteer.

Enrollment Requirement: Concurrent enrollment in COOP 171 and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Network with people in professional settings.
- Work with others in their field of interest.
- Adjust to specific aspects of a career.
- Improve previously acquired skills in CNC machining.

Program Outcomes

- Demonstrate accuracy and safety in the completion of manufacturing tasks.
- Produce a CNC machined workpiece.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

Mechatronics Technician**MTX 100 - Mechatronics Technician 1**

Credits: 1-13

Introduction and hands-on experience with fundamental hydraulic and pneumatic systems. Students acquire industry and workplace safety standards and practices, as well as essential interpersonal communication skills. Basic computer skills are highly recommended: Windows, Internet, and Email.

Enrollment Requirement: Eligible for MATH 70 or above.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify basic hydraulic components and explain their functions.
- Build and test basic industry-specific hydraulic circuits.
- Read, write, and explain basic hydraulic schematics.
- Identify basic pneumatic components and their functions.
- Build and test basic industry-specific pneumatic circuits.
- Read, write, and explain basic pneumatic schematics.

Program Outcomes

- Work as a mechatronics technician.
- Demonstrate OSHA and WISHA standards for safety in the workplace.
- Troubleshoot and repair hydraulic, pneumatic, electrical and electronic industrial equipment.

- Explain the consequences of failure to comply with company and basic safety principles

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MTX 110 - Mechatronics Technician 2

Credits: 1-13

Further explores hydraulic and pneumatic systems through instruction and hands-on experience. Fundamental AC/DC electrical concepts will also be introduced. Students acquire industry and workplace safety standards and practices, as well as essential interpersonal communication skills. Basic computer skills are highly recommended: Windows, Internet, and Email.

Enrollment Requirement: MTX 100 with a grade of 2.0 or higher; or instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify intermediate hydraulic components and explain their functions.
- Build and test intermediate industry-specific hydraulic circuits.
- Read, write, and explain intermediate hydraulic schematics.
- Identify intermediate pneumatic components and their functions.
- Build and test intermediate industry-specific pneumatic circuits.
- Read, write, and explain intermediate pneumatic schematics.
- Identify basic electrical components and explain their functions.
- Build and test basic industry specific electrical circuits.

Program Outcomes

- Work as a mechatronics technician.
- Demonstrate OSHA and WISHA standards for safety in the workplace.
- Troubleshoot and repair hydraulic, pneumatic, electrical and electronic industrial equipment.
- Explain the consequences of failure to comply with company and basic safety principles.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MTX 120 - Mechatronics Technician 3

Credits: 1-13

Advanced knowledge and skills of hydraulic and pneumatic systems through instruction and hands-on experience. Students will develop an understanding of electro-fluid power. Students acquire industry and workplace safety standards and practices, as well as essential interpersonal communication skills. Basic computer skills are highly recommended: Windows, Internet, and Email.

Enrollment Requirement: MTX 110 with a grade of 2.0 or higher; or instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify advanced hydraulic components and explain their functions.
- Build and test advanced industry-specific hydraulic circuits.
- Read, write, and explain advanced hydraulic schematics.
- Identify advanced pneumatic components and their functions.
- Build and test advanced industry-specific pneumatic circuits.
- Read, write, and explain advanced pneumatic schematics.
- Build and test electro-fluid power systems.

Program Outcomes

- Work as a mechatronics technician.
- Demonstrate OSHA and WISHA standards for safety in the workplace.
- Troubleshoot and repair hydraulic, pneumatic, electrical and electronic industrial equipment.
- Explain the consequences of failure to comply with company and basic safety principles.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MTX 130 - Mechatronics Technician 4

Credits: 1-13

Applies skills and knowledge gained in previous courses to troubleshoot hydraulic systems. Students will begin to develop an understanding of power and control electronics and electrical relay controls. Students acquire industry and workplace safety standards and practices, as well as essential interpersonal communication skills. Basic computer skills are highly recommended: Windows, Internet, and Email.

Enrollment Requirement: MTX 120 with a grade of 2.0 or higher; or instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Perform basic troubleshooting and fault identification in hydraulic systems.
- Identify and use basic power and electronic measuring equipment.
- Identify and use relay controls for industrial purposes.
- Read, write, and explain advanced hydraulic schematics.
- Read, write, and explain intermediate electrical schematics.

Program Outcomes

- Work as a mechatronics technician.
- Demonstrate OSHA and WISHA standards for safety in the workplace.
- Troubleshoot and repair hydraulic, pneumatic, electrical and electronic industrial equipment.
- Explain the consequences of failure to comply with company and basic safety principles.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MTX 140 - Mechatronics Technician 5

Credits: 1-13

Introduction to PLC programming through instruction and hands-on application of PLC simulation software. Students will gain knowledge and skills in PLC programming and AC motor drives. Students acquire industry and workplace safety standards and practices, as well as essential interpersonal communication skills. Basic computer skills are highly recommended: Windows, Internet, and Email.

Enrollment Requirement: MTX 130 with a grade of 2.0 or higher; or instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify and understand the use of PLC components and their functions.
- Perform basic PLC programming.
- Explain and use the ladder logic method of programming.
- Explain other PLC programming languages.
- Identify and use AC Motor Drives.
- Identify and use AC Variable Frequency Drives.

Program Outcomes

- Work as a mechatronics technician.
- Demonstrate OSHA and WISHA standards for safety in the workplace.
- Troubleshoot and repair hydraulic, pneumatic, electrical and electronic industrial equipment.
- Explain the consequences of failure to comply with company and basic safety principles.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MTX 150 - Mechatronics Technician 6

Credits: 1-13

Students will develop Programmable Logic Controllers (PLC) troubleshooting skills through instruction and hands-on experience. Students will also gain the fundamental skills and knowledge to program multiple variations of PLCs. Students will work on core training needed to implement, and program, robotics and automation through the use of digital and analog inputs and outputs.

Enrollment Requirement: MTX 140 with a grade of 2.0 or higher; or instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Test, troubleshoot, and modify PLC systems.
- Perform intermediate PLC programming.
- Identify and understand the use of Siemen's PLC's components and their functions.
- Perform Siemen's PLC programming.
- Troubleshoot a hydraulic system.
- Learn the fundamentals of robotics and automation
- Perform Universal Robotic core programming
- Identify and understand the use of Universal Robots 'e-Series" robotic components and their functions.

Program Outcomes

- Work as a mechatronics technician.
- Demonstrate OSHA and WISHA standards for safety in the workplace.
- Troubleshoot and repair hydraulic, pneumatic, electrical and electronic industrial equipment.
- Explain the consequences of failure to comply with company and basic safety principles.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is

designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

Management

MGMT 300 - Organizational Leadership

Credits: 5

Learn to apply leadership concepts to make an impact on teams within organizations, communities, and society. Topics include team dynamics, leading people, leading by example, leading projects, creating goals, and setting expectations.

Enrollment Requirement: Admission into the BAS in Applied Management program and BUS& 101, BUS 121 and BUS 258; or instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply organizational leadership theories at a variety of levels within the organization including personal, individual, team, and system.
- Analyze personal inventory of strengths and how they can be used in leadership development.
- Utilize theories and course content to develop strategies that enhance individual, team, and organizational performance.
- Describe the role that trust, accountability, vulnerability, communication, and emotional intelligence play in leading individuals, teams, and organizations.

Program Outcomes

- Formulate effective business strategies by conducting thorough analysis of a given market and business environment.
- Analyze quantitative and qualitative data to effectively and efficiently resolve business problems.
- Analyze financial data to explain organizational performance and identify business opportunities in a given market.
- Apply organizational behavior principles and human resources management practices to formulate a plan to effectively hire, retain, and develop a workforce.

- Plan and implement marketing and sales strategies to maximize long-term profitability of a firm.
- Construct operations and project plans that efficiently and effectively leverage organizational resources.
- Formulate strategies to increase ethical behavior and socially responsible decision making within an organization.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MGMT 301 - Leadership Development: Leading Self

Credits: 2

Learn to apply leadership practices to make an impact on teams within organizations, communities, and society. Topics include emotional intelligence, strengths-based leadership, high-performance leadership behaviors.

Enrollment Requirement: Admission into the BAS in Applied Management program; and ENGL& 101; or instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Recognize and apply a variety of leadership theories and practices to their own leadership development.
- Apply leadership theories and practices to better understand their strengths as a leader.
- Utilize leadership theories to construct an emotional intelligence development plan. growth plan utilizing emotional intelligence.

Program Outcomes

- Demonstrate leadership competencies and teamwork skills necessary to resolve interpersonal and organizational challenges that most often occur in the modern workplace.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MGMT 302 - Leadership Development: Leading Others

Credits: 2

Learn to apply leadership practices to make an impact on teams within organizations, communities, and society. Topics include team dynamics, leading people, leading by example.

Enrollment Requirement: Admission into the BAS in Applied Management program; and ENGL& 101; or instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply leadership theories to select, develop, and coach others to achievement in the workplace.
- Demonstrate an understanding of group dynamics and effective teamwork through interaction by utilizing best practices, models, and frameworks.

Program Outcomes

- Demonstrate leadership competencies and teamwork skills necessary to resolve interpersonal and organizational challenges that most often occur in the modern workplace.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MGMT 303 - Leadership Development: Leading Function & Orgs

Credits: 1

Learn to apply leadership practices to make an impact on teams within organizations, communities, and society. Topics include leading projects, creating goals, and setting expectations.

Enrollment Requirement: Admission into the BAS in Applied Management program; and ENGL& 101; or instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Given a business scenario, students will act systematically to address organizational complexity, culture, change, and risk.
- Utilize leadership theories to set an organizational vision and deploy strategic thinking, engagement, and innovation practices.

Program Outcomes

- Demonstrate leadership competencies and teamwork skills necessary to resolve interpersonal and organizational challenges that most often occur in the modern workplace.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MGMT 310 - Research in Marketing

Credits: 5

Learn to formulate marketing goals by utilizing market research methods to collect, analyze, and evaluate marketing data and information. Topics include market research methods, data analysis and interpretation, research proposals, communicating research, and strategic applications of research.

Enrollment Requirement: Admission into the BAS in Applied Management program; and MATH& 141 or MATH 147; and ENGL& 101; and BUS& 101; and BUS 121; or

instructor consent. **Recommended:** MATH 256

Course Outcomes:

Students who successfully complete this class will be able to:

- Contrast marketing research methods in terms of effectiveness, accuracy, cost, and required resources.
- Differentiate major types of measurement techniques in data collection methods.
- Analyze data obtained using marketing research.
- Construct market research project proposal that specifies research goals and methods.
- Propose marketing strategy recommendations utilizing results obtained from marketing research.

Program Outcomes

- Formulate effective business strategies by conducting thorough analysis of a given market and business environment.
- Analyze quantitative and qualitative data to effectively and efficiently resolve business problems.
- Analyze financial data to explain organizational performance and identify business opportunities in a given market.
- Use organizational behavior principles and human resources management practices to formulate a plan to effectively hire, retain, and develop a workforce.
- Plan and implement marketing and sales strategies to maximize long-term profitability of a firm.
- Construct operations and project plans that efficiently and effectively leverage organizational resources.
- Formulate strategies to increase ethical behavior and socially responsible decision making within an organization.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MGMT 315 - Organizational Design

Credits: 3

Learn effective organizational design in both traditional and innovative organizations, with special emphasis on organizational structures that can provide strategic advantage. Topics include when to use functional, divisional, or matrix organizations, and examples of high-engagement organizational cultures.

Enrollment Requirement: Admission into the BAS in Applied Management program; and BUS& 101; and ENGL& 101; or instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Analyze organizational effectiveness by diagnosing and evaluating organizational culture, values, and structure.
- Develop a framework for evolving organizational design elements and relationships by applying organizational theories to a business scenario.
- Summarize the relationship between leadership, organizational design, and effectiveness.
- Examine how management and organizational design can lead to a strategic advantage.
- Design an organizational structure for a business utilizing organizational design theories.

Program Outcomes

- Formulate effective business strategies by conducting thorough analysis of a given market and business environment.
- Analyze quantitative and qualitative data to effectively and efficiently resolve business problems.
- Analyze financial data to explain organizational performance and identify business opportunities in a given market.
- Apply organizational behavior principles and human resources management practices to formulate a plan to effectively hire, retain, and develop a workforce.
- Plan and implement marketing and sales strategies to maximize long-term profitability of a firm.
- Construct operations and project plans that efficiently and effectively leverage organizational resources.
- Formulate strategies to increase ethical behavior and socially responsible decision making within an organization.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of

emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MGMT 320 - Human Resources Management

Credits: 5

Examines the role of the human resource professional as a strategic partner in managing today's organizations. Topics include recruitment, selection, development, appraisal, retention, compensation, employment law, and labor relations.

Enrollment Requirement: Admission into the BAS in Applied Management program; and BUS& 101; and BUS 258; and ENGL& 101; or instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Create a recruitment plan by evaluating job description, creating a recruitment process, and developing a strategy for selecting and hiring an employee.
- Analyze an organization's talent management program by utilizing effective learning theories and best practices for employee training and development.
- Analyze the effectiveness of an organization's compensation and benefits by applying a Total Rewards perspective that integrates tangible rewards, employee benefits, and intangible rewards.
- Apply various employment laws to a business scenario and determine the potential impact on an organization.
- Explain the tactical and strategic role Human Resources plays in creating a high performance candidate.

Program Outcomes

- Formulate effective business strategies by conducting thorough analysis of a given market and business environment.
- Analyze quantitative and qualitative data to effectively and efficiently resolve business problems.
- Analyze financial data to explain organizational performance and identify business opportunities in a given market.
- Apply organizational behavior principles and human resources management practices to formulate a plan to effectively hire, retain, and develop a workforce.

- Plan and implement marketing and sales strategies to maximize long-term profitability of a firm.
- Construct operations and project plans that efficiently and effectively leverage organizational resources.
- Formulate strategies to increase ethical behavior and socially responsible decision making within an organization.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MGMT 325 - Human Resources Operations

Credits: 5

Focuses on the tactical and operational tasks related to workforce management and the HR function. Topics included: HR operations, Compensation & Benefits and Employee Relations. Prepares students for the Associate Professional in Human Resources (aPHR) exam.

Enrollment Requirement: Admission into the BAS in Applied Management program; and BUS& 101, BUS 121, and BUS 258; or instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply the tactical and operational tasks related to workforce management and the HR function including policies, procedures and programs related to legal & regulatory compliance.
- Explain concepts related to total rewards such as pay and benefit programs.
- Respond to employee questions and be able to handle claims related to compensation & benefit programs.

- Describe the methods organizations use to monitor and address morale, performance, and retention.
- Analyze the operational needs of the organization with the well-being of the individual employee.

Program Outcomes

- Formulate effective business strategies by conducting thorough analysis of a given market and business environment.
- Demonstrate leadership competencies and teamwork skills necessary to resolve interpersonal and organizational challenges that most often occur in the modern workplace.
- Analyze quantitative and qualitative data to effectively and efficiently resolve business problems.
- Analyze financial data to explain organizational performance and identify business opportunities in a given market.
- Use organizational behavior principles and human resources management practices to formulate a plan to effectively hire, retain, and develop a workforce.
- Plan and implement marketing and sales strategies to maximize long-term profitability of a firm.
- Demonstrate professional and persuasive communication to internal and external stakeholders, both orally and in writing.
- Construct operations and project plans that efficiently and effectively leverage organizational resources.
- Formulate strategies to increase ethical behavior and socially responsible decision making within an organization.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MGMT 335 - Marketing Communications and Planning

Credits: 5

Learn to develop, measure, and evaluate an integrated marketing communications plan.

Topics include situational and competitive analysis, target market segmentation, creative strategy, media planning and selection, social media management, budget determination, and measuring effectiveness of promotional program.

Enrollment Requirement: Admission into the BAS in Applied Management program; and BUS& 101; and ENGL& 101; and MGMT 395; or instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Summarize the concept of integrated marketing communications and how it relates to various components of the marketing mix.
- Outline a marketing strategy that integrates situational analysis, competitive analysis, and target market analysis.
- Develop a creative strategy that encompasses definition of target audience, key selling ideas, desired brand image, and tactics for creative execution.
- Construct a media plan that accomplishes predetermined objectives for targeting, reach, frequency, and creative strategy.
- Critique the media selection for a promotional program based on the objectives for the promotional program.

Program Outcomes

- Formulate effective business strategies by conducting thorough analysis of a given market and business environment.
- Analyze quantitative and qualitative data to effectively and efficiently resolve business problems.
- Analyze financial data to explain organizational performance and identify business opportunities in a given market.
- Apply organizational behavior principles and human resources management practices to formulate a plan to effectively hire, retain, and develop a workforce.
- Plan and implement marketing and sales strategies to maximize long-term profitability of a firm.
- Construct operations and project plans that efficiently and effectively leverage organizational resources.
- Formulate strategies to increase ethical behavior and socially responsible decision making within an organization.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MGMT 340 - Business Project Management

Credits: 5

Examines the theories and best practices for completing projects on time, on budget, and to specification. Students learn to apply knowledge and skills to effectively initiate, plan, execute, and complete projects. Software-based project management tools are discussed. Course aligns with current PMBOK Guide.

Enrollment Requirement: Admission into the BAS in Applied Management program; and ENGL& 101; or instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Define a project and how it contrasts with ongoing operations.
- Identify stakeholders.
- Write project charter, scope of work, communications plan, and responsibility matrix.
- Examine risks to a project and methods for mitigating those risks.
- Build a Work Breakdown Structure.
- Identify task relationships and schedule tasks based on available resources.
- Estimate project costs and timelines.
- Rebalance project schedule and understand impact to cost, schedule, and quality.
- Explain keys to building a strong project team and solving common project problems.
- Examine methods for monitoring project and closing out project.
- Utilize common project management software tools to assist scheduling, estimating, and monitoring of project.

Program Outcomes

- Formulate effective business strategies by conducting thorough analysis of a given market and business environment.
- Analyze quantitative and qualitative data to effectively and efficiently resolve business problems.
- Analyze financial data to explain organizational performance and identify business opportunities in a given market.
- Apply organizational behavior principles and human resources management practices to formulate a plan to effectively hire, retain, and develop a workforce.

- Plan and implement marketing and sales strategies to maximize long-term profitability of a firm.
- Construct operations and project plans that efficiently and effectively leverage organizational resources.
- Formulate strategies to increase ethical behavior and socially responsible decision making within an organization.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MGMT 344 - Corporate Finance I

Credits: 5

A survey of business financial practices. Topics include financial analysis, planning and control, net present value, and CVP analysis.

Enrollment Requirement: Admission into the BAS in Applied Management program; and BUS& 101; and BUS 258; and ENGL& 101; or admission into the BAS in Accounting program; or instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Interpret relevant financial information for businesses.
- Construct basic budgets.
- Demonstrate an understanding of net present value and the time value of money.
- Apply CVP analysis to make management decisions.

Program Outcomes

- Analyze quantitative and qualitative data to effectively and efficiently resolve business problems.
- Analyze financial data to explain organizational performance and identify business opportunities in a given market.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MGMT 345 - Corporate Finance II

Credits: 5

A continuation of corporate finance. Topics include: Risk and return, managing working capital, capital investment, sources and costs of financing and valuation.

Enrollment Requirement: Admission into the BAS in Applied Management program; MGMT 344; or instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Compare risk and return with regard to investment and financing decisions.
- Explain techniques to manage working capital.
- Summarize the sources and costs of various financing options.
- Calculate the value of a business using various valuation methods.

Program Outcomes

- Formulate effective business strategies by conducting thorough analysis of a given market and business environment.
- Analyze quantitative and qualitative data to effectively and efficiently resolve business problems.
- Analyze financial data to explain organizational performance and identify business opportunities in a given market.
- Apply organizational behavior principles and human resources management practices to formulate a plan to effectively hire, retain, and develop a workforce.
- Plan and implement marketing and sales strategies to maximize long-term profitability of a firm.
- Construct operations and project plans that efficiently and effectively leverage organizational resources.

- Formulate strategies to increase ethical behavior and socially responsible decision making within an organization.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

MGMT 350 - Developing Products

Credits: 5

Learn how to identify, design, produce, test, and evaluate a new product. Topics include identification of market opportunities, generation of product concepts, feasibility analysis, prototyping, supplier selection, production planning, and testing.

Enrollment Requirement: Admission into the BAS in Applied Management program; and BUS& 101; and ENGL& 101; and MGMT 395; or instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Justify market opportunity for a new product using analysis of target market, competition, and other components of the business environment.
- Generate multiple product concepts that address market opportunity.
- Analyze feasibility of product concepts in terms of design, manufacturing, and cost.
- Develop plan for creating and testing prototype of product concept.
- Compose a product development plan that includes product specifications, supplier identification, performance testing, and financial analysis of project.

Program Outcomes

- Formulate effective business strategies by conducting thorough analysis of a given market and business environment.
- Analyze quantitative and qualitative data to effectively and efficiently resolve business problems.
- Analyze financial data to explain organizational performance and identify business opportunities in a given market.
- Apply organizational behavior principles and human resources management practices to formulate a plan to effectively hire, retain, and develop a workforce.
- Plan and implement marketing and sales strategies to maximize long-term profitability of a firm.

- Construct operations and project plans that efficiently and effectively leverage organizational resources.
- Formulate strategies to increase ethical behavior and socially responsible decision making within an organization.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MGMT 360 - Business Development and Sales Management

Credits: 5

Learn to integrate business development and selling strategies to effectively create productive buyer-seller relationships. Topics include strategic prospecting, personal selling strategies, organizational relationships, managing the sales funnel, and developing sales proposals.

Enrollment Requirement: Admission into the BAS in Applied Management program; and BUS& 101; and ENGL& 101; or instructor consent. **Recommended:** BUS 159

Course Outcomes:

Students who successfully complete this class will be able to:

- Outline the processes and strategies needed to create a productive buyer-seller relationship.
- Implement successful sales management practices.
- Formulate a sales strategy including key performance indicators for a given sales scenario.
- Demonstrate communication techniques used by industry professionals.
- Construct a business development scenario that utilizes e-platforms, strategic prospecting, and sales and business analysis tools.

Program Outcomes

- Formulate effective business strategies by conducting thorough analysis of a given market and business environment.
- Analyze quantitative and qualitative data to effectively and efficiently resolve business problems.

- Analyze financial data to explain organizational performance and identify business opportunities in a given market.
- Apply organizational behavior principles and human resources management practices to formulate a plan to effectively hire, retain, and develop a workforce.
- Plan and implement marketing and sales strategies to maximize long-term profitability of a firm.
- Construct operations and project plans that efficiently and effectively leverage organizational resources.
- Formulate strategies to increase ethical behavior and socially responsible decision making within an organization.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MGMT 361 - Negotiations

Credits: 3

Learn to integrate negotiation strategies to effectively maximize outcomes and secure agreements between two or more parties. Topics include applying interest-based negotiations principles and developing options for mutual gain.

Enrollment Requirement: Admission into the BAS in Applied Management program; and BUS& 101, BUS 121 and BUS 258; or instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Summarize the impact of interpersonal styles, personality, culture, and other variables that influence negotiations.
- Explain effective small group communication strategies in areas such as conflict management and resolution.
- Critique strategies for effective negotiations based on a negotiations scenario.
- Demonstrate interest-based negotiations principles.

Program Outcomes

- Formulate effective business strategies by conducting thorough analysis of a given market and business environment.
- Analyze quantitative and qualitative data to effectively and efficiently resolve business problems.
- Analyze financial data to explain organizational performance and identify business opportunities in a given market.
- Apply organizational behavior principles and human resources management practices to formulate a plan to effectively hire, retain, and develop a workforce.
- Plan and implement marketing and sales strategies to maximize long-term profitability of a firm.
- Construct operations and project plans that efficiently and effectively leverage organizational resources.
- Formulate strategies to increase ethical behavior and socially responsible decision making within an organization.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MGMT 385 - Business Operations Management

Credits: 5

Learn to apply operations management methods to increase results and streamline processes in small to medium-sized businesses. Topics include forecasting, process and facility selection, work design, production planning and scheduling, process improvement, and quality control.

Enrollment Requirement: Admission into the BAS in Applied Management; and BUS& 101; and BUS 258; and MATH& 141 or MATH 147; or instructor consent.

Recommended: MATH 256 and/or MGMT 340

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Explain the role of operations management for maximizing competitiveness and productivity.
- Determine product and service capacity needs using multiple forecasting methods.
- Critique options for process selection, facility layout, and work design based on a firm's business objectives and forecast.
- Construct production plan that meets a firm's objectives for lead times, inventory levels, capacity, and cost.
- Estimate the cost-benefit of process and quality improvement initiatives, including those encompassing principles of Lean, Six Sigma, and SPC.

Program Outcomes

- Formulate effective business strategies by conducting thorough analysis of a given market and business environment.
- Analyze quantitative and qualitative data to effectively and efficiently resolve business problems.
- Analyze financial data to explain organizational performance and identify business opportunities in a given market.
- Apply organizational behavior principles and human resources management practices to formulate a plan to effectively hire, retain, and develop a workforce.
- Plan and implement marketing and sales strategies to maximize long-term profitability of a firm.
- Construct operations and project plans that efficiently and effectively leverage organizational resources.
- Formulate strategies to increase ethical behavior and socially responsible decision making within an organization.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MGMT 395 - Marketing Management

Credits: 5

Examines how managers develop, implement, and evaluate strategic marketing decisions to maximize long-term profitability of a firm. Topics include analysis of

competitor behavior, product line management, and long-term road mapping of product and branding strategy.

Enrollment Requirement: Admission into the BAS in Applied Management; and BUS& 101; and BUS 121; and ENGL& 101; or instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Develop marketing strategies for products at different stages of the product life cycle.
- Modify a product line based on the firm's marketing strategy, the business environment, and the product's stage in the product life cycle.
- Critique a firm's roadmap for product mix in terms of its effect on customer acquisition, customer retention, and market positioning.
- Formulate strategies to maximize customer acquisition and retention.
- Design marketing strategies that leverage the core competencies of the firm with forces of the business environment.

Program Outcomes

- Formulate effective business strategies by conducting thorough analysis of a given market and business environment.
- Analyze quantitative and qualitative data to effectively and efficiently resolve business problems.
- Analyze financial data to explain organizational performance and identify business opportunities in a given market.
- Apply organizational behavior principles and human resources management practices to formulate a plan to effectively hire, retain, and develop a workforce.
- Plan and implement marketing and sales strategies to maximize long-term profitability of a firm.
- Construct operations and project plans that efficiently and effectively leverage organizational resources.
- Formulate strategies to increase ethical behavior and socially responsible decision making within an organization.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MGMT 400 - Applied Professional and Career Development

Credits: 3

Facilitates student development in the world of work through highly experiential and reflective learning focused on personal, professional, and career growth. Topics include personal branding, networking, interviewing, career planning, and continued professional development.

Enrollment Requirement: Admission into the BAS in Applied Management program; and BUS& 101, BUS 121 and BUS 258; or admission into the BAS in Accounting program; or instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Develop a personal branding strategy that effectively communicates core values, skills, strengths, and value proposition to appropriate stakeholders.
- Create a career development plan that can be utilized for identifying and attaining professional opportunities.
- Deploy networking strategies to expand current network and create potential career opportunities.
- Construct, format, and tailor a professional resume, digital profile, or portfolio.
- Demonstrate an understanding of the behavioral interview process by participating in simulated behavioral interviews.

Program Outcomes

- Formulate effective business strategies by conducting thorough analysis of a given market and business environment.
- Analyze quantitative and qualitative data to effectively and efficiently resolve business problems.
- Analyze financial data to explain organizational performance and identify business opportunities in a given market.
- Apply organizational behavior principles and human resources management practices to formulate a plan to effectively hire, retain, and develop a workforce.
- Plan and implement marketing and sales strategies to maximize long-term profitability of a firm.
- Construct operations and project plans that efficiently and effectively leverage organizational resources.

- Formulate strategies to increase ethical behavior and socially responsible decision making within an organization.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MGMT 403 - Diversity, Equity & Inclusion in the Workplace

Credits: 2

Using research, best practices, and the experience from leaders in diversity, equity & inclusion (DEI), participants will gain insights and practice essential leadership skills and behaviors that help foster diverse, equitable, and inclusive teams and organizations.

Enrollment Requirement: Admission into the BAS in Applied Management program; BUS& 101, BUS 121 and BUS 258; or admission into the BAS in Accounting program; or instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify examples of different forms of bias and develop strategies to reduce their adverse impact on creating diversity, equity, and inclusion in the workplace.
- Examine the critical role of leadership in developing and executing actions necessary to dismantle systematic injustices and move a workplace to an equitable and inclusive climate.
- Describe and identify prejudice reduction methods to improve psychological safety in work groups.
- Apply best practices in diversity, equity and inclusion to develop organizational strategies that create a cognitively diverse, equitable, and inclusive workplace.
- Examine intersectionality and social positionality in business management to develop culturally responsive management methods.

Program Outcomes

- Formulate effective business strategies by conducting thorough analysis of a given market and business environment.
- Demonstrate leadership competencies and teamwork skills necessary to resolve interpersonal and organizational challenges that most often occur in the modern workplace.
- Analyze quantitative and qualitative data to effectively and efficiently resolve business problems.
- Analyze financial data to explain organizational performance and identify business opportunities in a given market.
- Use organizational behavior principles and human resources management practices to formulate a plan to effectively hire, retain, and develop a workforce.
- Plan and implement marketing and sales strategies to maximize long-term profitability of a firm.
- Demonstrate professional and persuasive communication to internal and external stakeholders, both orally and in writing.
- Construct operations and project plans that efficiently and effectively leverage organizational resources.
- Formulate strategies to increase ethical behavior and socially responsible decision making within an organization.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MGMT 405 - Corporate Social Responsibility

Credits: 2

Learn to integrate corporate social responsibility (CSR) strategies into core business objectives to create value and positive social change. Topics include the shareholder-stakeholder controversy, triple-bottom-line analyses, supplier sourcing, employee considerations, and the global environment.

Enrollment Requirement: Admission into the BAS in Applied Management program; and BUS& 101; and ENGL& 101; or instructor consent. **Recommended:** MGMT 385

Course Outcomes:

Students who successfully complete this class will be able to:

- Summarize the concepts, frameworks, consumer demands, and value chain related to corporate social responsibility (CSR).
- Explain the ways in which multinational companies manage business and human rights liability.
- Create a value framework with key performance indicators to guide CSR decision-making.
- Critique CSR strategies in a business case, focusing on the maximization of output and social impact.

Program Outcomes

- Formulate effective business strategies by conducting thorough analysis of a given market and business environment.
- Analyze quantitative and qualitative data to effectively and efficiently resolve business problems.
- Analyze financial data to explain organizational performance and identify business opportunities in a given market.
- Apply organizational behavior principles and human resources management practices to formulate a plan to effectively hire, retain, and develop a workforce.
- Plan and implement marketing and sales strategies to maximize long-term profitability of a firm.
- Construct operations and project plans that efficiently and effectively leverage organizational resources.
- Formulate strategies to increase ethical behavior and socially responsible decision making within an organization.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MGMT 420 - Business Strategy

Credits: 5

Learn to develop and execute strategic plans that create and sustain a competitive

advantage in a given market. Topics include techniques for analyzing firm capabilities, competitive environments, and strategic positioning; and tactics for implementing strategic plans across an organization; and analysis of business models.

Enrollment Requirement: Admission into the BAS in Applied Management program; and BUS& 101; and ENGL& 101; and MGMT 345 and 395; or instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Conduct an analysis of a firm's capabilities using multiple strategic frameworks.
- Analyze the competitiveness of an industry using Porter's Five Forces model.
- Construct a positioning map of an industry.
- Develop a strategic plan that addresses a firm's goals and capabilities.
- Contrast common business models according to revenue model and position in the value chain.

Program Outcomes

- Formulate effective business strategies by conducting thorough analysis of a given market and business environment.
- Analyze quantitative and qualitative data to effectively and efficiently resolve business problems.
- Analyze financial data to explain organizational performance and identify business opportunities in a given market.
- Apply organizational behavior principles and human resources management practices to formulate a plan to effectively hire, retain, and develop a workforce.
- Plan and implement marketing and sales strategies to maximize long-term profitability of a firm.
- Construct operations and project plans that efficiently and effectively leverage organizational resources.
- Formulate strategies to increase ethical behavior and socially responsible decision making within an organization.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is

designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MGMT 425 - Business Analysis

Credits: 5

Learn techniques for analyzing business opportunities, improving processes, and making rational decisions that maximize value and limit risk. Topics include value stream mapping, structured analysis techniques such as linear programming and sensitivity analysis, and foundations for sound decision-making.

Enrollment Requirement: Admission into the BAS in Applied Management program; and BUS& 101; and ENGL& 101; and MGMT 345, 385 and 395; or instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Construct a value stream map of an organization's processes.
- Contrast methods of structured analysis for decision making.
- Use linear programming to determine the optimal sales mix.
- Develop a sensitivity analysis for a given business scenario.
- Outline the foundations for sound decision making.

Program Outcomes

- Formulate effective business strategies by conducting thorough analysis of a given market and business environment.
- Analyze quantitative and qualitative data to effectively and efficiently resolve business problems.
- Analyze financial data to explain organizational performance and identify business opportunities in a given market.
- Apply organizational behavior principles and human resources management practices to formulate a plan to effectively hire, retain, and develop a workforce.
- Plan and implement marketing and sales strategies to maximize long-term profitability of a firm.
- Construct operations and project plans that efficiently and effectively leverage organizational resources.
- Formulate strategies to increase ethical behavior and socially responsible decision making within an organization.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as

necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

Mathematics

MATH 30 - Support Course for MATH& 107

Credits: 2

Support course for MATH& 107 that covers pre-college topics needed in MATH& 107 - Math in Society. The course must be taken concurrently with MATH& 107. Study of fractions, percents, exponents, roots, functions, formulas, linear equations, and study skills strategies. This is a pass/no credit course.

Enrollment Requirement: MATH 72 or TS/TS-OD 57 with a 2.5 or higher, or appropriate math placement; and concurrent enrollment in MATH& 107.

Recommended: READ 104, ENGL 97

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Use order of operations to evaluate expressions including those with fractions, integer exponents, and square roots.
- Calculate with and convert between fractions, decimals, and percentages.
- Give the definition of a function and interpret function notation.
- Solve linear equations.
- Identify values in applications and use them to evaluate formulas.
- Describe study skills strategies.

Program Outcomes

- Recognize which quantitative or symbolic reasoning methods are appropriate for solving a given problem.
- Correctly implement the quantitative or symbolic reasoning methods that are appropriate for solving a given problem.
- Translate data into various formats such as symbolic language, equations, graphs, and formulas.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MATH 31 - Support Course for MATH& 141

Credits: 2

Support course for MATH& 141 that covers pre-college topics needed in MATH& 141 - PreCalculus I. The course must be taken concurrently with MATH& 141. Study of factoring, exponents, complex fractions, graphing, linear equations, linear inequalities, quadratic equations, literal equations, graphing calculator, and study skills strategies. This is a pass/no credit course.

Enrollment Requirement: MATH 97 with a grade of 2.0 or higher, or appropriate math placement; and concurrent enrollment in MATH& 141. **Recommended:** READ 104, ENGL 97

Course Outcomes:

Students who successfully complete this class will be able to:

- Factor polynomials.
- Simplify expressions using exponent rules.
- Solve linear inequalities.
- Simplify complex fractions.
- Graph linear and quadratic functions.
- Find the equation of a line.
- Solve literal and quadratic equations.
- Perform basic functions on a graphing calculator.
- Describe study skills strategies.

Program Outcomes

- Recognize which quantitative or symbolic reasoning methods are appropriate for solving a given problem.
- Correctly implement the quantitative or symbolic reasoning methods that are appropriate for solving a given problem.
- Translate data into various formats such as symbolic language, equations, graphs, and formulas.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MATH 36 - Support Course for MATH& 146

Credits: 2

Support course for MATH& 146 that covers pre-college topics needed in MATH& 146 - Introduction to Statistics. The course must be taken concurrently with MATH& 146. Study of linear graphing, rounding, scientific notation, exponents, order of operations, linear equation solving, square roots, and linear inequalities. The course emphasizes problem-solving techniques, critical thinking, and study skills to prepare students for statistical analysis. This is a pass/no credit course.

Enrollment Requirement: MATH 72 or TS/TS-OD 57 with a grade of 2.5 or higher, or appropriate math placement; and concurrent enrollment in MATH& 146.

Recommended: READ 104, ENGL 97

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Convert between decimal, percentage, and fractional numbers.
- Use order of operations to evaluate expressions including those with fractions, integer exponents, and square roots.
- Use inequalities to represent and analyze relationships between quantities.
- Convert numbers between scientific and standard notation.
- Solve linear and literal equations.
- Graph and interpret linear equations.
- Describe study skills strategies.

Program Outcomes

- Recognize which quantitative or symbolic reasoning methods are appropriate for solving a given problem.
- Correctly implement the quantitative or symbolic reasoning methods that are appropriate for solving a given problem.
- Translate data into various formats such as symbolic language, equations, graphs, and formulas.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MATH 39 - Support Course for MATH 109

Credits: 2

Support course for MATH 109 that covers pre-college topics needed in MATH

109 - Mathematical Models in Gaming. The course must be taken concurrently with MATH 109. Study of functions, formulas, fractions, percents, exponents, roots, linear equations, and study skills strategies. This is a pass/no credit course.

Enrollment Requirement: MATH 72 or TS/TS-OD 57 with a 2.5 or higher, or appropriate math placement; and concurrent enrollment in MATH 109. **Recommended:** READ 104, ENGL 97

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify values in applications and use them to evaluate formulas.
- Give the definition of a function and interpret function notation.
- Use order of operations to evaluate expressions including those with fractions, integer exponents, and square roots.
- Solve linear equations.
- Calculate with and convert between fractions, decimals, and percentages.
- Describe study skills strategies.

Program Outcomes

- Recognize which quantitative or symbolic reasoning methods are appropriate for solving a given problem.
- Correctly implement the quantitative or symbolic reasoning methods that are appropriate for solving a given problem.
- Translate data into various formats such as symbolic language, equations, graphs, and formulas.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MATH 70 - Pre-Algebra

Credits: 5

Study of problem solving, geometry and measurement, exponents, fractions, percents, and signed numbers. Includes introductory work with polynomials and basic descriptive statistics.

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Perform operations with fractions, decimals, and integers, including order of operations.

- Convert between percents and fractions and solve percent problems.
- Apply geometry and measurement concepts.
- Perform operations with integer exponents.
- Simplify basic polynomial expressions.
- Calculate basic descriptive statistics.

Program Outcomes

- Recognize which quantitative or symbolic reasoning methods are appropriate for solving a given problem.
- Correctly implement the quantitative or symbolic reasoning methods that are appropriate for solving a given problem.
- Translate data into various formats such as symbolic language, equations, graphs, and formulas.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MATH 72 - Elementary Algebra

Credits: 5

Study of graphing, solving linear equations and inequalities, unit analysis, ratios, rates, proportions, solving systems of equations, Pythagorean Theorem, and applications. Course requires a graphing calculator.

Enrollment Requirement: MATH 70 or TS/TS-OD 56 with a grade of 2.5 or higher; or appropriate math placement.

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Solve linear equations, linear inequalities, systems of linear equations, and literal equations.
- Convert between the graph and the equation of a line.
- Use unit analysis to convert measurements.
- Solve ratio, rate, and proportional reasoning problems.
- Apply the Pythagorean Theorem to solve problems.

Program Outcomes

- Recognize which quantitative or symbolic reasoning methods are appropriate for solving a given problem.

- Correctly implement the quantitative or symbolic reasoning methods that are appropriate for solving a given problem.
- Translate data into various formats such as symbolic language, equations, graphs, and formulas.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MATH 97 - Intermediate Algebra

Credits: 5

Study of the definition of a function; graphs and solutions of quadratic, rational, radical, and literal equations; complex numbers; radical expressions; variation; and applications. Graphing calculator required.

Enrollment Requirement: MATH 72 or TS/TS-OD 57 with a grade of 2.5 or higher; or appropriate math placement.

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify and graph functions and interpret function notation.
- Solve rational, radical, and quadratic equations.
- Perform operations with rational, radical, and quadratic equations and expressions containing rational exponents.
- Derive linear and quadratic equations.
- Apply the mathematical techniques of the course to practical applications.

Program Outcomes

- Recognize which quantitative or symbolic reasoning methods are appropriate for solving a given problem.
- Correctly implement the quantitative or symbolic reasoning methods that are appropriate for solving a given problem.
- Translate data into various formats such as symbolic language, equations, graphs, and formulas.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MATH& 107 - Math in Society

Credits: 5

Study of various mathematical topics including growth models, finance, statistics, and probability. Additional topics may include voting theory, fair division, networks, scheduling, apportionment and other fields.

Enrollment Requirement: MATH 97 with a grade of 2.0 or higher; or either MATH 72 or TS/TS-OD 57 with a grade of 2.5 or higher and concurrently enrolled in MATH 30 Support Course for MATH& 107 ; or appropriate math placement.

Satisfies Requirement: Natural Science and Quantitative Skills

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Calculate compound interest income.
- Calculate payments for the amortization of a loan and deposits for annuity accumulation.
- Use linear and exponential growth models to make predictions.
- Identify different types of samples of a population.
- Analyze data from censuses, surveys, and comparative experiments.
- Graph data using box plots and histograms.
- Calculate and analyze descriptive statistics including mean, median, standard deviation, and quartiles.
- Describe sample spaces and calculate the probability of events in a random experiment.
- Solve modern application problems.

Program Outcomes

- Recognize which quantitative or symbolic reasoning methods are appropriate for solving a given problem.
- Correctly implement the quantitative or symbolic reasoning methods that are appropriate for solving a given problem.
- Translate data into various formats such as symbolic language, equations, graphs, and formulas.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MATH 108 - Contemporary Math for Information Technology

Credits: 5

Study of a variety of mathematical topics related to information technology, including routes and networks, scheduling, statistics, probability, the decimal, binary and hexadecimal number systems, logic gates and Boolean algebra.

Enrollment Requirement: MATH 97 with a grade of 2.0 or higher; or appropriate math placement.

Satisfies Requirement: Natural Science and Quantitative Skills

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Solve routing problems using Euler circuits, Hamilton circuits, minimum network problems using spanning trees and scheduling problems using directed graphs.
- Calculate and analyze descriptive statistics including mean, median, standard deviation, and quartiles.
- Describe sample spaces and calculate the probability of events in a random experiment.
- Graph and analyze data that has an approximate normal distribution.
- Convert between decimal, binary and hexadecimal numbers.
- Perform addition, subtraction, and multiplication on binary numbers.
- Write truth tables and Boolean algebra expressions for simple combinations of logic gates.
- Simplify simple logic gate circuits using Boolean algebra, DeMorgan's Theorem and the Duality Theorem.

Program Outcomes

- Recognize which quantitative or symbolic reasoning methods are appropriate for solving a given problem.
- Correctly implement the quantitative or symbolic reasoning methods that are appropriate for solving a given problem.
- Translate data into various formats such as symbolic language, equations, graphs, and formulas.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MATH 109 - Mathematical Models in Gaming

Credits: 5

Study of modeling using functions, algebraic equations, probability, and expected value, focused on the context of gaming. Includes elementary function growth analysis and game theory.

Enrollment Requirement: MATH 97 with a grade of 2.0 or higher; or MATH 72 or TS/TS-OD 57 with a grade of 2.5 or higher and concurrently enrolled in MATH 39 - Support Course for MATH 109; or appropriate math placement.

Satisfies Requirement: Natural Science and Quantitative Skills

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Create functions modeling gaming and real-world situations.
- Compute a weighted average.
- Compare growth rates of functions.
- Describe sample spaces and calculate the probability of an event in a random experiment.
- State and apply basic rules of probability.
- Compute an expected value and apply it to decision making.
- Explain how a mathematical model can be used to answer questions about a gaming or real-world situation.

Program Outcomes

- Recognize which quantitative or symbolic reasoning methods are appropriate for solving a given problem.
- Correctly implement the quantitative or symbolic reasoning methods that are appropriate for solving a given problem.
- Translate data into various formats such as symbolic language, equations, graphs, and formulas.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MATH& 131 - Mathematics for Elementary Education 1

Credits: 5

Introduces problem-solving techniques, number theory, set theory, and numeration

systems related to topics taught at the K-8 level. Recommended for prospective or practicing elementary and middle school teachers, paraeducators, parents, and others who help educate children in grades K-8. Previously MATH& 171.

Enrollment Requirement: MATH 97 with a grade of 2.0 or higher; or appropriate math placement.

Satisfies Requirement: Natural Science and Quantitative Skills

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply problem solving models to number system concepts.
- Identify sources of mathematics standards and summarize major strands of NCTM or Washington state standards.
- Apply knowledge about features of our base ten number system to analyze other number systems.
- Describe the concept of a whole number as well as relationships between them (order, divisibility, factorization, and common factors/multiples).
- Use mental math and a variety of different algorithms, including methods used in other societies, for operations with whole numbers, integers and fractions.
- Use manipulatives to represent the operations with whole numbers, integers and fractions.
- Analyze common error patterns in students' computations and demonstrate how alternative algorithms can reduce those errors.
- Apply various problem-solving techniques to different learning styles, such as visual methods, kinesthetic approaches, and verbal reasoning.
- Simulate classroom scenarios using role-playing and peer teaching.
- Examine teaching methods used historically and globally, and examine the role of mathematics in different cultures.

Program Outcomes

- Recognize which quantitative or symbolic reasoning methods are appropriate for solving a given problem.
- Correctly implement the quantitative or symbolic reasoning methods that are appropriate for solving a given problem.
- Translate data into various formats such as symbolic language, equations, graphs, and formulas.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MATH& 132 - Mathematics for Elementary Education 2

Credits: 5

Covers the mathematics elementary teachers are responsible for teaching at K-8 levels, including polyhedra, polygons, symmetry, tessellations, size changes, curves and curved surfaces, transformations, length, angles, area and surface area, volume, measure formulas; quantifying uncertainty, simulating probabilistic situations, sampling, and organizing and interpreting data with one and two variables. Previously MATH& 172.

Enrollment Requirement: MATH& 131 with a grade of 2.0 or higher or appropriate math placement. Courses may be taken out of sequence with instructor permission.

Satisfies Requirement: Natural Science and Quantitative Skills

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe and use multiple problem-solving strategies to solve a variety of problems.
- Define and compute length, area, surface area, and volume for regular and irregular 2-D and 3-D objects.
- Compare and discuss advantages and disadvantages of both standard and non-standard units.
- Identify sources of mathematics standards and summarize major strands of the NCTM Standards or Washington State standards.
- Use the concepts of congruency and similarity to prove or justify geometric claims.
- Analyze data from censuses, surveys, and comparative experiments.
- Graph data using box plots and histograms.
- Calculate and analyze descriptive statistics including mean, median, standard deviation, and quartiles.
- Describe sample spaces and calculate the probability of events in a random experiment.
- Implement differentiated instruction methods, such as scaffolded learning, visual supports, and hands-on manipulatives, to address a wide range of learning abilities.
- Identify and integrate connections between mathematics and other disciplines, such as science, history, art, and economics.
- Evaluate the effectiveness of instructional strategies and adapt those to the diverse needs of students.
- Examine how educators in different cultural contexts have historically approached mathematics teaching and how these practices can inform modern inclusive pedagogy.
- Integrate technology such as dynamic geometry software, virtual manipulatives, and educational apps to engage visual and auditory learners.

Program Outcomes

- Recognize which quantitative or symbolic reasoning methods are appropriate for solving a given problem.
- Correctly implement the quantitative or symbolic reasoning methods that are appropriate for solving a given problem.
- Translate data into various formats such as symbolic language, equations, graphs, and formulas.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MATH& 141 - PreCalculus I

Credits: 5

Study of piecewise, absolute value, power, polynomial, rational, exponential, and logarithmic functions and their applications; algebraic combinations of functions; composition of functions; inverse functions; transformations. Graphing calculator required.

Enrollment Requirement: MATH 97 with a grade of 2.5 or higher; or MATH 97 with a grade of 2.0 or higher AND concurrently enrolled in MATH 31 - Support Course for MATH& 141; or appropriate math placement.

Satisfies Requirement: Natural Science and Quantitative Skills

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Understand and use function notation and terminology.
- Perform operations with combinations and compositions of functions as well as inverse functions.
- Analyze graphical behavior of functions, including transformations.
- Graph and identify important properties of linear, piecewise, power, polynomial, rational, exponential, logarithmic and absolute value functions.
- Solve equations, inequalities and application problems.

Program Outcomes

- Recognize which quantitative or symbolic reasoning methods are appropriate for solving a given problem.
- Correctly implement the quantitative or symbolic reasoning methods that are appropriate for solving a given problem.

- Translate data into various formats such as symbolic language, equations, graphs, and formulas.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MATH& 142 - PreCalculus II

Credits: 5

Study of trigonometric functions and their applications, inverse trigonometric functions, trigonometric equations, trigonometric identities, solutions of right and oblique triangles, vectors, polar coordinates, and parametric equations. Graphing calculator required.

Enrollment Requirement: MATH& 141 with a grade of 2.0 or higher; or appropriate math placement.

Satisfies Requirement: Natural Science and Quantitative Skills

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Convert between the graph of a circle and its equation, and perform geometric calculations involving circles and portions of circles.
- Graph and understand the properties of trigonometric functions and their inverse functions.
- Apply the triangle definitions of the trigonometric functions.
- Apply trigonometric identities.
- Solve trigonometric equations.
- Analyze and graph parametric and polar equations.
- Graph and perform basic operations with vectors.
- Solve application problems.

Program Outcomes

- Recognize which quantitative or symbolic reasoning methods are appropriate for solving a given problem.
- Correctly implement the quantitative or symbolic reasoning methods that are appropriate for solving a given problem.
- Translate data into various formats such as symbolic language, equations, graphs, and formulas.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MATH& 146 - Introduction to Statistics

Credits: 5

Introduction to the analysis of statistical studies, descriptive statistics, basic probability, sampling distributions, hypothesis testing, confidence intervals, and correlation.

Enrollment Requirement: MATH 97 with a grade of 2.0 or higher; or either MATH 72 or TS/TS-OD 57 with a grade of 2.5 or higher and concurrently enrolled in MATH 36 - Support Course for MATH& 146; or appropriate math placement.

Satisfies Requirement: Natural Science and Quantitative Skills

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Define and use common statistical terminology.
- Identify the major categories of experimental designs and sampling methods.
- Identify common sources of bias in surveys and experiments.
- Construct and interpret frequency distributions, histograms, scatterplots, and box plots.
- Calculate and interpret measures of center and spread.
- Use correlation and linear regression to find the association between variables.
- Calculate probabilities and percentiles using the normal distribution and the central limit theorem.
- Calculate confidence intervals for means and proportions.
- Perform t-tests for single means and Chi Square tests.
- Calculate probabilities using basic elements of probability theory, such as sample spaces, the addition rule, and the multiplication rule.

Program Outcomes

- Recognize which quantitative or symbolic reasoning methods are appropriate for solving a given problem.
- Correctly implement the quantitative or symbolic reasoning methods that are appropriate for solving a given problem.
- Translate data into various formats such as symbolic language, equations, graphs, and formulas.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MATH 147 - Finite Mathematics-Business and Social Science

Credits: 5

Study of graphs and solutions of linear equations, systems of equations, matrices, linear inequalities and linear programming, the simplex method, piecewise defined, quadratic, polynomial, rational exponential and logarithmic functions, and financial formulas. Many problems and examples are drawn from the fields of business, economics, and social science. Graphing calculator required.

Enrollment Requirement: MATH 97 with a grade of 2.0 or higher; or appropriate math placement.

Satisfies Requirement: Natural Science and Quantitative Skills

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Solve systems of linear equations.
- Interpret the results of solutions to equations and inequalities.
- Perform matrix operations.
- Solve linear inequalities and linear programming problems.
- Solve equations involving quadratic, polynomial, rational, exponential or logarithmic functions.
- Use interest and annuity formulas to solve finance problems.
- Use function notation and terminology.

Program Outcomes

- Recognize which quantitative or symbolic reasoning methods are appropriate for solving a given problem.
- Correctly implement the quantitative or symbolic reasoning methods that are appropriate for solving a given problem.
- Translate data into various formats such as symbolic language, equations, graphs, and formulas.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MATH& 148 - Business Calculus

Credits: 5

Study of differential and integral calculus of polynomial, logarithmic and exponential functions. Many problems and examples are drawn from the fields of business, economics, and social science. Graphing calculator required.

Enrollment Requirement: MATH& 141 or MATH 147 with a grade of 2.0 or higher; or appropriate math placement.

Satisfies Requirement: Natural Science and Quantitative Skills

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Calculate the average and instantaneous rates of change.
- Apply and interpret the limit definition of the derivative.
- Apply rules for differentiation.
- Solve related rates problems.
- Apply the first and second derivative tests and interpret their graphical implications.
- Set up and solve optimization problems.
- Find antiderivatives of polynomials and exponential functions.
- Use Riemann sums to estimate the definite integral.
- State and apply the Fundamental Theorem of Calculus.
- Apply integration to problems in business and economics.
- Calculate partial derivatives.

Program Outcomes

- Recognize which quantitative or symbolic reasoning methods are appropriate for solving a given problem.
- Correctly implement the quantitative or symbolic reasoning methods that are appropriate for solving a given problem.
- Translate data into various formats such as symbolic language, equations, graphs, and formulas.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MATH& 151 - Calculus I

Credits: 5

The first course of a four-quarter calculus sequence. Introduces students to differential calculus and related applications. Topics include limits, derivatives of algebraic and

transcendental functions, optimization, linearization, numerical methods, modeling.
Graphing calculator required.

Enrollment Requirement: MATH& 142 with a grade of 2.0 or higher; or appropriate placement math placement.

Satisfies Requirement: Natural Science and Quantitative Skills

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Evaluate limits of functions and use limits to determine continuity.
- Find the derivative of functions using the definition, and understand the derivative as a rate of change.
- Find the derivatives of functions including exponential, logarithmic, and trigonometric.
- Apply the various rules and techniques of differentiation such as the power, product, quotient, chain rules, and implicit differentiation.
- Apply derivatives to solve application problems, and determine the behavior of functions.

Program Outcomes

- Recognize which quantitative or symbolic reasoning methods are appropriate for solving a given problem.
- Correctly implement the quantitative or symbolic reasoning methods that are appropriate for solving a given problem.
- Translate data into various formats such as symbolic language, equations, graphs, and formulas.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MATH& 152 - Calculus II

Credits: 5

The second course of a four-quarter calculus sequence. Introduces students to integral calculus and related applications. Topics include antiderivatives of algebraic and transcendental functions, the Fundamental Theorem of Calculus, techniques of integration, areas, volumes, moments and centers of mass, numerical methods.
Graphing calculator required.

Enrollment Requirement: MATH& 151 with a grade of 2.0 or higher; or appropriate math placement.

Satisfies Requirement: Natural Science and Quantitative Skills

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Use Riemann sums to find areas and define an integral.
- Apply the Fundamental Theorem of Calculus.
- Find antiderivatives using a variety of techniques including substitution, tables, integration by parts and partial fractions.
- Approximate definite integrals using numerical techniques, such as the trapezoid rule, Simpson's method, calculator/computer programs, and geometry.
- Apply integration techniques to solve problems involving areas, volumes, arc length, centroids, average value, and introductory differential equations.
- Find limits using l'Hopital's rule.
- Evaluate improper integrals.

Program Outcomes

- Recognize which quantitative or symbolic reasoning methods are appropriate for solving a given problem.
- Correctly implement the quantitative or symbolic reasoning methods that are appropriate for solving a given problem.
- Translate data into various formats such as symbolic language, equations, graphs, and formulas.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MATH& 163 - Calculus III

Credits: 5

The third course of a four-quarter calculus sequence. Introduces students to series representations of functions, as well as calculus concepts in higher dimensions. Topics include Taylor series, vectors, three-dimensional space and surfaces, vector-valued functions, multivariable functions, partial derivatives, and double integrals. Graphing calculator required. Previously MATH& 153.

Enrollment Requirement: MATH& 152 with a grade of 2.0 or higher; or appropriate math placement.

Satisfies Requirement: Natural Science and Quantitative Skills

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Represent functions as power series.
- Use Taylor polynomials to approximate functions.
- Graph and perform operations with 2D and 3D vectors, and apply vectors in geometry and science.
- Write equations of lines and planes using vectors.
- Represent three-dimensional points, surfaces, and equations using the Cartesian coordinate system.
- Represent curves using vector-valued functions.
- Compute and apply domain, limits, derivatives, and antiderivatives of a vector-valued function.
- Determine domains, ranges, limits and continuity for multivariate functions.
- Compute and apply partial derivatives.
- Compute and apply double integrals.

Program Outcomes

- Recognize which quantitative or symbolic reasoning methods are appropriate for solving a given problem.
- Correctly implement the quantitative or symbolic reasoning methods that are appropriate for solving a given problem.
- Translate data into various formats such as symbolic language, equations, graphs, and formulas.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MATH 194 - Special Topics-Mathematics

Credits: 1-5

Study of specialized mathematical topics. Topics presented depend upon interest and staffing. Possible areas of study include number theory, probability, logic, mathematics for parents, and computer applications. This is a pass/no credit course.

Enrollment Requirement: Instructor consent and eligible for READ 104.

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate an in-depth understanding of a specific topic.
- Design and execute a research project to explore the topic.

Program Outcomes

- Recognize which quantitative or symbolic reasoning methods are appropriate for solving a given problem.
- Correctly implement the quantitative or symbolic reasoning methods that are appropriate for solving a given problem.
- Translate data into various formats such as symbolic language, equations, graphs, and formulas.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MATH 238 - Differential Equations

Credits: 5

Study of the theory and solutions of first and second order differential equations, existence and uniqueness theorems, numerical methods of solution, and applications. Additional topics may be chosen from the following: series solutions for differential equations, systems of linear differential equations, Laplace transforms, and stability theory. Graphing calculator required.

Enrollment Requirement: MATH& 254 with a grade of 2.0 or higher; or concurrent enrollment in MATH& 254; or appropriate math placement.

Satisfies Requirement: Natural Science and Quantitative Skills

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Solve separable, exact and linear first order differential equations.
- Solve higher order linear or Cauchy-Euler differential equations.
- Apply the theory of differential equations to solve problems from various disciplines.
- Apply the existence and uniqueness theorems to first and second order equations.
- Apply direction fields and numerical methods to approximate solutions.

Program Outcomes

- Recognize which quantitative or symbolic reasoning methods are appropriate for solving a given problem.
- Correctly implement the quantitative or symbolic reasoning methods that are appropriate for solving a given problem.
- Translate data into various formats such as symbolic language, equations, graphs, and formulas.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MATH 240 - Topics in Linear Algebra

Credits: 5

Study of systems of linear equations, vector spaces, matrices and matrix equations, eigenvalues and eigenvectors, linear transformations, and applications. Graphing calculator required.

Enrollment Requirement: MATH& 163 with a grade of 2.0 or higher; or appropriate math placement.

Satisfies Requirement: Natural Science and Quantitative Skills

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe the solution set of a system of linear equations.
- Apply Gaussian and Gauss-Jordan elimination.
- Find the inverse of an invertible matrix.
- Apply equivalent properties of matrix invertibility.
- Identify vector spaces.
- Find a basis for a vector space.
- Normalize a set of vectors.
- Find and apply the eigenvalues and eigenvectors of a matrix.
- Find the least squares approximation of a system of linear equations.
- Identify and apply linear transformations.

Program Outcomes

- Recognize which quantitative or symbolic reasoning methods are appropriate for solving a given problem.
- Correctly implement the quantitative or symbolic reasoning methods that are appropriate for solving a given problem.

- Translate data into various formats such as symbolic language, equations, graphs, and formulas.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MATH& 254 - Calculus IV

Credits: 5

The fourth course of a four-quarter calculus sequence. Introduces students to functions of two and three variables; limits and continuity; partial differentiation; gradients; multiple integration; iterated integrals; vector analysis including such topics as divergence, curl, line integrals, and the fundamental theorems of vector calculus. Graphing calculator required.

Enrollment Requirement: MATH& 163 with a grade of 2.0 or higher; or appropriate math placement.

Satisfies Requirement: Natural Science and Quantitative Skills

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Determine domains, ranges, limits and continuity for multivariate functions.
- Compute and apply partial derivatives.
- Compute and apply double and triple integrals.
- Convert rectangular integrals into polar, cylindrical or spherical integrals.
- Compute and apply line integrals.
- Find the divergence and curl for vector fields.
- Compute surface integrals using Stokes' Theorem and the Divergence Theorem.

Program Outcomes

- Recognize which quantitative or symbolic reasoning methods are appropriate for solving a given problem.
- Correctly implement the quantitative or symbolic reasoning methods that are appropriate for solving a given problem.
- Translate data into various formats such as symbolic language, equations, graphs, and formulas.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MATH 256 - Statistics for Business and Social Science

Credits: 5

Study of descriptive and inferential statistics; boxplots, histograms and scatterplots; introduction to design of experiments; measures of central tendency; frequency distributions; probability distributions; sampling and sampling distributions; hypothesis testing; confidence intervals; and linear regression.

Enrollment Requirement: MATH& 141 or MATH 147 with a grade of 2.0 or higher; or appropriate math placement. **Recommended:** Eligible for READ 104.

Satisfies Requirement: Natural Science and Quantitative Skills

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Define and use common statistical terminology.
- Identify the major categories of experimental designs and sampling methods.
- Identify common sources of bias in surveys and experiments.
- Construct and interpret frequency distributions, histograms, pie charts, and box plots.
- Calculate and interpret the measures of center and spread.
- Carry out a linear regression analysis of paired data.
- State and apply the basic axioms and theorems of probability.
- State and apply the central limit theorem.
- Calculate confidence intervals and conduct hypothesis tests for one and two samples using the standard normal, Student-t, and Chi square distributions.

Program Outcomes

- Recognize which quantitative or symbolic reasoning methods are appropriate for solving a given problem.
- Correctly implement the quantitative or symbolic reasoning methods that are appropriate for solving a given problem.
- Translate data into various formats such as symbolic language, equations, graphs, and formulas.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MATH 294 - Special Topics in Mathematics

Credits: 1-5

Focuses on special topics in math that are not part of the regular curriculum. Content varies from course to course.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate an in-depth understanding of a specific topic.
- Design and execute a research project to explore the topic.

Program Outcomes

- Recognize which quantitative or symbolic reasoning methods are appropriate for solving a given problem.
- Correctly implement the quantitative or symbolic reasoning methods that are appropriate for solving a given problem.
- Translate data into various formats such as symbolic language, equations, graphs, and formulas.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MATH 297 - Independent Study-Mathematics

Credits: 1-5

Encourages students to independently study an area or topic of special interest in mathematics. Students meet on a tutorial basis with the instructor.

Enrollment Requirement: MATH& 148, MATH& 151 or MATH 256 with a grade of 2.0 or higher and instructor consent.

Course Fee: \$2.00

Course Outcomes:

Course outcomes to be mutually agreed upon between instructor and student.

Program Outcomes

- Recognize which quantitative or symbolic reasoning methods are appropriate for solving a given problem.
- Correctly implement the quantitative or symbolic reasoning methods that are appropriate for solving a given problem.

- Translate data into various formats such as symbolic language, equations, graphs, and formulas.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MATHM 70 - Pre-Algebra-Resource Module

Credits: 1-2

Uses self-paced, individual computer mediated learning to supplement concepts learned in MATH 70. Recommended for students who want extra work in MATH 70 and for those who need to work on specific skills to prepare for MATH 70. Students use software to learn standard concepts from MATH 70. Students investigate Math Learning Center resources such as videos, computers, supplementary books, and/or drop-in tutoring to work on concepts learned in MATH 70. A minimum of 22 hours of work must be completed to receive one credit, 44 hours for two credits. This is a pass/no credit course.

Enrollment Requirement: A student cannot be enrolled in more than one math modules class (MATHM 70, MATHM 72, MATHM 97) at the same time.

Course Fee: \$12.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Perform operations with fractions, decimals, and integers in an algebraic environment including order of operations.
- Apply geometry and measurement concepts including the Pythagorean theorem.
- Perform operations with integer exponents.
- Simplify basic polynomial expressions.
- Solve simple equations.
- Calculate basic descriptive statistics.
- Graph points onto the Cartesian coordinate system.
- Use resources available to students on campus such as the Math Learning Center.

Program Outcomes

- Recognize which quantitative or symbolic reasoning methods are appropriate for solving a given problem.
- Correctly implement the quantitative or symbolic reasoning methods that are appropriate for solving a given problem.
- Translate data into various formats such as symbolic language, equations, graphs, and formulas.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MATHM 72 - Elementary Algebra-Resource Module

Credits: 1-2

Uses self-paced, individual computer mediated learning to supplement concepts learned in MATH 72. Recommended for students who want extra work in MATH 72 and for those who need to work on specific skills to prepare for MATH 72. Students use software to learn standard concepts from MATH 72. Students investigate Math Learning Center resources such as videos, computers, supplementary books, and/or drop-in tutoring to work on concepts learned in MATH 72. A minimum of 22 hours of work must be completed to receive one credit, 44 hours for two credits. This is a pass/no credit course.

Enrollment Requirement: A student cannot be enrolled in more than one math modules class (MATHM 70, MATHM 72, MATHM 97) at the same time.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Solve linear equations, linear inequalities, systems of linear equations, and literal equations.
- Convert between the graph and the equation of a line.
- Simplify polynomials and expressions involving integer exponents.
- Factor quadratic expressions.
- Identify functions and use function notation.
- Use unit analysis to convert measurements.
- Solve ratio, rate, and proportional reasoning problems.
- Apply the Pythagorean Theorem to solve problems.
- Use resources available to students on campus such as the Math Learning Center.

Program Outcomes

- Recognize which quantitative or symbolic reasoning methods are appropriate for solving a given problem.
- Correctly implement the quantitative or symbolic reasoning methods that are appropriate for solving a given problem.
- Translate data into various formats such as symbolic language, equations, graphs, and formulas.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MATHM 97 - Intermediate Algebra-Resource Module

Credits: 1-2

Uses self-paced, individual computer mediated learning to supplement concepts learned in MATH 97. Recommended for students who want extra work in MATH 97 and for those who need to work on specific skills to prepare for MATH 97. Students use software to learn standard concepts from MATH 97. Students investigate Math Learning Center resources such as videos, computers, supplementary books, and/or drop-in tutoring to work on concepts learned in MATH 97. A minimum of 22 hours of work must be completed to receive one credit, 44 hours for two credits. This is a pass/no credit course.

Enrollment Requirement: A student cannot be enrolled in more than one math modules class (MATHM 70, MATHM 72, MATHM 97) at the same time.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify and graph functions and interpret function notation.
- Solve rational, radical, and quadratic equations.
- Perform operations with rational, radical, and quadratic equations and expressions containing rational exponents.
- Derive linear and quadratic equations.
- Apply the mathematical techniques of the course to practical applications.
- Use resources available to students on campus such as the Math Learning Center.

Program Outcomes

- Recognize which quantitative or symbolic reasoning methods are appropriate for solving a given problem.
- Correctly implement the quantitative or symbolic reasoning methods that are appropriate for solving a given problem.
- Translate data into various formats such as symbolic language, equations, graphs, and formulas.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

Music

MUSC 101 - Fundamentals of Music

Credits: 5

Covers basic note and rhythm reading, chords and scales, aural skills and fundamentals of songwriting. Includes an examination of chord symbols and progressions, melody, lyrics and form.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$15.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate proper musical notation skills.
- Aurally identify and notate simple intervals and simple rhythmic patterns.
- Identify scales, keys, intervals, triads, clefs, meter, rhythm, and chords.
- Demonstrate basic sight-singing skills in tonal music.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MUSC 102 - Global Pop Music

Credits: 5

Investigates the effect ethnicity, gender/sexuality, religion, marginalization, globalization,

and social justice has on pop music. We will look at how local (traditional) and global (post-rock n' roll/pop) music is used by different cultures as a way to express identity and global membership. Class covers a range of musical genres from K-pop to Afrobeat.

Satisfies Requirement: Humanities/Fine Arts/English and Diversity

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify the way that global popular music aesthetics in the post-rock era are incorporated into and fused with indigenous music practices (e.g. K-pop, Bollywood, and Afrobeat).
- Produce a project that looks more in-depth into one specific global popular music.
- Identify the music and instruments of a selection of musical traditions and how they are used as symbols of indigeneity (e.g. Australian didgeridoo, Shona mbira, and Andean panpipes).
- Compare how popular music borrow from the popular music of other countries to associate with social movements (e.g. the use of African-American funk by Fela Kuti and Afrobeat or the use of reggae music as part of the Black Power Movement in Brazil).
- Discuss the effects of ethnicity, gender/sexuality, religion, globalization, and social justice on pop music.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.

MUSC 103 - American Popular Music

Credits: 5

Discusses the study of the history and genesis of American popular music from its birth to the present day. Students study and listen to folk music, Dixieland and jazz, Broadway shows, rock and roll and current musical trends.

Satisfies Requirement: Humanities/Fine Arts/English and Diversity

Course Outcomes:

Students who successfully complete this class will be able to:

- Discuss musical styles instrumental to the formation of American popular music (e.g. Appalachian folk music, blues, jazz, gospel, rock & roll, and bluegrass).
- Identify the musical language and instrumentation of a selection of musical traditions (e.g. fiddle, banjo, and trumpet).
- Identify the origins and influences of American popular music (e.g. West African diaspora, Irish jigs, European Christian hymns).
- Investigate issues of marginalization, cultural appropriation, and oppression in the formation of racial identity and expression (e.g. blackface minstrelsy, soul, and rap).
- Examine how music is used as a resistance against oppression (e.g. abolition songs, protest music of the Vietnam era, funk, and hip-hop).
- Discuss the influence of popular music globally in the post-Rock era as a form of globalization and Western cultural imperialism.
- Demonstrate fluency with past and current innovations in the music industry (e.g. stage, recording industry, and digital media).

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.

MUSC 104 - Music in World Culture

Credits: 5

Introduces the traditional music of cultures from around the world, including practices that have been in decline after centuries of imperialization and globalization. Through this process we will aim to decolonize music studies by focusing on "othering" of local practices in an effort to decentralize the Western gaze of American academia.

Satisfies Requirement: Humanities/Fine Arts/English and Diversity

Course Outcomes:

Students who successfully complete this class will be able to:

- Discuss musical styles of historically marginalized people.
- Identify the music and instrumentation of a selection of musical traditions (e.g. griot music of the Mande people from Mali, Quechua kantu music of Bolivia, or khoomei singing of Tuva).
- Write about the history of music studies in Western academia the practices have continued the "othering" of non-European musical traditions.
- Analyze the processes of Western imperialism and the decline of indigenous music practices.
- Compare different systems of cultural preservation (e.g. UNESCO, government preservations systems, and education programs).
- Compare how traditional music practices have been used for social justice movements (e.g. Shona mbira music and the use in Chimurenga during the War of Black Liberation in Zimbabwe, or Chilean nueva cancion).

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.

MUSC& 105 - Music Appreciation

Credits: 5

Introduces the music of the great master composers beginning with the elements of music and progressing through the common style periods. Includes listening lab.

Satisfies Requirement: Humanities/Fine Arts/English

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify the elements of Western art music along with comparison pieces from non-Western cultures (e.g. melody, harmony, rhythm, word-music relationships, form, texture).
- Explain the philosophies and characteristics of each Western musical era and what changes developed to cause a shift to a new era.
- Explain the historical significance and characteristics of composed music from different Western musical eras from the Middle Ages to the 20th century.
- Recognize compositions (masterworks) and composers who brought forth major musical innovations and contributions to the Western music landscape in each musical era.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MUSC 107 - History of Jazz

Credits: 5

Jazz is the first uniquely American music and has a rich and exciting history, as well as a profound impact on American and world culture. Introduces the students to jazz as a body of music and as a product of a fascinating dialog within and between cultural spheres: African diasporic, American, and African American.

Satisfies Requirement: Humanities/Fine Arts/English and Diversity

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify musical styles and genres instrumental to the formation of jazz.
- Identify instrumentation important to the development of the history of jazz.
- Identify the origins and influences of jazz music (e.g. field cries, blues, Christian hymns).
- Investigate issues of marginalization, cultural appropriation, and oppression in the formation of racial identity and expression (e.g. blackface minstrelsy, rural and Delta blues).
- Examine how music is used as resistance against oppression (e.g. cool jazz, free jazz, bebop).
- Discuss the impact of jazz on American popular culture and world music cultures.
- Identify musicians notable to the development of jazz music (e.g. Louis Armstrong, Miles Davis, and Charlie Parker).

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.

MUSC 108 - Computer Music 1

Credits: 5

Introduction to computer assisted notation, composition and performance using a computer, digital keyboard, and software for notation and digital sequencing.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify terms and concepts related to music technology.
- Recognize relevant events in the development of computer music and music technology.
- Apply basic computer music skills to professional music software.
- Compose and produce original computer music and/or sound art using basic sound production techniques.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MUSC 109 - Computer Music 2

Credits: 5

A continuation of MUSC 108 with more in-depth study and use of digital of audio workstation (DAW) software. Students will begin to work with basic mixing and master procedures, study procedures in effects processing, and be introduced to the history of electronic music prior to 1960.

Enrollment Requirement: MUSC 108 with a grade of 2.0 or higher.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Recognize relevant events and historical trends in the development of computer music and music technology up to 1960.
- Discuss concepts related to computer music.
- Apply computer music skills to professional music software.
- Compose original computer music and/or sound art using sound production techniques including basic mixing, mastering, and effects processing.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MUSC 110 - Computer Music 3

Credits: 5

A continuation of MUSC 109 with additional study and use of digital audio workstation (DAW) and/or notation software. Students will continue to work with mixing and mastering procedures, effects processing, different plug-in types, and study the history of electronic music through the 1980s.

Enrollment Requirement: MUSC 109 with a grade of 2.0 or higher.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Recognize relevant events and historical trends in the development of computer music and music technology through the 1980s.
- Apply computer music skills to professional music software.
- Compose original computer music and/or sound art using sound production techniques.
- Present original computer music and/or sound art projects to the campus community.
- Discuss topics related to computer music.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MUSC 118 - Concert Choir 1

Credits: 1-3

Students prepare and present selected choral works. Gives an in-depth study of fundamentals of vocal production. One required evening performance each quarter.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$15.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate the ability to match pitch.
- Demonstrate correct posture and proper vocal technique.
- Recognize historical trends in choral repertoire.
- Apply proper vocal technique and musical interpretation in a final performance.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MUSC 119 - Concert Choir 2

Credits: 1-3

Continuation of MUSC 118. Students prepare and present selected choral works. Gives an in-depth study of fundamentals of vocal production. One required evening performance each quarter.

Enrollment Requirement: MUSC 118.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$15.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate the ability to match pitch.
- Demonstrate correct posture and proper vocal technique.
- Recognize historical trends in choral repertoire.
- Apply proper vocal technique and musical interpretation in a final performance.
- Demonstrate leadership in their singing section.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MUSC 120 - Concert Choir 3

Credits: 1-3

Continuation of MUSC 119. Gives an in-depth study of fundamentals of vocal production. One required evening performance each quarter.

Enrollment Requirement: MUSC 119.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$15.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate the ability to match pitch.
- Demonstrate correct posture and proper vocal technique.
- Recognize historical trends in choral repertoire.
- Apply proper vocal technique and musical interpretation in a final performance.
- Demonstrate leadership in their singing section.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MUSC& 121 - Ear Training 1

Credits: 2

Students study simple intervals, triads and rhythm through a program designed to train the ear to identify and write down simple musical structures from dictation.

Satisfies Requirement: Humanities/Fine Arts/English

Course Outcomes:

Students who successfully complete this class will be able to:

- Aurally identify simple intervals, simple rhythmic patterns, and basic triads.
- Aurally identify and notate simple melodies in major and minor keys in melodic dictation.
- Aurally identify and notate basic rhythms in simple and compound meters in rhythmic dictation.
- Develop basic sight-singing skills in tonal music.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MUSC& 122 - Ear Training 2

Credits: 2

Students continue to study simple and compound intervals, basic four-part harmony, rhythm and pitch through a program designed to train the ear to identify and write down musical structures from dictation.

Enrollment Requirement: MUSC&121 with a grade of 2.0 or higher.

Satisfies Requirement: Humanities/Fine Arts/English

Course Outcomes:

Students who successfully complete this class will be able to:

- Aurally identify simple and compound intervals, rhythmic subdivisions, basic triads, and inversions of chords, including dominant seventh chords.
- Aurally identify and notate melodies in major and minor (harmonic and melodic) keys in melodic dictation.
- Aurally identify and notate rhythms of intermediate difficulty in simple and compound meters in rhythmic dictation.
- Aurally identify and notate basic chord progressions in major and minor keys in harmonic dictation.
- Develop basic and intermediate sight-singing skills in tonal music.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MUSC& 123 - Ear Training 3

Credits: 2

Continues to study simple and compound intervals, triads and seventh chords in four-part harmony and complete melodies through a program designed to train the ear to identify and write down musical structures from dictation.

Enrollment Requirement: MUSC& 122 with a grade of 2.0 or higher.

Satisfies Requirement: Humanities/Fine Arts/English

Course Outcomes:

Students who successfully complete this class will be able to:

- Aurally identify simple and compound intervals, rhythmic subdivisions, triads, inversions, and seventh chords.
- Aurally identify and notate more complex melodies in major and minor (harmonic and melodic) keys in melodic dictation.
- Aurally identify and notate rhythms of intermediate difficulty in simple, compound, and odd meters in rhythmic dictation.
- Aurally identify and notate more complex chord progressions in major and minor keys in harmonic dictation.
- Develop intermediate sight-singing skills in tonal music.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MUSC 124 - Musical Rehearsal and Performance

Credits: 5

Students participate in a musical comedy or drama as a performer or technician.

Satisfies Requirement: Humanities/Fine Arts/English

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate proficiency with their character and his/her role in a production.
- Practice lines and learn a script and score for final performance.
- Follow general stage directions and blocking.
- Perform songs and dances as integral component parts of a musical production.

Program Outcomes

Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MUSC 125 - Vocal Coaching for Singers

Credits: 5

For absolute beginners to most advanced. Students prepare songs in a variety of styles,

to sing at least weekly for the class and for a final recital. Instructor works with individual students on vocal technique, style-mastery, stage presence, and microphone techniques. Addresses stage fright and other performance issues. Implements peer evaluations and learning constructive and objective self-critique.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate a knowledge of healthy and proper vocal techniques through the preparation and performing of at least three songs in different styles; including but not limited to musical theater, jazz, pop, country, R&B and other contemporary styles.
- Recognize proper (or improper) vocal technique in others by writing peer evaluations.
- Demonstrate an understanding of good stage presence in their performances.
- Demonstrate a knowledge of strategies to manage performance anxiety issues.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MUSC 127 - Green River Jazz Voices 1

Credits: 1-5

Prepares and presents choral music in classical, jazz, and pop idioms. Some students may be involved as rhythm section players or sound technicians. Requires extensive performance demands and additional hours for rehearsals and concerts. BY AUDITION ONLY.

Enrollment Requirement: Instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$15.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate the ability to sing with proper vocal technique.
- Demonstrate sight singing using solfege.
- Apply proper song stylizing to different jazz styles being performed (e.g. bossa nova, samba, swing, ballad, and pop).
- Identify historical significance of songs and styles being performed (e.g. blues, jazz standards, classic pop music, latin jazz, more current songs arranged in jazz style).
- Demonstrate high standards in performances (preparedness, professionalism, confidence, accuracy, stylizing, musical interpretation, improvisation).

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MUSC 128 - Green River Jazz Voices 2

Credits: 1-5

Prepares and presents classical, jazz, and pop idioms. Some students may be involved as rhythm section players or sound technicians. Requires extensive performance demands and additional hours for rehearsals and concerts. BY AUDITION ONLY.

Enrollment Requirement: MUSC 127 and instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$15.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate the ability to sing with proper vocal technique.
- Demonstrate sight singing using solfege.
- Apply proper song stylizing to different jazz styles being performed (e.g. bossa nova, samba, swing, ballad, and pop).
- Identify historical significance of songs and styles being performed (e.g. blues, jazz standards, classic pop music, Latin jazz, more current songs arranged in jazz style).
- Demonstrate high standards in performances (preparedness, professionalism, confidence, accuracy, stylizing, musical interpretation, improvisation).

- Apply leadership in your section.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MUSC 129 - Green River Jazz Voices 3

Credits: 1-5

Prepares and presents choral music in classical, jazz and pop idioms. Some students may be involved as rhythm section players or sound technicians. Requires extensive performance demands and additional hours for rehearsals and concerts. BY AUDITION ONLY.

Enrollment Requirement: MUSC 128 and instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$15.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate the ability to sing with proper vocal technique.
- Demonstrate sight singing using solfege.
- Apply proper song stylizing to different jazz styles being performed (e.g. bossa nova, samba, swing, ballad, and pop).
- Identify historical significance of songs and styles being performed (e.g. blues, jazz standards, classic pop music, latin jazz, more current songs arranged in jazz style).
- Demonstrate high standards in performances (preparedness, professionalism, confidence, accuracy, stylizing, musical interpretation, improvisation).
- Apply leadership in your section.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.

- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MUSC& 131 - Music Theory 1

Credits: 3

Study of basic music notation with emphasis on principles of rhythm, intervals, scales, key signatures, triads and seventh chords, four-part writing, functional tonal harmony, non-harmonic tones and cadences.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify and explain scales, keys, intervals, triads, clefs, meter, rhythm, and some basic harmony.
- Recognize major events in the development of music theory.
- Demonstrate proper musical notation skills.
- Analyze music using basic music theory knowledge.

Program Outcomes

Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MUSC& 132 - Music Theory 2

Credits: 3

Continuation of MUSC& 131. Covers the study of musical texture, species counterpoint, phrases, motives, and diatonic harmony including the dominant seventh chord, non-harmonic tones, cadences and inversions in a variety of choral and keyboard textures in common practice style. Includes analysis, composition and performance.

Enrollment Requirement: MUSC& 131 with a grade of 2.0 or higher.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify musical textures.
- Identify and explain dominant seventh chords.
- Recognize major and relevant events in the development of music theory.
- Analyze music using basic and intermediate music theory knowledge.
- Analyze and compose music using basic phrases, motives, species counterpoint, and four-part harmony.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MUSC& 133 - Music Theory 3

Credits: 3

Continuation of MUSC& 132. Continued study of musical texture, counterpoint, and diatonic harmony including non-dominant seventh chords, secondary dominant chords, basic musical forms, and modulation.

Enrollment Requirement: MUSC& 132 with a grade of 2.0 or higher.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify and explain non-dominant seventh chords, secondary dominant chords, musical forms, and modulation.
- Recognize and explain major events in the development of music theory.
- Analyze music using intermediate music theory knowledge.
- Analyze and compose music using phrases, motives, counterpoint, four-part harmony, basic modulation, and simple forms.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MUSC 137 - Asian Drumming Ensemble 1: Korean Percussion

Credits: 5

This ensemble will explore traditional Korean drumming practices, their use among rural farmers, and their use in social protest (i.e. Japanese occupation, pro-democratization movements, to the ousting of President Park Geun-hye). We will learn basic techniques of the Korean drumming traditions pungmul, samulnori, and nongak and play the four main instruments: ching, kkwaenggwari, puk, and changgo. No musical experience required.

Satisfies Requirement: Humanities/Fine Arts/English and Diversity

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify a variety of basic drumming selections of Korean traditional drumming and rhythms.
- Discuss a variety of selections of basic Korean traditional drumming and rhythms.
- Play basic rhythms and identify with how these drumming practices used as part of the pro-democratization process in the 1970s and 1980s.
- Place the sounds and meanings of particular pieces/rhythms in social, historical, and political contexts (e.g. shaman ritual rhythms vs. rhythms used for political protest).

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.

MUSC 138 - Asian Drumming Ensemble 2: Korean Percussion

Credits: 5

This ensemble will explore traditional Korean drumming practices, their use among rural farmers, and their use in social protest (i.e. Japanese occupation, pro-democratization movements, to the ousting of President Park Geun-hye). We will learn intermediate techniques of the Korean drumming traditions pungmul, samulnori, and nongak and play the four main instruments: ching, kkwaenggwari, puk, and changgo.

Enrollment Requirement: MUSC 137 with a grade of 1.0 or higher; or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English and Diversity
Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify a variety of selections of intermediate Korean traditional drumming and rhythms.
- Demonstrate a variety of selections of intermediate Korean traditional drumming and rhythms.
- Play intermediate rhythms and identify with how these drumming practices used as part of the pro-democratization process in the 1970s and 1980s.
- Analyze the meanings of particular pieces/rhythms in social, historical, and political contexts (e.g. shaman ritual rhythms vs. rhythms used for political protest).

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.

MUSC 139 - Asian Drumming Ensemble 3: Korean Percussion

Credits: 5

This ensemble will explore traditional Korean drumming practices, their use among rural farmers, and their use in social protest (i.e. Japanese occupation, pro-democratization movements, to the ousting of President Park Geun-hye). We will learn advanced techniques of the Korean drumming traditions pungmul, samulnori, and nongak and play the four main instruments: ching, kkwaenggwari, puk, and changgo.

Enrollment Requirement: MUSC 138 with a grade of 1.0 or higher; or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English and Diversity

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify a variety of advanced drumming selections of Korean traditional drumming and rhythms.
- Demonstrate a variety of selections of advanced Korean traditional drumming and rhythms.
- Play advanced rhythms and identify with how these drumming practices used as part of the pro-democratization process in the 1970s and 1980s.
- Apply and compare meanings of particular pieces/rhythms in social, historical, and political contexts (e.g. shaman ritual rhythms vs. rhythms used for political protest).

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.

MUSC 140 - Class Piano 1

Credits: 2

Offers basic piano pedagogy in a group classroom situation. Teaches hand positions,

fingering, and basic chord structure.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$15.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate beginning keyboard techniques including proper hand positions and fingering.
- Perform beginning piano literature.
- Identify scales, keys, intervals, triads, clefs, meter, rhythm, and chords.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MUSC 141 - Class Piano 2

Credits: 2

Offers basic and intermediate piano pedagogy in a group classroom situation. Covers hand positions, fingering, and chord structures.

Enrollment Requirement: MUSC 140 with a grade of 2.0 or higher.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$15.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate beginning and intermediate keyboard techniques including proper hand positions and fingering.
- Perform beginning and intermediate piano literature.
- Identify scales, keys, intervals, triads, clefs, meter, rhythm, and chords.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MUSC 142 - Class Piano 3

Credits: 2

Offers intermediate piano pedagogy in a group classroom situation. Covers hand positions, fingering, and intermediate chord structures and progressions.

Enrollment Requirement: MUSC 141 with a grade of 2.0 or higher.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$15.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate intermediate keyboard techniques including proper hand positions and fingering.
- Perform beginning and intermediate piano literature.
- Identify scales, keys, intervals, triads, clefs, meter, rhythm, and chords.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is

designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MUSC 150 - Private Instruction 1

Credits: 1

Individual instruction in voice or on any common instrument.

Enrollment Requirement: Instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$675.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate proper tone production on specified instrument.
- Demonstrate memorization of beginning musical literature appropriate to instrument.
- Apply proper tone production and musical interpretation in a public performance.
- Perform music from a variety of contemporary and historical styles.
- Demonstrate professional standards of stage presence and concert etiquette during public performance.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MUSC 151 - Private Instruction 2

Credits: 1

Individual instruction in voice or on any common instrument.

Enrollment Requirement: MUSC 150 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$675.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate proper tone production on specified instrument.
- Demonstrate memorization of beginning musical literature appropriate to instrument.
- Apply proper tone production and musical interpretation in a public performance.
- Perform music from a variety of contemporary and historical styles.
- Demonstrate professional standards of stage presence and concert etiquette during public performance.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MUSC 152 - Private Instruction 3

Credits: 1

Individual instruction in voice or on any common instrument.

Enrollment Requirement: MUSC 151 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$675.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate proper tone production on specified instrument.

- Demonstrate memorization of beginning and intermediate musical literature appropriate to instrument.
- Apply proper tone production and musical interpretation in a public performance.
- Perform music from a variety of contemporary and historical styles.
- Demonstrate professional standards of stage presence and concert etiquette during public performance.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

MUSC 160 - Songwriting and Music Composition 1

Credits: 5

Introduction to songwriting and music composition. Students will analyze musical works and study techniques of composition to create their own music.

Enrollment Requirement: MUSC& 131 and MUSC& 121 with grades of 2.0 or higher or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify terms and concepts related to music composition and songwriting.
(Assignments)
- Analyze music using basic music theory knowledge. (Assignments, Projects)^[1]_{SEP}
- Compose music using historical and contemporary composition techniques
(Assignments, Projects)
- Apply basic computer music skills to professional music notation software. (Projects)

Program Outcomes

- Demonstrate knowledge of historical genres and styles beyond current trends in Music. This will be assessed through assignments.
- Demonstrate a deeper understanding of musical experience through active engagement with critical listening and discourse. This will be assessed through assignments.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.
- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.

MUSC 161 - Songwriting and Music Composition 2

Credits: 5

A continuation of MUSC 160 with study of basic songwriting and music composition techniques. Students will continue to analyze musical works and study composition techniques to create their own music.

Enrollment Requirement: MUSC 160 with a 2.0 grade or higher.

Recommended: MUSC& 132 and MUSC& 122

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Analyze music using basic music theory knowledge. (Assignments, Projects)^{SEP}

- Compose music using historical and contemporary composition techniques (Assignments, Projects)^{[1][2][SEP]}
- Recognize relevant events and historical trends in the development of songwriting and music composition (Assignments)
- Apply basic computer music skills to professional music software. (Projects)

Program Outcomes

- Demonstrate knowledge of historical genres and styles beyond current trends in Music. This will be assessed through assignments.
- Demonstrate a deeper understanding of musical experience through active engagement with critical listening and discourse. This will be assessed through assignments.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.
- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.

MUSC 162 - Songwriting and Music Composition 3

Credits: 5

A continuation of MUSC 161 with more in-depth study of basic songwriting and music composition techniques. Students will continue to analyze musical works and study composition techniques to create their own music.

Enrollment Requirement: MUSC 161 with a grade of 2.0 or higher.

Recommended: MUSC& 132 and MUSC& 122

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Analyze music using intermediate music theory knowledge. (Assignments, Projects)^[L]_{SEP}]
- Compose music using historical and contemporary composition techniques (Assignments, Projects)^[L]_{SEP}]
- Recognize relevant events and historical trends in the development of songwriting and music composition (Assignments)
- Research terms and concepts related to songwriting and music composition (Assignments, Presentation)
- Apply basic and some intermediate music computer skills to professional music software. (Projects)

Program Outcomes

- Demonstrate knowledge of historical genres and styles beyond current trends in Music. This will be assessed through assignments.
- Demonstrate a deeper understanding of musical experience through active engagement with critical listening and discourse. This will be assessed through assignments.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.
- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.

MUSC 170 - Music and the Environment

Credits: 5

Examines the engagement of sound in the environment such as marine, bird, and animal

sounds, depictions of nature in music, and the impact of the music industry. This course will look the ways that human sounds (cars, planes, roadways, etc.) impact the natural habitat of animal and bird species and how these changes impact indigenous lifestyles. This course will look at how sound and music are used within environmental protests and how sound is used as a technical tool for city grid systems, acoustic weapons, and echolocation.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Analyze the use of nature sounds and imagery in music and how artists imitate, incorporate, and interpret environmental sounds across genres and cultures.
- Assess the ecological footprint of the music industry, considering the noise pollution, environmental impacts of production, touring, festivals, and venue infrastructure.
- Investigate how sound pollution affects Indigenous communities focusing on ecological knowledge and cultural practices.
- Evaluate technological uses of sound, such as echolocation, acoustic surveillance, and water monitoring, and consider their functional benefits and ethical concerns.
- Explore the role of sound in environmental justice and activism, including how sound is used to raise awareness, resist environmental harm, and restore ecosystems through acoustic ecology.
- Investigate how noise pollution affects wild life and migration patterns.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.

MUSC 218 - Concert Choir 4

Credits: 1-3

Continuation of MUSC 120. Students prepare and present selected choral works. Students study the basics of vocal production. One required evening performance each quarter.

Enrollment Requirement: MUSC 120.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$15.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate the ability to match pitch.
- Demonstrate correct posture and proper vocal technique.
- Recognize historical trends in choral repertoire.
- Apply proper vocal technique and musical interpretation in a final performance.
- Demonstrate leadership in their singing section.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MUSC 219 - Concert Choir 5

Credits: 1-3

Continuation of MUSC 218. Students study the basics of vocal production. One required evening performance each quarter.

Enrollment Requirement: MUSC 218.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$15.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate the ability to match pitch.
- Demonstrate correct posture and proper vocal technique.
- Recognize historical trends in choral repertoire.
- Apply proper vocal technique and musical interpretation in a final performance.
- Demonstrate leadership in their singing section.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MUSC 220 - Concert Choir 6

Credits: 1-3

Continuation of MUSC 219. Students prepare and present selected choral works. Students study the basics of vocal production. One required evening performance each quarter.

Enrollment Requirement: MUSC 219.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$15.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate the ability to match pitch.
- Demonstrate correct posture and proper vocal technique.
- Recognize historical trends in choral repertoire.
- Apply proper vocal technique and musical interpretation in a final performance.
- Demonstrate leadership in their singing section.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MUSC 227 - Green River Jazz Voices 4

Credits: 1-5

Students prepare and present choral music in classical, jazz and pop idioms. Some students may be involved as rhythm section players or sound technicians. Requires extensive performance demands and additional hours for rehearsals and concerts. BY AUDITION ONLY.

Enrollment Requirement: MUSC 129 and instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$15.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify and explain non-dominant seventh chords, secondary dominant chords, musical forms, and modulation.
- Recognize and explain major events in the development of music theory.
- Analyze music using intermediate music theory knowledge.
- Analyze and compose music using phrases, motives, counterpoint, four-part harmony, basic modulation, and simple forms.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MUSC 228 - Green River Jazz Voices 5

Credits: 1-5

Students prepare and present choral music in classical, jazz and pop idioms. Some students may be involved as rhythm section players or sound technicians. Requires extensive performance demands and additional hours for rehearsals and concerts. BY AUDITION ONLY.

Enrollment Requirement: MUSC 227 and instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$15.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify and explain non-dominant seventh chords, secondary dominant chords, musical forms, and modulation.
- Recognize and explain major events in the development of music theory.
- Analyze music using intermediate music theory knowledge.
- Analyze and compose music using phrases, motives, counterpoint, four-part harmony, basic modulation, and simple forms.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MUSC 229 - Green River Jazz Voices 6

Credits: 1-5

Students prepare and present choral music in classical, jazz and pop idioms. Some students may be involved as rhythm section players or sound technicians. Requires extensive performance demands and additional hours for rehearsals and concerts. BY AUDITION ONLY.

Enrollment Requirement: MUSC 228 and instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$15.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify and explain non-dominant seventh chords, secondary dominant chords, musical forms, and modulation.
- Recognize and explain major events in the development of music theory.
- Analyze music using intermediate music theory knowledge.
- Analyze and compose music using phrases, motives, counterpoint, four-part harmony, basic modulation, and simple forms.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MUSC 250 - Private Instruction 4

Credits: 1

Individual instruction in voice or on any common instrument.

Enrollment Requirement: MUSC 152 and instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$675.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate proper tone production on specified instrument.
- Demonstrate memorization of intermediate musical literature appropriate to instrument.
- Apply proper tone production and musical interpretation in a public performance.
- Perform music from a variety of contemporary and historical styles.
- Demonstrate professional standards of stage presence and concert etiquette during public performance.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MUSC 251 - Private Instruction 5

Credits: 1

Individual instruction in voice or on any common instrument.

Enrollment Requirement: MUSC 250 and instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$675.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate proper tone production on specified instrument.
- Demonstrate memorization of intermediate musical literature appropriate to instrument.
- Apply proper tone production and musical interpretation in a public performance.
- Perform music from a variety of contemporary and historical styles.
- Demonstrate professional standards of stage presence and concert etiquette during public performance.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MUSC 252 - Private Instruction 6

Credits: 1

Individual instruction in voice or on any common instrument. Student pays instructor fee.

Enrollment Requirement: MUSC 251 and instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$675.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate proper tone production on specified instrument.
- Demonstrate memorization of intermediate and advanced musical literature appropriate to instrument.
- Apply proper tone production and musical interpretation in a public performance.
- Perform music from a variety of contemporary and historical styles.
- Demonstrate professional standards of stage presence and concert etiquette during public performance.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MUSC 260 - Songwriting and Music Composition 4

Credits: 5

A continuation of MUSC 162 with study of intermediate songwriting and music composition techniques. Students will continue to analyze musical works and study composition techniques to create their own music.

Enrollment Requirement: MUSC 162 with a grade of 2.0 or higher.

Recommended: MUSC& 132 and MUSC& 122

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Analyze music using intermediate music theory knowledge. (Assignments, Projects)
- Compose music using historical and contemporary composition techniques (Assignments, Projects)
- Recognize and explain relevant events and historical trends in the development of songwriting and music composition (Assignments)
- Research and explain terms and concepts related to songwriting and music composition (Assignments, Presentation)
- Apply intermediate computer music skills to professional music software. (Projects)

Program Outcomes

- Demonstrate knowledge of historical genres and styles beyond current trends in Music. This will be assessed through assignments.
- Demonstrate a deeper understanding of musical experience through active engagement with critical listening and discourse. This will be assessed through assignments.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.
- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.

MUSC 261 - Songwriting and Music Composition 5

Credits: 5

A continuation of MUSC 260 with additional study of intermediate songwriting and music composition techniques. Students will continue to analyze musical works and study composition techniques to create their own music.

Enrollment Requirement: MUSC 260 with a grade of 2.0 or higher.

Recommended: MUSC& 133 and MUSC& 123

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Analyze music using intermediate music theory knowledge. (Assignments, Projects)
- Compose music using historical and contemporary composition techniques (Assignments, Projects)
- Research and explain relevant events and historical trends in the development of songwriting and music composition (Assignments)
- Research and explain terms and concepts related to songwriting and music composition (Assignments, Presentation)
- Apply intermediate and some advanced computer music skills to professional music software. (Projects)

Program Outcomes

- Demonstrate knowledge of historical genres and styles beyond current trends in Music. This will be assessed through assignments.
- Demonstrate a deeper understanding of musical experience through active engagement with critical listening and discourse. This will be assessed through assignments.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.
- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.

MUSC 262 - Songwriting and Music Composition 6

Credits: 5

A continuation of MUSC 261 with additional study of intermediate techniques of songwriting and music composition and an introduction to more advanced techniques. Students will continue to analyze musical works and study composition techniques to create their own music.

Enrollment Requirement: MUSC 261 with a grade of 2.0 or higher.

Recommended: MUSC& 133 and MUSC& 123

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Analyze music using intermediate and some advanced music theory knowledge. (Assignments, Projects)
- Compose music using historical and contemporary composition techniques (Assignments, Projects)
- Research and explain relevant events and historical trends in the development of songwriting and music composition (Assignments)
- Research and explain terms and concepts related to songwriting and music composition (Assignments, Presentation)
- Apply advanced computer music skills to professional music software. (Projects)

Program Outcomes

- Demonstrate knowledge of historical genres and styles beyond current trends in Music. This will be assessed through assignments.
- Demonstrate a deeper understanding of musical experience through active engagement with critical listening and discourse. This will be assessed through assignments.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is

designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.
- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.

MUSC 298 - Independent Study-Music 1

Credits: 1-5

Encourages students to study independently in their fields of special interest in music. Each student meets on a tutorial basis with the instructor.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Design a music-related project and/or research plan with the instructor.
- Demonstrate progress on the music-related project and/or research throughout the quarter.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

MUSC 299 - Independent Study-Music 2

Credits: 1-5

Encourages students to study independently in their fields of special interest in music.

Each student meets on a tutorial basis with the instructor.

Enrollment Requirement: MUSC 298 and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Design a music-related project and/or research plan with the instructor.
- Demonstrate progress on the music-related project and/or research throughout the quarter.

Program Outcomes

- Demonstrate a knowledge of historical genres and styles beyond current trends in Performing Arts.
- Demonstrate responsibility by one or more of the following: attendance, assignment completion, final project or performance completion.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Natural Resources

NATRS 100 - Introduction to Natural Resources

Credits: 5

Introduces the study of natural resources outdoors and in a classroom setting. Explores natural resources careers. Introduces concepts of systems, biomes, forest biology, tree physiology, forest ecology, silviculture, water resources, fish and wildlife management, and Washington forest practices. Students study forest history, forest policy, and forest ownership.

Enrollment Requirement: ENGL& 101 with a grade of 2.0 or higher; or concurrent enrollment; and instructor consent.

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate knowledge of natural resources career opportunities and organizations by being introduced to people that are self-employed, work for private industry or public agencies. Knowledge by become familiar with GRC's Natural Resources programs that lead to advanced degrees and employment.
- Demonstrate the understanding forest biology, tree physiology and tree anatomy, forest ecology, forest regions and soils and examine the role of fire in development and management of Northwest forests.
- Demonstrate the understanding of silviculture and the biological reasons for silviculture prescriptions in the Pacific Northwest.
- Demonstrate the understanding of the importance of forest streams, wetlands, and riparian zones and the protection measures used in the regulations of the Forest Practices Rules and the impacts to fish and wildlife.
- Demonstrate knowledge of both Federal and Washington State environmental regulations and the aesthetic components found in natural resource environments through analysis, discussions, essay writing and presentations in class.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland and Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 114 - Chainsaw Operation and Maintenance

Credits: 2

Students demonstrate competency using small engine-powered forestry equipment. Teaches safety, maintenance, repairs and operation of the equipment. Emphasizes how the equipment is used in current forestry operations. This is a pass/no credit course.

Enrollment Requirement: Instructor consent.

Course Fee: \$45.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate competency using a chainsaw and learn chainsaw safety, maintenance, repairs, and operation with emphasis on how the equipment is used in current forestry operations and demonstrate safe procedures at all times.
- Practice maintaining chainsaws and associated tools, parts, and equipment, repair (dismantling and assembling chainsaws and associated tools) and practice troubleshooting problems.
- Demonstrate the safe use of chainsaws and associated tools in correct falling, log bucking techniques, and limbing situations.
- Demonstrate Silvicultural Operations that include pre-commercial and commercial thinning operations, and how to safely approach a cutting crew.
- Demonstrate professional attitude, critique and assist team-members, demonstrate safe conduct, and will follow instructions, operate equipment individually and in teams.

Program Outcomes

- Attain employment in several Natural Resources areas.
- Manage Forestland and Resources to attain positive outcomes.
- Demonstrate good written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

NATRS 123 - Backcountry Watershed and Forest Assessment

Credits: 12

A field intensive course that covers uses and management of watersheds and the forests contained therein. Teaches watershed scale assessments, backcountry management, and human dimensions of wilderness use including forest harvesting practices across the State of Washington. Topics include land use assessment and management impacts through extensive field exercises in individual, team, and group situations. Students conduct basic trail maintenance, orienteering and examine uses and misuses of backcountry resources. Students create a field journal including a management plan for effective backcountry use. Summer field trip includes base camping, backpacking and/ or backcountry day hiking and field-intensive studies.

Enrollment Requirement: NATRS 182 and NATRS 270 with grades of 2.0 or higher; and instructor consent.

Course Fee: \$450.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate safe and effective methods for accessing remote areas of watersheds.
- Safely and critically assess the health of a watershed based on field observations of land use actions and management across multiple types of land ownership.
- Demonstrate competencies in backcountry travel, orienteering, backcountry safety, and trail management.
- Demonstrate knowledge and skills from hands-on field learning and practice as well reading and presentations, field lectures, labs and demonstrations.
- Develop skills in note keeping, map interpretation, and use of GPS.
- Demonstrate components of leadership through their ability to work well in teams in rugged conditions, as well as the necessary planning and organization.
- Demonstrate field observations and produce a field journal.
- Demonstrate skills in punctuality, timeliness, leadership, professional attitude and respect.
- Demonstrate critical thinking in discussions, essay writing and a research report.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland or Resources to attain positive outcomes.

- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 130 - Wildland Firefighter Training L-180 S-130/190 and ICS series

Credits: 5

Training for Type 2 wildland firefighters in basic firefighting skills. Complies with Northwest Wildfire Coordinating Group standards for S-190, and S-130 courses, which includes L-180 (Human Factors on the Fireline). Coursework reviews the ICS organization, terminology, and common responsibilities. Includes standard firefighting orders, watch-out situations, human factors on the fire line, suppression tactics, incident response, basic fire behavior, emergency situations, risk management, and fire weather. Includes a one-day practicum. This is a pass/no credit course.

Enrollment Requirement: Instructor consent.

Course Fee: \$30.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate knowledge of the Incident Command System, terminology and responsibilities within the ICS organization and practice personal preparedness necessary for wildland firefighters.
- Demonstrate the ability to assess risks, then plan and conduct appropriate actions in incident response and the importance of LCES (Lookouts, Communication, Escape Routes and Safety Zones).

- Demonstrate self-management and survival by learning the use of Fire Shelters while gaining knowledge of fire behavior, weather affecting fires, and weather affected by fires.
- Demonstrate awareness of the human factors regarding fires and human factors on the fire line.
- Demonstrate basic fire suppression tactics in the field on a mock fire situation and awareness of structure protection, protecting the point of fire origin, and hazmat procedures.
- Demonstrate the use of hand tools, hose lays, pumps, and fire suppression equipment.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland and Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

NATRS 161 - Wildlife Habitat Management

Credits: 4

Study the management of wildlife and wildlife habitats to encourage incidence and diversity of mammals, birds, amphibians, and reptiles. Students develop field wildlife research projects to aid management skills. Students visit, observe, and participate in actual projects, giving them opportunities to see Pacific Northwest wildlife in its ever-changing environments within the growing research-based industry.

Enrollment Requirement: Eligible for ENGL& 101 and instructor consent.

Course Fee: \$25.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate research and organizational skills through the development of a wildlife management plan.
- Collect wildlife sample data using approved protocols for various wildlife species, including mammals, birds, reptiles and amphibians.
- Describe the ecological and economic importance of key wildlife species native the the Pacific Northwest.
- Evaluate habitat conditions for a variety of wildlife species and provide appropriate habitat management prescriptions.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland and Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 172 - Computer Applications Overview

Credits: 4

Provide hands-on learning with skills and technology that is applicable to a wide range of employers and natural resources disciplines. Introduces important vocabulary, concepts, and topics that will improve student use of specific software like Microsoft Office Suite, creation of data displays, and prepare students for training in geographic information systems (GIS). For Natural Resources students.

Enrollment Requirement: Instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Utilize Microsoft Office Suite - Word, PowerPoint, Excel, Access.
- Create data displays including charts, graphs, tables.
- Examine and explain different types of datasets.
- Learn basic statistics as it applies to spreadsheets and data displays.
- Differentiate between spreadsheets and databases.
- Practice with multiple types of data collection tools and technology.
- Explain principle concepts of geographic information systems.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland or Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 180 - Natural Resources Measurement

Credits: 6

Application of algebra, geometry, and trigonometry to the solution of tree measurement, surveying, mapping, and orienteering problems. Requires calculator with trigonometric functions and capabilities.

Enrollment Requirement: MATH 70 with a grade of 2.0 or higher and instructor consent.

Course Fee: \$80.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate the application of arithmetic, algebra, geometry and trigonometry to solve area, volume, tree measurement, surveying, mapping and orienteering problems.
- Demonstrate proficiency using measurement tools including dot grids, engineer's scale, calculator, maps, tables and graphs.
- Practice for field applications and procedures by successfully solving (on paper and in Excel) mathematical natural resources based applications.
- Practice logical sequential reasoning by showing steps used to solve a problem.
- Demonstrate forest measurement methods and equipment use including forest product measurements including scaling, cruising and inventory equations.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland or Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

NATRS 182 - Aerial Photos, GIS and Forest Navigation

Credits: 8

Teaches the use of compass and chain/tape, mapping, map reading, topography, orientation, area determination, triangulation, the U.S. survey system, note keeping, field

reporting, GPS (Global Positioning Systems), pacing and Studies and uses aerial photographs to interpret vegetation and land forms, measure distance and direction, and to navigate. Uses extensive field exercises in individual, team, and group situations. Students conduct basic tree measurements as well as open and closed traverses of roads, trails, and areas. Students apply previously learned mathematical concepts and field skills.

Enrollment Requirement: NATRS 180 with a grade of 2.0 or higher; and instructor consent.

Course Fee: \$130.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate basic tree measurement skills, Map reading and drawing.
- Demonstrate field use of aerial photography and GIS using remote sensing and mapping systems commonly used in natural resources management (GIS/GPS).
- Demonstrate skills and knowledge learned in Forest Introduction, Tree and Shrub Identification, and Forest Navigation.
- Demonstrate competencies in distance measurements, direction measurements, note-keeping, public land survey system, map interpretation, acreage determinations, map making, surveying, exhibit competency operating a handheld GPS machine collecting data.
- Demonstrate components of leadership: knowledge of the job, supervision, planning, training, teamwork, work within the organization and work independently within a group.
- Demonstrate aesthetic awareness: opportunities to appreciate aesthetic awareness first-hand. Students will interpret, map, draw, and write about aesthetic components found in natural resources environments.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland and Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

NATRS 183 - Tree and Shrub Identification

Credits: 4

Collect specimens and identify tree and shrub species found in Washington forests. Teaches the use of taxonomic keys and their ecological characteristics and growth habits.

Enrollment Requirement: Instructor permission.

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate the ability to identify regionally important species by leaves, twigs, bark and fruit characteristics.
- Discuss how to use of taxonomic keys to identify and verify tree and shrub genera and species.
- Examine dendrology terminology comprehension and utilization.
- Identify plant morphology and apply knowledge through the correct identification of required plants.
- Identify scientific names and acronyms of selected species including native species of the Pacific Northwest.
- Apply their knowledge through sampling vegetation utilizing circular nested plots and canopy cover measure.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland or Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

Critical Thinking, Responsibility, Quantitative and Symbolic Reasoning, Written Communication

NATRS 184 - Wildflower Identification

Credits: 5

Collects specimens and identifies wildflower species found in Washington forests. Teaches the use of taxonomic keys and their ecological characteristics and growth habits.

Enrollment Requirement: NATRS 183 with a grade of 2.0 or higher; and instructor consent.

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Discuss the use of taxonomic keys to identify ferns, shrubs, and wildflowers.
- Examine the use and comprehension of dendrology terminology.
- Identify plant morphology and apply knowledge through the use of dichotomous keys.
- Examine identification and basic ecology of all required plants.
- Sample vegetation through various methods including: percent cover, transects, fixed area plots and stem counts.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland or Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 192 - GIS for Natural Resources

Credits: 5

Introduces geospatial concepts as part of the discipline of geographic information systems (GIS). Provides an overview with hands-on experience with ArcGIS software and functionality in natural resources applications. Emphasizes principal components of ArcGIS including ArcGIS Pro, Catalog, Toolbox and ArcGIS Online. Provides hands-on practical exercises using field data in various formats including

shapefiles, raster, geodatabase feature classes, GPX, and surface features datasets. Explores how to use geospatial datasets already available and how to create, modify or build new datasets. Create, manage, analyze, and display georeferenced datasets and finished maps.

Enrollment Requirement: NATRS 172 and MATH 70 or higher with grades of 2.0 or higher; and instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Acquire geospatial datasets from various resources, including government entities, open-data portals, and relevant interest groups.
- Analyze geospatial data using several types of tools, techniques, and methods.
- Utilize the ESRI software suite, including ArcGIS Pro, ArcGIS Online, Catalog, and Toolbox.
- Transform GPS data to be readable.
- Explain the principles of spatial concepts pertaining to geographic information systems.
- Design and use maps to display geographical data.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland or Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 198 - Independent Study-Natural Resources 1

Credits: 1-5

Encourages natural resources students to study and develop independently in their special interests. Students must obtain approval on their selected special study project from the instructor.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Develop a deeper understanding of their specific area of interest within natural resources.
- Hone skills and techniques to further develop field based experience for their specific area of interest within natural resources.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland and Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

NATRS 199 - Independent Study-Natural Resources 2

Credits: 1-5

Encourages Natural Resources students to study and develop independently in their special interests. Students must obtain approval on their selected special study project from the instructor.

Enrollment Requirement: Instructor consent.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

NATRS 205 - Wildland Recreation

Credits: 4

Students learn skills needed to develop and manage wildland parks and recreational sites for private, state, and federal owners. Students visit, observe, and participate in actual projects within the growing wildland recreational industry.

Enrollment Requirement: NATRS 100 with grade of 2.0 or higher or concurrent enrollment; and instructor consent.

Course Fee: \$60.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate the use of common field and hand and power tools through recreation projects.
- Demonstrate the ability to gain insight and understanding into wildland recreation management planning and design.
- Demonstrate integration of knowledge from natural resource classes into recreation environment.
- Demonstrate the ability to recognize the differences and similarities of wildland recreation operating procedures between federal, state, county campgrounds and private parks and campgrounds.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland and Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 210 - Introduction to Soils

Credits: 4

Introduces the study of physical and chemical properties of soil and soil ecology. Includes topics on soil formation, plant nutrition, soil water, water and soil conservation, soil erosion and stability, and use of soil maps. Schedules mini labs and field trips to offer hands-on experience. Discusses influence of soils on environmental quality, human health, and forest and agricultural economies.

Enrollment Requirement: MATH 72 with a grade of 2.0 or higher; or eligible for MATH 97 or higher; and instructor consent.

Course Fee: \$25.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Correctly identify key soil morphological and physical properties.
- Demonstrate knowledge of soil forming factors, soil classification and soil nutrition.
- Demonstrate ability to utilize soil maps.
- Identify soil erosion and instability factors and provide appropriate preventative measures.
- Demonstrate knowledge of soil organisms and ecology and its influences on human health and economy.

Program Outcomes

- Attain a job in the Natural Resources field.

- Manage Forestland and Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperator.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 262 - GIS Tools in the Field

Credits: 5

Focuses on various software and GPS tools to collect, create, edit and maintain attributes and spatial information from the office to the field, and back using applications like ESRI's Field Map, Survey 123, Avenza and others. Covers several different analytical techniques and methods pertaining for field data collection and imagery collection as applied to natural resources.

Enrollment Requirement: NATRS 192 with a grade of 2.5 or higher; and instructor consent

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Perform proficient use of field data collection technology like ESRI Fieldmaps, Survey 123, Avenza, and GPS units.
- Evaluate the advantages and disadvantages of each field collection technique.
- Generate maps, graphs, and photo displays as part of analysis.
- Analyze and process aerial and satellite imagery with computer-based programs.
- Demonstrate competency using ArcGIS modules for spatial analysis of field collected data.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland or Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 263 - Cartography

Credits: 5

Provides general introduction to the principles and techniques of cartography. Reviews fundamental mapping concepts of map design using GIS technology. Applies concepts of map scale, projection, and coordinate systems. Learn new software and tools within ArcGIS software including well MapPlex and ColorBrewer to aid in understanding principles of thematic map design.

Enrollment Requirement: NATRS 192 with a grade of 2.5 or higher; and instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Gather and process geospatial data for the purposes of map creation.
- Create map-based solutions for a given audience and purpose.
- Explain cartographic principles and utilize those principles for effective map design.
- Implement cartographic techniques to create high-quality maps.

- Improve map design skills through analyzing and critiquing their own work and the work of others.
- Differentiate between appropriate use of color, typography, symbology, scale, map type, gestalt, among other design elements.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland or Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 270 - Stream and Wetland Ecology

Credits: 5

Students gain an understanding of stream, pond, and wetland ecology through classroom and field experiences. Students study stream and wetland dynamics, associated plant and animal ecology, streamflow hydraulics, and Washington Forest Practices Regulations in an applied field setting. Students conduct measurements and sampling within ponds, streams, and wetlands with follow-up analysis and reports.

Enrollment Requirement: ENGL& 101 and NATRS 172 with grades of 2.0 or higher; and instructor consent.

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Discuss the importance of streams and wetlands in making natural resources management decisions.
- Describe acceptable and legal land management practices, among different categories of riparian zones and water types.
- Use laboratory equipment.
- Measure, analyze, and report stream and wetland physiology, biological, and chemical parameters.
- Demonstrate skills in punctuality, leadership, professional attitude, respect, and the use of word-processing and spreadsheet applications.
- Demonstrate critical thinking, analysis, application and synthesis through the scientific method using logical development of primary scientific research and be able to defend their development of conclusions.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland or Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 271 - Stream and Wetland Restoration

Credits: 5

Stream and wetland restoration is an important issue in water and fish management. Students are given the opportunity to evaluate fundamental ecological processes with the end result being restoration of streams and wetlands. Students look at possible

structure and functional issues within the riparian ecosystem. Students develop an efficient and productive restoration project addressing human-induced changes surrounding both aquatic and terrestrial components. Class is taught with lecture, field sampling, demonstrations, and interviews with agencies and private organizations.

Enrollment Requirement: ENGL& 101 and NATRS 270 with grades of 2.0 or higher; and instructor consent.

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Develop skills in restoration and management in and around surface water sources.
- Identify plant occurrence and stream dynamics.
- Use their data collection skills in recording information obtained in both office and field settings.
- Identify various management methods and activities used in restoring streams back to healthy and productive waterways.
- Visit, observe, and participate in actual projects within the growing research based industry.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland or Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 272 - Fish Identification and Habitat

Credits: 5

Covers the classification, identification, anatomy and physiology, age and growth, behavior, life history, and habitat of fish of the Pacific Northwest. Examines the importance of fish in our society and investigates related regulations and policies.

Enrollment Requirement: NATRS 270 with a grade of 2.0 or higher; and instructor consent.

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Classify and identify fish of the Pacific Northwest (PNW) at different life stages.
- Identify anatomy and physiology of fish in the PNW.
- Demonstrate ability to determine age, sex and growth rate of fish of the PNW.
- Analyze behavior and life history traits of fish of the PNW.
- View and discuss habitat utilized by fish of the PNW.
- Identify various fish survey techniques comm in the industry.
- Examine the importance of fish in our society and investigate regulations and policies associated with those fishes.
- Research and develop a research report of the topic.

Program Outcomes

- Attain a job in the Natural Resources Industry.
- Manage Forestland or Resources to attain positive outcomes.
- Demonstrate good written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 277 - Natural Resources Internship 1

Credits: 4

Internship requires the student to work full time in a paid or volunteer position for an agency or company that will best help the student enhance his/her technical skills and prepare the student for career employment. The student must earn four credits by working 132 hours during the quarter following completion of the second-year Natural Resources courses. Students find and choose their employers and obtain instructor approval before beginning work. Students must have suitable field clothes and equipment for the internship position. This is a pass/no credit course.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Find and obtain a job/position/internship position in a Natural Resources related field that will best help the student enhance his/her technical skills and prepare the student for career employment.
- Obtain and complete an internship of 440-462 hours.
- Keep a daily journal detailing: What was done each day, what was learned each day and contacts made each day.
- Satisfy an evaluation by their employer/supervisor on standard job measures such as: Job knowledge, quality of work, quantity of work, ability to learn and attendance.
- Improve their self-confidence in their abilities, competencies, and knowledge as measured by the employer's and instructor's assessments.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland or Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

NATRS 278 - Natural Resources Internship 2

Credits: 4

Internship requires the student to work full time in a paid or volunteer position for an agency or company that will best help the student enhance his/her technical skills and prepare the student for career employment. The student must earn four credits by working 132 hours following NATRS 277. Students find and choose their employers and obtain instructor approval before beginning work. Students must have suitable field clothes and equipment for the internship position. This is a pass/no credit course.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Find and obtain a job/position/internship position in a Natural Resources related field that will best help the student enhance his/her technical skills and prepare the student for career employment.
- Obtain and complete an internship of 440-462 hours.
- Keep a daily journal detailing: What was done each day, what was learned each day and contacts made each day.
- Satisfy an evaluation by their employer/supervisor on standard job measures such as: Job knowledge, quality of work, quantity of work, ability to learn and attendance.
- Improve their self-confidence in their abilities, competencies, and knowledge as measured by the employer's and instructor's assessments.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland or Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

NATRS 279 - Natural Resources Internship 3

Credits: 3

Internship requires the student to work full time in a paid or volunteer position for an agency or company that will best help the student enhance his/her technical skills and prepare the student for career employment. The student must earn three credits by working 99 hours following NATRS 278. Students find and choose their employers and

obtain instructor approval before beginning work. Students must have suitable field clothes and equipment for the internship position. This is a pass/no credit course.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Find and obtain a job/position/internship position in a Natural Resources related field that will best help the student enhance his/her technical skills and prepare the student for career employment.
- Obtain and complete an internship of 440-462 hours.
- Keep a daily journal detailing: What was done each day, what was learned each day and contacts made each day.
- Satisfy an evaluation by their employer/supervisor on standard job measures such as: Job knowledge, quality of work, quantity of work, ability to learn and attendance.
- Improve their self-confidence in their abilities, competencies, and knowledge as measured by the employer's and instructor's assessments.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland or Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

NATRS 280 - Natural Resources Internship 4

Credits: 3

Internship requires the student to work full time in a paid or volunteer position for an agency or company that will best help the student enhance his/her technical skills and prepare the student for career employment. The student must earn three credits by working 99 hours following NATRS 279. Students find and choose their employers and obtain instructor approval before beginning work. Students must have suitable field clothes and equipment for the internship position. This is a pass/no credit course.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Find and obtain a job/position/internship position in a Natural Resources related field that will best help the student enhance his/her technical skills and prepare the student for career employment.
- Obtain and complete an internship of 440-462 hours.
- Keep a daily journal detailing: What was done each day, what was learned each day and contacts made each day.
- Satisfy an evaluation by their employer/supervisor on standard job measures such as: Job knowledge, quality of work, quantity of work, ability to learn and attendance.
- Improve their self-confidence in their abilities, competencies, and knowledge as measured by the employer's and instructor's assessments.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland or Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

NATRS 284 - Road and Trail Engineering

Credits: 7

Covers road and recreational trail location priorities, location on topographic maps with grade, slope, and property line constraints; Forest Practice Regulations; harvesting and construction equipment; curve computation and field layout; slope staking and cut/fill computation; culvert location; surfaces and drainage; calculations for cut/fill and curves; plan and profile drawing of fieldwork. Uses extensive field exercises in team and group situations.

Enrollment Requirement: NATRS 182 and 292 with grades of 2.0 or higher; and instructor consent.

Course Fee: \$25.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate the ability to integrate previously learned concepts including mathematics, navigation, surveying, mapping, aerial photo interpretation, computer applications, forest hydrology, wildlife management, wildland recreation, and silviculture.

- Demonstrate their skills in road and trail design, Forest Practice Regulations that govern the design and construction of forest roads reconnaissance of a proposed road, identify control points, pegging and grade, harvesting and construction equipment, and drainage and project location onto a large scale map using math and fieldwork to learn curve computation and apply road geometry to the layout of a road or trail in a forested area.
- Demonstrate the ability to work as an individual and in teams or crews performing outside work and a final project to incorporate students working in differing roles and leadership capacities and synthesis teamwork into a group product of road location, making accurate field notes and maps including curve design in the field.
- Demonstrate preparation of a plan and profile from data collected in the field and understanding transportation and harvesting equipment purposes, limitations, advantages, and applications.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland and Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 286 - Natural Resources Business Principles

Credits: 5

A study of human relations and business activities unique to small independent businesses and organizations. Emphasizes contract supervision and consulting/contracting in natural resources management. Includes study of interactions of individuals, teams and crews, organizations, and business ethics. Teaches the types

of ownership, organization, state and federal laws, contracts, taxation, insurance, payroll, finance, accounting, customer relations, personnel management, and negotiation.

Enrollment Requirement: NATRS 172 with a grade of 2.0 or higher; and instructor consent.

Course Fee: \$25.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Practice assertiveness, motivation, leadership, effective communication skills, listening skills, negotiation skills, and conflict resolution skills.
- Examine participation as team members, crew members, and employees.
- Analyze hiring, assessment of personnel, employee rights, and personnel improvement plans and diversity in the workplace.
- Compare and contrast interactions between small business owners and large organizations.
- Demonstrate effective customer relations techniques.
- Discuss business philosophies, corporate culture, and ethical business principles.
- Initiate and manage a small business and evaluate strategic planning and develop a business plan.
- Identify the requirements of the landowners and natural resources businesses that enter into agreements.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland or Resources to attain positive outcomes.
- Demonstrate good written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is

designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 290 - Internship Seminar

Credits: 1

For career-oriented natural resources students as a sequential course to NATRS 277. Covers business letters, resumes, applications, interviewing skills, and internship procedures. Conducts mock interviews and actual interviews for spring internships. This is a pass/no credit course.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate the ability to use computer word-processing skills and self-confidence by producing professional-quality business letters, résumés, and applications to obtain an internship position.
- Demonstrate clear written and oral communication through the use of comparing and contrasting their individual written and oral presentations to those of others.
- Demonstrate organizational skills through the use of different format styles in creating comprehensive resumes, completing thorough job applications and professional appearance through the use of performing mock interviews.
- Demonstrate professional writing skills using correct grammar, syntax, and punctuation.
- Demonstrate responsibility by punctuality and consistent attendance in class and providing assignments when requested.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland and Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as

necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 292 - Resource Sampling and Appraisal of Forest Condit

Credits: 8

Students acquire skills and knowledge to measure, calculate, and sample resources and forest products to determine value using statistically valid procedures. A rigorous course using skills and knowledge of tree diseases and disasters affecting forest product quality. Includes classroom, field studies and library research.

Enrollment Requirement: NATRS 182 with a grade of 2.0 or higher; and instructor consent.

Course Fee: \$30.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate their knowledge diseases which impact tree and log volumes and the reasons to assess dead and living trees in a forest.
- Demonstrate their ability to identify the various types of inventory processes and appraisals required by employers.
- Demonstrate the ability to complete thorough, orderly, concise note-keeping and mapping procedures.
- Demonstrate how to accurately use equipment and methods common in the natural resources fields in performance of timber appraisal and to use statistical methods to assess and validate the results of sampling processes.
- Demonstrate how to refine previously learned skills to measure or calculate diameters, distances, heights, basal area, and volume of logs, trees in stands of trees.
- Demonstrate their knowledge of tree and shrub species, forest diseases, forest types, log grades, and log sorts, use of aerial photography and maps, and different cruising methods.
- Demonstrate the ability to identify harvesting equipment, how to use desktop computer applications to calculate stumpage values. SuperAce

- Demonstrate their ability to plan, design, and layout, a timber harvest.

Program Outcomes

Attain a job in the Natural Resources field.

Manage Forestland and Resources to attain positive outcomes.

Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 293 - Silvicultural Analysis and Forest Protection

Credits: 5

Study of silvicultural and forest protection practices common in management of natural resources in the Pacific Northwest. Course prescribes specific management objectives and inventories resources and soils. Students design, measure and report a research project by working independently and in groups, indoors and outdoors.

Enrollment Requirement: NATRS 172 and 180 with grades of 2.0 or higher; and instructor consent.

Course Fee: \$25.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate knowledge of key forestry ecology principles that influence silvicultural practices.

- Demonstrate knowledge of appropriate silviculture tools and practices that cover all stages of stand development to meet various management objectives.
- Demonstrate knowledge of how silvicultural practices influence wildlife habitat, wood properties and forest health.
- Develop a professional forest management plan for a landowner.
- Identify threats to forest health and potential management responses to health issues.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland and Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 297 - Independent Study-Natural Resources 4

Credits: 1-5

Encourages students to study and develop independently in their area of special interest in natural resources. Students must obtain approval on their study project from the instructor.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Develop a deeper understanding of their specific area of interest within natural resources.

- Hone skills and techniques to further develop field based experience for their specific area of interest within natural resources.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland and Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

NATRS 298 - Independent Study-Natural Resources 5

Credits: 1-5

Encourages students to study and develop independently in their area of special interest in natural resources. Students must obtain approval on their study project from the instructor.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Develop a deeper understanding of their specific area of interest within natural resources.
- Hone skills and techniques to further develop field based experience for their specific area of interest within natural resources.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland and Resources to attain positive outcomes.

- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

NATRS 299 - Independent Study-Natural Resources 6

Credits: 1-5

Encourages students to study and develop independently in their area of special interest in natural resources. Students must obtain approval on their study project from the instructor.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Develop a deeper understanding of their specific area of interest within natural resources.
- Hone skills and techniques to further develop field based experience for their specific area of interest within natural resources.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland and Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work

products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

NATRS 300 - Forest Ecology

Credits: 5

Focuses on ecological principles applied to forest management including production ecology, biogeochemistry, disturbances, environmental factors, populations, community ecology, forest succession, and forest classification/description. Course will be taught through classroom and field studies. Hands-on application will be emphasized.

Enrollment Requirement: ENGL 128 with a grade of 2.0 or higher; and instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate understanding of plant succession, soil conditions and implications for tree growth.
- Synthesize the science behind ecological occurrences and disturbances.
- Discuss the theories including biodiversity, inter- and intraspecific interactions, disturbance and succession that describe ecological processes and how they can be applied across multiple ecosystems.
- Demonstrate high reading and comprehension skills through reading and discussing scientific articles.
- Conduct an ecological research project.
- Write a scientific paper with their findings.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland or Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 301 - Resource Economics

Credits: 5

Emphasizes the practical understanding of distribution of limited resources be it financial or physical. Financial topics include forest resource valuation and financial analysis concepts, inflation, risk and uncertainty, taxes related to both property ownership, and business and financial decision making. Students become familiar with parts of a contract including boilerplate clauses and specialized terms related to logging, road building and timber sales. Covers timber sale and unit appraisal. Labs focus on computational problems and associated computer software used in the forest management industry.

Enrollment Requirement: Instructor consent.

Course Fee: \$25.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Explain forest resource valuation in the context of private and public lands.
- Complete basic financial analysis for various forest operations and practices using acceptable industry standard software programs.
- Compare and contrast inflation, risk and uncertainty in financial decision making.
- Appraise taxes and fees associated with forest ownership and resource extraction.
- Compose and evaluate standard contracts for a variety of forestry activities.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland and Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperator.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 385 - Forest Protection and Disease Management

Credits: 5

Teaches students about the various biotic and abiotic disturbance agents that affect forest ecosystems. Students identify important forest insects and diseases of North America, especially the Pacific Northwest, as well as their effects on forest ecology. Students learn predisposing factors that increase susceptibility as well as propose effective management strategies to reduce impacts.

Enrollment Requirement: ENGL 128 with a grade of 2.0 or higher; and instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Correctly identify common insects and diseases that impact forest health and values in North America with focus on the Pacific Northwest.
- Assess a forest for current and potential health issues from biotic and abiotic agents.
- Prepare a management plan to deal with forest health issues.
- Demonstrate knowledge of the importance and impact of various disturbance agents on forest ecosystems.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland and Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 386 - Bio Invasions: Invasive Species Management

Credits: 5

Walks students through the positive identification of invasive species and noxious weeds in Washington State. Students have the opportunity to learn about non-plant invasive and observe or participate in their management. Students learn sources of invasive species, methods of control and visit sites where biological, mechanical and chemical control has been used. Students learn the ecology behind biological invasions and assess invasive species control in the field. Students participate in mechanical control methods in various locations targeting various invasive species and have the opportunity to observe chemical methods. Students produce an invasive species management plan.

Enrollment Requirement: ENGL 128 with a grade of 2.0 or higher; and concurrent enrollment in NATRS 417; and instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Access and utilize resources for identifying, classifying and reporting invasive species in Washington state.
- Demonstrate knowledge of the ecology of invasive species.
- Demonstrate knowledge of three methods of control for biological invasive.
- Participate in the control and management of invasive species.
- Write an integrated invasive management plan.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland and Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperator.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 390 - Environmental Decision Making and Conflict Resolution

Credits: 5

Introduces students to conflict theory as applied in complex natural resource disputes including forest harvest in the Pacific Northwest. Focuses on skill development in planning culturally appropriate and inclusive public participation processes, meeting facilitation, and conflict mediation including option comparison for nonviolent conflict management.

Enrollment Requirement: ENGL 128 with a grade of 2.0 or higher; and instructor consent.

Course Fee: \$25.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Discuss case studies of environmental conflict with a focus on Western environmental issues.
- Examine stakeholders and learn to identify what communication process should be used to improve opportunities for conflict resolution and decision making outcomes.
- Examine individual and group conflict resolution skills including interdisciplinary teams.
- Participate in a public forum for an environmental conflict and write an industry brief on the issue.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland and Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 399 - Natural Resources Seminar

Credits: 1

Showcases timely speeches by professionals in natural resource management. Guide students through a review of current topics in forestry, fire, watershed, or soils.

Presentations by guest speakers and professionals in the field complement student's development of writing and oral presentation skills.

Enrollment Requirement: ENGL& 101 with a grade of 2.0 or higher; and instructor consent.

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Discuss the various facets of Natural Resources through weekly guest lecture presentations from multiple professionals.
- Discuss current events, findings and practices in the field of Natural Resources.
- Engage with relevant questions of current professionals in the field.
- Summarize talks and synthesize information through reflection essays.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland and Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 400 - Forest Practices, Law and Policy

Credits: 5

A core forest resource management course. Students examine and analyze natural resource policy including environmental impact statements, environmental assessments, and habitat conservation plans. Students appraise and critique administrative behavior, as well as legislative, regulatory, legal, ethical, and personal considerations as applied to forestry operations in Washington State and nationally. Students discuss and demonstrate applications of Washington Forest Practices, Habitat Conservation Plans, Clean Air, Clean Water, and Endangered Species Acts.

Enrollment Requirement: ENGL 128 and NATRS 390 with grades of 2.0 or higher; and instructor consent.

Course Fee: \$25.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate their familiarity with the various environmental acts, laws, policies that govern Natural Resources on a national and local basis.
- Demonstrate their familiarity with the updated and current HCP and Washington Forest Practice Rules and Regulations and how they are applied locally.
- Demonstrate the understanding of the practical impacts of the Clean Air and Clean Water Acts, as well as the Endangered Species Act and how they impact land and water management in the Pacific Northwest (PNW).

- Participate in a public forum and understand the process of an Interdisciplinary Team (IDT) in the review process of the Forest Practice Applications (FPA). Explain the process and outcomes of an Interdisciplinary Team (IDT) review of an FPA
- Demonstrate their appraisal and critiquing administrative process and behaviors, as well as legislative, regulatory, legal ethical, tribal and personal considerations. (This is the format of Timber, Fish and Wildlife (TFW) Cooperators).
- Identify/define/explain the differences between the state and federal environmental acts and policies discussed in class. Be familiar with the SEPA document and the process.
- Describe and explaining how the TFW Cooperative started, how it has developed over time and what its current role is in the management of natural resources in today's environment.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland and Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 401 - Advanced Harvest Systems: Cable and Aerial Based

Credits: 5

Focuses on in-depth understanding of various harvest systems for the applied forester or land manager. Topics include skyline operations, safety rules, rigging requirements, payload analysis, harvest unit planning and layout. Specialized areas include helicopter logging, Riparian Management Zone (RMZ) rules, Wetland Management Zones (WMZ) rules, Channel Migration Zone (CMZ) rules and unstable slopes.

Enrollment Requirement: NATRS 182 with a grade of 2.0 or higher; concurrent enrollment in NATRS 402 and 403; and instructor consent.

Course Fee: \$150.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate knowledge of current high lead and skyline logging systems involving both cable and aerial operations.
- Demonstrate the knowledge of safety rules involving Labor and Industries (L&I) as they apply.
- Identify types of rigging and equipment used in Aerial Cable operations.
- Demonstrate harvest unit planning, design and layout objectives.
- Demonstrate the knowledge of and identify commercial thinning operations and fire salvage operations.
- Identify Riparian Migration Zones (RMZ), Wetland Migration Zones (WMZ) and Channel Migration Zone (CMZ) protection rules in regards to harvest operations.
- Identify and delineate unstable slopes and the rules that apply.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland and Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 402 - Advanced Harvest Systems: Ground Based

Credits: 4

Focuses on more in-depth understanding of various harvest systems for the applied forester or land manager. Topics include mechanical operations for ground based systems, rigging requirements, payload analysis, harvest unit planning and layout. Specialized areas include helicopter logging, Riparian Management Zone (RMZ) rules, Wetland Management Zones (WMZ) rules, Channel Migration Zone (CMZ) rules and unstable slopes.

Enrollment Requirement: NATRS 182 with a grade of 2.0 or higher; and instructor consent.

Course Fee: \$150.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate knowledge and identify current ground based harvest operations available in the Forest Industry.
- Demonstrate knowledge and identify safety rules involving Labor and Industries (L&I).
- Identify types of rigging and equipment used in ground based harvest operations.
- Demonstrated skills in harvest unit planning, design and layout objectives used in ground based operations.
- Demonstrate the knowledge of and identify commercial thinning operations and fire salvage operations.
- Identify Riparian Migration Zones (RMZ), Wetland Migration Zones (WMZ) and Channel Migration Zone (CMZ) protection rules in regards to harvest operations.
- Identify and delineate unstable slopes and the rules that apply.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland and Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 403 - Transportation System Design

Credits: 3

An intermediate level class for foresters and resource managers in issues and responsibilities relating to transportation systems. Students study road types, standards and design procedures. Includes basic soil engineering, route surveying, reconnaissance and design software. Specialized topics include design and installation of drainage structures, erosion control techniques and methods, and material stockpiles. Covers administrative activities such as road costing, rules, regulations, permits and road maintenance plans.

Enrollment Requirement: NATRS 182 with a grade of 2.0 or higher; and instructor consent.

Course Fee: \$150.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify the different classification of haul roads such as Class A, B, C and D miles and the associated rate for each class and the different design and standards for permanent mainline roads, spurs and temporary roads.
- Demonstrate basic road engineering to perform road pegging, route surveying and reconnaissance, road location and field layout.
- Identify fish passage issues, proper drainage structures and different erosion control techniques as they pertain to road construction.
- Demonstrate their ability to analyze road costing, have knowledge of Forest Practice rules and regulations and the permitting process and maintenance dictate transportation designs.
- Demonstrate their knowledge to identify the difference between road abandonment, deactivation and decommissioning.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland or Resources to attain positive outcomes.

- Demonstrate good written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 416 - UAV Applications and Mapping

Credits: 5

Explore unmanned aerial vehicle (UAV) applications for mapping including methods of data collection, processing, and analysis for agriculture, real-estate, surveying, construction, with an emphasis on natural resources and forestry applications. Gain knowledge of rules and regulations of commercial use of UAVs including federal, state, and local jurisdiction regulations. Become familiar with UAV platforms for data acquisition, software for automated data collection, and software for acquired data post processing. Learn to use mapping software for remote sensing, image analysis, and change detection from data collected in the field.

Enrollment Requirement: NATRS 192 or equivalent; and instructor consent.

Recommended: NATRS 107

Course Fee: \$75.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Utilize UAV technology as a form of data collection.
- Differentiate between federal, state, and local regulations regarding UAV's.
- Engage in safe and efficient drone flights.

- Perform image processing from collected data imagery.
- Perform statistical analysis from processed imagery.
- Create a comprehensive final project for a region of interest using UAV applications and other relevant GIS applications.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland or Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 417 - Resource Management GIS Applications 1

Credits: 2

A supplementary GIS course that accompanies NATRS 386 Bio Invasions. Students apply GIS principles to generate projects for NATRS 386. Students build on their current GIS skills and employ trouble shooting and problem solving with the ultimate outcome of successful spatial mapping and analysis to complete NATRS 386 assignments.

Enrollment Requirement: NATRS 192 with a grade of 2.0 or higher; and concurrent enrollment with NATRS 386; and instructor consent.

Course Fee: \$25.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Utilize ArcPro software to complete mapping projects.
- Problem solve ArcPro tools to complete tasks by utilizing ArcPro Help, Search and on-line help forums.
- Download and upload geospatial data files and correctly import them into ArcPro.
- Define projections of data layers for map creation and analysis.
- Create file geodatabases, feature datasets, feature classes, fields and domains as necessary to support NATRS 386 content.
- Create metadata to support new data creation.
- Create user-friendly and client centered maps.
- Conduct spatial analysis as necessary to support NATRS 386 content.
- Write detailed reports explaining data acquisition, processing, and analysis techniques.
- Create and present a final project encompassing the above outcomes.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland or Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 418 - Resource Management GIS Applications 2

Credits: 2

A supplementary GIS course that accompanies NATRS 493 Advanced Silviculture. Students apply GIS principles to generate projects for NATRS 493. Students build on their current GIS skills and employ trouble shooting and problem solving with the ultimate outcome of successful spatial mapping and analysis to complete NATRS 493 assignments.

Enrollment Requirement: NATRS 192 with a grade of 2.0 or higher; concurrent enrollment with NATRS 493; and instructor consent.

Course Fee: \$25.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Utilize ArcPro software to complete mapping projects.
- Problem solve ArcPro tools to complete tasks by utilizing ArcPro Help, Search and on-line help forums.
- Download and upload geospatial data files and correctly import them into ArcPro.
- Define projections of data layers for map creation and analysis.
- Create file geodatabases, feature datasets, feature classes, fields and domains as necessary to support NATRS 493 content.
- Create metadata to support new data creation.
- Create user-friendly and client centered maps.
- Conduct spatial analysis as necessary to support NATRS 493 content.
- Write detailed reports explaining data acquisition, processing, and analysis techniques.
- Create and present a final project encompassing the above outcomes.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland or Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 419 - Resource Management GIS Applications 3

Credits: 2

A supplementary GIS course that accompanies NATRS 461 Wildlife Ecology Students apply GIS principles to complete projects for NATRS 461. Students build on their current GIS skills and utilize trouble shooting and problem solving with the ultimate outcome of generating successful spatial mapping and analysis to complete NATRS 461 assignments.

Enrollment Requirement: NATRS 192 with a grade of 2.0 or higher; concurrent enrollment with NATRS 461 and instructor consent.

Course Fee: \$25.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Utilize ArcPro software to complete mapping projects.
- Problem solve ArcPro tools to complete tasks by utilizing ArcPro Help, Search and on-line help forums.
- Download and upload geospatial data files and correctly import them into ArcPro.
- Define projections of data layers for map creation and analysis.
- Create file geodatabases, feature datasets, feature classes, fields and domains as necessary to support NATRS 461 content.
- Create metadata to support new data creation.
- Create user-friendly and client centered maps.
- Conduct spatial analysis as necessary to support NATRS 461 content.
- Write detailed reports explaining data acquisition, processing, and analysis techniques.
- Create and present a final project encompassing the above outcomes.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland or Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 461 - Wildlife Ecology

Credits: 5

Students examine, identify and determine important wildlife habitats and their characteristic plants and animals within an ecological and management context through outdoor application of concepts. Discusses identification of species and habitats as well as life histories and ecology of important species. Examines and critiques scientific principles and management implications. Students organize and carry out a scientific sampling and assessment in the field.

Enrollment Requirement: NATRS 161 with grades of 2.0 or higher or concurrent enrollment; and instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate knowledge of basic wildlife ecology principles including population dynamics.
- Apply skill and knowledge to collect wildlife habitat and ecology data needed for habitat assessment and management.
- Access, read and understand scientific and government documents related to wildlife ecology topics.
- Conduct and write up a wildlife related research project.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland and Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperator.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 471 - Restoration Techniques

Credits: 5

Examines Forest restoration at multiple spatial scales from stand to watershed to landscape levels. Students demonstrate outdoor skills and conduct restoration assessments. Compares goals for biological conservation, invasive species management, carbon sequestration, and economic viability through field trips and applied experience with restoration techniques and case studies.

Enrollment Requirement: ENGL 335 with grade of 2.0 or higher or concurrent enrollment; and NATRS 210 with a grade of 2.0 or higher; and instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate knowledge and skill in assessing a stand for restoration potential.
- Demonstrate an understanding of various restoration techniques used for a variety of degraded environments.
- Demonstrate an understanding of the ecological, economic and social aspects of preparing and conducting restoration projects at various spatial and temporal scales.
- Prepare a management plan for a restoration project.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland and Resources to attain positive outcomes.
- Demonstrate effective written and verbal communications between industry partners and cooperator.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as

necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 493 - Advanced Silviculture

Credits: 5

Students learn, through classroom and field studies, woody plant interactions with environmental stresses including changes to stand structure caused by humans, nature or time and selection using genetic principles for improved growth. Students participate in hands-on seedling production methods while applying the theory and practice of controlling forest establishment, composition, and growth. Students assess fundamentals of forest stand development and dynamics and use critical thinking to propose forest stewardship techniques to satisfy a range of possible objectives (biological, economic, and social).

Enrollment Requirement: ENGL 128, NATRS 292 and 293 with grades of 2.0 or higher; and MATH& 146 with grade of 2.0 or higher or concurrent enrollment; and concurrent enrollment in NATRS 418; and instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe the most common silvicultural tools and practices and how to use them appropriately to meet management objectives.
- Explain growth and yield dynamics for forest stands under a variety of management regimes.
- Demonstrate the use and applicability of at least one growth model for making silviculture decisions.
- Evaluate various silvicultural activities for biologic, economic and social soundness.

Program Outcomes

- Attain a job in the Natural Resources field.
- Manage Forestland and Resources to attain positive outcomes.

- Demonstrate effective written and verbal communications between industry partners and cooperators.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 494 - Capstone in Natural Resources Proposal

Credits: 1

Communicate within the natural resources community in a hands-on application where they synthesize knowledge and skills to create or construct a desired project outcome for a forestry-related project. Produce projects individually or in a team that will be carried out to completion in subsequent classes.

Enrollment Requirement: Instructor consent.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Synthesize cumulative knowledge and skills to develop desired project outcome(s).
- Work with a sponsoring entity to develop a complete project proposal.
- Explain their proposal and process to all stakeholders.

Program Outcomes

- Demonstrate knowledge and develop skills applying current laws, policies and regulations governing forest land operations and land management as well as the social and political effects of natural resource management including harvest, road construction and public use.

- Demonstrate the ability to evaluate forest resource conditions, including forest health, invasive species and past management to form and carry out prescription to meet landowner objectives in a variety of forest conditions.
- Demonstrate the knowledge of ecological processes and principles and the effects of management on forest land resources.
- Demonstrate the expertise to collect, analyze and evaluate field data using current technology and equipment through scientific and land management processes.
- Integrate geospatial workflows for problem-solving and analysis related to natural resources management through implementation of current GIS software and tools.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 495 - Capstone in Natural Resources Field Work

Credits: 2

Conduct field work and other associated tasks in connection with capstone project proposals by working with a sponsoring organization. Students are given the opportunity to utilize, synthesis and expand knowledge and expertise in key areas of interest to them through their capstone work.

Enrollment Requirement: NATRS 494 with a grade of 2.0 or higher or concurrent enrollment; and instructor consent.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Conduct field work and other necessary tasks in connection with their capstone project proposal by working with a sponsoring organization.

- Expand their natural resource and interpersonal skills through the capstone process.
- Gain additional knowledge and experience in key areas associated with the capstone project.

Program Outcomes

- Demonstrate knowledge and develop skills applying current laws, policies and regulations governing forest land operations and land management as well as the social and political effects of natural resource management including harvest, road construction and public use.
- Demonstrate the ability to evaluate forest resource conditions, including forest health, invasive species and past management to form and carry out prescription to meet landowner objectives in a variety of forest conditions.
- Demonstrate the knowledge of ecological processes and principles and the effects of management on forest land resources.
- Demonstrate the expertise to collect, analyze and evaluate field data using current technology and equipment through scientific and land management processes.
- Integrate geospatial workflows for problem-solving and analysis related to natural resources management through implementation of current GIS software and tools.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NATRS 496 - Capstone in Natural Resources Delivery

Credits: 2

Finalize all necessary steps to complete all deliverables including making a presentation of the project to the sponsoring organization. Final field work, data analysis, meetings, evaluations, writing and other necessary tasks are finished.

Enrollment Requirement: NATRS 494 and 495 with grades of 2.0 or higher or

concurrent enrollment; and instructor consent.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Articulate the results of their work product(s) to supervisors and other stakeholders.
- Deliver a completed use-able project of their own creation to the sponsoring organization.
- Assess and evaluate their skills and abilities in a natural resource field.
- Assess and evaluate their personal character and knowledge growth.

Program Outcomes

- Demonstrate knowledge and develop skills applying current laws, policies and regulations governing forest land operations and land management as well as the social and political effects of natural resource management including harvest, road construction and public use.
- Demonstrate the ability to evaluate forest resource conditions, including forest health, invasive species and past management to form and carry out prescription to meet landowner objectives in a variety of forest conditions.
- Demonstrate the knowledge of ecological processes and principles and the effects of management on forest land resources.
- Demonstrate the expertise to collect, analyze and evaluate field data using current technology and equipment through scientific and land management processes.
- Integrate geospatial workflows for problem-solving and analysis related to natural resources management through implementation of current GIS software and tools.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

Natural Science

N SCI 194 - Special Topics-Natural Science

Credits: 1-5

Offers non-lab science subject matter that is not part of the regular curriculum. Content varies from course to course.

Course Outcomes:

Students who successfully complete this class will be able to:

- Course outcomes to be determined by instructor based on selected course topic(s).

Nursing

INPNUR 102 - Internationally Educated LPN Theory

Credits: 6

Designed to update internationally educated practical nurses on the foundational theories and evidence-based practices essential to meet Washington State's licensure requirements. Course content covers the nursing process, pharmacology, and the evolving role of the practical nurse within today's healthcare system. Topics include legal expectations, the Washington Nurse Practice Act, and practical nursing ethics. The course will integrate physical, biological, and social sciences to enhance understanding of nursing care across diverse cultural, ethnic, and socioeconomic backgrounds. Participants will build on their previous nursing knowledge to gain a comprehensive understanding of nursing fundamentals, medical-surgical care, and mental health nursing across the lifespan.

Enrollment Requirement: Application and approval **Recommended:** ENGL& 101 - English Composition I

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate safe nursing care, using the nursing process clinical judgment, evidence-based practice, and principles of pharmacology to clients across the lifespan.
- Incorporate the legal and ethical framework for practical nursing practice in Washington. Demonstrate effective communication, observation, and documentation skills necessary for patient care.
- Integrate legal, ethical, social determinants of health, cultural and ethnic diversity considerations when providing care for diverse clients across the lifespan.

Program Outcomes

- Effectively utilize the nursing process and clinical judgement to deliver safe, patient-centered care across the lifespan and within diverse healthcare settings.

- Make informed, evidence-based decisions to manage complex patient care scenarios and optimize health outcomes.
- Incorporate legal and ethical guidelines within the scope of practice of Washington State Nurse Practice Act and the Scope of Practice Decision Tree.
- Demonstrate strong communication, reporting, and documentation skills to collaborate with interdisciplinary healthcare teams and interact with patients and families.
- Deliver patient-centered care that respects and addresses the diverse cultural, ethnic, and socioeconomic backgrounds of individuals and communities.
- Exhibit confidence and preparedness to transition into practice by applying nursing knowledge and skills in clinical experiences, emphasizing safety, efficiency, and quality of care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

INPNUR 103 - Internationally Educated LPN Laboratory

Credits: 2

This course provides focused, hands-on lab experience designed to help internationally educated practical nurses (IEPNs) acquire and refine essential nursing skills before entering clinical practice. Participants will engage in structured skill-building exercises covering foundational nursing procedures, including patient assessment, vital signs, medication administration, wound care, and infection control. This lab-based course emphasizes the development of technical proficiency, safety, and accuracy in nursing interventions. Participants will demonstrate effective communication and teamwork skills necessary for delivering patient-centered care. The course aims to build confidence and competence in practical nursing skills that will be applied in clinical settings. This is a pass/no credit course.

Enrollment Requirement: Application and Approval **Recommended:** ENGL& 101 -

Course Outcomes:

Students who successfully complete this class will be able to:

- Acquire and demonstrate proficiency in core practical nursing skills, including patient assessment, vital signs, and medication administration.
- Demonstrate safe and effective infection control techniques, including proper use of personal protective equipment (PPE).
- Develop the ability to communicate effectively with patients, families, and interdisciplinary healthcare teams.
- Apply critical thinking and problem-solving in simulated patient care situations.
- Build readiness for clinical practice by mastering the technical and interpersonal skills required for safe and ethical patient care.

Program Outcomes

- Effectively utilize the nursing process and clinical judgement to deliver safe, patient-centered care across the lifespan and within diverse healthcare settings.
- Make informed, evidence-based decisions to manage complex patient care scenarios and optimize health outcomes.
- Incorporate legal and ethical guidelines within the scope of practice of Washington State Nurse Practice Act and the Scope of Practice Decision Tree.
- Demonstrate strong communication, reporting, and documentation skills to collaborate with interdisciplinary healthcare teams and interact with patients and families.
- Deliver patient-centered care that respects and addresses the diverse cultural, ethnic, and socioeconomic backgrounds of individuals and communities.
- Exhibit confidence and preparedness to transition into practice by applying nursing knowledge and skills in clinical experiences, emphasizing safety, efficiency, and quality of care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

INPNUR 105 - Internationally Educated LPN Clinical

Credits: 4

This course is aimed at preparing internationally educated practical nurses for practical application of nursing knowledge and skills in diverse healthcare settings. Participants will gain hands-on experience in clinical decision-making, patient care, and the professional roles of practical nurses, with a focus on medical-surgical, mental health, and geriatric care. Clinical experiences and simulations will reflect care across the lifespan and emphasize cultural competence, patient safety, and collaboration within interdisciplinary teams. By the end of the course, participants will be prepared to transition into the practical nursing workforce in Washington State, understanding their professional identity and scope of practice. This is a pass/no credit course.

Enrollment Requirement: Application and Approval **Recommended:** ENGL& 101 - English Composition I

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply nursing knowledge and skills in a clinical environment.
- Utilize the nursing process and clinical judgement to manage patient care across different healthcare settings.
- Demonstrate safe and ethical nursing practices in accordance with Washington State laws. Effectively communicate and collaborate within an interdisciplinary healthcare team.
- Provide culturally informed care to diverse patient populations across the lifespan.

Program Outcomes

- Effectively utilize the nursing process and clinical judgement to deliver safe, patient-centered care across the lifespan and within diverse healthcare settings.
- Make informed, evidence-based decisions to manage complex patient care scenarios and optimize health outcomes.
- Incorporate legal and ethical guidelines within the scope of practice of Washington State Nurse Practice Act and the Scope of Practice Decision Tree.
- Demonstrate strong communication, reporting, and documentation skills to collaborate with interdisciplinary healthcare teams and interact with patients and families.
- Deliver patient-centered care that respects and addresses the diverse cultural, ethnic, and socioeconomic backgrounds of individuals and communities.
- Exhibit confidence and preparedness to transition into practice by applying nursing knowledge and skills in clinical experiences, emphasizing safety, efficiency, and quality of care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

INRNUR 102 - Internationally Educated RN Theory

Credits: 8

This course is designed for internationally educated registered nurses (IERNs) to gain a comprehensive understanding of the current concepts, standards, and expectations of nursing practice in the U.S. healthcare system. The course covers essential topics, including the nursing process, pharmacology, and professional nursing roles, with a focus on legal and ethical responsibilities under the Washington State Nurse Practice Act and the Uniform Disciplinary Act. Participants will explore the physical, biological, and social sciences necessary for nursing practice and apply these concepts to diverse patient populations across the lifespan. The course also addresses key areas of registered nursing practice, including medical-surgical, mental health, family, pediatric, community, and geriatric nursing.

Enrollment Requirement: Application and Approval **Recommended:** ENGL& 101 - English Composition I

Course Outcomes:

Students who successfully complete this class will be able to:

- Engage in clinical judgment that integrates evidence-based practice to ensure healthcare quality and safety and make client/relationship centered care decisions to diverse patients across the lifespan.
- Integrate pharmacological principles into safe and effective medication administration and patient care.
- Demonstrate effective communication, observation, and documentation skills necessary for patient care.

- Integrate legal, ethical, social determinants of health, cultural and ethnic diversity considerations when providing care for diverse clients across the lifespan.

Program Outcomes

- Effectively utilize the nursing process and clinical judgement to deliver safe, patient-centered care across the lifespan and within diverse healthcare settings.
- Make informed, evidence-based decisions to manage complex patient care scenarios and optimize health outcomes.
- Incorporate legal and ethical guidelines within the scope of practice of Washington State Nurse Practice Act and the Scope of Practice Decision Tree.
- Demonstrate strong communication, reporting, and documentation skills to collaborate with interdisciplinary healthcare teams and interact with patients and families.
- Deliver patient-centered care that respects and addresses the diverse cultural, ethnic, and socioeconomic backgrounds of individuals and communities.
- Exhibit confidence and preparedness to transition into practice by applying nursing knowledge and skills in clinical experiences, emphasizing safety, efficiency, and quality of care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

INRNUR 103 - Internationally Educated RN Lab

Credits: 2

This course provides internationally educated registered nurses (IERNs) with intensive hands-on practice to acquire and refine essential nursing skills necessary for clinical practice in the U.S. healthcare system. The course focuses on competency-based learning in key areas such as medical-surgical, mental health, obstetrical, family, pediatric, and geriatric nursing. Through hands-on skills practice and simulated patient care scenarios, participants will enhance their ability to apply advanced clinical skills,

critical thinking, and decision-making in a controlled environment. The lab-based approach emphasizes technical proficiency, patient safety, and adherence to Washington State's nursing standards. Participants will also strengthen their communication, teamwork, and patient care management skills in preparation for real-world clinical practice. This is a pass/no credit course.

Enrollment Requirement: Application and Approval **Recommended:** ENGL& 101 - English Composition I

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate competence in performing nursing skills integrating information from the arts and sciences and evidence-based practice, and applying clinical reasoning.
- Demonstrate safe, ethical nursing interventions with a focus on patient safety and adherence to scope of practice of a Registered Nurse and professional standards. Demonstrate effective communication and collaboration skills required for interdisciplinary teamwork and patient-centered care.
- Build readiness for clinical practice by mastering the technical and interpersonal skills necessary for registered nursing practice across diverse healthcare settings.

Program Outcomes

- Effectively utilize the nursing process and clinical judgement to deliver safe, patient-centered care across the lifespan and within diverse healthcare settings.
- Make informed, evidence-based decisions to manage complex patient care scenarios and optimize health outcomes.
- Incorporate legal and ethical guidelines within the scope of practice of Washington State Nurse Practice Act and the Scope of Practice Decision Tree.
- Demonstrate strong communication, reporting, and documentation skills to collaborate with interdisciplinary healthcare teams and interact with patients and families.
- Deliver patient-centered care that respects and addresses the diverse cultural, ethnic, and socioeconomic backgrounds of individuals and communities.
- Exhibit confidence and preparedness to transition into practice by applying nursing knowledge and skills in clinical experiences, emphasizing safety, efficiency, and quality of care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

INRNUR 105 - Internationally Educated RN Clinical

Credits: 5

This course provides internationally educated registered nurses (IERNs) with hands-on practice in applying advanced nursing knowledge and skills in the clinical environment. The course focuses on developing clinical competencies in medical-surgical, mental health, obstetrical, pediatric, family, and geriatric nursing. Through clinical experiences, participants will hone their clinical decision-making, problem-solving, and critical thinking abilities. Emphasis is placed on patient safety, professional ethics, and collaboration within interdisciplinary healthcare teams. Clinical experiences and simulations will reflect care across the lifespan, preparing participants to provide culturally informed, safe, and effective care in diverse healthcare settings.

Enrollment Requirement: Application and Approval **Recommended:** ENGL& 101 - English Composition I

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply the nursing process and clinical judgement to manage complex patient care scenarios in simulated environments, ensuring safe, evidence-based and ethical practices. Demonstrate clinical competency in a variety of clinical settings with diverse populations across the lifespan.
- Collaborate effectively with interdisciplinary healthcare teams in the management of patient care.
- Provide culturally informed care, addressing the diverse needs of patients and their families across the lifespan.

Program Outcomes

- Effectively utilize the nursing process and clinical judgement to deliver safe, patient-centered care across the lifespan and within diverse healthcare settings.
- Make informed, evidence-based decisions to manage complex patient care scenarios and optimize health outcomes.
- Incorporate legal and ethical guidelines within the scope of practice of Washington State Nurse Practice Act and the Scope of Practice Decision Tree.

- Demonstrate strong communication, reporting, and documentation skills to collaborate with interdisciplinary healthcare teams and interact with patients and families.
- Deliver patient-centered care that respects and addresses the diverse cultural, ethnic, and socioeconomic backgrounds of individuals and communities.
- Exhibit confidence and preparedness to transition into practice by applying nursing knowledge and skills in clinical experiences, emphasizing safety, efficiency, and quality of care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NCLEX 101 - NCLEX Preparation

Credits: 5

The course will provide a thorough review of nursing concepts, critical thinking skills, and test-taking strategies essential for success on the NCLEX-RN or NCLEX-PN exams. Through lectures, practice exams, and simulated clinical scenarios, students will reinforce their knowledge and build confidence in their ability to pass the exam. Emphasis will be placed on understanding the exam format, mastering content areas, and developing effective study habits.

Enrollment Requirement: Application and Admission

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate proficiency in key nursing concepts across the NCLEX content areas, including pharmacology, health promotion, and disease prevention.
- Apply critical thinking and clinical judgment skills to prioritize patient care and make informed decisions in simulated scenarios.

- Complete multiple NCLEX-style practice exams to assess knowledge retention and identify areas needing further review.
- Develop personalized study plans and effective study techniques to enhance retention of nursing knowledge and improve test performance.
- Implement strategies for managing test anxiety and stress, ensuring a calm and focused approach to exam day.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

RFPNUR 102 - Refresher LPN Theory

Credits: 6

This course is designed to provide a comprehensive review and update of current practical nursing concepts for LPNs re-entering the profession. Course content covers the nursing process, pharmacology, and the evolving role of the practical nurse within today's healthcare system. Topics include legal expectations, the Washington Nurse Practice Act, and practical nursing ethics. The course will integrate physical, biological, and social sciences to enhance understanding of nursing care across diverse cultural, ethnic, and socioeconomic backgrounds. Participants will build on their previous nursing knowledge to gain a comprehensive understanding of nursing fundamentals, medical-surgical care, and mental health nursing.

Enrollment Requirement: Application and Admission

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate safe nursing care, using the nursing process clinical judgment, evidence-based practice, and principles of pharmacology to clients across the lifespan.

- Incorporate the legal and ethical framework for practical nursing practice in Washington.
- Demonstrate effective communication, observation, and documentation skills necessary for patient care.
- Integrate legal, ethical, social determinants of health, cultural and ethnic diversity considerations when providing care for diverse clients across the lifespan.

Program Outcomes

- Effectively utilize the nursing process and clinical judgement to deliver safe, patient-centered care across the lifespan and within diverse healthcare settings.
- Make informed, evidence-based decisions to manage complex patient care scenarios and optimize health outcomes.
- Incorporate legal and ethical guidelines within the scope of practice of Washington State Nurse Practice Act and the Scope of Practice Decision Tree.
- Demonstrate strong communication, reporting, and documentation skills to collaborate with interdisciplinary healthcare teams and interact with patients and families.
- Deliver patient-centered care that respects and addresses the diverse cultural, ethnic, and socioeconomic backgrounds of individuals and communities.
- Exhibit confidence and preparedness to transition into practice by applying nursing knowledge and skills in clinical experiences, emphasizing safety, efficiency, and quality of care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

RFPNUR 103 - Refresher LPN Laboratory

Credits: 2

Designed to help LPNs re-entering the profession acquire and practice the essential

nursing skills needed before beginning clinical practice. Participants will engage in structured skill-building exercises covering foundational nursing procedures, including patient assessment, vital signs, medication administration, wound care, and infection control. This lab-based course emphasizes the development of technical proficiency, safety, and accuracy in nursing interventions. Participants will demonstrate effective communication and teamwork skills necessary for delivering patient-centered care. The course aims to build confidence and competence in practical nursing skills that will be applied in clinical settings. This is a pass/no credit course.

Enrollment Requirement: Application and Admission

Course Outcomes:

Students who successfully complete this class will be able to:

- Acquire and demonstrate proficiency in core practical nursing skills, including patient assessment, vital signs, and medication administration.
- Demonstrate safe and effective infection control techniques, including proper use of personal protective equipment (PPE).
- Develop the ability to communicate effectively with patients, families, and interdisciplinary healthcare teams.
- Apply critical thinking and problem-solving in simulated patient care situations.
- Build readiness for clinical practice by mastering the technical and interpersonal skills required for safe and ethical patient care.

Program Outcomes

- Effectively utilize the nursing process and clinical judgement to deliver safe, patient-centered care across the lifespan and within diverse healthcare settings.
- Make informed, evidence-based decisions to manage complex patient care scenarios and optimize health outcomes.
- Incorporate legal and ethical guidelines within the scope of practice of Washington State Nurse Practice Act and the Scope of Practice Decision Tree.
- Demonstrate strong communication, reporting, and documentation skills to collaborate with interdisciplinary healthcare teams and interact with patients and families.
- Deliver patient-centered care that respects and addresses the diverse cultural, ethnic, and socioeconomic backgrounds of individuals and communities.
- Exhibit confidence and preparedness to transition into practice by applying nursing knowledge and skills in clinical experiences, emphasizing safety, efficiency, and quality of care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as

necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

RFPNUR 105 - Refresher LPN Clinical

Credits: 4

This course provides practical nursing students with supervised clinical practice in real-world healthcare settings. Participants will gain hands-on experience in clinical decision-making, patient care, and the professional roles of practical nurses, with a focus on medical-surgical, mental health, and geriatric care. Clinical experiences and simulations will reflect care across the lifespan and emphasize cultural competence, patient safety, and collaboration within interdisciplinary teams. By the end of the course, participants will be prepared to transition into the practical nursing workforce in Washington State, understanding their professional identity and scope of practice. This is a pass/no credit course.

Enrollment Requirement: Application and Admission

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply nursing knowledge and skills in a clinical environment.
- Utilize the nursing process and clinical judgement to manage patient care across different healthcare settings.
- Demonstrate safe and ethical nursing practices in accordance with Washington State laws.
- Effectively communicate and collaborate within an interdisciplinary healthcare team.
- Provide culturally informed care to diverse patient populations across the lifespan.

Program Outcomes

- Effectively utilize the nursing process and clinical judgement to deliver safe, patient-centered care across the lifespan and within diverse healthcare settings.
- Make informed, evidence-based decisions to manage complex patient care scenarios and optimize health outcomes.
- Incorporate legal and ethical guidelines within the scope of practice of Washington State Nurse Practice Act and the Scope of Practice Decision Tree.

- Demonstrate strong communication, reporting, and documentation skills to collaborate with interdisciplinary healthcare teams and interact with patients and families.
- Deliver patient-centered care that respects and addresses the diverse cultural, ethnic, and socioeconomic backgrounds of individuals and communities.
- Exhibit confidence and preparedness to transition into practice by applying nursing knowledge and skills in clinical experiences, emphasizing safety, efficiency, and quality of care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

RFRNUR 102 - Refresher RN Theory

Credits: 8

This course provides an in-depth review of advanced nursing concepts in the participant's chosen specialty area, such as medical-surgical, pediatrics, obstetrics, psychiatric, acute care, intensive care, extended care, or community health. The course covers essential topics, including the nursing process, pharmacology, and professional nursing roles, with a focus on legal and ethical responsibilities under the Washington State Nurse Practice Act and the Uniform Disciplinary Act. Participants will explore the physical, biological, and social sciences necessary for nursing practice and apply these concepts to diverse patient populations across the lifespan. The course also addresses key areas of registered nursing practice, including medical-surgical, mental health, family, pediatric, community, and geriatric nursing.

Enrollment Requirement: Application and Admission.

Course Outcomes:

Students who successfully complete this class will be able to:

- Engage in clinical judgment that integrates evidence-based practice to ensure healthcare quality and safety and make client/relationship centered care decisions to diverse patients across the lifespan.
- Integrate pharmacological principles into safe and effective medication administration and patient care.
- Demonstrate effective communication, observation, and documentation skills necessary for patient care.
- Integrate legal, ethical, social determinants of health, cultural and ethnic diversity considerations when providing care for diverse clients across the lifespan.

Program Outcomes

- Effectively utilize the nursing process and clinical judgement to deliver safe, patient-centered care across the lifespan and within diverse healthcare settings.
- Make informed, evidence-based decisions to manage complex patient care scenarios and optimize health outcomes.
- Incorporate legal and ethical guidelines within the scope of practice of Washington State Nurse Practice Act and the Scope of Practice Decision Tree.
- Demonstrate strong communication, reporting, and documentation skills to collaborate with interdisciplinary healthcare teams and interact with patients and families.
- Deliver patient-centered care that respects and addresses the diverse cultural, ethnic, and socioeconomic backgrounds of individuals and communities.
- Exhibit confidence and preparedness to transition into practice by applying nursing knowledge and skills in clinical experiences, emphasizing safety, efficiency, and quality of care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

RFRNUR 103 - Refresher RN Laboratory

Credits: 2

This course focuses on skill acquisition and refinement for registered nurses preparing to re-enter specialty practice. The course focuses on competency-based learning in key areas such as medical-surgical, mental health, obstetrical, family, pediatric, and geriatric nursing. Through hands-on skills practice and simulated patient care scenarios, participants will enhance their ability to apply advanced clinical skills, critical thinking, and decision-making in a controlled environment. The lab-based approach emphasizes technical proficiency, patient safety, and adherence to Washington State's nursing standards. Participants will also strengthen their communication, teamwork, and patient care management skills in preparation for real-world clinical practice. This is a pass/no credit course.

Enrollment Requirement: Application and Admission.

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate competence in performing nursing skills integrating information from the arts and sciences and evidence-based practice, and applying clinical reasoning.
- Demonstrate safe, ethical nursing interventions with a focus on patient safety and adherence to scope of practice of a Registered Nurse and professional standards.
- Demonstrate effective communication and collaboration skills required for interdisciplinary teamwork and patient-centered care.
- Build readiness for clinical practice by mastering the technical and interpersonal skills necessary for registered nursing practice across diverse healthcare settings.

Program Outcomes

- Effectively utilize the nursing process and clinical judgement to deliver safe, patient-centered care across the lifespan and within diverse healthcare settings.
- Make informed, evidence-based decisions to manage complex patient care scenarios and optimize health outcomes.
- Incorporate legal and ethical guidelines within the scope of practice of Washington State Nurse Practice Act and the Scope of Practice Decision Tree.
- Demonstrate strong communication, reporting, and documentation skills to collaborate with interdisciplinary healthcare teams and interact with patients and families.
- Deliver patient-centered care that respects and addresses the diverse cultural, ethnic, and socioeconomic backgrounds of individuals and communities.
- Exhibit confidence and preparedness to transition into practice by applying nursing knowledge and skills in clinical experiences, emphasizing safety, efficiency, and quality of care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of

emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

RFRNUR 105 - Refresher RN Clinical

Credits: 5

This course provides registered nurses with hands-on experience in their chosen specialty area, such as medical-surgical, pediatrics, psychiatric, obstetrics, acute care, intensive care, or community health nursing. The course focuses on developing clinical competencies in medical-surgical, mental health, obstetrical, pediatric, family, and geriatric nursing. Through clinical experiences, participants will hone their clinical decision-making, problem-solving, and critical thinking abilities. Emphasis is placed on patient safety, professional ethics, and collaboration within interdisciplinary healthcare teams. Clinical experiences and simulations will reflect care across the lifespan, preparing participants to provide culturally informed, safe, and effective care in diverse healthcare settings. This is a pass/no credit course.

Enrollment Requirement: Application and Admission

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply the nursing process and clinical judgement to manage complex patient care scenarios in simulated environments, ensuring safe, evidence-based and ethical practices.
- Demonstrate clinical competency in a variety of clinical settings with diverse populations across the lifespan.
- Collaborate effectively with interdisciplinary healthcare teams in the management of patient care.
- Provide culturally informed care, addressing the diverse needs of patients and their families across the lifespan.

Program Outcomes

- Effectively utilize the nursing process and clinical judgement to deliver safe, patient-centered care across the lifespan and within diverse healthcare settings.
- Make informed, evidence-based decisions to manage complex patient care scenarios and optimize health outcomes.
- Incorporate legal and ethical guidelines within the scope of practice of Washington State Nurse Practice Act and the Scope of Practice Decision Tree.
- Demonstrate strong communication, reporting, and documentation skills to collaborate with interdisciplinary healthcare teams and interact with patients and families.
- Deliver patient-centered care that respects and addresses the diverse cultural, ethnic, and socioeconomic backgrounds of individuals and communities.
- Exhibit confidence and preparedness to transition into practice by applying nursing knowledge and skills in clinical experiences, emphasizing safety, efficiency, and quality of care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

Nursing, BSN

BNURSE 312 - Registered Nurse's Role in Holistic Health Assessment & Care

Credits: 3

Building on previous Licensed Practical Nurse (LPN) education and practice, this course examines the expanded role and responsibilities of the Registered Nurse in the assessment of health and the delivery of care using a holistic, person-centered approach. Also included is nursing theories, Quality and Safety Education for Nurses (QSEN), Social Determinants of Health, and Healthy People 2030.

Enrollment Requirement: Enrollment in the LPN to BSN Program.

Course Fee: \$75.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Synthesize knowledge from the arts and sciences to provide holistic, evidence-based nursing care to the client across the life span using critical reasoning.
- Analyze the role of the nurse, using clinical reasoning and evidence-based practice when caring for the client with a health disorder.
- Explain systems-based practice to enhance collaboration to coordinate and manage health care that promotes health and prevents illness.
- Describe the application of clinical judgment in the nursing care of a client with a health disorder.
- Examine the indications, implications, side effects, contraindications, patient teaching and safety precautions for clients receiving medication and non-pharmacological treatments related to course theory content.
- Evaluate the pathophysiology, clinical manifestations, diagnostic tests, medical and nursing management of health conditions experienced by clients across the lifespan.
- Implement health promotion and disease amelioration activities related to health conditions experienced across the lifespan taking into account relevant social determinants of health.
- Distinguish the RN role from the LPN role regarding culturally appropriate nursing care for clients across the life span including communication, legal, economic, sociocultural aspects of care.
- Explain various nursing and other theories that provide the foundation for current holistic, person-centered nursing care.

Program Outcomes

- Integrate knowledge from the arts and sciences to manage the care of clients across the life span using evidence-based practice and clinical reasoning to inform decision making.
- Provide holistic, person-centered, population health care to diverse populations including community and public health.
- Utilize research information to improve health of diverse clients across the life span.
- Minimize harm to clients through quality assurance and improvement.
- Use systems-based practice to coordinate and manage care to provide safe, quality, and equitable care.
- Integrate informatics and other healthcare technologies to inform decision making when managing and delivering safe, high-quality, and efficient health care in accordance with best practice and professional and regulatory standards.
- Demonstrate accountability for personal and professional development, including the professional identity of a bachelor of science prepared registered nurse, and lifelong learning.

- Apply leadership principles and quality improvement when intentionally collaborating with the interdisciplinary health care team to provide evidence-based, safe quality nursing care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

BNURSE 313 - Registered Nurse's Role in Holistic Health Assessment & Care Lab

Credits: 2

Provides opportunities to practice and demonstrate nursing skills associated with the Registered Nurse's Role in Holistic Health Assessment & Care in preparation for more advanced clinical experiences. Additionally, students complete a concept map and perform a head-to-toe assessment.

Enrollment Requirement: Enrollment in the LPN to BSN Program

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Perform holistic, culturally sensitive nursing care, including a focus on racial, socio-economic, sexual, gender, ethnicity, religious, social determinants of health, and spiritual needs of medical-surgical clients in a nursing lab environment.
- Demonstrate competence in performing nursing skills integrating information from the arts and sciences and evidence-based practice, and applying clinical reasoning.
- Integrate principles of safety, quality, collaboration, relationship-centered care, systems-based care when providing care to medical-surgical clients in the nursing lab environment.
- Communicate clearly to client and family, as well other health care team members to provide for continuity of care.

- Evaluate personal performance to identify strengths and weaknesses leading to a plan to address weaknesses.
- Demonstrate accurate calculation of medication dosage and other mathematical applications related to nursing care.
- Develop a concept map(s) using the clinical judgment and action model.

Program Outcomes

- Integrate knowledge from the arts and sciences to manage the care of clients across the life span using evidence-based practice and clinical reasoning to inform decision making.
- Provide holistic, person-centered, population health care to diverse populations including community and public health.
- Utilize research information to improve health of diverse clients across the life span.
- Minimize harm to clients through quality assurance and improvement.
- Use systems-based practice to coordinate and manage care to provide safe, quality, and equitable care.
- Integrate informatics and other healthcare technologies to inform decision making when managing and delivering safe, high-quality, and efficient health care in accordance with best practice and professional and regulatory standards.
- Demonstrate accountability for personal and professional development, including the professional identity of a bachelor of science prepared registered nurse, and lifelong learning.
- Apply leadership principles and quality improvement when intentionally collaborating with the interdisciplinary health care team to provide evidence-based, safe quality nursing care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

BNURSE 314 - Pathophysiology, Pharmacology, and Physical Assessment for LPN to RN

Credits: 5

Examines concepts of pathophysiology and physical assessment findings that are the basis for clinical judgment when providing holistic, high quality, person-centered nursing care, and related pharmacology.

Enrollment Requirement: Enrollment in the LPN to BSN Program

Course Fee: \$75.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Explain how pathophysiological changes impact human health across the lifespan.
- Distinguish methods of performing physical assessment to determine the body's response to health and illness.
- Describe physical assessment findings associated with pathophysiological changes for clients across the lifespan.
- Interpret the general principles of pharmacotherapeutics, pharmacokinetics, pharmacodynamics, and pharmacogenetics/genomics in wellness promotion and illness prevention and treatment.

Program Outcomes

- Integrate knowledge from the arts and sciences to manage the care of clients across the life span using evidence-based practice and clinical reasoning to inform decision making.
- Provide holistic, person-centered, population health care to diverse populations including community and public health.
- Utilize research information to improve health of diverse clients across the life span.
- Minimize harm to clients through quality assurance and improvement.
- Use systems-based practice to coordinate and manage care to provide safe, quality, and equitable care.
- Integrate informatics and other healthcare technologies to inform decision making when managing and delivering safe, high-quality, and efficient health care in accordance with best practice and professional and regulatory standards.
- Demonstrate accountability for personal and professional development, including the professional identity of a bachelor of science prepared registered nurse, and lifelong learning.
- Apply leadership principles and quality improvement when intentionally collaborating with the interdisciplinary health care team to provide evidence-based, safe quality nursing care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

BNURSE 317 - Registered Nurse's Role in Holistic Health Assessment & Care Simulation

Credits: 1

On campus and virtual simulation scenarios related to content in the Registered Nurse's Role in Holistic Health Assessment & Care will provide the student with the opportunity to apply clinical skills using the nursing process and demonstrate developing clinical judgment when giving culturally sensitive care in a safe simulation environment.

Enrollment Requirement: Enrollment in the LPN to BSN Program

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe patterns and deviations in subjective and objective data related to the care of clients who are in different stages of the life cycle in a simulation environment.
- Interpret data to determine appropriate nursing response within legal and ethical guidelines to address relevant client data.
- Perform holistic, culturally sensitive nursing care, including a focus on racial, socio-economic, sexual, gender, ethnicity, religious, social determinants of health, and spiritual needs of a client in a simulation environment.

- Integrate principles of safety, quality, collaboration, person-centered care, systems-based care when providing care in a simulation environment.
- Demonstrate safe performance of nursing care in a simulation environment.
- Communicate clearly to client and family, as well other health care team members to provide for continuity of care.
- Evaluate personal performance to identify strengths and weaknesses leading to a plan to address weaknesses.

Program Outcomes

- Integrate knowledge from the arts and sciences to manage the care of clients across the life span using evidence-based practice and clinical reasoning to inform decision making.
- Provide holistic, person-centered, population health care to diverse populations including community and public health.
- Utilize research information to improve health of diverse clients across the life span.
- Minimize harm to clients through quality assurance and improvement.
- Use systems-based practice to coordinate and manage care to provide safe, quality, and equitable care.
- Integrate informatics and other healthcare technologies to inform decision making when managing and delivering safe, high-quality, and efficient health care in accordance with best practice and professional and regulatory standards.
- Demonstrate accountability for personal and professional development, including the professional identity of a bachelor of science prepared registered nurse, and lifelong learning.
- Apply leadership principles and quality improvement when intentionally collaborating with the interdisciplinary health care team to provide evidence-based, safe quality nursing care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

BNURSE 332 - Applied Critical Thinking in Maternal-Child Nursing

Credits: 5

Concentrates on nursing care of the perinatal family and pediatric/family client experiencing wellness and/or acute and chronic conditions. Safe, evidence-based, holistic, person-centered topics related to gender-based health throughout the lifespan will be examined.

Enrollment Requirement: Enrollment in the LPN to BSN Program

Course Fee: \$75.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Synthesize knowledge from the arts and sciences to provide nursing care to the reproductive family during antepartum, intrapartum, and postpartum phases as well as the care of the pediatric client/family.
- Analyze the role of the nurse, using clinical reasoning, evidence-based practice, and family centered care when caring for the pediatric and reproductive family with medical-surgical, mental, and cognitive conditions.
- Explain systems-based practice to enhance collaboration to coordinate and manage health care for the reproductive family / pediatric client/family that promotes health and prevents illness.
- Describe the application of clinical judgment in the nursing care for a reproductive family / pediatric client/family.
- Examine the indications, implications, side effects, contraindications, patient teaching and safety precautions for clients receiving medication and non-pharmacological treatments related to course theory content.
- Evaluate the pathophysiology, clinical manifestations, diagnostic tests, medical and nursing management of conditions experienced by the reproductive family / pediatric client/family.
- Implement health promotion activities and hazard prevention with the client/family/caregiver related to the common medical surgical, mental, and cognitive conditions experienced by pediatric and reproductive/newborn clients, taking into account relevant social determinants of health.
- Apply growth and development theories to enhance effective communication, patient education, and advocacy for the perinatal family and pediatric client/family.
- Describe nutritional requirements for patients to support health and growth and development across the lifespan.

Program Outcomes

- Integrate knowledge from the arts and sciences to manage the care of clients across the life span using evidence-based practice and clinical reasoning to inform decision making.
- Provide holistic, person-centered, population health care to diverse populations including community and public health.
- Utilize research information to improve health of diverse clients across the life span.
- Minimize harm to clients through quality assurance and improvement.
- Use systems-based practice to coordinate and manage care to provide safe, quality, and equitable care.
- Integrate informatics and other healthcare technologies to inform decision making when managing and delivering safe, high-quality, and efficient health care in accordance with best practice and professional and regulatory standards.
- Demonstrate accountability for personal and professional development, including the professional identity of a bachelor of science prepared registered nurse, and lifelong learning.
- Apply leadership principles and quality improvement when intentionally collaborating with the interdisciplinary health care team to provide evidence-based, safe quality nursing care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

BNURSE 333 - Maternal/Child Nursing Lab

Credits: 1

Addresses perinatal and pediatric related nursing skills and their application in the clinical setting using clinical judgment.

Enrollment Requirement: Enrollment in the LPN to BSN Program

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Perform holistic, culturally sensitive nursing care, including a focus on racial, socio-economic, sexual, gender, ethnicity, religious, social determinants of health, and spiritual needs of a reproductive family / pediatric client/family in a nursing lab environment.
- Demonstrate competence in performing nursing skills integrating information from the arts and sciences and evidence-based practice, and applying clinical reasoning to pediatric and childbearing family nursing skills.
- Integrate principles of safety, quality, collaboration, relationship-centered care, systems-based care when providing care to pediatric and childbearing family in the nursing lab environment.
- Communicate clearly to client and family, as well other health care team members to provide for continuity of care.
- Demonstrate accurate calculation of medication dosage and other mathematical applications related to nursing care.
- Evaluate personal performance to identify strengths and weaknesses leading to a plan to address weaknesses.

Program Outcomes

- Integrate knowledge from the arts and sciences to manage the care of clients across the life span using evidence-based practice and clinical reasoning to inform decision making.
- Provide holistic, person-centered, population health care to diverse populations including community and public health.
- Utilize research information to improve health of diverse clients across the life span.
- Minimize harm to clients through quality assurance and improvement.
- Use systems-based practice to coordinate and manage care to provide safe, quality, and equitable care.
- Integrate informatics and other healthcare technologies to inform decision making when managing and delivering safe, high-quality, and efficient health care in accordance with best practice and professional and regulatory standards.
- Demonstrate accountability for personal and professional development, including the professional identity of a bachelor of science prepared registered nurse, and lifelong learning.
- Apply leadership principles and quality improvement when intentionally collaborating with the interdisciplinary health care team to provide evidence-based, safe quality nursing care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

BNURSE 335 - Maternal/Child Nursing Clinical

Credits: 2

Directed on the nursing care of pediatric and child-bearing families, implementing care that addresses developmental, ethnic, and cultural influences. Health promotion, wellness teaching needs, and perinatal care will be addressed. Emphasis placed on application of developmental theory when providing nursing care with a pediatric population.

Enrollment Requirement: Enrollment in the LPN to BSN Program

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Utilize clinical judgment in providing holistic, evidence-based, person/family-centered care for a pediatric or childbearing family within legal and ethical standards of the profession.
- Demonstrate self and professional leadership when coordinating and managing safe, high-quality care in alignment with best practice and other regulatory standards for pediatric and/or childbearing families.
- Employ communication and therapeutic relationship skills that meet the developmental, cognitive, psychosocial, cultural, and physiological needs of diverse pediatric or childbearing families.
- Use informatics and other healthcare technologies to collaborate with other members of the healthcare team when managing efficient nursing care.
- Develop and implement teaching to a pediatric or childbearing family client.

- Develop a plan to meet own personal, professional, and educational goals related to the care of a pediatric or childbearing family.
- Reflect on clinical experiences related to QSEN competencies and progress on the program learning outcomes.

Program Outcomes

- Integrate knowledge from the arts and sciences to manage the care of clients across the life span using evidence-based practice and clinical reasoning to inform decision making.
- Provide holistic, person-centered, population health care to diverse populations including community and public health.
- Utilize research information to improve health of diverse clients across the life span.
- Minimize harm to clients through quality assurance and improvement.
- Use systems-based practice to coordinate and manage care to provide safe, quality, and equitable care.
- Integrate informatics and other healthcare technologies to inform decision making when managing and delivering safe, high-quality, and efficient health care in accordance with best practice and professional and regulatory standards.
- Demonstrate accountability for personal and professional development, including the professional identity of a bachelor of science prepared registered nurse, and lifelong learning.
- Apply leadership principles and quality improvement when intentionally collaborating with the interdisciplinary health care team to provide evidence-based, safe quality nursing care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

BNURSE 337 - Maternal/Child Nursing Simulation

Credits: 1

On campus and virtual simulation scenarios related to content in Applied Critical Thinking in Maternal-Child Nursing will provide the student with the opportunity to apply clinical skills using the nursing process, and demonstrate clinical judgment when giving culturally sensitive care in a safe simulation environment.

Enrollment Requirement: Enrollment in the LPN to BSN Program

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe patterns and deviations in subjective and objective data related to the care of perinatal family / pediatric clients who are in different stages of the life cycle in a simulation environment.
- Interpret data to determine appropriate nursing response within legal and ethical guidelines to address relevant perinatal family / pediatric client/family data.
- Perform holistic, culturally sensitive nursing care, including a focus on racial, socio-economic, sexual, gender, ethnicity, religious, social determinants of health, and spiritual needs of a perinatal family / pediatric client/family in a simulation environment.
- Integrate principles of safety, quality, collaboration, person-centered care, family-centered care, systems-based care when providing care in a simulation environment.
- Demonstrate safe performance of nursing care in a simulation environment.
- Communicate clearly to a perinatal family / pediatric client and family, as well other health care team members to provide for continuity of care.
- Evaluate personal performance to identify strengths and weaknesses leading to a plan to address weaknesses.

Program Outcomes

- Integrate knowledge from the arts and sciences to manage the care of clients across the life span using evidence-based practice and clinical reasoning to inform decision making.
- Provide holistic, person-centered, population health care to diverse populations including community and public health.
- Utilize research information to improve health of diverse clients across the life span.
- Minimize harm to clients through quality assurance and improvement.
- Use systems-based practice to coordinate and manage care to provide safe, quality, and equitable care.
- Integrate informatics and other healthcare technologies to inform decision making when managing and delivering safe, high-quality, and efficient health care in accordance with best practice and professional and regulatory standards.

- Demonstrate accountability for personal and professional development, including the professional identity of a bachelor of science prepared registered nurse, and lifelong learning.
- Apply leadership principles and quality improvement when intentionally collaborating with the interdisciplinary health care team to provide evidence-based, safe quality nursing care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

BNURSE 342 - Applied Critical Thinking in Advanced Med/Surg Nursing

Credits: 5

Focuses on the development of nursing competence in planning and managing care of individuals with complex alterations in health status. Stresses integration of physiological, pathophysiological, psychological, and pharmacological concepts as well as the role of the social determinants of health essential to professional nursing practice.

Enrollment Requirement: Enrollment in the LPN to BSN Program

Course Fee: \$75.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Synthesize knowledge from the arts and sciences to provide holistic nursing care to the medical surgical client across the life span.
- Analyze the role of the nurse, using clinical reasoning and evidence-based practice when caring for the client with complex medical surgical conditions experienced by clients across the lifespan.

- Explain systems-based practice to enhance collaboration to coordinate and manage medical surgical health care that promotes health and prevents illness.
- Describe the application of clinical judgment in the nursing care of a client with a medical-surgical disorder.
- Examine the indications, implications, side effects, contraindications, patient teaching and safety precautions for clients receiving medication and non-pharmacological treatments related to course theory content.
- Evaluate the pathophysiology, clinical manifestations, diagnostic tests, medical and nursing management of complex medical surgical conditions experienced by clients across the lifespan.
- Implement health promotion and disease amelioration activities related to complex medical surgical conditions experienced across the lifespan taking into account relevant social determinants of health.

Program Outcomes

- Integrate knowledge from the arts and sciences to manage the care of clients across the life span using evidence-based practice and clinical reasoning to inform decision making.
- Provide holistic, person-centered, population health care to diverse populations including community and public health.
- Utilize research information to improve health of diverse clients across the life span.
- Minimize harm to clients through quality assurance and improvement.
- Use systems-based practice to coordinate and manage care to provide safe, quality, and equitable care.
- Integrate informatics and other healthcare technologies to inform decision making when managing and delivering safe, high-quality, and efficient health care in accordance with best practice and professional and regulatory standards.
- Demonstrate accountability for personal and professional development, including the professional identity of a bachelor of science prepared registered nurse, and lifelong learning.
- Apply leadership principles and quality improvement when intentionally collaborating with the interdisciplinary health care team to provide evidence-based, safe quality nursing care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is

designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

BNURSE 343 - Advanced Med-Surg Nursing Lab

Credits: 1

Focuses on more advanced client care skills related to Applied Critical Thinking in Advanced Med-Surg Nursing content across the lifespan and their application in the clinical setting using clinical judgment.

Enrollment Requirement: Enrollment in the LPN to BSN Program

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Perform holistic, culturally sensitive nursing care, including a focus on racial, socio-economic, sexual, gender, ethnicity, religious, social determinants of health, and spiritual needs of a client in a nursing lab environment.
- Demonstrate competence in performing nursing skills integrating information from the arts and sciences and evidence-based practice, and applying clinical reasoning to med-surg nursing skills.
- Integrate principles of safety, quality, collaboration, relationship-centered care, systems-based care when providing care to med-surg clients in the nursing lab environment.
- Communicate clearly to client and family, as well other health care team members to provide for continuity of care.
- Demonstrate accurate calculation of medication dosage and other mathematical applications related to nursing care.
- Evaluate personal performance to identify strengths and weaknesses leading to a plan to address weaknesses.

Program Outcomes

- Integrate knowledge from the arts and sciences to manage the care of clients across the life span using evidence-based practice and clinical reasoning to inform decision making.
- Provide holistic, person-centered, population health care to diverse populations including community and public health.
- Utilize research information to improve health of diverse clients across the life span.

- Minimize harm to clients through quality assurance and improvement.
- Use systems-based practice to coordinate and manage care to provide safe, quality, and equitable care.
- Integrate informatics and other healthcare technologies to inform decision making when managing and delivering safe, high-quality, and efficient health care in accordance with best practice and professional and regulatory standards.
- Demonstrate accountability for personal and professional development, including the professional identity of a bachelor of science prepared registered nurse, and lifelong learning.
- Apply leadership principles and quality improvement when intentionally collaborating with the interdisciplinary health care team to provide evidence-based, safe quality nursing care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

BNURSE 345 - Advanced Med-Surg Nursing Clinical

Credits: 2

Focuses on the professional role of the nurse utilizing clinical judgment and implementation of evidence-based nursing care for clients with medical-surgical health care needs.

Enrollment Requirement: Enrollment in the LPN to BSN Program

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Utilize clinical judgment in providing holistic, evidence-based, person/family-centered care of a medical-surgical client within legal and ethical standards of the profession.
- Demonstrate self and professional leadership when coordinating and managing safe, high-quality care in alignment with best practice and other regulatory standards for medical-surgical clients.
- Employ communication and therapeutic relationship skills that meet the developmental, cognitive, psychosocial, cultural, and physiological needs of diverse medical-surgical clients.
- Use informatics and other healthcare technologies to collaborate with other members of the healthcare team when managing efficient nursing care.
- Develop and implement teaching to a medical-surgical client.
- Develop a plan to meet their own personal, professional, and educational goals related to the care of a medical-surgical client.
- Reflect on clinical experiences related to QSEN competencies and progress on the program learning outcomes.

Program Outcomes

- Integrate knowledge from the arts and sciences to manage the care of clients across the life span using evidence-based practice and clinical reasoning to inform decision making.
- Provide holistic, person-centered, population health care to diverse populations including community and public health.
- Utilize research information to improve health of diverse clients across the life span.
- Minimize harm to clients through quality assurance and improvement.
- Use systems-based practice to coordinate and manage care to provide safe, quality, and equitable care.
- Integrate informatics and other healthcare technologies to inform decision making when managing and delivering safe, high-quality, and efficient health care in accordance with best practice and professional and regulatory standards.
- Demonstrate accountability for personal and professional development, including the professional identity of a bachelor of science prepared registered nurse, and lifelong learning.
- Apply leadership principles and quality improvement when intentionally collaborating with the interdisciplinary health care team to provide evidence-based, safe quality nursing care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

BNURSE 347 - Advanced Med-Surg Nursing Simulation

Credits: 1

On campus and virtual simulation scenarios related to content in Applied Critical Thinking in Advanced Med-Surg Nursing will provide the student with the opportunity to apply clinical skills using the nursing process, and demonstrate clinical judgment when giving culturally sensitive care in a safe simulation environment.

Enrollment Requirement: Enrollment in the LPN to BSN Program

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe patterns and deviations in subjective and objective data related to the care of med-surg clients who are in different stages of the life cycle in a simulation environment.
- Interpret data to determine appropriate nursing response within legal and ethical guidelines to address relevant med-surg client data.
- Perform holistic, culturally sensitive nursing care, including a focus on racial, socio-economic, sexual, gender, ethnicity, religious, social determinants of health, and spiritual needs of a med-surg client in a simulation environment.
- Integrate principles of safety, quality, collaboration, person-centered care, and systems-based care when providing care in a simulation environment.
- Demonstrate safe performance of nursing care in a simulation environment.
- Communicate clearly to a med-surg client and family, as well as other health care team members, to provide for continuity of care.
- Evaluate personal performance to identify strengths and weaknesses leading to a plan to address weaknesses.

Program Outcomes

- Integrate knowledge from the arts and sciences to manage the care of clients across the life span using evidence-based practice and clinical reasoning to inform decision making.

- Provide holistic, person-centered, population health care to diverse populations including community and public health.
- Utilize research information to improve health of diverse clients across the life span.
- Minimize harm to clients through quality assurance and improvement.
- Use systems-based practice to coordinate and manage care to provide safe, quality, and equitable care.
- Integrate informatics and other healthcare technologies to inform decision making when managing and delivering safe, high-quality, and efficient health care in accordance with best practice and professional and regulatory standards.
- Demonstrate accountability for personal and professional development, including the professional identity of a bachelor of science prepared registered nurse, and lifelong learning.
- Apply leadership principles and quality improvement when intentionally collaborating with the interdisciplinary health care team to provide evidence-based, safe quality nursing care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

BNURSE 362 - Applied Critical Thinking in Mental Health Nursing

Credits: 4

Focuses on the utilization of clinical judgment in providing evidence-based psychiatric/mental health nursing care. Includes the creation of a therapeutic milieu with therapeutic communication, principles of safety, pharmacological and alternative therapies to facilitate clinical decision making within cultural, ethical, and legal parameters for clients with psychiatric/mental health issues.

Enrollment Requirement: Enrollment in the LPN to BSN Program

Course Fee: \$75.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Synthesize knowledge from the art and sciences in the provision of holistic psychiatric-mental health care of individuals, families, and groups.
- Analyze selected nursing and psychological theories used in psychiatric/mental health care settings.
- Analyze the role of the nurse using clinical reasoning, evidence-based practice, and family centered care when caring for the client with a mental health disorder.
- Explain systems-based practice to enhance collaboration to coordinate and manage mental health care that promotes health and prevents illness.
- Describe the application of clinical judgment in the nursing care of a client with a psychiatric-mental health disorder.
- Examine the indications, implications, side effects, contraindications, patient teaching and safety precautions for clients receiving medication and non-pharmacological treatments related to course theory content.
- Evaluate the pathophysiology, clinical manifestations, diagnostic tests, medical and nursing management of mental health conditions experienced by clients across the lifespan.
- Implement health promotion and disease amelioration activities related to mental health conditions experienced across the lifespan taking into account relevant social determinants of health.
- Describe therapeutic communication techniques and effective interpersonal skills in the provision of psychiatric-mental health care of individuals, families, and groups.

Program Outcomes

- Integrate knowledge from the arts and sciences to manage the care of clients across the life span using evidence-based practice and clinical reasoning to inform decision making.
- Provide holistic, person-centered, population health care to diverse populations including community and public health.
- Utilize research information to improve health of diverse clients across the life span.
- Minimize harm to clients through quality assurance and improvement.
- Use systems-based practice to coordinate and manage care to provide safe, quality, and equitable care.
- Integrate informatics and other healthcare technologies to inform decision making when managing and delivering safe, high-quality, and efficient health care in accordance with best practice and professional and regulatory standards.
- Demonstrate accountability for personal and professional development, including the professional identity of a bachelor of science prepared registered nurse, and lifelong learning.

- Apply leadership principles and quality improvement when intentionally collaborating with the interdisciplinary health care team to provide evidence-based, safe quality nursing care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

BNURSE 365 - Mental Health Nursing Clinical

Credits: 1

Focuses on the professional role of the nurse in psychiatric/mental health nursing, utilizing clinical judgment, application of theories, and implementation of evidence-based nursing care for client with psychiatric/mental health issues while being responsive to cultural, ethical, and legal influences. Application of mental health promotion included.

Enrollment Requirement: Enrollment in the LPN to BSN Program

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Utilize clinical judgment in providing holistic, evidence-based, person/family-centered care for a client with a psychiatric / mental health disorder within legal and ethical standards of the profession.
- Demonstrate self and professional leadership when coordinating and managing safe, high-quality care in alignment with best practice for a client with a psychiatric / mental health disorder.

- Employ therapeutic communication and therapeutic relationship skills that meet the developmental, cognitive, psychosocial, cultural, and physiological needs of diverse client with a psychiatric / mental health disorder.
- Use informatics and other healthcare technologies to collaborate with other members of the healthcare team when managing efficient nursing care.
- Develop and implement teaching to a client with a psychiatric / mental health disorder.
- Develop a plan to meet own personal, professional, and educational goals related to the care of a client with a psychiatric / mental health disorder.
- Reflect on clinical experiences related to QSEN competencies and progress on the program learning outcomes.

Program Outcomes

- Integrate knowledge from the arts and sciences to manage the care of clients across the life span using evidence-based practice and clinical reasoning to inform decision making.
- Provide holistic, person-centered, population health care to diverse populations including community and public health.
- Utilize research information to improve health of diverse clients across the life span.
- Minimize harm to clients through quality assurance and improvement.
- Use systems-based practice to coordinate and manage care to provide safe, quality, and equitable care.
- Integrate informatics and other healthcare technologies to inform decision making when managing and delivering safe, high-quality, and efficient health care in accordance with best practice and professional and regulatory standards.
- Demonstrate accountability for personal and professional development, including the professional identity of a bachelor of science prepared registered nurse, and lifelong learning.
- Apply leadership principles and quality improvement when intentionally collaborating with the interdisciplinary health care team to provide evidence-based, safe quality nursing care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is

designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

BNURSE 367 - Mental Health Nursing Simulation

Credits: 1

On campus and virtual simulation scenarios related to content in Applied Critical Thinking in Mental Health Nursing will provide the student with the opportunity to apply clinical skills using the nursing process and demonstrate clinical judgment when giving culturally sensitive care in a safe simulation environment.

Enrollment Requirement: Enrollment in the LPN to BSN Program

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe patterns and deviations in subjective and objective data related to the care of clients who are in different stages of the life cycle in a simulation environment.
- Interpret data to determine appropriate nursing response within legal and ethical guidelines to address relevant client data.
- Perform holistic, culturally sensitive nursing care, including a focus on racial, socio-economic, sexual, gender, ethnicity, religious, social determinants of health, and spiritual needs of a client in a simulation environment.
- Integrate principles of safety, quality, collaboration, person-centered care, and systems-based care when providing care in a simulation environment.
- Demonstrate safe performance of nursing care in a simulation environment.
- Create a therapeutic milieu and utilize therapeutic communication with the client and family, as well as communicate clearly with other health care team members to provide for continuity of care.
- Evaluate personal performance to identify strengths and weaknesses leading to a plan to address weaknesses.

Program Outcomes

- Integrate knowledge from the arts and sciences to manage the care of clients across the life span using evidence-based practice and clinical reasoning to inform decision making.
- Provide holistic, person-centered, population health care to diverse populations including community and public health.
- Utilize research information to improve health of diverse clients across the life span.
- Minimize harm to clients through quality assurance and improvement.
- Use systems-based practice to coordinate and manage care to provide safe, quality, and equitable care.

- Integrate informatics and other healthcare technologies to inform decision making when managing and delivering safe, high-quality, and efficient health care in accordance with best practice and professional and regulatory standards.
- Demonstrate accountability for personal and professional development, including the professional identity of a bachelor of science prepared registered nurse, and lifelong learning.
- Apply leadership principles and quality improvement when intentionally collaborating with the interdisciplinary health care team to provide evidence-based, safe quality nursing care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

BNURSE 394 - Special Topics: Nursing

Credits: 3

Enable students to pursue areas of special interest in the nursing field such as EKG interpretation, phlebotomy and IV placement and emergency medicine. Topics are subject to change. Coop fee will vary depending on topic.

Enrollment Requirement: Enrollment in the LPN to BSN program.

Course Outcomes:

Course outcomes to be determined by instructor based on selected course topic(s).

Program Outcomes

- Integrate knowledge from the arts and sciences to manage the care of clients across the life span using evidence-based practice and clinical reasoning to inform decision making.
- Provide holistic, person-centered, population health care to diverse populations including community and public health.

- Utilize research information to improve health of diverse clients across the life span.
- Minimize harm to clients through quality assurance and improvement.
- Use systems-based practice to coordinate and manage care to provide safe, quality, and equitable care.
- Integrate informatics and other healthcare technologies to inform decision making when managing and delivering safe, high-quality, and efficient health care in accordance with best practice and professional and regulatory standards.
- Demonstrate accountability for personal and professional development, including the professional identity of a bachelor-of-science prepared registered nurse, and lifelong learning.
- Apply leadership principles and quality improvement when intentionally collaborating with the interdisciplinary health care team to provide evidence-based, safe quality nursing care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

BNURSE 412 - Nursing Ethics

Credits: 3

Focuses on the synthesis of ethical concepts required for sound clinical judgment in clinical practice across the life span. Ethical theories, values and moral development, ethical decision making, and self-determination are covered as well as the role of the nurse related to ethics in research, disasters and global consciousness.

Enrollment Requirement: Enrollment in the LPN to BSN Program

Course Fee: \$75.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate the knowledge, skills, and attitudes that reflect critical thinking related to ethical decision making in order to provide person-centered care across the lifespan.
- Explain the role of the nurse to provide safe, high-quality holistic care when confronted with issues related to ethical issues.

- Examine professional and personal ethical values related to the provision of evidence-based and efficient nursing care.
- Evaluate the role of the nurse regarding the person's right for self-determination.
- Employ professional standards of the nurse when confronted with disasters and other global concerns.

Program Outcomes

- Integrate knowledge from the arts and sciences to manage the care of clients across the life span using evidence-based practice and clinical reasoning to inform decision making.
- Provide holistic, person-centered, population health care to diverse populations including community and public health.
- Utilize research information to improve health of diverse clients across the life span.
- Minimize harm to clients through quality assurance and improvement.
- Use systems-based practice to coordinate and manage care to provide safe, quality, and equitable care.
- Integrate informatics and other healthcare technologies to inform decision making when managing and delivering safe, high-quality, and efficient health care in accordance with best practice and professional and regulatory standards.
- Demonstrate accountability for personal and professional development, including the professional identity of a bachelor of science prepared registered nurse, and lifelong learning.
- Apply leadership principles and quality improvement when intentionally collaborating with the interdisciplinary health care team to provide evidence-based, safe quality nursing care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

BNURSE 422 - Academic Inquiry and Research in Nursing Science

Credits: 3

Examines the natures of inquiry and research, language, and processes with content focused on how research contributes to the development of knowledge, improves nursing practice, and enhances professional development and accountability. Students will critically appraise and interpret research studies including an exploration of legal and ethical issues and bias.

Enrollment Requirement: Enrollment in the LPN to BSN Program

Course Fee: \$75.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Utilize the process of inquiry to evaluate and augment current and emerging nursing practices.
- Systematically appraise nursing theory, practice, and research.
- Discuss legal and ethical issues related to research including the role in protecting human subjects in research.
- Describe major sources of bias when appraising research.

Program Outcomes

- Integrate knowledge from the arts and sciences to manage the care of clients across the life span using evidence-based practice and clinical reasoning to inform decision making.
- Provide holistic, person-centered, population health care to diverse populations including community and public health.
- Utilize research information to improve health of diverse clients across the life span.
- Minimize harm to clients through quality assurance and improvement.
- Use systems-based practice to coordinate and manage care to provide safe, quality, and equitable care.
- Integrate informatics and other healthcare technologies to inform decision making when managing and delivering safe, high-quality, and efficient health care in accordance with best practice and professional and regulatory standards.
- Demonstrate accountability for personal and professional development, including the professional identity of a bachelor of science prepared registered nurse, and lifelong learning.
- Apply leadership principles and quality improvement when intentionally collaborating with the interdisciplinary health care team to provide evidence-based, safe quality nursing care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of

emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

BNURSE 424 - Evidence-Based Practice in Nursing

Credits: 3

Focuses on the impact of evidence-based practice on patient safety. Introduction of the PICOT process, appraising knowledge, implementing evidence-based practice, methods to sustain change, and dissemination of evidence are included.

Enrollment Requirement: Enrollment in the LPN to BSN Program

Course Fee: \$75.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe the steps of the evidence-based practice process.
- Utilize the Population/Patient Problem, Intervention, Comparison, Outcome, Time (PICOT) format for asking clinical questions.
- Critically appraise evidence for decision making related to clinical practice.
- Describe the factors related to implementation of evidence in clinical practice.
- Disseminate information of evidence-based practice implementation.
- Discuss measures to facilitate the generation of evidence.

Program Outcomes

- Integrate knowledge from the arts and sciences to manage the care of clients across the life span using evidence-based practice and clinical reasoning to inform decision making.

- Provide holistic, person-centered, population health care to diverse populations including community and public health.
- Utilize research information to improve health of diverse clients across the life span.
- Minimize harm to clients through quality assurance and improvement.
- Use systems-based practice to coordinate and manage care to provide safe, quality, and equitable care.
- Integrate informatics and other healthcare technologies to inform decision making when managing and delivering safe, high-quality, and efficient health care in accordance with best practice and professional and regulatory standards.
- Demonstrate accountability for personal and professional development, including the professional identity of a bachelor of science prepared registered nurse, and lifelong learning.
- Apply leadership principles and quality improvement when intentionally collaborating with the interdisciplinary health care team to provide evidence-based, safe quality nursing care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

BNURSE 426 - Reflective Practice/Portfolio 1

Credits: 1

Students begin the development of a professional nursing portfolio to provide evidence of competencies, certifications, and continuing education. Introduces reflection on nursing practice, reflection related to Quality and Safety Education for Nurses (QSEN) Competencies, and reflection related to self-progress toward the Program Learning Outcomes.

Enrollment Requirement: Enrollment in the LPN to BSN Program

Course Outcomes:

Students who successfully complete this class will be able to:

- Begin a reflective practice portfolio.
- Perform reflective journaling related to personal work experiences, and Quality and Safety Education for Nurses (QSEN).
- Describe personal and professional development as a BSN student with evidence of integrating knowledge of the arts and sciences, evidence-based practice, clinical reasoning, holistic person-centered care, use of research information, quality assurance/improvement, systems-based practice, use of other healthcare technologies, and leadership.

Program Outcomes

- Integrate knowledge from the arts and sciences to manage the care of clients across the life span using evidence-based practice and clinical reasoning to inform decision making.
- Provide holistic, person-centered, population health care to diverse populations including community and public health.
- Utilize research information to improve health of diverse clients across the life span.
- Minimize harm to clients through quality assurance and improvement.
- Use systems-based practice to coordinate and manage care to provide safe, quality, and equitable care.
- Integrate informatics and other healthcare technologies to inform decision making when managing and delivering safe, high-quality, and efficient health care in accordance with best practice and professional and regulatory standards.
- Demonstrate accountability for personal and professional development, including the professional identity of a bachelor of science prepared registered nurse, and lifelong learning.
- Apply leadership principles and quality improvement when intentionally collaborating with the interdisciplinary health care team to provide evidence-based, safe quality nursing care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

BNURSE 428 - Patient Safety & Quality Improvement

Credits: 3

Focuses on the process of continuous quality improvement to improve patient safety by examining the components of quality improvement and utilizing methods to measure and analyze care quality.

Enrollment Requirement: Enrollment in the LPN to BSN Program

Course Fee: \$75.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe the impact of quality improvement on patient safety.
- Describe legal, ethical, and regulatory standards influencing quality improvement.
- Utilize methods to measure and analyze care quality.
- Develop and present a quality improvement project.

Program Outcomes

- Integrate knowledge from the arts and sciences to manage the care of clients across the life span using evidence-based practice and clinical reasoning to inform decision making.
- Provide holistic, person-centered, population health care to diverse populations including community and public health.
- Utilize research information to improve health of diverse clients across the life span.
- Minimize harm to clients through quality assurance and improvement.
- Use systems-based practice to coordinate and manage care to provide safe, quality, and equitable care.
- Integrate informatics and other healthcare technologies to inform decision making when managing and delivering safe, high-quality, and efficient health care in accordance with best practice and professional and regulatory standards.
- Demonstrate accountability for personal and professional development, including the professional identity of a bachelor of science prepared registered nurse, and lifelong learning.
- Apply leadership principles and quality improvement when intentionally collaborating with the interdisciplinary health care team to provide evidence-based, safe quality nursing care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

BNURSE 452 - Population Health Nursing Practice

Credits: 5

Examines holistic nursing care to diverse clients across the lifespan in the community and public health settings using an evidence-based and systems-based process to improve health. Population healthcare trends are included.

Enrollment Requirement: Enrollment in the LPN to BSN Program

Course Fee: \$75.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Discuss basic knowledge of healthcare policy, finance, and regulatory environments that affect the health of diverse populations.
- Examine the impact of socio-cultural, demographic, geographic, and economic variables on population health.
- Utilize information technologies to assess available public health data and best available evidence to identify population health risks, health promotion, and risk reduction interventions.
- Describe the impact of the social determinants of health on diverse populations to identify benefits of interventions to minimize harm at the local, national, and global level.
- Describe the role of the nurse in delivering safe, holistic population-based care to clients at risk.

Program Outcomes

- Integrate knowledge from the arts and sciences to manage the care of clients across the life span using evidence-based practice and clinical reasoning to inform decision making.
- Provide holistic, person-centered, population health care to diverse populations including community and public health.
- Utilize research information to improve health of diverse clients across the life span.
- Minimize harm to clients through quality assurance and improvement.
- Use systems-based practice to coordinate and manage care to provide safe, quality, and equitable care.
- Integrate informatics and other healthcare technologies to inform decision making when managing and delivering safe, high-quality, and efficient health care in accordance with best practice and professional and regulatory standards.
- Demonstrate accountability for personal and professional development, including the professional identity of a bachelor of science prepared registered nurse, and lifelong learning.
- Apply leadership principles and quality improvement when intentionally collaborating with the interdisciplinary health care team to provide evidence-based, safe quality nursing care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

BNURSE 454 - Nursing Leadership & Healthcare Policy

Credits: 5

Examines the healthcare policy making process, the influence of political and economic forces, and need for nursing activism in the development of policy affecting health and wellness. Also included is an exploration of organizational strategies, theories of

leadership and management, societal trends, and implications for quality nursing practice.

Enrollment Requirement: Enrollment in the LPN to BSN Program

Course Fee: \$75.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Analyze the impact of social and health care policies on social disparities in health.
- Evaluate the process of problem identification through policy implementation, regulation, and evaluation.
- Analyze the organizational, financial, and socio-political aspects of clinical health services and public health systems.
- Evaluate the impact of the nurse related to public policy affecting healthcare and strategies of advocacy.
- Integrate theory and research in the formulation, implementation, and evaluation of nursing leadership / management actions to create a culture of evidence-based quality and safety into one's own practice and within healthcare systems.
- Analyze methods to enhance team collaboration.
- Evaluate the skills of the nurse leader related to the various roles of the position.

Program Outcomes

- Integrate knowledge from the arts and sciences to manage the care of clients across the life span using evidence-based practice and clinical reasoning to inform decision making.
- Provide holistic, person-centered, population health care to diverse populations including community and public health.
- Utilize research information to improve health of diverse clients across the life span.
- Minimize harm to clients through quality assurance and improvement.
- Use systems-based practice to coordinate and manage care to provide safe, quality, and equitable care.
- Integrate informatics and other healthcare technologies to inform decision making when managing and delivering safe, high-quality, and efficient health care in accordance with best practice and professional and regulatory standards.
- Demonstrate accountability for personal and professional development, including the professional identity of a bachelor of science prepared registered nurse, and lifelong learning.
- Apply leadership principles and quality improvement when intentionally collaborating with the interdisciplinary health care team to provide evidence-based, safe quality nursing care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

BNURSE 455 - Population Health Nursing Clinical

Credits: 2

Focuses on the professional role of the nurse in the community setting, utilizing clinical judgment and implementation of evidence-based nursing care for clients with health education and other healthcare-related needs while being responsive to cultural, ethical, and legal influences.

Enrollment Requirement: Enrollment in the LPN to BSN Program

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Utilize clinical judgment in providing holistic, evidence-based, person-centered care for a client in the community, within legal and ethical standards of the profession.
- Demonstrate self and professional leadership when coordinating and managing safe, high-quality care in alignment with best practice and other regulatory standards for clients in the community.
- Employ communication and therapeutic relationship skills that meet the developmental, cognitive, psychosocial, cultural, and physiological needs of diverse clients in the community.
- Use informatics and other healthcare technologies to collaborate with other members of the healthcare team when managing efficient nursing care.
- Develop and implement teaching to a client in the community.
- Develop a plan to meet their own personal, professional, and educational goals related to the care of a client in the community.

- Reflect on clinical experiences related to QSEN competencies and progress on the program learning outcomes.

Program Outcomes

- Integrate knowledge from the arts and sciences to manage the care of clients across the life span using evidence-based practice and clinical reasoning to inform decision making.
- Provide holistic, person-centered, population health care to diverse populations including community and public health.
- Utilize research information to improve health of diverse clients across the life span.
- Minimize harm to clients through quality assurance and improvement.
- Use systems-based practice to coordinate and manage care to provide safe, quality, and equitable care.
- Integrate informatics and other healthcare technologies to inform decision making when managing and delivering safe, high-quality, and efficient health care in accordance with best practice and professional and regulatory standards.
- Demonstrate accountability for personal and professional development, including the professional identity of a bachelor of science prepared registered nurse, and lifelong learning.
- Apply leadership principles and quality improvement when intentionally collaborating with the interdisciplinary health care team to provide evidence-based, safe quality nursing care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

BNURSE 462 - Nursing Informatics & Telehealth

Credits: 3

Focuses on informatics and telehealth within clinical practice to improve communication and support the delivery of quality health care. Healthcare trends will be included.

Enrollment Requirement: Enrollment in the LPN to BSN Program

Course Fee: \$75.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Evaluate the role of informatics in improving patient care outcomes and creating a safe care environment for a diverse patient population.
- Analyze current and emerging technologies to optimize safety, cost effectiveness, and health outcomes.
- Discuss legal, regulatory, professional, and financial issues related to telehealth.
- Describe the application of telehealth to support high-quality, efficient, and person-centered care.
- Employ informatics to teach patients about health promotion, disease prevention, and risk reduction.

Program Outcomes

- Integrate knowledge from the arts and sciences to manage the care of clients across the life span using evidence-based practice and clinical reasoning to inform decision making.
- Provide holistic, person-centered, population health care to diverse populations including community and public health.
- Utilize research information to improve health of diverse clients across the life span.
- Minimize harm to clients through quality assurance and improvement.
- Use systems-based practice to coordinate and manage care to provide safe, quality, and equitable care.
- Integrate informatics and other healthcare technologies to inform decision making when managing and delivering safe, high-quality, and efficient health care in accordance with best practice and professional and regulatory standards.
- Demonstrate accountability for personal and professional development, including the professional identity of a bachelor of science prepared registered nurse, and lifelong learning.
- Apply leadership principles and quality improvement when intentionally collaborating with the interdisciplinary health care team to provide evidence-based, safe quality nursing care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of

emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

BNURSE 464 - Nursing Care Coordination & Interprofessional Collaboration

Credits: 3

Examines the role of the RN in care coordination of person-centered care in collaboration with the client, families, caregivers, health care team, and third-party payors and services to provide timely, quality, cost-effective, holistic health care through a system-based approach.

Enrollment Requirement: Enrollment in the LPN to BSN Program

Course Fee: \$75.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe nursing care coordination and collaboration when providing holistic, person-centered care.
- Explain the role of the nurse in providing care coordination in a variety of settings.
- Discuss the competencies of a nursing care coordinator using a system-based approach.
- Describe effective collaborative approaches to align patient outcomes within the health care team and across health care settings.
- Describe the use of health information technology in care coordination.
- Identify ways to measure success with care coordination.
- Explain how reimbursement affects care coordination.
- Describe the different components of advance care planning.

Program Outcomes

- Integrate knowledge from the arts and sciences to manage the care of clients across the life span using evidence-based practice and clinical reasoning to inform decision making.
- Provide holistic, person-centered, population health care to diverse populations including community and public health.
- Utilize research information to improve health of diverse clients across the life span.
- Minimize harm to clients through quality assurance and improvement.
- Use systems-based practice to coordinate and manage care to provide safe, quality, and equitable care.
- Integrate informatics and other healthcare technologies to inform decision making when managing and delivering safe, high-quality, and efficient health care in accordance with best practice and professional and regulatory standards.
- Demonstrate accountability for personal and professional development, including the professional identity of a bachelor of science prepared registered nurse, and lifelong learning.
- Apply leadership principles and quality improvement when intentionally collaborating with the interdisciplinary health care team to provide evidence-based, safe quality nursing care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

BNURSE 472 - Transition to Nursing Practice - NCLEX Prep

Credits: 4

Focuses on the professional identity of a BSN-prepared RN, professional development, roles and leadership, and measures to obtain and maintain licensure as an RN. Also includes preparation for taking the NCLEX-RN licensure exam.

Enrollment Requirement: Enrollment in the LPN to BSN Program

Course Fee: \$75.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Discuss the role of the nurse caring for clients within legal and ethical guidelines related to coordination of care, safety and infection control, health promotion and maintenance, psychosocial integrity, basic care and comfort, parenteral therapies, medications, and reduction of risk potential.
- Identify the role of the nurse when caring for clients within legal and ethical guidelines with a disorder in the cardiovascular-hematologic, respiratory, neurosensory, gastrointestinal-biliary, genitourinary-renal- reproductive, endocrine, musculoskeletal, medical emergencies, and integumentary systems.
- Write a professional resume and cover letter for seeking employment as a BSN prepared RN.
- Compare professional nursing organizations.
- Describe methods of maintaining continued competency as an RN.

Program Outcomes

- Integrate knowledge from the arts and sciences to manage the care of clients across the life span using evidence-based practice and clinical reasoning to inform decision making.
- Provide holistic, person-centered, population health care to diverse populations including community and public health.
- Utilize research information to improve health of diverse clients across the life span.
- Minimize harm to clients through quality assurance and improvement.
- Use systems-based practice to coordinate and manage care to provide safe, quality, and equitable care.
- Integrate informatics and other healthcare technologies to inform decision making when managing and delivering safe, high-quality, and efficient health care in accordance with best practice and professional and regulatory standards.
- Demonstrate accountability for personal and professional development, including the professional identity of a bachelor of science prepared registered nurse, and lifelong learning.
- Apply leadership principles and quality improvement when intentionally collaborating with the interdisciplinary health care team to provide evidence-based, safe quality nursing care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of

emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

BNURSE 475 - Nursing Capstone Clinical

Credits: 4

Focuses on the integration of concepts from the arts, sciences, and previous nursing courses while caring for clients using evidence-based practice, clinical reasoning in the provision of person-centered, systems-based, high-quality health care in accordance with professional and regulatory standards. Students demonstrate accountability for personal and professional development while planning and implementing a quality improvement project.

Enrollment Requirement: Enrollment in the LPN to BSN Program

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Utilize clinical judgment in providing holistic, evidence-based, person/family-centered care of clients within legal and ethical standards of the profession.
- Demonstrate self and professional leadership when coordinating and managing safe, high-quality care in alignment with best practice and other regulatory standards for clients.
- Employ communication and therapeutic relationship skills that meet the developmental, cognitive, psychosocial, cultural, and physiological needs of diverse clients.
- Use informatics and other healthcare technologies to collaborate with other members of the healthcare team when managing efficient nursing care.
- Develop and implement a Capstone PICOT project.
- Develop a plan to meet their own personal, professional, and educational goals related to the care of a medical-surgical client.

- Reflect on clinical experiences related to QSEN competencies and progress on the program learning outcomes.

Program Outcomes

- Integrate knowledge from the arts and sciences to manage the care of clients across the life span using evidence-based practice and clinical reasoning to inform decision making.
- Provide holistic, person-centered, population health care to diverse populations including community and public health.
- Utilize research information to improve health of diverse clients across the life span.
- Minimize harm to clients through quality assurance and improvement.
- Use systems-based practice to coordinate and manage care to provide safe, quality, and equitable care.
- Integrate informatics and other healthcare technologies to inform decision making when managing and delivering safe, high-quality, and efficient health care in accordance with best practice and professional and regulatory standards.
- Demonstrate accountability for personal and professional development, including the professional identity of a bachelor of science prepared registered nurse, and lifelong learning.
- Apply leadership principles and quality improvement when intentionally collaborating with the interdisciplinary health care team to provide evidence-based, safe quality nursing care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

BNURSE 476 - Reflective Practice/Portfolio 2

Credits: 1

Provides an opportunity for self-analysis of personal and professional development toward being a BSN prepared RN and complete all components on the Reflective Practice/Portfolio. Students create a curriculum vitae for inclusion in the Reflective Practice/Portfolio.

Enrollment Requirement: Enrollment in the LPN to BSN Program

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe personal and professional development as a BSN student with evidence of integrating knowledge of the arts and sciences, evidence-based practice, clinical reasoning, holistic person-centered care, use of research information, quality assurance/improvement, systems-based practice, use of other healthcare technologies, and leadership.
- Complete a professional portfolio which includes reflections from each clinical course related to QSEN and personal progress toward program learning outcomes, professional memberships, professional education, required health records needed for professional practice, professional licenses, personal philosophy of nursing, professional references, recommendations and recognitions, and professional job descriptions with performance evaluations.
- Create a curriculum vitae.

Program Outcomes

- Integrate knowledge from the arts and sciences to manage the care of clients across the life span using evidence-based practice and clinical reasoning to inform decision making.
- Provide holistic, person-centered, population health care to diverse populations including community and public health.
- Utilize research information to improve health of diverse clients across the life span.
- Minimize harm to clients through quality assurance and improvement.
- Use systems-based practice to coordinate and manage care to provide safe, quality, and equitable care.
- Integrate informatics and other healthcare technologies to inform decision making when managing and delivering safe, high-quality, and efficient health care in accordance with best practice and professional and regulatory standards.
- Demonstrate accountability for personal and professional development, including the professional identity of a bachelor of science prepared registered nurse, and lifelong learning.
- Apply leadership principles and quality improvement when intentionally collaborating with the interdisciplinary health care team to provide evidence-based, safe quality nursing care.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

Nursing Assistant

NRS A 103 - Nurse Assistant Lab

Credits: 3

Students apply knowledge and develop the physical skills necessary to provide entry level nurse assistant care in the laboratory setting. Includes integrating communication and patient care skills, assisting with activities of daily living, practicing client rights and confidentiality, infection control and proper documentation in the health care setting. Students will engage in a variety of activities designed to enhance their ability to practice safe, culturally competent, patient-centered care while incorporating principles of restorative nursing. Previously NRS A 111.

Enrollment Requirement: Instructor permission.

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Practice safe, culturally competent, patient-centered care to clients.
- Incorporate principles and skills of restorative nursing in providing care.
- Identify behaviors that are respectful of client rights and promote client independence.
- Demonstrates the ability to work cooperatively as a member of a health care team, including the use of effective communication skills.
- Perform basic nursing skills accurately and safely while identifying and demonstrating procedures and techniques that prevent the spread of microorganisms.
- Demonstrate the ability to identify and use safety and emergency procedures.
- Practice within the legal/ethical scope of practice and responsibility of a nursing assistant.

Program Outcomes

- Define their role as a safe practitioner.
- Function on a team or within a group in a nurturing positive manner.
- Relate to people of all ages.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

NRS A 104 - Nurse Assistant Theory

Credits: 3

Students develop the concepts and knowledge necessary to provide safe, patient-centered, entry level nurse assistant care. This course emphasizes the integration of ethical considerations, effective communication strategies, legal obligations, and a commitment to patient advocacy within the scope of practice for nursing assistants. This course fosters the skills, knowledge, and attitudes essential for delivering high-quality and compassionate care in diverse healthcare settings. Students will emerge equipped with the theoretical understanding necessary to excel in clinical practice and contribute positively to the well-being of patients they serve. Previously NRS A 110.

Enrollment Requirement: Instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe the Nursing Assistant's roles and responsibilities regarding ethics, communication, legal obligations, and abuse laws.
- Describe and demonstrate professional communication in spoken and written form, as it relates to teamwork, HIPAA laws, charting, and patient/resident interactions.
- Demonstrate the ability to utilize medical devices for obtaining vital signs, transferring patients, and providing patient care, all while maintaining a safe environment.
- Describe functions of the body systems at an appropriate level of understanding for the Nursing Assistant's scope of practice.
- Demonstrate safety and infection control practices that comply with standards of care for Nursing Assistants.
- Define/discuss basic restorative needs and demonstrate knowledge of meeting patients' physical, mental, and psychosocial needs.
- Define social determinants of health and vulnerable populations.

- Define OBRA regulations and the importance of advocacy for the populations we care for within the Nursing Assistant scope of practice.

Program Outcomes

- Define their role as a safe practitioner.
- Function on a team or within a group in a nurturing positive manner.
- Relate to people of all ages.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

NRS A 105 - Nursing Assistant Clinical

Credits: 2

This is a dynamic and immersive course that places students in a real-world healthcare setting, providing hands-on experiences to integrate theoretical knowledge into practical skills. This course is designed to equip students with the essential competencies required for clinical practice as nursing assistants. Through supervised clinical experiences, students will engage in the provision of safe, culturally competent, and patient-centered care, while also mastering the principles and skills of restorative nursing.

Enrollment Requirement: Instructor permission

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Provide safe, culturally competent, patient-centered care to clients.
- Incorporate principles and skills of restorative nursing while providing care.

- Demonstrate behaviors that are respectful of client rights and promote client independence.
- Demonstrate the ability to work cooperatively as a member of a health care team, including the use of effective communication skills.
- Practice basic nursing skills accurately and safely while utilizing procedures and techniques that prevent the spread of microorganisms.
- Demonstrate the ability to identify and use safety and emergency procedures.
- Practice within the legal/ethical scope of practice and responsibility of a nursing assistant.

Program Outcomes

- Demonstrate problem solving, critical thinking approaches utilized in patient care settings.
- Use ethical principles in practice, conduct, and relationships with patients, staff, and families.
- Identify with the values of the profession and incorporate them into practice.
- Promote a positive public image of nursing assistant as a positive role model.
- Utilize communication skills to establish and maintain a therapeutic relationship with patients, families, and staff.
- Execute competencies required for beginning practice as a nursing assistant.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

Nutrition

NUTR& 101 - Nutrition

Credits: 5

Introduction to the role of nutrition in human health. Topics include human metabolism, utilization of nutrients, nutritive value of foods, factors that affect eating habits, food advertising, nutrition and disease, and establishing a healthy lifestyle. This course is

particularly suitable for health occupations students.

Enrollment Requirement: AP 100 or AP 103; or BIOL& 160, all with grades of 2.0 or higher.

Satisfies Requirement: Natural Science

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify nutritional requirements of a healthy diet.
- Identify the nutritional needs of humans through the stages of the life span.
- Describe the Macro & Micro nutrients and their functions.
- Explain the scientific process of digestion including organs and systems involved.
- State and discuss menu choices and how they impact various disease processes.
- Evaluate impact of advertising and marketing on the U.S. populations' health.
- Apply knowledge of nutritional science to health and wellness through analysis of individual menu.

Program Outcomes

- Provide safe, quality, evidence-based, innovative client-centered nursing care to diverse clients across the lifespan.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

Occupational Therapy Assistant

OTA 100 - Introduction to Occupational Therapy

Credits: 3

Introduces the practice of occupational therapy, its history and philosophical base. Covers occupational therapy practice framework such as domain and process, the occupational therapy process, and the promotion of health. Introduces ethics and professional behavior.

Enrollment Requirement: Enrollment in OTA Program.

Course Fee: \$13.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply and analyze the role of sociocultural, socioeconomic, and diversity, equity, and inclusion factors, as well as lifestyles in contemporary society to meet the needs of persons, groups, and populations. Course content must include, but is not limited to, introductory psychology, abnormal psychology, and introductory sociology or introductory anthropology.
- Demonstrate knowledge of the social determinants of health for persons, groups, and populations with or at risk for disabilities and chronic health conditions and distinguishes the epidemiological factors that impact the public health and welfare of populations.
- Apply knowledge of occupational therapy history, philosophical base, theory, and sociopolitical climate and their importance in meeting society's current and future occupational needs as well as how these factors influence and are influenced by practice.
- Demonstrate knowledge of and apply the interaction of occupation and activity, including areas of occupation, performance skills, performance patterns, context, and client factors.
- Apply and analyze scientific evidence to explain the importance of: Balancing areas of occupation, the role of occupation in the promotion of health and wellness and the prevention of disease, illness, and dysfunction for persons, groups, and populations.
- Demonstrate knowledge of the current published American Occupational Therapy Association (AOTA) Occupational Therapy Code of Ethics and AOTA Standards of Practice and use them as a guide for ethical decision making in professional interactions, client interventions, employment settings, and when confronted with personal and organizational ethical conflicts.
- Explain the role and responsibility of the practitioner to advocate for occupational therapy including changes in service delivery policies, effecting changes in the system, recognizing opportunities in emerging practice areas, and advocating for opportunities to expand the occupational therapy assistant's role. Articulate the distinct knowledge and skills of occupational therapy practitioners to the community of interest.
- Define effective, competency-based legal and ethical supervision of occupational therapy assistants and non-occupational therapy personnel.
- Explain how scholarly activities and literature contribute to the development of the profession. Locate and demonstrate understanding of professional literature, including

the quality of the source of information, to make evidence-based practice decisions in collaboration with the occupational therapist.

Program Outcomes

- Demonstrate mastery of the occupational therapy foundational content requirements.
- Discuss the basic tenets of occupational therapy.
- Intervene and implement occupational therapy processes.
- Describe the context of occupational therapy services.
- Assist in the management of occupational therapy services.
- Read and use professional literature in the field of occupational therapy.
- Discuss the importance of ethics, values and responsibilities in the field of occupational therapy.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

OTA 101 - Life Span Growth and Development in Humans

Credits: 3

Includes a study of the basic theories and processes of normal human growth and development. Emphasizes practical assessment and integration of all components- psychosocial, physical and cognitive-relative to the needs of recipients of occupational therapy.

Enrollment Requirement: Enrollment in OTA Program.

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate knowledge of: The structure and function of the human body that must include the biological and physical sciences, neurosciences, kinesiology, and biomechanics. Human development throughout the lifespan (infants, children,

adolescents, adults, and older adults). Course content must include, but is not limited to, developmental psychology. Concepts of human behavior that must include the behavioral sciences, social sciences, and science of occupation.

- Apply and analyze the role of sociocultural, socioeconomic, and diversity, equity, and inclusion factors, as well as lifestyles in contemporary society to meet the needs of persons, groups, and populations. Course content must include, but is not limited to, introductory psychology, abnormal psychology, and introductory sociology or introductory anthropology.
- Demonstrate the principles of the teaching-learning process using educational methods and health literacy education approaches: To design activities and clinical training for persons, groups, and populations. To instruct and train the client, caregiver, family, significant others, and communities at the level of the audience.

Program Outcomes

- Demonstrate mastery of the occupational therapy foundational content requirements.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

OTA 102 - OTA Applied Anatomy and Kinesiology

Credits: 3

Demonstrate knowledge and understanding of the function of the human body to include applied concepts related to anatomy, kinesiology, and biomechanics with an emphasis on material related to the practice of occupational therapy across diverse clientele and practice settings. Client factors, body functions and body structures related to movement are studied as they affect performance in areas of occupation.

Enrollment Requirement: Concurrent enrollment in OTA 103; and enrollment in OTA program.

Course Fee: \$13.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate knowledge of: The structure and function of the human body that must include the biological and physical sciences, neurosciences, kinesiology, and biomechanics. Human development throughout the lifespan (infants, children, adolescents, adults, and older adults). Course content must include, but is not limited to, developmental psychology. Concepts of human behavior that must include the behavioral sciences, social sciences, and science of occupation.

Program Outcomes

Demonstrate mastery of the occupational therapy foundational content requirements.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

OTA 103 - Applied Anatomy and Kinesiology Lab

Credits: 2

Application of concepts learned in OTA 102. Demonstrate knowledge and understanding of the function of the human body to include applied concepts related to anatomy, kinesiology, and biomechanics with an emphasis on material related to the practice of occupational therapy across diverse clientele and practice settings. Client factors, body functions and body structures related to movement are studied as they affect performance in areas of occupation.

Enrollment Requirement: Concurrent enrollment in OTA 102; and enrollment in OTA program.

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate knowledge of: The structure and function of the human body that must include the biological and physical sciences, neurosciences, kinesiology, and biomechanics. Human development throughout the lifespan (infants, children, adolescents, adults, and older adults). Course content must include, but is not limited to, developmental psychology. Concepts of human behavior that must include the behavioral sciences, social sciences, and science of occupation.

Program Outcomes

Demonstrate mastery of the occupational therapy foundational content requirements.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

OTA 111 - Fundamentals of Occupational Therapy as Health Care Providers

Credits: 2

Students learn basic patient-therapist interaction and communication skills, introductory use of medical terminology, patient confidentiality and HIPAA rules, infection control and blood borne pathogens guidelines, and time management skills.

Enrollment Requirement: Concurrent enrollment in OTA 112; and enrollment in OTA program.

Course Fee: \$114.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate activity analysis in areas of occupation, performance skills, performance patterns, context, and client factors to implement the intervention plan.
- Demonstrate sound judgment regarding safety of self and others and adhere to safety regulations throughout the occupational therapy process as appropriate to the setting and scope of practice. This must include the ability to assess and monitor vital signs (e.g., blood pressure, heart rate, respiratory status, and temperature) to ensure that the client is stable for intervention.

- Create and implement a plan to address individualized personal and professional responsibilities that are consistent with current accepted standards and long-term professional goals. The plan must address the following: Personal well-being, alignment with current accepted norms in occupational therapy practice, advocacy related to clients, occupational therapy, or the role of the occupational therapist or occupational therapy assistant, long-term career objectives and a strategy to evaluate, refine, and update the plan over time.
- Demonstrate therapeutic use of self, including one's personality, insights, perceptions, and judgments, as part of the therapeutic process in both individual and group interaction.
- Demonstrate the application of principles of instructional design and teaching and learning in content related to occupational therapy which includes at minimum: Development of learning objectives, design of material, development of learning assessment, delivery of professional presentation and self-reflection of process.
- Demonstrate therapeutic use of self, including one's personality, insights, perceptions, and judgments, as part of the therapeutic process in both individual and group interaction.
- Identify and communicate to the occupational therapist the need to refer to specialists both internal and external to the profession, including community agencies.
- Demonstrate effective communication with clients, care partners, communities, and members of the intra-professional and interprofessional teams in a responsive and responsible manner that supports a team approach to promote client outcomes.
- Demonstrate knowledge of: Care coordination, case management, and transition services in traditional and emerging practice environments, the consultative process with persons, groups, programs, organizations, or communities in collaboration with inter- and intra-professional colleagues.

Program Outcomes

- Conduct and document a screening and evaluation process.
- Intervene and implement occupation therapy processes.
- Discuss the importance of ethics, values and responsibilities in the field of occupational therapy.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is

designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

OTA 112 - Professional Skills for Healthcare Providers Lab

Credits: 2

Students demonstrate ability to apply strategies for learned communication with interdisciplinary team and patients with the use of proper medical terminology, and safe practice of infection control and blood borne pathogens guidelines. Implement strategies for time management and application of study skills. Demonstrates implementation of OT practice framework and introduction into task analyses.

Enrollment Requirement: Concurrent enrollment in OTA 111; and enrollment in OTA program.

Course Fee: \$42.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate activity analysis in areas of occupation, performance skills, performance patterns, context, and client factors to implement the intervention plan.
- Demonstrate sound judgment regarding safety of self and others and adhere to safety regulations throughout the occupational therapy process as appropriate to the setting and scope of practice. This must include the ability to assess and monitor vital signs (e.g., blood pressure, heart rate, respiratory status, and temperature) to ensure that the client is stable for intervention.
- Demonstrate knowledge of effective leadership styles. Identify personal and professional strengths and areas for growth to become an effective leader.
- Demonstrate the application of principles of instructional design and teaching and learning in content related to occupational therapy which includes at minimum: Development of learning objectives, design of material, development of learning assessment, delivery of professional presentation. and self-reflection of process.
- Demonstrate therapeutic use of self, including one's personality, insights, perceptions, and judgments, as part of the therapeutic process in both individual and group interaction.
- Demonstrate effective communication with clients, care partners, communities, and members of the intra-professional and interprofessional teams in a responsive and responsible manner that supports a team approach to promote client outcomes.
- Apply components of the OTPF and show novice understanding of each component.
- Apply novice understanding of the Occupational Profile.
- Demonstrate knowledge of medical terms and abbreviations related to OT profession.

- Demonstrate a novice level of knowledge in understanding the need to communicate and refer to other health care professional for consultation and intervention.

Program Outcomes

- Demonstrate mastery of the occupational therapy foundational content requirements.
- Discuss the basic tenets of occupational therapy.
- Conduct and document a screening and evaluation process.
- Intervene and implement occupational therapy processes.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

OTA 120 - Developmental Disabilities 1

Credits: 3

An introduction to the principles of growth and development and the effects of common heritable diseases, genetic conditions, mental illness, disability, trauma and injury in children. Includes instruction in the OT process, assessments and interventions that are based on the frames of references that are used to meet the needs of children with diverse conditions. Students also learn the role of the COTA and how the profession continues to evolve based on changing societal influences and needs.

Enrollment Requirement: Concurrent enrollment in OTA 121; and enrollment in OTA program.

Course Fee: \$30.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate knowledge of: The structure and function of the human body that must include the biological and physical sciences, neurosciences, kinesiology, and biomechanics. Human development throughout the lifespan (infants, children, adolescents, adults, and older adults). Course content must include, but is not limited to, developmental psychology. Concepts of human behavior that must include the behavioral sciences, social sciences, and science of occupation.
- Apply knowledge of occupational therapy history, philosophical base, theory, and sociopolitical climate and their importance in meeting society's current and future occupational needs as well as how these factors influence and are influenced by practice.
- Understand how occupational performance is affected by the effects of disease processes including heritable diseases, genetic conditions, mental illness, disability, trauma, and injury.
- Contribute to the evaluation process of client(s)' occupational performance by completing an occupational profile and administering standardized and non-standardized screenings and assessment tools as delegated by the occupational therapist. Explain the importance of using psychometrically sound assessment tools when considering client needs, and cultural and contextual factors.
- Demonstrate interventions that address dysphagia and disorders of feeding and eating, and train others in precautions and techniques while considering client and contextual factors.
- Identify the role and responsibilities of the OT and COTA in different pediatric practice settings.
- Demonstrate knowledge of the principle of typical development in children and understand how developmental milestones influence development throughout the human life span.
- Describe general symptoms and effects of common developmental disabilities, orthopedic disabilities, movement disorders, genetic disorders, autism spectrum disorders, sensory processing disorders, intellectual disabilities, learning disabilities, and other physical and mental disorders.
- Demonstrate knowledge of oral motor development, precautions, and techniques to provide interventions which address functional limitations surrounding feeding and eating performance in children.

Program Outcomes

- Demonstrate mastery of the occupational therapy foundational content requirements.
- Conduct and document a screening and evaluation process.
- Intervene and implement occupational therapy processes.
- Describe the context of occupational therapy services.
- Assist in the management of occupational therapy services.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

OTA 121 - Developmental Disabilities 1 Lab

Credits: 2

Lab allows for practical experience in administering screening tools and standardized assessments, and the development of interventions to meet the needs of children with common heritable diseases, genetic conditions, mental illness, disability, trauma, and injury. Emphasis is on the application of knowledge and experiential learning of approaches and techniques that are used with children.

Enrollment Requirement: Concurrent enrollment in OTA 120; and enrollment in OTA program.

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply scientific evidence, theories, models of practice, and frames of reference that underlie the practice of occupational therapy to guide and inform interventions for persons, groups, and populations in a variety of practice contexts and environments.
- Demonstrate knowledge of and apply the interaction of occupation and activity, including areas of occupation, performance skills, performance patterns, context, and client factors.
- Explain to the community of interest (e.g., consumers, potential employers, colleagues, third-party payers, regulatory boards, policymakers, and the public) the distinct nature of occupation and the evidence that occupation supports performance, participation, health, wellness, and well-being.
- Demonstrate professional reasoning to inform occupation-based interventions that focus on: Client factors, performance patterns, and performance skills. Creation, promotion, establishment, restoration, maintenance, modification, and prevention.
- Contribute to the evaluation process of client(s)' occupational performance by completing an occupational profile and administering standardized and non-standardized screenings and assessment tools as delegated by the occupational therapist. Explain

the importance of using psychometrically sound assessment tools when considering client needs, and cultural and contextual factors.

- Collaborating in the development of occupation-based intervention plans and strategies that must be client centered, culturally relevant, reflective of current occupational therapy practice, and based on available evidence. Under the direction of an occupational therapist, report on data for evaluation of client outcomes.
- Provide direct interventions and procedures to persons, groups, or populations to enhance safety, health and wellness, chronic condition management, and performance in occupations. This must include the ability to collaborate with the occupational therapist related to interventions and selecting and delivering occupations and activities: Occupations as a therapeutic intervention Interventions to support occupations including therapeutic exercise Interventions to support well-being (e.g., complementary health and integrative health) Interventions to support self-advocacy related to the person, groups, or populations and Virtual interventions
- Design and implement occupation-based interventions using the strategies of establish, restore, and modify approaches to address deficits in performance skills.
- Demonstrate interventions that address dysphagia and disorders of feeding and eating, and train others in precautions and techniques while considering client and contextual factors.
- Demonstrate knowledge of oral motor development, precautions, and techniques to provide interventions which address functional limitations surrounding feeding and eating performance in children

Program Outcomes

- Demonstrate mastery of the occupational therapy foundational content requirements.
- Discuss the basic tenets of occupational therapy.
- Conduct and document a screening and evaluation process.
- Intervene and implement occupational therapy processes.
- Assist in the management of occupational therapy services.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

OTA 122 - Physical Disabilities 1

Credits: 3

Study of the effects of heritable diseases, genetic conditions, disability, trauma and injury to the physical and mental health and occupational performance of the individual. Study the structure and function of the human body to include the biological and physical foundation of specific clinical conditions. Includes basic assessment and treatment approaches utilized in occupational therapy intervention of the physically disabled.

Enrollment Requirement: OTA 102 and OTA 103 with grades of 2.0 or higher; concurrent enrollment in OTA 123; and enrollment in OTA program.

Course Fee: \$14.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate knowledge of: The structure and function of the human body that must include the biological and physical sciences, neurosciences, kinesiology, and biomechanics. Human development throughout the lifespan (infants, children, adolescents, adults, and older adults). Course content must include, but is not limited to, developmental psychology. Concepts of human behavior that must include the behavioral sciences, social sciences, and science of occupation.
- Demonstrate knowledge of and apply the interaction of occupation and activity, including areas of occupation, performance skills, performance patterns, context, and client factors.
- Apply and analyze scientific evidence to explain the importance of: Balancing areas of occupation, The role of occupation in the promotion of health and wellness. The prevention of disease, illness, and dysfunction for persons, groups, and populations.
- Understand how occupational performance is affected by the effects of disease processes including heritable diseases, genetic conditions, mental illness, disability, trauma, and injury.
- Demonstrate professional reasoning to inform occupation-based interventions that focus on: Client factors, performance patterns, and performance skills. Creation, promotion, establishment, restoration, maintenance, modification, and prevention.
- Design and implement occupation-based interventions using the strategies of establish, restore, and modify approaches to address deficits in performance skills.
- Provide training in techniques to enhance functional mobility, including physical transfers, wheelchair management, and mobility devices.
- Describe the collaboration process with the occupational therapist to identify appropriate features of assistive technologies and durable medical equipment to support the client's participation. Demonstrate strategies with assistive technologies and devices (e.g., aids for communication, mobility, sensory loss, computer access, seating, and positioning systems) used to enhance occupational performance.

- Identify and analyze the influence of contextual factors and current federal, state, and local policy issues and structures on the delivery of occupational therapy services for persons, groups, or populations and social systems as they relate to the practice of occupational therapy.
- Explain how scholarly activities and literature contribute to the development of the profession. Locate and demonstrate understanding of professional literature, including the quality of the source of information, to make evidence-based practice decisions in collaboration with the occupational therapist.

Program Outcomes

- Demonstrate mastery of the occupational therapy foundational content requirements.
- Discuss the basic tenets of occupational therapy.
- Conduct and document a screening and evaluation process.
- Intervene and implement occupational therapy processes.
- Assist in the management of occupational therapy services.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

OTA 123 - Physical Disabilities 1 Lab

Credits: 2

Basic assessment and treatment techniques as it relates to adult physical disabilities. Lab allows for practical experience in patient assessment, transfers and daily living skills.

Enrollment Requirement: Concurrent enrollment in OTA 122; or instructor consent.

Course Fee: \$67.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Contribute to the evaluation process of client(s)' occupational performance by completing an occupational profile and administering standardized and non-standardized screenings and assessment tools as delegated by the occupational therapist. Explain the importance of using psychometrically sound assessment tools when considering client needs, and cultural and contextual factors.
- Provide training in techniques to enhance functional mobility, including physical transfers, wheelchair management, and mobility devices.
- Describe the collaboration process with the occupational therapist to identify appropriate features of assistive technologies and durable medical equipment to support the client's participation. Demonstrate strategies with assistive technologies and devices (e.g., aids for communication, mobility, sensory loss, computer access, seating, and positioning systems) used to enhance occupational performance.
- Understand how quantitative and qualitative research studies inform occupational therapy practice.

Program Outcomes

- Demonstrate mastery of the occupational therapy foundational content requirements.
- Conduct and document a screening and evaluation process.
- Intervene and implement occupational therapy processes.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

OTA 124 - Fundamentals of Gerontology

Credits: 3

Study of physical, emotional and social processes involved in normal aging, plus a brief study of the pathology associated with the aging process. Emphasizes techniques used in maintaining independence, adjusting to the special problems of aging and the utilization of community resources.

Enrollment Requirement: Enrollment in OTA program.

Course Fee: \$8.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Provide training in techniques to enhance community mobility, and address alternative means of transportation in community settings, including driver rehabilitation and other community access options.
- Demonstrate interventions that address dysphagia and disorders of feeding and eating, and train others in precautions and techniques while considering client and contextual factors.
- Demonstrate effective communication with clients, care partners, communities, and members of the intra-professional and interprofessional teams in a responsive and responsible manner that supports a team approach to promote client outcomes.
- Demonstrate awareness of the principles of intra-professional and interprofessional team dynamics to perform effectively in different team roles to plan, deliver, and evaluate patient- and population-centered care as well as population health programs and policies that are safe, timely, efficient, effective, and equitable.
- Demonstrate knowledge of: Care coordination, case management, and transition services in traditional and emerging practice environments. The consultative process with persons, groups, programs, organizations, or communities in collaboration with inter- and intra-professional colleagues.

Program Outcomes

- Demonstrate mastery of the occupational therapy foundational content requirements.
- Discuss the basic tenets of occupational therapy.
- Conduct and document a screening and evaluation process.
- Intervene and implement occupational therapy processes.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

OTA 126 - Clinical Seminar 1

Credits: 1

Teaches students the basics of client-therapist interaction, documentation, clinical issues, and therapeutic techniques. Includes weekly discussion of concurrent clinical experiences.

Enrollment Requirement: Concurrent enrollment in OTA 127 and OTA 128; and enrollment in OTA program.

Course Fee: \$48.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate therapeutic use of self, including one's personality, insights, perceptions, and judgments, as part of the therapeutic process in both individual and group interaction.
- Implement a discharge plan from occupational therapy services that was developed by the occupational therapist in collaboration with the client and members of the interprofessional teams by reviewing the needs of the client, caregiver, family, and significant others; available resources; and discharge environment.
- Demonstrate knowledge of various reimbursement systems and funding mechanisms (e.g., federal, state, local, third party, private payer), appeals mechanisms, treatment/diagnosis codes (e.g., CPT®, ICD, DSM® codes), and durable medical equipment coding (e.g., HCPCS) and documentation requirements (e.g., equipment justifications) that affect consumers and the practice of occupational therapy. Documentation must effectively communicate the need and rationale for occupational therapy services.
- Articulate the importance of and demonstrate ability to gather data for the purpose of screening and evaluation using methods including but not limited to specified screening tools, using skilled observation and consulting with the patient's health care team (other professionals, family, and significant others).
- Articulate the importance of and demonstrate the ability to gather and share data for the purpose of evaluating client (s) occupational performance in activities of ADLs, IADLs, education, work, play, rest, sleep and social participation as it applies to the Occupational Therapy Performance Framework (OTPF)
- Articulate a novice level ability to implement treatment activity with patients/clients as assigned by FW CI.
- Identify and demonstrate effective work habits in the clinical setting.
- Understand the importance of self-knowledge in relation to the quality of one's life and the choices one makes.
- To describe the role families, play in the formation of identity and self-esteem.
- Describe various factors that should be considered in making sound ethical decisions.

Program Outcomes

- Conduct and document a screening and evaluation process.
- Intervene and implement occupational therapy processes.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

OTA 127 - Clinical Seminar Lab

Credits: 1

Students demonstrate skills at a novice level to gather necessary information to implement evaluation, treatment, and occupational profile of the client, document occupational therapy service, implement treatment based on the OTPF. Students also demonstrate professional behaviors required to be successful in the fieldwork.

Enrollment Requirement: Concurrent enrollment in OTA 126 and OTA 128; and enrollment in OTA program.

Course Fee: \$229.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply scientific evidence, theories, models of practice, and frames of reference that underlie the practice of occupational therapy to guide and inform interventions for persons, groups, and populations in a variety of practice contexts and environments.
- Create and implement a plan to address individualized personal and professional responsibilities that are consistent with current accepted standards and long-term professional goals. The plan must address the following: Personal well-being. Alignment with current accepted norms in occupational therapy practice. Advocacy related to clients, occupational therapy, or the role of the occupational therapist or occupational therapy assistant. Long-term career objectives. A strategy to evaluate, refine, and update the plan over time.
- Demonstrate therapeutic use of self, including one's personality, insights, perceptions, and judgments, as part of the therapeutic process in both individual and group interaction.
- Implement a discharge plan from occupational therapy services that was developed by the occupational therapist in collaboration with the client and members of the

interprofessional teams by reviewing the needs of the client, caregiver, family, and significant others; available resources; and discharge environment.

- Demonstrates the knowledge of the use of technology in practice which must include Electronic documentation systems, Virtual environments, Telehealth Tech.
- Demonstrate knowledge of various reimbursement systems and funding mechanisms (e.g., federal, state, local, third party, private payer), appeals mechanisms, treatment/diagnosis codes (e.g., CPT®, ICD, DSM® codes), and durable medical equipment coding (e.g., HCPCS) and documentation requirements (e.g., equipment justifications) that affect consumers and the practice of occupational therapy.
- Demonstrate effective work habits in the clinical setting.
- Demonstrate a novice level ability to document therapy service to ensure accountability of service provision and to meet standards for reimbursement agencies, and FW site facility while accurately communicating the rationale and effectiveness of therapy services.

Program Outcomes

- Conduct and document a screening and evaluation process.
- Intervene and implement occupational therapy processes.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

OTA 128 - Application of Occupational Therapy Assistant 1

Credits: 1

Students participate in supervised clinical experience with clients in a community practice setting. Includes directed observation, planning, and implementation of client treatments as assigned by clinical supervisor, and application of theory and treatment techniques. This is a pass/no credit course.

Enrollment Requirement: Concurrent enrollment in OTA 126 and OTA 127; and enrollment in OTA program.

Course Fee: \$31.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply information learned in the academic portion in to fieldwork experiences. See specific form for detailed criteria.
- Demonstrate skills of collaboration with occupational therapists and other professionals in planning and preparation for treatment activity with patients/clients.
- Demonstrate a beginners understanding of implementing treatment activity with patient/clients.
- Demonstrate ability to link treatment activity to theory and disease process.
- Record observations and understand the application of the Occupational Therapy Practice Framework to patient treatment and recording of findings.
- Demonstrate ability to communicate effectively with Clinical Instructor, patients and other professionals Apply treatment theories and techniques used in the assigned clinics.
- Articulate the importance in using observation, histories, and interviews of patient as assigned to assist in the screening and assessment of patients.
- Demonstrate ability to communicating effectively with patient/clients and staff.

Program Outcomes

- Conduct and document a screening and evaluation process.
- Intervene and implement occupational therapy processes.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

OTA 130 - Professional Advocacy Experience

Credits: 1

Acquaints students with therapy practitioner's responsibilities in professional activities

and for promotion of occupational therapy to other professionals, consumers, third-party payers and the public.

Enrollment Requirement: Enrollment in OTA Program.

Course Fee: \$145.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Explain to the community of interest (e.g., consumers, potential employers, colleagues, third-party payers, regulatory boards, policymakers, and the public) the distinct nature of occupation and the evidence that occupation supports performance, participation, health, wellness, and well-being.
- Identify and communicate to the occupational therapist the need to design community programs to support occupational performance for persons, groups, or populations.
- Identify and analyze the influence of contextual factors and current federal, state, and local policy issues and structures on the delivery of occupational therapy services for persons, groups, or populations and social systems as they relate to the practice of occupational therapy.
- Explain the role and responsibility of the practitioner to advocate for occupational therapy including changes in service delivery policies, effecting changes in the system, recognizing opportunities in emerging practice areas, and advocating for opportunities to expand the occupational therapy assistant's role. Articulate the distinct knowledge and skills of occupational therapy practitioners to the community of interest.
- Identify the need and demonstrate the ability to participate in the development, support, promotion, and management of service delivery options.

Program Outcomes

- Discuss the basic tenets of occupational therapy.
- Conduct and document a screening and evaluation process.
- Intervene and implement occupational therapy processes.
- Describe the context of occupational therapy services.
- Assist in the management of occupational therapy services.
- Discuss the importance of ethics, values and responsibilities in the field of occupational therapy.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

OTA 131 - Physical Disabilities 2

Credits: 3

Understand the effects of heritable diseases, genetic conditions, disability, trauma, and injury to the physical and mental health and occupational performance of the individual. Demonstrate knowledge and understanding of the structure and function of the human body to include the biological and physical sciences of specific clinical conditions. Describe and demonstrate basic assessment and treatment approaches utilized in occupational therapy intervention of the physically disabled through practical experiences in a lab setting.

Enrollment Requirement: OTA 102 and OTA 103; OTA 122 and OTA 123 all with grades of 2.0 or higher; concurrent enrollment in OTA 132; and enrollment in OTA program.

Course Fee: \$40.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Understand how occupational performance is affected by the effects of disease processes including heritable diseases, genetic conditions, mental illness, disability, trauma, and injury.
- Monitor and reassess, in collaboration with the client and care partner, the effect of occupational therapy intervention and the need for continued or modified intervention and communicate the identified needs to the occupational therapist.
- Assess, grade, and modify the way persons, groups, and populations perform occupations and activities by adapting processes, modifying environments, implementing assistive technology or adaptive equipment, and applying ergonomic principles to reflect the changing needs of the client, sociocultural context, and technological advances.
- Design and implement occupation-based interventions using the strategies of establish, restore, and modify approaches to address deficits in performance skills.
- Explain the need for orthotics, and design, fabricate, apply, fit, and train in orthoses and devices used to enhance occupational performance and participation. Train in the safe and effective use of prosthetic devices used to enhance occupational performance.
- Identify and communicate to the occupational therapist the need to refer to specialists both internal and external to the profession, including community agencies.
- Demonstrates the knowledge of the use of technology in practice which must include Electronic documentation systems, Virtual environments, Telehealth Tech.

- Demonstrate the principles of the teaching-learning process using educational methods and health literacy education approaches: To design activities and clinical training for persons, groups, and populations, to instruct and train the client, caregiver, family, significant others, and communities at the level of the audience.

Program Outcomes

- Demonstrate mastery of the occupational therapy foundational content requirements.
- Discuss the basic tenets of occupational therapy.
- Describe the context of occupational therapy services.
- Assist in the management of occupational therapy services.
- Discuss the importance of ethics, values and responsibilities in the field of occupational therapy.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

OTA 132 - Physical Disabilities 2 Lab

Credits: 2

Basic assessment and treatment techniques as it relates to adult physical disabilities. Lab allows for practical experience in patient assessment, transfers, and daily living skills.

Enrollment Requirement: OTA 102 and OTA 103; OTA 122 and OTA 123 with grades of 2.0 or higher; concurrent enrollment in OTA 131; and enrollment in OTA program.

Course Fee: \$46.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate sound judgment regarding safety of self and others and adhere to safety regulations throughout the occupational therapy process as appropriate to the setting and scope of practice. This must include the ability to assess and monitor vital signs (e.g., blood pressure, heart rate, respiratory status, and temperature) to ensure that the client is stable for intervention.
- Collaborating in the development of occupation-based intervention plans and strategies that must be client centered, culturally relevant, reflective of current occupational therapy practice, and based on available evidence. Under the direction of an occupational therapist, report on data for evaluation of client outcomes.
- Understand how quantitative and qualitative research studies inform occupational therapy practice.

Program Outcomes

- Demonstrate mastery of the occupational therapy foundational content requirements.
- Conduct and document a screening and evaluation process.
- Intervene and implement occupational therapy processes.
- Read and use professional literature in the field of occupational therapy.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

OTA 133 - Psychosocial Dysfunction

Credits: 3

Students learn the techniques used to meet mental health needs within the occupational therapy setting. Includes the application of psychosocial frames of reference, clinical conditions, and the application of occupational therapy to these conditions.

Enrollment Requirement: Concurrent enrollment in OTA 134; and enrollment in OTA program.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate knowledge of the social determinants of health for persons, groups, and populations with or at risk for disabilities and chronic health conditions and distinguishes the epidemiological factors that impact the public health and welfare of populations.
- Apply scientific evidence, theories, models of practice, and frames of reference that underlie the practice of occupational therapy to guide and inform interventions for persons, groups, and populations in a variety of practice contexts and environments.
- Apply knowledge of occupational therapy history, philosophical base, theory, and sociopolitical climate and their importance in meeting society's current and future occupational needs as well as how these factors influence and are influenced by practice.
- Understand how occupational performance is affected by the effects of disease processes including heritable diseases, genetic conditions, mental illness, disability, trauma, and injury.
- Demonstrate activity analysis in areas of occupation, performance skills, performance patterns, context, and client factors to implement the intervention plan.
- Demonstrate sound judgment regarding safety of self and others and adhere to safety regulations throughout the occupational therapy process as appropriate to the setting and scope of practice. This must include the ability to assess and monitor vital signs (e.g., blood pressure, heart rate, respiratory status, and temperature) to ensure that the client is stable for intervention.
- Contribute to the evaluation process of client (s) occupational performance by completing an occupational profile and administering a standardized and non-standardized screening and assessment tools as delegated by the occupational therapist. Explain the importance of using psychometrically sound assessment tools when considering client needs and cultural and contextual factors.
- Collaborating in the development of occupation-based intervention plans and strategies that must be client centered, culturally relevant, reflective of current occupational therapy practice, and based on available evidence. Under the direction of an occupational therapist, report on data for evaluation of client outcomes.
- Provide direct interventions and procedures to persons, groups, or populations to enhance safety, health and wellness, chronic condition management, and performance in occupations. This must include the ability to collaborate with the occupational therapist related to interventions and selecting and delivering occupations and activities: Occupations as a therapeutic intervention, Interventions to support occupations including therapeutic exercise, Interventions to support well-being (e.g., complementary health and integrative health), Interventions to support self-advocacy related to the person, groups, or populations, and virtual interventions.
- Design and implement occupation-based interventions using the strategies of establish, restore, and modify approaches to address deficits in performance skills.

- Understand how quantitative and qualitative research studies inform occupational therapy practice.

Program Outcomes

- Demonstrate mastery of the occupational therapy foundational content requirements.
- Discuss the basic tenets of occupational therapy.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

OTA 134 - Psychosocial Dysfunction Lab & Fieldwork Experience

Credits: 1

Students participate in supervised clinical experience with clients in a community practice setting. Includes directed observations, planning and implementation of client treatments as assigned by clinical supervisor, and application of theory and treatment techniques in a group setting with clients with psychological and social factors influencing engagement in occupation.

Enrollment Requirement: Concurrent enrollment in OTA 133; and enrollment in OTA program.

Course Fee: \$32.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate knowledge of the social determinants of health for persons, groups, and populations with or at risk for disabilities and chronic health conditions and distinguishes the epidemiological factors that impact the public health and welfare of populations.
- Apply and analyze the role of sociocultural, socioeconomic, and diversity, equity, and inclusion factors, as well as lifestyles in contemporary society to meet the needs of persons, groups, and populations. Course content must include, but is not limited to, introductory psychology, abnormal psychology, and introductory sociology or introductory anthropology.

- Demonstrate knowledge of and apply the interaction of occupation and activity, including areas of occupation, performance skills, performance patterns, context, and client factors.
- Demonstrate activity analysis in areas of occupation, performance skills, performance patterns, context, and client factors to implement the intervention plan.
- Contribute to the evaluation process of client (s) occupational performance by completing an occupational profile and administering a standardized and non-standardized screening and assessment tools as delegated by the occupational therapist. Explain the importance of using psychometrically sound assessment tools when considering client needs and cultural and contextual factors.
- Apply scientific evidence, theories, models of practice, and frames of reference that underlie the practice of occupational therapy to guide and inform interventions for persons, groups, and populations in a variety of practice contexts and environments.
- Collaborating in the development of occupation-based intervention plans and strategies that must be client centered, culturally relevant, reflective of current occupational therapy practice, and based on available evidence. Under the direction of an occupational therapist, report on data for evaluation of client outcomes.
- Design and implement occupation-based interventions using the strategies of establish, restore, and modify approaches to address deficits in performance skills..
- Understand how quantitative and qualitative research studies inform occupational therapy practice.
- Ensure at least one fieldwork experience (either Level I or Level II) has a primary focus on the role of occupational therapy practitioners addressing mental health, behavioral health, or psychosocial aspects of client performance to support their engagement in occupations.

Program Outcomes

- Demonstrate mastery of the occupational therapy foundational content requirements.
- Conduct and document a screening and evaluation process.
- Intervene and implement occupational therapy processes.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

OTA 194 - Special Topics 1: Occupational Therapy Assistant

Credits: 1-3

Enable students to pursue special areas of interest, by participating in specific lecture content, in the Occupational Therapy Assistant (OTA) program as directed by the program director and faculty. Students will participate and be evaluated in program lectures in order to meet the required ACOTE standard.

Enrollment Requirement: Students must be enrolled in the OTA program.

Course Outcomes:

Course outcomes are to be determined by the Program Director and Course Instructor.

Program Outcomes

- Demonstrate mastery of the occupational therapy foundational content requirements.
- Discuss the basic tenets of occupational therapy.
- Conduct and document a screening and evaluation process.
- Intervene and implement occupational therapy processes.
- Describe the context of occupational therapy services.
- Assist in the management of occupational therapy services.
- Read and use professional literature in the field of occupational therapy.
- Discuss the importance of ethics, values, and responsibilities in the field of occupational therapy.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

OTA 195 - Special Topic 2: Occupational Therapy Assistant

Credits: 1-3

Enable students to pursue special areas of interest by participating in specific lab activities in the Occupational Therapy Assistant (OTA) program as directed by the program director and faculty. Students will participate and be evaluated in program lab topics in order to meet the required ACOTE standard.

Enrollment Requirement: Students must be enrolled in the OTA program or transferring from another program.

Course Outcomes:

Students who successfully complete this class will be able to:

Course outcomes to be determine by the Program Director and Course Instructor.

Program Outcomes

- Demonstrate mastery of the occupational therapy foundational content requirements.
- Discuss the basic tenets of occupational therapy.
- Conduct and document a screening and evaluation process.
- Intervene and implement occupational therapy processes.
- Describe the context of occupational therapy services.
- Assist in the management of occupational therapy services.
- Read and use professional literature in the field of occupational therapy.
- Discuss the importance of ethics, values, and responsibilities in the field of occupational therapy.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

OTA 196 - Special Topic 3: Occupational Therapy Assistant

Credits: 1-11

Enable students to pursue special areas of interest, by participating in specific fieldwork experiences in the Occupational Therapy Assistant (OTA) program as directed by the program director and faculty. Students will participate in fieldwork in order to meet the

required ACOTE standard.

Enrollment Requirement: Students must be enrolled in the OTA program or transferring from another program.

Course Outcomes:

Students who successfully complete this class will be able to:

Course outcomes to determine by Program Director and Course Instructor

Program Outcomes

- Demonstrate mastery of the occupational therapy foundational content requirements.
- Discuss the basic tenets of occupational therapy.
- Conduct and document a screening and evaluation process.
- Intervene and implement occupational therapy processes.
- Describe the context of occupational therapy services.
- Assist in the management of occupational therapy services.
- Read and use professional literature in the field of occupational therapy.
- Discuss the importance of ethics, values, and responsibilities in the field of occupational therapy.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

OTA 198 - Independent Study - Occupational Therapy Assistant

Credits: 1

For students needing remediation for successful completion of fieldwork experiences, or who wish to explore specific areas of occupational therapy in-depth. Students participate in learning activities needed to re-mediate deficient areas. This is a pass/no credit

course.

Enrollment Requirement: Enrollment in OTA Program.

Course Outcomes:

Students who successfully complete this class will be able to:

- Course outcomes to be mutually agreed upon between instructor and student.

Program Outcomes

- Demonstrate mastery of the occupational therapy foundational content requirements.
- Discuss the basic tenets of occupational therapy.
- Conduct and document a screening and evaluation process.
- Intervene and implement occupational therapy processes.
- Describe the context of occupational therapy services.
- Assist in the management of occupational therapy services.
- Read and use professional literature in the field of occupational therapy.
- Discuss the importance of ethics, values and responsibilities in the field of occupational therapy.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

OTA 200 - Developmental Disabilities 2

Credits: 1

An advanced level course that expands students' understanding of conditions that affect children. Focuses on introduction and discussion of task analysis and occupational-based approaches.

Enrollment Requirement: Enrollment in OTA program.

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Understand how occupational performance is affected by the effects of disease processes including heritable diseases, genetic conditions, mental illness, disability, trauma, and injury.
- Demonstrate activity analysis in areas of occupation, performance skills, performance patterns, context, and client factors to implement the intervention plan.
- Collaborating in the development of occupation-based intervention plans and strategies that must be client centered, culturally relevant, reflective of current occupational therapy practice, and based on available evidence. Under the direction of an occupational therapist, report on data for evaluation of client outcomes.
- Monitor and reassess, in collaboration with the client and care partner, the effect of occupational therapy intervention and the need for continued or modified intervention and communicate the identified needs to the occupational therapist.
- Identify and communicate to the occupational therapist the need to refer to specialists both internal and external to the profession, including community agencies.

Program Outcomes

- Conduct and document a screening and evaluation process.
- Intervene and implement occupational therapy processes.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

OTA 201 - Developmental Disabilities 2 Lab

Credits: 2

Students apply and demonstrate novice competency of material learned in OTA 200. Focuses on application and hands on experience with task analysis, assistive technology and devices and occupational based approaches. Students demonstrate interventions and collaborate with clients, educators and other health care professionals using a service learning model.

Enrollment Requirement: OTA 120 and OTA 121 with grades of 2.0 or higher; and concurrent enrollment in OTA 200; and enrollment in OTA program.

Course Fee: \$46.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate activity analysis in areas of occupation, performance skills, performance patterns, context, and client factors to implement the intervention plan.
- Demonstrate sound judgment regarding safety of self and others and adhere to safety regulations throughout the occupational therapy process as appropriate to the setting and scope of practice. This must include the ability to assess and monitor vital signs (e.g., blood pressure, heart rate, respiratory status, and temperature) to ensure that the client is stable for intervention.
- Demonstrate therapeutic use of self, including one's personality, insights, perceptions, and judgments, as part of the therapeutic process in both individual and group interaction.
- Collaborating in the development of occupation-based intervention plans and strategies that must be client centered, culturally relevant, reflective of current occupational therapy practice, and based on available evidence. Under the direction of an occupational therapist, report on data for evaluation of client outcomes.
- Monitor and reassess, in collaboration with the client and care partner, the effect of occupational therapy intervention and the need for continued or modified intervention and communicate the identified needs to the occupational therapist.
- Design and implement occupation-based interventions using the strategies of establish, restore, and modify approaches to address deficits in performance skills.
- Demonstrate awareness of the principles of intra-professional and interprofessional team dynamics to perform effectively in different team roles to plan, deliver, and evaluate patient- and population-centered care as well as population health programs and policies that are safe, timely, efficient, effective, and equitable.

Program Outcomes

- Conduct and document a screening and evaluation process.
- Intervene and implement occupational therapy processes.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

OTA 202 - Ethics, Society, and Professional Practice

Credits: 3

Provides an overview and understanding of professional ethics and responsibilities including knowledge of ethical principles, professional development, healthcare reimbursement systems and healthcare laws. Also includes critical analysis of social issues including socioeconomics, social injustices, cultural awareness and diversity factors related to the practice of occupational therapy. Students learn through class lectures and discussions as well as practical assignments that promote critical thinking.

Enrollment Requirement: Enrollment in OTA Program.

Course Fee: \$8.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply and analyze the role of sociocultural, socioeconomic, and diversity, equity, and inclusion factors, as well as lifestyles in contemporary society to meet the needs of persons, groups, and populations. Course content must include, but is not limited to, introductory psychology, abnormal psychology, and introductory sociology or introductory anthropology.
- Demonstrate knowledge of the social determinants of health for persons, groups, and populations with or at risk for disabilities and chronic health conditions and distinguishes the epidemiological factors that impact the public health and welfare of populations.
- Apply knowledge of occupational therapy history, philosophical base, theory, and sociopolitical climate and their importance in meeting society's current and future occupational needs as well as how these factors influence and are influenced by practice.
- Demonstrate knowledge of the current published American Occupational Therapy Association (AOTA) Occupational Therapy Code of Ethics and AOTA Standards of Practice and use them as a guide for ethical decision making in professional interactions, client interventions, employment settings, and when confronted with personal and organizational ethical conflicts.

- Identify and analyze the influence of contextual factors and current federal, state, and local policy issues and structures on the delivery of occupational therapy services for persons, groups, or populations and social systems as they relate to the practice of occupational therapy.
- Demonstrate knowledge of various reimbursement systems and funding mechanisms (e.g., federal, state, local, third party, private payer), appeals mechanisms, treatment/diagnosis codes (e.g., CPT®, ICD, DSM® codes), and durable medical equipment coding (e.g., HCPCS) and documentation requirements (e.g., equipment justifications) that affect consumers and the practice of occupational therapy. Documentation must effectively communicate the need and rationale for occupational therapy services.
- Demonstrate knowledge of applicable national requirements for credentialing and requirements for licensure, certification, or registration consistent with federal and state laws.
- Define effective, competency-based legal and ethical supervision of occupational therapy assistants and non-occupational therapy personnel.

Program Outcomes

- Demonstrate mastery of the occupational therapy foundational content requirements.
- Conduct and document a screening and evaluation process.
- Intervene and implement occupational therapy processes.
- Describe the context of occupational therapy services.
- Assist in the management of occupational therapy services.
- Discuss the importance of ethics, values and responsibilities in the field of occupational therapy.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

OTA 210 - Therapeutic Practices in Occupational Therapy

Credits: 3

An advanced level course that incorporates the application of theories, models of practice, and frames of reference in the analysis, selection and use of activities in a therapeutic environment while addressing the needs of diverse patient populations. Emphasis is placed on the application of the OT Practice Framework in the development of intervention targeting basic and higher-level living skills. Includes instruction in the responsibilities a COTA has in the areas of documentation, record keeping, service operations, research, and safety and infection control.

Enrollment Requirement: OTA 122, OTA 123, OTA 131, OTA 132 and OTA 133 all with grades of 2.0 or higher; and concurrent enrollment in OTA 211.

Course Fee: \$31.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate knowledge of and apply the interaction of occupation and activity, including areas of occupation, performance skills, performance patterns, context, and client factors.
- Apply and analyze scientific evidence to explain the importance of: Balancing areas of occupation, the role of occupation in the promotion of health and wellness, the prevention of disease, illness, and dysfunction for persons, groups, and populations.
- Describe the collaboration process with the occupational therapist to identify appropriate features of assistive technologies and durable medical equipment to support the client's participation.
- Implement a discharge plan from occupational therapy services that was developed by the occupational therapist in collaboration with the client and members of the interprofessional teams by reviewing the needs of the client, caregiver, family, and significant others; available resources; and discharge environment.
- Provide training in techniques to enhance community mobility, and address alternative means of transportation in community settings, including driver rehabilitation and other community access options.
- Provide training in techniques to enhance functional mobility, including physical transfers, wheelchair management, and mobility devices.
- Demonstrate knowledge of the use of technology in practice, which must include Electronic documentation systems, Virtual environments, Telehealth technology
- Demonstrate the principles of the teaching-learning process using educational methods and health literacy education approaches: To design activities and clinical training for persons, groups, and populations and to instruct and train the client, caregiver, family, significant others, and communities at the level of the audience
- Demonstrate knowledge of various reimbursement systems and funding mechanisms (e.g., federal, state, local, third party, private payer), appeals mechanisms, treatment/diagnosis codes (e.g., CPT®, ICD, DSM® codes), and durable medical equipment coding (e.g., HCPCS) and documentation requirements (e.g., equipment

justifications) that affect consumers and the practice of occupational therapy. Documentation must effectively communicate the need and rationale for occupational therapy services.

- Explain how scholarly activities and literature contribute to the development of the profession. Locate and demonstrate understanding of professional literature, including the quality of the source of information, to make evidence-based practice decisions in collaboration with the occupational therapist.

Program Outcomes

- Demonstrate mastery of the occupational therapy foundational content requirements.
- Discuss the basic tenets of occupational therapy.
- Conduct and document a screening and evaluation process.
- Intervene and implement occupational therapy processes.
- Describe the context of occupational therapy services.
- Assist in the management of occupational therapy services.
- Read and use professional literature in the field of occupational therapy.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

OTA 211 - Therapeutic Practices Clinical Skills Training

Credits: 2

An advanced level course that emphasizes the application of therapeutic practices in a clinical context. Includes training and feedback in areas related to client care including chart review, intervention planning, intervention implementation, documentation and discharge planning.

Enrollment Requirement: OTA 122, OTA 123, OTA 131, OTA 132, and OTA 133 all

with grades of 2.0 or higher; concurrent enrollment in OTA 210; and enrollment in OTA program.

Course Fee: \$33.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate knowledge of and apply the interaction of occupation and activity, including areas of occupation, performance skills, performance patterns, context, and client factors.
- Demonstrate therapeutic use of self, including one's personality, insights, perceptions, and judgments, as part of the therapeutic process in both individual and group interaction.
- Demonstrate professional reasoning to inform occupation-based interventions that focus on: Client factors, performance patterns, and performance skills., Creation, promotion, establishment, restoration, maintenance, modification, and prevention.
- Contribute to the evaluation process of client(s)' occupational performance by completing an occupational profile and administering standardized and non-standardized screenings and assessment tools as delegated by the occupational therapist. Explain the importance of using psychometrically sound assessment tools when considering client needs, and cultural and contextual factors. Collaborating in the development of occupation-based intervention plans and strategies that must be client centered, culturally relevant, reflective of current occupational therapy practice, and based on available evidence.
- Collaborating in the development of occupation-based intervention plans and strategies that must be client centered, culturally relevant, reflective of current occupational therapy practice, and based on available evidence. Under the direction of an occupational therapist, report on data for evaluation of client outcomes
- Provide direct interventions and procedures to persons, groups, or populations to enhance safety, health and wellness, chronic condition management, and performance in occupations. This must include the ability to collaborate with the occupational therapist related to interventions and selecting and delivering occupations and activities: Occupations as a therapeutic intervention, Interventions to support occupations including therapeutic exercise, Interventions to support well-being (e.g., complementary health and integrative health), Interventions to support self-advocacy related to the person, groups, or populations, Virtual interventions.
- Demonstrate knowledge of the use of technology in practice, which must include: Electronic documentation systems Virtual environments and Telehealth technology.
- Demonstrate the principles of the teaching-learning process using educational methods and health literacy education approaches: To design activities and clinical training for persons, groups, and populations and to instruct and train the client, caregiver, family, significant others, and communities at the level of the audience. Under

the direction of an occupational therapist, report on data for evaluation of client outcomes.

- Demonstrate effective communication with clients, care partners, communities, and members of the intra-professional and interprofessional teams in a responsive and responsible manner that supports a team approach to promote client outcomes.
- Demonstrate knowledge of various reimbursement systems and funding mechanisms (e.g., federal, state, local, third party, private payer), appeals mechanisms, treatment/diagnosis codes (e.g., CPT®, ICD, DSM® codes), and durable medical equipment coding (e.g., HCPCS) and documentation requirements (e.g., equipment justifications) that affect consumers and the practice of occupational therapy. Documentation must effectively communicate the need and rationale for occupational therapy services.

Program Outcomes

- Conduct and document a screening and evaluation process.
- Intervene and implement occupational therapy processes.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

OTA 212 - Therapeutic Group Leadership

Credits: 1

Students study group dynamics as related to occupational therapy. Students learn to plan and implement activity groups appropriate to patients or clients of all ages. Emphasizes group leadership skills.

Enrollment Requirement: Concurrent enrollment in OTA 213; and enrollment in OTA program.

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply scientific evidence, theories, models of practice, and frames of reference that underlie the practice of occupational therapy to guide and inform interventions for persons, groups, and populations in a variety of practice contexts and environments.
- Demonstrate the principles of the teaching-learning process using educational methods and health literacy education approaches: to design activities and clinical training for persons, groups, and populations. to instruct and train the client, caregiver, family, significant others, and communities at the level of the audience.
- Demonstrate awareness of the principles of intra-professional and interprofessional team dynamics to perform effectively in different team roles to plan, deliver, and evaluate patient- and population-centered care as well as population health programs and policies that are safe, timely, efficient, effective, and equitable.

Program Outcomes

- Demonstrate mastery of the occupational therapy foundational content requirements.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

OTA 213 - Therapeutic Group Leadership Lab

Credits: 1

Students implement activities, appropriate to clients of all ages, incorporating components of a group, characteristics of different type of groups, and developmental levels of a group.

Enrollment Requirement: Concurrent enrollment in OTA 212; and enrollment in OTA program.

Course Fee: \$44.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply scientific evidence, theories, models of practice, and frames of reference that underlie the practice of occupational therapy to guide and inform interventions for persons, groups, and populations in a variety of practice contexts and environments.
- Demonstrate professional reasoning to inform occupation-based interventions that focus on: Client factors, performance patterns, and performance skills. Creation, promotion, establishment, restoration, maintenance, modification, and prevention Demonstrate professional reasoning to inform occupation-based interventions that focus on: Client factors, performance patterns, and performance skills.
- Demonstrate the principles of the teaching-learning process using educational methods and health literacy education approaches: to design activities and clinical training for persons, groups, and populations, to instruct and train the client, caregiver, family, significant others, and communities at the level of the audience. Creation, promotion, establishment, restoration, maintenance, modification, and prevention.
- Demonstrate effective communication with clients, care partners, communities, and members of the intra-professional and interprofessional teams in a responsive and responsible manner that supports a team approach to promote client outcomes
- Demonstrate awareness of the principles of intra-professional and interprofessional team dynamics to perform effectively in different team roles to plan, deliver, and evaluate patient- and population-centered care as well as population health programs and policies that are safe, timely, efficient, effective, and equitable.

Program Outcomes

- Conduct and document a screening and evaluation process.
- Intervene and implement occupational therapy processes.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

OTA 220 - Therapeutic Activities 2

Credits: 1

Students learn to plan and implement socioculturally appropriate therapeutic leisure and social activities for patients/clients in a variety of community settings. Emphasizes gradation and adaptation of leisure and social activities appropriate for a variety of patient/client diagnoses.

Enrollment Requirement: Enrollment in OTA Program.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply scientific evidence, theories, models of practice, and frames of reference that underlie the practice of occupational therapy to guide and inform interventions for persons, groups, and populations in a variety of practice contexts and environments.
- Apply and analyze scientific evidence to explain the importance of: Balancing areas of occupation, the role of occupation in the promotion of health and wellness, the prevention of disease, illness, and dysfunction for persons, groups, and population.
- Demonstrate activity analysis in areas of occupation, performance skills, performance patterns, context, and client factors to implement the intervention plan.
- Demonstrate the principles of the teaching-learning process using educational methods and health literacy education approaches: to design activities and clinical training for persons, groups, and populations, to instruct and train the client, caregiver, family, significant others, and communities at the level of the audience.
- Demonstrate awareness of the principles of intra-professional and interprofessional team dynamics to perform effectively in different team roles to plan, deliver, and evaluate patient- and population-centered care as well as population health programs and policies that are safe, timely, efficient, effective, and equitable.

Program Outcomes

- Demonstrate mastery of the occupational therapy foundational content requirements.
- Discuss the basic tenets of occupational therapy.
- Conduct and document a screening and evaluation process.
- Intervene and implement occupational therapy processes.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

OTA 221 - Therapeutic Group Activities 2 Lab

Credits: 2

Students implement and lead activities for clients of all ages with consideration of characteristics of different types and developmental levels of a group.

Enrollment Requirement: Concurrent enrollment in OTA 220 and enrollment in OTA program.

Course Fee: \$15.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Explain to the community of interest (e.g., consumers, potential employers, colleagues, third-party payers, regulatory boards, policymakers, and the public) the distinct nature of occupation and the evidence that occupation supports performance, participation, health, wellness, and well-being. Apply and analyze scientific evidence to explain the importance of: Balancing areas of occupation, the role of occupation in the promotion of health and wellness and the prevention of disease, illness, and dysfunction for persons, groups, and populations.
- Apply and analyze scientific evidence to explain the importance of: Balancing areas of occupation. The role of occupation in the promotion of health and wellness. The prevention of disease, illness, and dysfunction for persons, groups, and populations
- Demonstrate therapeutic use of self, including one's personality, insights, perceptions, and judgments, as part of the therapeutic process in both individual and group interaction.
- Demonstrate professional reasoning to inform occupation-based interventions that focus on: Client factors, performance patterns, and performance skills. Creation, promotion, establishment, restoration, maintenance, modification, and prevention.
- Provide direct interventions and procedures to persons, groups, or populations to enhance safety, health and wellness, chronic condition management, and performance in occupations. This must include the ability to collaborate with the occupational therapist related to interventions and selecting and delivering occupations and activities: Occupations as a therapeutic intervention, Interventions to support occupations including therapeutic exercise and Interventions to support well-being (e.g., complementary health and integrative health) Interventions to support self-advocacy related to the person, groups, or populations and Virtual interventions

- Demonstrate knowledge of: Care coordination, case management, and transition services in traditional and emerging practice environments. The consultative process with persons, groups, programs, organizations, or communities in collaboration with inter- and intra-professional colleagues.
- Demonstrate the principles of the teaching-learning process using educational methods and health literacy education approaches: To design activities and clinical training for persons, groups, and populations and to instruct and train the client, caregiver, family, significant others, and communities at the level of the audience.
- Demonstrate effective communication with clients, care partners, communities, and members of the intra-professional and interprofessional teams in a responsive and responsible manner that supports a team approach to promote client outcomes.
- Demonstrate awareness of the principles of intra-professional and interprofessional team dynamics to perform effectively in different team roles to plan, deliver, and evaluate patient- and population-centered care as well as population health programs and policies that are safe, timely, efficient, effective, and equitable.

Program Outcomes

- Conduct and document a screening and evaluation process.
- Intervene and implement occupational therapy processes.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

OTA 222 - Clinical Seminar 2

Credits: 1

Students learn basics of patient-therapist interaction, documentation, clinical issues, and therapeutic techniques. Also includes weekly discussion of concurrent clinical experiences.

Enrollment Requirement: Concurrent enrollment in OTA 223; and enrollment in OTA program.

Course Fee: \$122.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply and analyze the role of sociocultural, socioeconomic, and diversity, equity, and inclusion factors, as well as lifestyles in contemporary society to meet the needs of persons, groups, and populations. Course content must include, but is not limited to, introductory psychology, abnormal psychology, and introductory sociology or introductory anthropology.
- Apply scientific evidence, theories, models of practice, and frames of reference that underlie the practice of occupational therapy to guide and inform interventions for persons, groups, and populations in a variety of practice contexts and environments.
- Demonstrate activity analysis in areas of occupation, performance skills, performance patterns, context, and client factors to implement the intervention plan.

Program Outcomes

- Discuss the basic tenets of occupational therapy.
- Conduct and document a screening and evaluation process.
- Intervene and implement occupational therapy processes.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

OTA 223 - Application of OTA Co-op Experience 2

Credits: 1

Students participate in supervised clinical experience with patients in a community practice setting. Includes directed observation, planning, and implementation of patient treatments as assigned by the clinical supervisor. This is a pass/no credit course.

Enrollment Requirement: Concurrent enrollment in OTA 222 and enrollment in OTA program.

Course Fee: \$28.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Plan and prepare for treatment of patients/clients.
- Implement treatment activity with patients/clients as assigned by fieldwork (FW) Clinical Instructor (CI).
- Observation and recording of patient/client/student performance.
- Use effective work habits in the clinical setting.
- Communicate effectively with patient/clients and staff.
- Apply treatment theories and techniques used in the assigned clinics.
- Use observation, histories, and interviews of patient as assigned to assist in the screening and assessment of patients.

Program Outcomes

- Demonstrate mastery of the occupational therapy foundational content requirements.
- Conduct and document a screening and evaluation process.
- Intervene and implement occupational therapy processes.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

OTA 224 - Therapeutic Adaptations

Credits: 2

An advanced course where students demonstrate previously learned technical skills as well as their knowledge of physical dysfunctions as they work with a variety of material to design, modify, adapt and fabricate special equipment and assistive devices for the disabled. Students demonstrate and articulate the use of technology to support performance, participation, health and wellbeing.

Enrollment Requirement: Concurrent enrollment in OTA 225; and admitted to the OTA program.

Course Fee: \$25.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply scientific evidence, theories, models of practice, and frames of reference that underlie the practice of occupational therapy to guide and inform interventions for persons, groups, and populations in a variety of practice contexts and environments.
- Demonstrate the application of principles of instructional design and teaching and learning in content related to occupational therapy which includes at minimum: Development of learning objectives, design of material, development of learning assessment, delivery of professional presentation. Self-reflection of process.
- Assess, grade, and modify the way persons, groups, and populations perform occupations and activities by adapting processes, modifying environments, implementing assistive technology or adaptive equipment, and applying ergonomic principles to reflect the changing needs of the client, sociocultural context, and technological advances.
- Describe the collaboration process with the occupational therapist to identify appropriate features of assistive technologies and durable medical equipment to support the client's participation. Demonstrate strategies with assistive technologies and devices (e.g., aids for communication, mobility, sensory loss, computer access, seating, and positioning systems) used to enhance occupational performance.
- Explain the need for orthotics, and design, fabricate, apply, fit, and train in orthoses and devices used to enhance occupational performance and participation. Train in the safe and effective use of prosthetic devices used to enhance occupational performance.
- Understand the business aspects of practice including, but not limited to, the development of business plans, financial management, reimbursement, program evaluation models, strategic planning, and liability issues under current models of service provision including providing services on a contractual basis.
- Demonstrate knowledge of: Care coordination, case management, and transition services in traditional and emerging practice environments. The consultative process with persons, groups, programs, organizations, or communities in collaboration with inter- and intra-professional colleagues.
- Identify the need and demonstrate the ability to participate in the development, support, promotion, and management of service delivery options.
- Participate in ongoing processes for quality management and improvement (e.g., outcome studies analysis and client engagement surveys) and implement program changes as needed to demonstrate quality of services.
- Understand how quantitative and qualitative research studies inform occupational therapy practice.

Program Outcomes

- Demonstrate mastery of the occupational therapy foundational content requirements.
- Discuss the basic tenets of occupational therapy.

- Conduct and document a screening and evaluation process.
- Intervene and implement occupational therapy processes.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

OTA 225 - Application of Therapeutic Activities

Credits: 3

An advanced course where students will apply and integrate previously learned technical skills as well as knowledge of physical dysfunction as they work with a variety of materials to design, modify, adapt and fabricate special equipment and assistive devices for the disabled.

Enrollment Requirement: Concurrent enrollment in OTA 224.

Course Fee: \$82.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate the application of principles of instructional design and teaching and learning in content related to occupational therapy which includes at minimum: Development of learning objectives, design of material, development of learning assessment and delivery of professional presentation and self-reflection of process.
- Describe the collaboration process with the occupational therapist to identify appropriate features of assistive technologies and durable medical equipment to support the client's participation. Demonstrate strategies with assistive technologies and devices (e.g., aids for communication, mobility, sensory loss, computer access, seating, and positioning systems) used to enhance occupational performance.
- Understand the business aspects of practice including, but not limited to, the development of business plans, financial management, reimbursement, program evaluation models, strategic planning, and liability issues under current models of service provision including providing services on a contractual basis.

- Demonstrate knowledge of: Care coordination, case management, and transition services in traditional and emerging practice environments and the consultative process with persons, groups, programs, organizations, or communities in collaboration with inter- and intra-professional colleagues.
- Identify the need and demonstrate the ability to participate in the development, support, promotion, and management of service delivery options.
- Participate in ongoing processes for quality management and improvement (e.g., outcome studies analysis and client engagement surveys) and implement program changes as needed to demonstrate quality of services.

Program Outcomes

- Demonstrate mastery of the occupational therapy foundational content requirements.
- Discuss the basic tenets of occupational therapy.
- Conduct and document a screening and evaluation process.
- Intervene and implement occupational therapy processes.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

OTA 228 - Pre-Fieldwork Experience Seminar

Credits: 2

Prepares student for successful completion of Level 2 fieldwork. Emphasizes further development of documentation skills. Additional topics include self-assessment in preparation for full-time fieldwork, job search skills, service operations, and supervision issues.

Enrollment Requirement: Enrollment in OTA Program.

Course Fee: \$55.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Create and implement a plan to address individualized personal and professional responsibilities that are consistent with current accepted standards and long-term professional goals. The plan must address the following: Personal well-being, alignment with current accepted norms in occupational therapy practice, advocacy related to clients, occupational therapy, or the role of the occupational therapist or occupational therapy assistant and long-term career objectives. A strategy to evaluate, refine, and update the plan over time.
- Demonstrate knowledge of effective leadership styles. Identify personal and professional strengths and areas for growth to become an effective leader.
- Demonstrate knowledge of applicable national requirements for credentialing and requirements for licensure, certification, or registration consistent with federal and state laws.

Program Outcomes

- Conduct and document a screening and evaluation process.
- Intervene and implement occupational therapy processes.
- Describe the context of occupational therapy services.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

OTA 240 - Fieldwork Experience Seminar 1

Credits: 1

Students discuss and problem-solve fieldwork experiences, read and discuss literature appropriate to fieldwork and review OTA program content in preparation for national certification exam.

Enrollment Requirement: Concurrent enrollment in OTA 245; and enrollment in OTA program.

Course Fee: \$167.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate knowledge of the social determinants of health for persons, groups, and populations with or at risk for disabilities and chronic health conditions. This must include epidemiological factors that impact the public health and welfare of populations.
- Understand the importance of professional responsibility to continue to improve self. Student will identify challenges and how a plan to meet those challenges while in fieldwork.
- Articulate the characteristic of the relationship between their Clinical Instructor and themselves as well as the Occupational Therapy and Occupational Therapy Assistant collaboration.
- Demonstrate use of evidence base knowledge when articulating professional reasoning.
- Become more aware with strategies/treatment techniques used in a variety of settings.
- Identify what made their relationship with their Fieldwork Educator successful, discover what makes the collaborative approach to supervision and patient care, methods used to establish roles.
- Understand the importance of professional responsibility to continue to improve self. Student will identify challenges and how a plan to meet those challenges while in fieldwork.
- Demonstrate ability to identify and meet the needs identified in their fieldwork site.
- Articulate the role of the Occupational Therapy Assistant and Occupational Therapist in the screening and evaluation process along with the importance of and rationale for supervision and collaborative work between the occupational therapy assistant and occupational therapist is that process.
- Participate in the documentation of ongoing process of quality management and improvement and demonstrate program changes as needed to demonstrate quality of services.

Program Outcomes

- Demonstrate mastery of the occupational therapy foundational content requirements.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

OTA 241 - Fieldwork Experience Seminar 2

Credits: 1

Students discuss and problem-solve fieldwork experiences, read and discuss literature appropriate to fieldwork, and review OTA program content in preparation for national certification exam.

Enrollment Requirement: Concurrent enrollment in OTA 246; and enrollment in OTA program.

Course Fee: \$194.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Requirements for Credentialing and Licensure: Provide care and programs that demonstrate knowledge of applicable national requirements for credentialing and requirements for licensure, certification, or registration consistent with federal and state laws.
- Understand the importance of professional responsibility to continue to improve self. Student will identify challenges and how a plan to meet those challenges while in fieldwork.
- Articulate the characteristic of the relationship between their Clinical Instructor and themselves as well as the Occupational Therapy and Occupational Therapy Assistant collaboration.
- Demonstrate use of evidence base knowledge when articulating professional reasoning.
- Quality of Management and Improvement: Participate in the documentation of ongoing processes for quality management and improvement (e.g., outcome studies analysis and client engagement surveys) and implement program changes as needed to demonstrate quality of services.
- Become more aware with strategies/treatment techniques used in a variety of settings.
- Identify what made their relationship with their Fieldwork Educator successful, discover what makes the collaborative approach to supervision and patient care, methods used to establish roles.
- Demonstrate ability to identify and meet the needs identified in their fieldwork site.
- Articulate the role of the Occupation Therapy Assistant and Occupational Therapist in the screening and evaluation process along with the importance of and rationale for supervision and collaborative work between the occupational therapy assistant and occupational therapist is that process.

Program Outcomes

Demonstrate mastery of the occupational therapy foundational content requirements.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

OTA 245 - Co-op Fieldwork Experience 1

Credits: 11

Fieldwork experience includes practice in one of the following areas: physical disabilities, psychological dysfunction, geriatrics, developmental disabilities, pediatrics, work hardening/pain management, or hand therapy under the supervision of a licensed occupational therapy practitioner. This is a pass/no credit course.

Enrollment Requirement: Concurrent enrollment in OTA 240; and enrollment in OTA program.

Course Fee: \$36.00

Course Outcomes:

Students who successfully complete this Level 2 fieldwork will meet the following outcomes. For specific criteria, see the Level 2 evaluation completed by the Level 2 Fieldwork Educator.

- **Professional Behaviors and Responsibilities:** Students will demonstrate the development of professional conduct, accountability, and ethical responsibilities essential to occupational therapy practice.
- **Occupational Therapy Process:** Students will apply evidence-based occupational therapy principles and clinical reasoning to deliver patient-centered interventions across diverse populations.
- **Communication:** Students will effectively communicate occupational therapy concepts, treatment plans, and patient education to clients, families, and interprofessional team members.
- **Feedback:** Students will actively utilize constructive feedback to reflect on their performance, demonstrate growth, and enhance clinical competence.

- **Core Values of Occupational Therapy:** Students will exemplify the core values of occupational therapy-such as life-long learning altruism, respect, equality, and justice-in their interactions and clinical decision-making.

Program Outcomes

Demonstrate mastery of the occupational therapy foundational content requirements.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

OTA 246 - Co-op Fieldwork Experience 2

Credits: 11

Fieldwork experience includes practice in one of the following areas: physical disabilities, psychological dysfunction, geriatrics, developmental disabilities, pediatrics, work hardening/pain management, or hand therapy under the supervision of a licensed occupational therapy practitioner. This is a pass/no credit course.

Enrollment Requirement: OTA 245 with grade of 2.0 or higher; concurrent enrollment in OTA 241; or instructor consent.

Course Fee: \$26.00

Course Outcomes:

Students who successfully complete this Level 2 fieldwork will meet the following outcomes. For specific criteria, see the Level 2 evaluation completed by the Level 2 Fieldwork Educator.

- **Professional Behaviors and Responsibilities:** Students will demonstrate the development of professional conduct, accountability, and ethical responsibilities essential to occupational therapy practice.
- **Occupational Therapy Process:** Students will apply evidence-based occupational therapy principles and clinical reasoning to deliver patient-centered interventions across diverse populations.
- **Communication:** Students will effectively communicate occupational therapy concepts, treatment plans, and patient education to clients, families, and interprofessional team members.

- **Feedback:** Students will actively utilize constructive feedback to reflect on their performance, demonstrate growth, and enhance clinical competence.
- **Core Values of Occupational Therapy:** Students will exemplify the core values of occupational therapy-such as life-long learning altruism, respect, equality, and justice-in their interactions and clinical decision-making.

Program Outcomes

Demonstrate mastery of the occupational therapy foundational content requirements.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Oceanography

OCEA& 101 - Introduction to Oceanography

Credits: 5

Introduces the fundamental principles of ocean science: the geology and geography of ocean basins; chemistry of sea water; physical dynamics of currents, waves, and tides; coastal processes; how human activity influences ocean environments; and the diverse ecosystems of Earth's oceans such as deep sea vents, coral reefs, and estuaries.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Natural Science or Lab Science

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply information presented during the lectures to the solutions of open-ended questions.
- Make observations (in class and on field trips) and correctly link those observations to information from the course.
- Use a computer to analyze and obtain oceanographic data.
- Work effectively with peers in finding solutions to oceanographic problems.

Program Outcomes

- Produce written interpretations of oceanographic materials
- Make oceanographic inferences from newly presented materials.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

Philosophy**PHIL& 101 - Introduction to Philosophy**

Credits: 5

Introduces students to the major problems and figures of philosophy. Gives students a greater understanding of human experience through the examination of the concepts of reality, knowledge and value. Questions posed may include: Does God exist? Do we act freely? Is the mind distinct from the body? Can we ever know anything for certain? What really matters?

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate command of important philosophical terminology, themes, and arguments from the four major areas of philosophy.
- State and evaluate non-trivial theories and arguments from various philosophical sources.

Program Outcomes

Form, analyze, and assess beliefs while demonstrating intellectual humility and respect towards the beliefs of others.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PHIL 102 - Contemporary Moral Problems

Credits: 5

Introduces students to the most urgent moral problems of our day. Provides students with an introduction to ethical theories and their application to contemporary moral problems. Topics may include war and torture, capital punishment, animal rights and the environment, abortion, euthanasia, and liberty.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate command of important philosophical terminology, themes, and arguments of the major normative ethical theories.
- Apply major normative ethical theories apply to contemporary moral issues such as abortion, capital punishment, euthanasia, food ethics, gun control, and other issues of similar urgency.
- State and evaluate non-trivial theories and arguments from various sources related to contemporary moral philosophy.
- Recognize the consequences of their actions and hold themselves accountable.

Program Outcomes

Form, analyze, and assess beliefs while demonstrating intellectual humility and respect towards the beliefs of others.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PHIL 103 - Historical Survey-Ancient Philosophy

Credits: 5

Introduces students to the ancient philosophy of western civilization. Examines the beginnings of philosophy from pre-Socratic ancient Greece up to the early Christian era, including such philosophers as Thales, Pythagoras, Heraclitus, Parmenides, Socrates, Plato, Aristotle, and Epicurus. Emphasizes how past thinkers have influenced current thought and practice.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate command of important philosophical terminology, themes, and arguments from pre-Socratic ancient Greece up to the early Christian era.
- State and evaluate non-trivial theories and arguments from various sources related to ancient philosophy.

Program Outcomes

Form, analyze, and assess beliefs while demonstrating intellectual humility and respect towards the beliefs of others.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PHIL 105 - Historical Survey-Modern Philosophy

Credits: 5

Introduces students to the philosophy of modern western civilization. Examines the period of philosophy from the humanism of the Enlightenment through the end of the 19th century, including such philosophers as Descartes, Leibniz, Spinoza, Hobbes, Locke, Berkeley, Hume, and Kant. Emphasizes the influence of these philosophers on

current thought and practice.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate command of important philosophical terminology, themes, and arguments from the Enlightenment through the end of the nineteenth century.
- State and evaluate non-trivial theories and arguments from various sources related to modern philosophy.

Program Outcomes

Form, analyze, and assess beliefs while demonstrating intellectual humility and respect towards the beliefs of others.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PHIL 108 - Historical Survey-Contemporary Philosophy

Credits: 5

Introduces students to a survey of issues in philosophy from roughly the beginning of the twentieth century to the present. Key figures include Frege, Russell, Moore, Wittgenstein, Quine, Davidson, Kripke, and Putnam. Key topics include Logical Atomism, Logical Positivism, Ordinary Language Philosophy, Truth, Meaning, Reference, and Interpretation. May also discuss reactions to contemporary philosophy in the form of phenomenology, pragmatism, and existentialism.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate command of important philosophical terminology, themes, and arguments from roughly the beginning of the twentieth century to the present.

- State and evaluate non-trivial theories and arguments from various sources related to contemporary philosophy.

Program Outcomes

Form, analyze, and assess beliefs while demonstrating intellectual humility and respect towards the beliefs of others.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PHIL 110 - Social and Political Philosophy

Credits: 5

Introduces students to the major themes of social and political philosophy, including justice, forms of government, revolution, liberty, equality, and civil disobedience. Sample topics include: What is a just distribution of income? What is the best form of government? Should there be limits to free speech? Is one ever justified in disobeying the law?

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate command of important philosophical terminology, themes, and arguments concerning the establishment and justification of societies.
- State and evaluate non-trivial theories and arguments from various sources related to social and political philosophy.
- Identify just relationships amongst and between members and societies.

Program Outcomes

Form, analyze, and assess beliefs while demonstrating intellectual humility and respect towards the beliefs of others.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of

emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PHIL 111 - Science, Technology, and Value

Credits: 5

Introduces students to the social, environmental, and ethical implications of contemporary science and technology. Topics include the normative ethics of behavior, value theory, and metaphysics together with issues on artificial intelligence, internet privacy, climate change, biotechnology, gender, and everyday artifacts.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate command of important philosophical terminology, themes, and arguments related to technological usage, research, and advancement.
- State and evaluate non-trivial theories and arguments from various sources related to science, technology, and value.
- Identify the practical implications of the interconnectedness of human values and technological development to their own lives and professions.

Program Outcomes

Form, analyze, and assess beliefs while demonstrating intellectual humility and respect towards the beliefs of others.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PHIL 112 - Ethics in the Workplace

Credits: 5

Introduces students to the ethical issues and problems (national and international) that arise in workplace, professional, and organizational settings. Helps students identify and solve these problems within the framework of ethical theory. May include topics such as negotiation, sexual harassment, comparable worth, whistleblowing, and the rights and responsibilities of employers and employees.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate command of important philosophical terminology, themes, and arguments related to ethical issues in the workplace.
- State and evaluate non-trivial theories and arguments from various sources related to ethics in the workplace.
- Identify the practical implications of ethical issues in the workplace on their own lives and professions.

Program Outcomes

Form, analyze, and assess beliefs while demonstrating intellectual humility and respect towards the beliefs of others.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PHIL& 115 - Critical Thinking

Credits: 5

Introduces students to informal non-symbolic logic and critical thinking. Sample topics include language analysis, inductive reasoning, statistical analysis, causal reasoning, arguments from analogy and fallacious patterns of reasoning. Students examine arguments in real-life situations which allows for a more willing exchange of ideas through asking questions, constructing arguments, and engaging in reasoned discussion.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate command of important philosophical terminology, themes, and arguments related to the systematic formulation and evaluation of beliefs by rational standards.
- State and evaluate non-trivial theories and arguments from various sources related to critical thinking.
- Relate critical thinking to personal freedom and empowerment.

Program Outcomes

Form, analyze, and assess beliefs while demonstrating intellectual humility and respect towards the beliefs of others.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PHIL& 120 - Symbolic Logic

Credits: 5

Introduces students to modern symbolic logic, including both propositional logic translation and proofs and predicate logic translation and proofs. Topics may include recognizing arguments, translating from a natural to a formal language, validity of arguments, logical implication, equivalency, and consistency.

Enrollment Requirement: MATH 97 with a grade of 2.0 or higher; or eligible for MATH 107 or higher.

Satisfies Requirement: Natural Science or, under certain conditions, the quantitative component of the basic skills requirement.

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Distinguish key concepts and terms in logic.
- Translate from English to the language of propositional and predicate logic.
- Construct truth tables to reveal the logical structure of individual statements, multiple statements, and determine the validity of an argument.
- Construct proofs in propositional and predicate logic.

Program Outcomes

Form, analyze, and assess beliefs while demonstrating intellectual humility and respect towards the beliefs of others.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

PHIL 160 - Introduction to the Philosophy of Science

Credits: 5

Introduces students to a critical look at the methods of inquiry associated with the sciences. Drawing from a broad range of historical and contemporary sources, topics will include: the aim of science; distinguishing science from non-science; scientific explanation, confirmation, and falsification; and the structure of scientific revolutions. Other topics may be discussed.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate command of important philosophical terminology, themes, and arguments related to philosophy of science.
- State and evaluate non-trivial theories and arguments from various sources related to philosophy of science.
- Trace the influence of philosophy on scientific theories and practices.

Program Outcomes

Form, analyze, and assess beliefs while demonstrating intellectual humility and respect

towards the beliefs of others.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PHIL 199 - Independent Study in Philosophy

Credits: 1-5

Allows students to independently study a topic of their special interest in philosophy. Students meet on a tutorial basis with a philosophy instructor. Credits, topics, and assignments vary according to student-faculty agreement.

Enrollment Requirement: Two courses in Philosophy, a topic that some member of the department is qualified to direct and evaluate, and consent from the division chair and instructor. Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate command of important philosophical terminology, themes, and arguments related to the agreed upon topic.
- State and evaluate non-trivial theories and arguments from various sources related to the agreed upon topic.

Program Outcomes

Form, analyze, and assess beliefs while demonstrating intellectual humility and respect towards the beliefs of others.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PHIL 200 - Introduction to the Philosophy of Religion

Credits: 5

Introduces students to the philosophy of religion, exploring such issues as the existence of God, faith and reason, the problem of evil, and the possibility of immortality.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate command of important philosophical terminology, themes, and arguments related to philosophy of religion.
- State and evaluate non-trivial theories and arguments from various sources related to philosophy of religion.
- Apply a consistent critical lens to the claims or doctrines of any religion.

Program Outcomes

- Form, analyze, and assess beliefs while demonstrating intellectual humility and respect towards the beliefs of others.
- Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PHIL 206 - Gender and Philosophy

Credits: 5

Examines how issues of gender have entered into discussions within the major fields of philosophy, including ethics, theory of knowledge, philosophy of science, philosophy of religion, and social and political philosophy.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English and Diversity

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate command of important philosophical terminology, themes, and arguments related to gender and philosophy.
- State and evaluate non-trivial theories and arguments from various sources related to gender and philosophy.
- Recognize the dominance of hegemonic masculinity on the discipline of philosophy.
- Evaluate the suppression or denigration of femininity on many philosophical topics.

Program Outcomes

- Form, analyze, and assess beliefs while demonstrating intellectual humility and respect towards the beliefs of others.
- Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PHIL 210 - Comparative Religion

Credits: 5

Introduces students to the world's major and newer religious traditions through philosophical, religious, and literary texts. Helps students to understand the philosophical similarities and differences among these religions. Religious traditions covered in this class may include: Zoroastrianism, Hinduism, Buddhism, Confucianism, Daoism, Judaism, Christianity, Islam, Sikhism, Baha'i, Santeria, Umbanda, Wicca, and New Age Theosophy.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English and Diversity

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate command of important philosophical terminology, themes, and arguments related to the world's major and newer religions.

- State and evaluate non-trivial theories and arguments from various sources related to the world's major and newer religions.
- Recognize how religious traditions influence each other over time.
- Evaluate how historical and political forces suppress or denigrate non-Western religious perspectives.

Program Outcomes

- Form, analyze, and assess beliefs while demonstrating intellectual humility and respect towards the beliefs of others.
- Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PHIL 216 - Women and World Religions

Credits: 5

Explores feminine perspectives of religion and spirituality in classical and indigenous religions today and throughout history. Examines images of the divine, mythological presentations, as well as roles and practices of women in each tradition through the study of traditional writings, feminist themes and feminist theologies. Addresses questions such as: What do sacred sources in traditional religions say about women and issues of gender; and how both men and women in society used oral and written sacred narratives. Previously HUMAN 224.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English and Diversity

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate command of important philosophical terminology, themes, and arguments related to views of sex, gender, and sexuality within the world's major and newer religions.

- Identify the influence of religious conceptions of sex, gender, and sexuality on identity, language, communication (both verbal and nonverbal), values, media, power, and violence.
- State and evaluate non-trivial theories and arguments related to sex, gender, and sexuality.
- Recognize the dominance of Essentialist/Biological and patriarchal religious perspectives.
- Evaluate the suppression or denigration of feminine identities which are intersectional, multiple, and fluid.

Program Outcomes

- Demonstrate intellectual humility in forming and defending their own beliefs while being respectful of the views of others.
- Systematically formulate, develop, and defend non-trivial answers to philosophical questions by applying rational standards.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PHIL 220 - Introduction to Eastern Philosophy

Credits: 5

Introduces students to eastern philosophies through philosophical, religious, and literary texts. Helps students understand the philosophical similarities and differences among these traditions, especially as they relate to reality, value, knowledge, the self and religion. Topics may include Hinduism, Buddhism, Confucianism, Legalism, Mohism, Daoism, and Neo-Confucianism.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate command of important philosophical terminology, themes, and arguments related to Eastern philosophies from India, China, and Japan.

- State and evaluate non-trivial theories and arguments from various sources related to eastern Philosophy.
- Identify how Eastern philosophical traditions influence each other over time.
- Recognize the dominance of Western philosophical perspectives.
- Evaluate the suppression or denigration of Eastern philosophical perspectives.

Program Outcomes

Form, analyze, and assess beliefs while demonstrating intellectual humility and respect towards the beliefs of others.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PHIL 236 - Existentialism

Credits: 5

Explores central themes of Existentialism, including personal responsibility, human freedom, the absence of external sources of value, the absurdity of human existence, and the meaning of life. Examines key philosophical and literary texts central to the Existentialist movement.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate command of important philosophical terminology, themes, and arguments related to human existence.
- State and evaluate non-trivial theories and arguments from various sources related to human existence.

Program Outcomes

Form, analyze, and assess beliefs while demonstrating intellectual humility and respect towards the beliefs of others.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PHIL 238 - Introduction to Philosophy of Human Rights

Credits: 5

Introduces students to some of the major issues concerning human rights. Sample topics include: Are there such things as human rights? Are human rights universal or are they culturally relative? Are minority rights exceptions to or different from human rights? Do future people have rights?

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English and Diversity

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate command of important philosophical terminology, themes, and arguments related to the nature of rights and their expression.
- State and evaluate non-trivial theories and arguments related to human rights.
- Recognize the dominance of Eurocentric philosophical perspectives.
- Evaluate the suppression or denigration of minority and indigenous philosophical perspectives.

Program Outcomes

- Form, analyze, and assess beliefs while demonstrating intellectual humility and respect towards the beliefs of others.
- Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PHIL 240 - Introduction to Ethics

Credits: 5

Introduces students to a philosophical study of morality. Helps students to understand and analyze competing ethical claims based on such standards as happiness, duty, human nature, theology, and custom. Questions considered may include: What makes actions right, if anything? What makes anything good or evil, if anything? What, if anything, makes a person a good person?

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate command of important philosophical terminology, themes, and arguments related to ethics.
- Apply the major normative ethical theories to practical moral considerations in public and private life.
- State and evaluate non-trivial theories and arguments related to ethics.
- Recognize the consequences of their actions and hold themselves accountable.

Program Outcomes

Form, analyze, and assess beliefs while demonstrating intellectual humility and respect towards the beliefs of others.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PHIL 243 - Environmental Ethics

Credits: 5

Introduces students to the moral relations between human beings and their natural environment. Topics include animal rights, population and consumption, pollution,

climate change, economics and the environment, and sustainability.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate command of important philosophical terminology, themes, and arguments related to the major normative ethical theories, theories of moral standing and value.
- Apply ethical theories to contemporary problems related to the environment.
- State and evaluate non-trivial theories and arguments related to environmental ethics.
- Recognize the consequences of their actions and hold themselves accountable.

Program Outcomes

Form, analyze, and assess beliefs while demonstrating intellectual humility and respect towards the beliefs of others.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PHIL 244 - Bioethics

Credits: 5

Introduces students to ethical issues relating to medical practice and biological research. Topics may include reproductive ethics (especially concerning genetic engineering and testing); definitions of health, disease, and disability; abortion and end of life care (advanced directives, assisted suicide, euthanasia); experimentation (both human and animal); and practitioner-patient relationships.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate command of important philosophical terminology, themes, and arguments related to the major normative ethical theories.
- Apply ethical theories to contemporary problems in biology and medicine.
- State and evaluate non-trivial theories and arguments related to bioethics.

Program Outcomes

Form, analyze, and assess beliefs while demonstrating intellectual humility and respect towards the beliefs of others.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

Phlebotomy

PHLEB 103 - Medical Assistant Phlebotomy Laboratory

Credits: 4

This course is designed to equip students with the essential skills and knowledge required for a successful career in phlebotomy. Participants will engage in hands-on learning experiences to master the art of blood collection while also focusing on vital aspects of patient care and laboratory procedures. Will include how to manage age specific needs, provide customer service, and obtain special collections. Previously PHLEB 102.

Enrollment Requirement: Instructor permission.

Course Fee: \$150.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate vital signs, EKG techniques and rhythm strip reading.
- Demonstrate accepted practices for infection control, isolation techniques, aseptic techniques, and methods for prevention of disease.
- Observe the OSHA Blood borne Pathogens Standard and Needle Safety Precaution Act.
- Demonstrate basic anatomy and physiology including veins of the arms and hands which phlebotomy is performed using correct anatomical terminology.

- Demonstrate knowledge of collection equipment, various types of additives used, special precautions necessary, and substances that can interfere in clinical analysis of blood constituents.
- Demonstrate requisitioning, specimen transport, and specimen processing with quality assurance and quality control in phlebotomy.
- Demonstrate professional communication (verbally and non-verbally) in the workplace.

Program Outcomes

- Define and describe phlebotomy, phlebotomy services, ethical, legal, and regulatory issues including HIPAA.
- Define and describe anatomic structures and function of body systems using correct medical terminology in relation to services performed by phlebotomists.
- Define and describe standard operating procedures to collect specimens including blood collection equipment, documentation, specimen handling, and transportation.
- Define and describe special collections in phlebotomy and effect on client safety.
- Perform infection control techniques and safety complying with federal, state, and locally mandated regulations regarding safety practices.
- Perform all steps of phlebotomy procedures including collection of equipment, reagents, supplies, interfering chemical substances, specimen requisitioning, collection, transport and processing.
- Perform appropriate professional communication and documentation of vital signs, EKGs, and phlebotomy procedures.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

PHLEB 104 - Medical Assistant Phlebotomy

Credits: 4

This course provides students with a solid foundation in the theoretical aspects of phlebotomy, ensuring a comprehensive understanding of the principles, ethics, and

regulations that govern this critical healthcare profession. Participants will delve into the core concepts that form the backbone of successful phlebotomy practice, setting the stage for a career characterized by precision, ethical conduct, and patient safety across the lifespan.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify phlebotomy, phlebotomy services, ethical, legal, and regulatory issues including HIPAA.
- Identify anatomic structures and function of body systems using correct medical terminology in relation to services performed by phlebotomists.
- Identify infection control and measures to ensure patient safety in various settings.
- Identify standard operating procedures to collect specimens including blood collection equipment, documentation, specimen handling, and transportation.
- Identify special collections in phlebotomy and effect on patient safety.

Program Outcomes

- Define and describe phlebotomy, phlebotomy services, ethical, legal, and regulatory issues including HIPAA.
- Define and describe anatomic structures and function of body systems using correct medical terminology in relation to services performed by phlebotomists.
- Define and describe standard operating procedures to collect specimens including blood collection equipment, documentation, specimen handling, and transportation.
- Define and describe special collections in phlebotomy and effect on client safety.
- Perform infection control techniques and safety complying with federal, state, and locally mandated regulations regarding safety practices.
- Perform all steps of phlebotomy procedures including collection of equipment, reagents, supplies, interfering chemical substances, specimen requisitioning, collection, transport and processing.
- Perform appropriate professional communication and documentation of vital signs, EKGs, and phlebotomy procedures.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as

necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

PHLEB 105 - Advanced Phlebotomy Practicum

Credits: 6

Consists of campus theory and lab as well as clinical experience in an assigned medical facility, to be arranged by the instructor. Provides practical experience in the role of the phlebotomy technician. Attendance is required to pass. Student must achieve a minimum grade of 2.5 or higher in order to pass the course. Meets the requirements for National Board Certification for a Phlebotomy Technician.

Enrollment Requirement: Completion of the Medical Assistant Phlebotomy Certificate at Green River College within 2 years of application, with a 2.5 GPA in all required courses.

Liability Insurance and Health (injury and sickness) Insurance.

Course Fee: \$250.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Perform all steps of phlebotomy procedures including collection of equipment, reagents, supplies, interfering chemical substances, specimen requisitioning, collection (venipunctures and skin punctures), transport and processing safely.
- Perform a minimum of 100 unaided venipunctures.
- Identify anatomic structures and function of body systems using correct medical terminology in relation to services performed by phlebotomists.
- Describe standard laboratory operations including safety and quality control as they pertain to federal, state, and locally mandated regulations.

Program Outcomes

- Describe phlebotomy, phlebotomy services, ethical, legal, and regulatory issues including HIPAA.
- Describe anatomic structures and function of body systems using correct medical terminology in relation to services performed by phlebotomists.

- Describe standard operating procedures to collect specimens including blood collection equipment, documentation, specimen handling, and transportation.
- Describe special collections in phlebotomy and effect on client safety.
- Perform infection control techniques and safety complying with federal, state, and locally mandated regulations regarding safety practices.
- Perform all steps of phlebotomy procedures including collection of equipment, reagents, supplies, interfering chemical substances, specimen requisitioning, collection, transport and processing.
- Communicate appropriately and professionally in the workplace.
- Document vital signs, EKGs, and phlebotomy procedures.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

Photography

PHOTO 101 - Beginning Black and White Photography

Credits: 5

Stimulates an interest in and furthers the understanding of the techniques and principles of photography. Introduces students to camera lenses, types of black and white film, proper film exposure, black and white film processing, and basic printmaking. Course requires a 35mm film camera.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$25.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate a working knowledge of camera operation.
- Apply the concepts of proper exposure, equivalent exposure, and the creative control of depth of field and motion.
- Demonstrate the processes of film development, contact printing and enlarging.
- Demonstrate the use of contrast control and burning and dodging techniques.
- Apply the concepts of photographic lighting and composition.
- Identify various genres and styles from the history of photography.
- Practice darkroom safety and health procedures.
- Apply the use of photographic terms and concepts in the evaluation of their work and others in a critique setting.

Program Outcomes

- Demonstrate an understanding of the elements and principals of design.
- Demonstrate responsibility by class attendance and completion of assignments and projects.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

PHOTO 102 - Intermediate Photography

Credits: 5

For students who have learned the fundamentals of film photography. Concentrates on the more complex aspects of exposure, printmaking skills, lighting and composition while increasing photographic concepts and vision. Students refine the aesthetic and technical aspects of their photography. Course requires a 35mm film camera.

Enrollment Requirement: PHOTO 101 with a grade of 1.0 or higher; or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$25.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate sound technical and visual skills in their work.
- Apply the concepts of the zone system to properly expose and develop their photographs.
- Properly demonstrate the process of fiber based printing technique.
- Demonstrate matting and presentation techniques.
- Create a photographic series that examines a cohesive theme or visual concept.
- Practice the use of alternative photographic techniques.
- Construct a written artist statement that supports their photographic project.

Program Outcomes

- Demonstrate an understanding of the elements and principals of design.
- Demonstrate responsibility by class attendance and completion of assignments and projects.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

PHOTO 103 - Advanced Photography

Credits: 5

For the student who has chosen to use photography as a form of creative expression. Students further refine their aesthetic and technical skills while developing a personal style. Students are directed toward personal projects that result in a portfolio of coherent images. Course requires a 35mm film camera.

Enrollment Requirement: PHOTO 102 with a grade of 1.0 or higher; or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$25.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate basic studio lighting techniques.
- Create photographs that demonstrate a high quality of craftsmanship and well examined design choices.
- Create and develop a photographic series that examines a cohesive theme or visual concept.
- Connect their project within, or as a response to, genres or styles from the history of photography.
- Demonstrate matting and presentation techniques.
- Construct a written artist statement that supports their photographic project.

Program Outcomes

- Demonstrate an understanding of the elements and principals of design.
- Demonstrate responsibility by class attendance and completion of assignments and projects.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

PHOTO 111 - Beginning Digital Photography

Credits: 5

Introduces the aesthetic and technical theories and techniques of digital photography. Topics include camera and lens operation, memory cards, file formats, exposure, white balance, composition, lighting, creativity, image editing software and output. Course requires a digital camera.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate a working knowledge of camera operational controls.

- Demonstrate photographic image editing software techniques.
- Demonstrate photographic composition and the elements and principals of design skills.
- Demonstrate photographic lighting skills.
- Demonstrate photographic image printing techniques.
- Demonstrate photographic creativity.
- Demonstrate photographic craftsmanship.

Program Outcomes

- Demonstrate an understanding of the elements and principals of design.
- Demonstrate responsibility by class attendance and completion of assignments and projects.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

PHOTO 112 - Intermediate Digital Photography

Credits: 5

Continues the study of aesthetic and technical theories and techniques of digital photography. Topics include intermediate level exposure, composition, lighting, creativity and image editing and correction techniques. Students begin to develop a personal photographic style. Course requires a digital camera.

Enrollment Requirement: PHOTO 111 with a grade of 1.0 or higher; or instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Execute intermediate level camera exposure techniques.
- Execute intermediate level composition principals, including the elements and principals of design.

- Execute intermediate level photographic lighting principals.
- Execute intermediate level photographic tonal conversion techniques.
- Execute intermediate levels photographic image editing techniques.
- Execute intermediate levels photography criticism techniques.
- Execute intermediate levels photographic creativity.
- Execute intermediate levels photographic craftsmanship.

Program Outcomes

- Demonstrate an understanding of the elements and principals of design.
- Demonstrate responsibility by class attendance and completion of assignments and projects.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

PHOTO 113 - Advanced Digital Photography

Credits: 5

Furtheres the study of aesthetic and technical theories and techniques of digital photography. Emphasizes the development of a related body of work demonstrating the student's personal photographic vision. Explores advanced digital camera and image editing software techniques. Course requires a digital camera.

Enrollment Requirement: PHOTO 112 with a grade of 1.0 or higher; or instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Conduct advanced level camera operation and exposure techniques.
- Conduct advanced level composition techniques incorporating the elements and principals of design.

- Conduct advanced level photographic lighting principals and techniques.
- Conduct advanced level photographic image editing techniques.
- Conduct advanced level photography criticism techniques and theories.
- Conduct advanced level photographic creativity.
- Conduct advanced level photographic craftsmanship.
- Conduct a research and presentation of a photographic portfolio project.

Program Outcomes

- Demonstrate an understanding of the elements and principals of design.
- Demonstrate responsibility by class attendance and completion of assignments and projects.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

PHOTO 197 - Independent Study-Photography

Credits: 1-5

Encourages students to study and develop independently in their major area of advanced photography. Students develop their own objectives, evaluation criteria, and performance standards in conjunction with the appropriate instructor.

Enrollment Requirement: Instructor consent.

Course Fee: \$25.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Develop their own learning objectives in conjunction with the appropriate instructor.

Program Outcomes

- Demonstrate an understanding of the elements and principals of design.

- Demonstrate responsibility by class attendance and completion of assignments and projects.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Physical Education

P E 101 - Physical Fitness Lab

Credits: 2

Focuses on cardiorespiratory fitness. Uses aerobic machines (ADA) in the fitness center. Lecture and lab activities focus on cardiorespiratory endurance, reduction or maintenance of body fat levels, safe and sound activity principles, nutrition, weight management/control, and risk factors for disease.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Gain information necessary to make wise choices regarding physical activity, nutrition, weight management/control, body composition and risk factors for disease.
- Develop programs and participated in safe and effective aerobic activity suitable to their individual goals and the course purpose.
- Maintain or improve cardiorespiratory endurance and body composition.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 102 - Jogging

Credits: 2

Focuses on cardiorespiratory fitness through jogging on a walking track, campus trails, and in nearby neighborhoods. Lecture and lab activities focus on cardiorespiratory endurance, reduction or maintenance of body fat levels, safe and sound activity principles, nutrition, weight management/control, and risk factors for disease.

Course Fee: \$8.50

Course Outcomes:

Students who successfully complete this class will be able to:

- Make wise choices regarding physical activity, nutrition, weight management/control, body composition, and risk factors for disease.
- Develop programs and participate in safe and effective jogging/running activities suitable to individual goals and the course purpose.
- Maintain or improve cardiorespiratory endurance and body composition.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 103 - Total Physical Fitness

Credits: 3

Emphasizes total body fitness and focuses on aerobic activity and resistance training. Lecture and lab activities focus on cardiorespiratory endurance, muscular strength and endurance, safe and sound activity principles, nutrition, and risk factors for disease.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Make wise choices regarding physical activity, nutrition, weight management/control, body composition, and risk factors for disease.

- Develop programs and participate in safe and effective aerobic and anaerobic activities suitable to their individual goals and the course purpose.
- Maintain or improve fitness levels and body composition.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 109 - Court Games

Credits: 3

Focuses on the fundamentals of badminton, pickleball, and volleyball as lifetime leisure activities. Enables the participant to practice and acquire proper techniques and strategies associated with badminton, pickleball, and volleyball and learn the rules governing each game.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate the rules and strategies pertinent to badminton, pickleball, and volleyball.
- Practice the following racket and paddle strokes: serve, lob, drop, smash, overhead, backhand, forehand, and drive.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 111 - Aerobic Walking

Credits: 2

Focuses on cardiorespiratory fitness through aerobic walking on a walking track, trails, and nearby neighborhoods surrounding the campus. Lecture and lab activities focus on cardiorespiratory endurance, reduction or maintenance of body fat levels, safe and sound activity principles, nutrition, weight management/control, and risk factors for disease.

Course Fee: \$8.50

Course Outcomes:

Students who successfully complete this class will be able to:

- Make wise choices regarding physical activity, nutrition, weight management/control, body composition, and risk factors for disease.
- Develop programs and participate in safe and effective aerobic walking techniques suitable to their individual goals and the course purpose.
- Maintain or improve cardio-respiratory endurance.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 112 - Karate

Credits: 1

Focuses on the basics of traditional Shito-Ryu karate. Students receive instruction in proper sport or self-defense etiquette, Japanese terminology, traditional Kata (form), basic self-defense techniques, basic blocks, kicks, and bag workout.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify the history, tradition, and philosophy of karate.
- Participate in karate forms.
- Practice and develop concentration, self-discipline, and self-esteem.
- Practice and develop skill in basic blocks, punches, and kicks.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 113 - Group Dynamic Activities

Credits: 1

Focuses on self-confidence and team-building skills through participation in a graduated series of problem-solving and challenge activities. Employs initiative activities, games, and an adventure-based challenge/ropes course. Meets two eight-hour days.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate the ability to work within a group by practicing leadership, followership, decision-making, and problem solving.
- Demonstrate the ability to evaluate sound physical activity and personal safety with respect to strengths and weaknesses within the group and the individual.
- Demonstrate the ability to recognize self-imposed boundaries and challenge those perceived limitations resulting in a fuller appreciation of self.
- Interact with nature as an outdoor learning environment in order to apply an appreciation and respect for the beauty of its various elements.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 114 - Cardio Conditioning

Credits: 1

Focuses on cardiorespiratory fitness using treadmills, stationary bicycles, stair climbers, rowing machines, cross-country ski machines, elliptical trainers, arc trainers, and ADA SciFit. Develops general endurance of the respiratory and circulatory systems, reduces or maintains body fat levels, and provides knowledge in safe and sound activity principles.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Make wise choices regarding physical activity and training techniques.
- Develop programs and participate in safe and effective aerobic activity suitable to their individual needs and the course purpose.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.

- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 115 - Kick-Box Aerobics

Credits: 1

Focuses on cardiorespiratory fitness using skills and techniques of kickboxing combined with music. Develops general endurance of the respiratory and circulatory systems, reduces or maintains body fat levels and teaches basic martial art skills such as punching, kicking, knee raises, and many combinations.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Make wise choices regarding physical activity and training techniques associated with kick-box aerobics.
- Participate in safe and effective aerobic activity suitable to their individual needs and the course purpose.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 117 - Badminton/Pickleball

Credits: 1

Focuses on the fundamentals of badminton and pickleball as lifetime leisure activities.

Enables participants to practice and acquire proper techniques and strategies associated with badminton and pickleball and learn the rules governing both games.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate the rules and strategies pertinent to badminton and pickleball.
- Practice the following racket and paddle strokes: serve, lob, drop, smash, overhead, backhand, forehand, and drive.
- Practice offensive and defensive skills and strategies for both games.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 118 - Volleyball

Credits: 1

Focuses on the fundamentals of volleyball as a lifetime leisure activity. Enables the participant to practice and acquire proper techniques and strategies associated with volleyball and learn the rules governing the game.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Practice the following fundamental skills of volleyball: passing, setting, hitting, serving, and blocking.
- Practice offensive and defensive skills and strategies.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 119 - Intermediate and Advanced Volleyball

Credits: 1

Focuses on intermediate and advanced volleyball skills and strategies. Students practice and acquire intermediate and advanced techniques and skills associated with volleyball.

Enrollment Requirement: P E 118 or instructor consent.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Practice the following volleyball skills: passing, setting, hitting, serving, and blocking.
- Practice offensive and defensive skills and strategies.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 121 - Badminton

Credits: 1

Focuses on the fundamentals of badminton as a lifetime leisure activity. Enables the participant to practice and acquire proper techniques and strategies associated with badminton and learn the rules governing the game.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Practice the following fundamental skills of badminton: serve, backhand, forehand, high clear, drop shot, and smash.
- Practice offensive and defensive skills and strategies.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 122 - Archery

Credits: 1

Focuses on the fundamentals of archery as a lifetime leisure activity. Enables the participant to practice and acquire proper techniques, strategies, and safety procedures associated with archery and gain knowledge of proper archery etiquette.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Practice the following fundamental skills of archery: stance, anchoring, bracing the bow, and releasing.
- Practice safety procedures.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 124 - Indoor Soccer

Credits: 1

Focuses on the fundamentals of indoor soccer as a lifetime leisure activity. Enables the participant to practice and acquire proper techniques and strategies associated with soccer and learn the rules governing the game. Played in the main gymnasium.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Practice the following fundamental skills of soccer: dribbling, shooting, passing, and clearing.
- Practice offensive and defensive skills and strategies.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 129 - Pickleball

Credits: 1

Focuses on the fundamentals of pickleball as a lifetime leisure activity. Enables the participant to practice and acquire techniques and strategies associated with pickleball and learn the rules governing the game.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 131 - Weight Training

Credits: 2

Focuses on muscular strength and endurance through resistance training with Nautilus and Cybex machines and free weights. Lecture and lab activities focus on safe and effective resistance training principles, basic functional anatomy, muscular strength and endurance, and basic nutrition.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Make wise, wellness choices regarding physical activity, application of basic principles of resistance training, and basic nutritional needs.

- Develop resistance training programs and actively participating in safe and effective activity suitable to their individual goals and the course purpose.
- Evaluate personal health and wellness status. fitness level, and/or physical skill development.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 132 - Strength Conditioning

Credits: 1

Focuses on muscular strength and endurance through resistance training with Nautilus and Cybex machines and free weights. Emphasizes safe and effective resistance training principles and muscular strength and endurance.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply the basic principles of resistance training.
- Develop programs and participate in safe and effective weight training activities suitable to their individual goals and the course purpose.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 136 - Yoga 1

Credits: 1

Focuses on Hatha yoga as a lifetime leisure activity. Emphasizes a progressive system of relaxation, movement, and conditioning techniques and a non-dogmatic approach to yoga focusing on flexibility, stretching and relaxing the body and mind.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Make wise choices regarding relaxation, stretching, and yoga techniques.
- Participate in safe and effective yoga techniques suitable to their individual needs and the course purpose.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 137 - Body Toning

Credits: 1

Focuses on total body conditioning using handheld weights, bands, and exercises set to music. Improves cardiorespiratory endurance, body composition, flexibility, and muscular strength and endurance.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Make wise choices regarding physical activity and training techniques.
- Participate in safe and effective aerobic and resistance activity suitable to their individual needs and the course purpose.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 138 - Zumba

Credits: 1

Focuses on cardiorespiratory endurance for men and women of all ages using Zumba dance techniques set to music. Develops general endurance of the respiratory and circulatory systems, reduces or maintains body fat levels, and provides knowledge in safe and sound activity principles.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Make wise choices regarding physical activity and training techniques.
- Participate in safe and effective aerobic activity suitable to their individual needs and the course purpose.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 147 - Pilates/Yoga

Credits: 1

Combines Pilates and yoga to focus on training core muscle groups; abdomen, lower back, hips, and buttocks. Focuses on building a stronger, healthier body, and improving posture, circulation, energy and stamina. Emphasizes stretching and relaxing the mind and body.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Make wise choices regarding participation in physical activity.
- Improve wellness by actively participating in safe and effective pilates and yoga techniques suitable to their individual needs and the course purpose.
- Evaluate personal health and wellness, fitness level, and/or physical skill development.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 148 - CORE Training

Credits: 1

Uses Swiss balls and free weights (dumbbells) to build core strength and functional fitness. Designed to tone the entire body with special emphasis on progressively

challenging the spinal extensors and deep abdominal muscles.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Make wise choices regarding participation in core training techniques.
- Improve wellness by actively participating in safe and effective core training techniques suitable to their individual needs and the course purpose.
- Evaluate personal health and wellness, fitness level, and/or physical skill development.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 149 - CORE Training for Health

Credits: 2

Uses Swiss balls and free weights (dumbbells) to build core strength and functional fitness. Core training progressively challenges the spinal extensors and deep abdominal muscles. Lecture and lab activities emphasize health benefits, disease prevention, basic nutrition and anatomy, resistance principles, and safe, effective activity techniques.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Make wise choices regarding participation in core training, disease prevention, and basic nutrition.
- Improve wellness by actively participating in safe and effective core training techniques suitable to their individual needs and the course purpose.
- Evaluate personal health and wellness, fitness level, and/or physical skill development.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 151 - Sport Conditioning

Credits: 2

An individualized, specialized fitness class using aerobic activity (fitness machines/jogging/interval training), anaerobic activity and weight training. Provides training programs and information appropriate for conditioning before, during and after a competitive, intramural or leisure sport season.

Course Fee: \$8.50

Course Outcomes:

Students who successfully complete this class will be able to:

- Make wise choices regarding physical activity, nutrition, weight management/control, body composition, and risk factors for disease.
- Develop programs and participate in safe and effective aerobic and anaerobic activity suitable to their individual sports and the course purpose.
- Maintain or improve cardiorespiratory endurance and body composition.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Critical Thinking** -Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of

emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 158 - Cardio Fusion

Credits: 1

A high-energy group fitness class using a "boot camp" format which promotes cardiorespiratory fitness and muscular strength and endurance. Applies interval training principles using handheld weights, resistance bands, therapy balls, and aerobic exercise set to music. Appropriate for all fitness levels.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Make wise choices regarding physical activity and training techniques.
- Participate in safe and effective physical activity suitable to their individual needs and the course purpose.
- Improve wellness by developing programs and actively participating in physical activity suitable to their individual goals and the course purpose.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 160 - Exercise and Nutrition

Credits: 3

Focuses on cardiorespiratory fitness, resistance training, and nutrition education. Lecture and lab activities include fitness and nutrition, safe and effective principles of activity, healthy food choices, caloric needs and recommendations, micronutrients, macronutrients, phytochemicals, antioxidants, diet and disease, and weight management.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Make wise choices regarding physical activity, nutrition, weight management/control, body composition, and risk factors for disease.
- Develop programs and participate in safe and effective aerobic activity suitable to their individual goals and the course purpose.
- Maintain or improve cardiorespiratory endurance and body composition.
- Demonstrate an enhanced awareness of nutrition and recognize the role that personal responsibility plays in adopting behaviors and making choices that impact personal well-being.
- Increase knowledge in and understanding of nutrition as it relates to risk factors for disease and the optimal functioning of the individual.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 165 - Exercise and Health

Credits: 3

Focuses on cardiorespiratory fitness, resistance training and disease prevention education. Lecture and lab activities include safe and effective activity principles, benefits of physical activity, and prevention of disease, including cardiovascular disease, cancer, osteoporosis, diabetes, and stroke.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Make wise choices regarding physical activity and disease prevention.
- Develop programs and participate in safe and effective aerobic activity suitable to their individual goals and the course purpose.
- Maintain or improve cardiorespiratory endurance and body composition.
- Demonstrate an enhanced awareness of disease prevention and recognize the role that personal responsibility plays in adopting behaviors and making choices that impact personal well-being.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 198 - Independent Study-Physical Education 1

Credits: 1-3

Enables students with a basic knowledge in a discipline to pursue areas of special interest when there is no offering in the regular curriculum.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify information and concepts specific to physical education.
- Clearly communicate in written form.
- Accept class policies and procedures outlined in the course syllabus.
- Turn in assignments and papers on time or be willing to accept the consequences of not doing so.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 201 - Advanced Physical Fitness Lab

Credits: 2

Allows students to continue and advance their health and fitness knowledge and their aerobic activity using treadmills, stationary bicycles, stair climbers, rowing machines, cross-country ski machines, elliptical trainers, arc trainers, and ADA SciFit machine.

Enrollment Requirement: P E 101 or instructor consent.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Make wise choices regarding physical activity, nutrition, weight management/control, body composition, and risk factors for disease.
- Develop and participate in safe and effective aerobic activity suitable to their individual goals and the course purpose.
- Maintain or improve cardio-respiratory endurance and body composition.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is

designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 202 - Physical Fitness Lab

Credits: 2

Allows students to continue and advance their health and fitness using treadmills, stationary bicycles, stair climbers, rowing machines, cross-country ski machines, elliptical trainers, arc trainers, and ADA SciFit machine.

Enrollment Requirement: P E 201 or instructor consent.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Make wise choices regarding physical activity, nutrition, weight management/control, body composition, and risk factors for disease.
- Develop and participate in safe and effective aerobic activity suitable to their individual goals and the course purpose.
- Maintain or improve cardiorespiratory endurance and body composition.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 212 - Advanced Jogging

Credits: 2

Allows students to continue and advance their health and fitness through jogging. Students jog on the walking track, campus trails, and through nearby neighborhoods.

Enrollment Requirement: P E 102.

Course Fee: \$8.50

Course Outcomes:

Students who successfully complete this class will be able to:

- Make wise choices regarding physical activity, nutrition, weight management/control, body composition, and risk factors for disease.
- Develop programs and participate in safe and effective jogging/running activities suitable to their individual goals and the course purpose.
- Maintain or improve cardiorespiratory endurance and body composition.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 215 - Advanced Aerobic Walking

Credits: 2

Allows students to continue to advance their health and fitness through aerobic walking. Students walk on the campus track, campus trails, and through nearby neighborhoods.

Enrollment Requirement: P E 111.

Course Fee: \$8.50

Course Outcomes:

Students who successfully complete this class will be able to:

- Make wise choices regarding physical activity, nutrition, weight management/control, body composition, and risk factors for disease.
- Develop programs and participate in safe and effective aerobic walking activities suitable to their individual goals and the course purpose.
- Maintain or improve cardiorespiratory endurance and body composition.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 216 - Advanced Karate

Credits: 1

Focuses on advanced techniques of traditional Shito-Ryu karate, traditional Kata (form) and other techniques. Students receive instruction in competition sport techniques, rules, and sparring. Japanese terminology, self-defense and basic techniques, or previous martial arts experience required.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Advance their knowledge and appreciation of the history, tradition, and philosophy of karate.
- Practice and develop advanced skill in blocking, punching, kicking, competition sport techniques, rules, and sparring.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 231 - Advanced Weight Training

Credits: 2

Allows students to continue and advance their health and fitness knowledge and their muscular strength and endurance through resistance training with Nautilus and Cybex machines and free weights.

Enrollment Requirement: P E 131 or instructor consent.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply basic principles of resistance training, understand basic nutritional needs, and identify major muscles.
- Develop programs and participate in safe and effective weight training activities suitable to their individual goals and the course purpose.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 236 - Yoga 2

Credits: 1

Focuses on Hatha yoga as a lifetime leisure activity. Emphasizes a progressively advanced system of relaxation, movement, and conditioning techniques and a non-dogmatic approach to yoga focusing on flexibility, stretching, and relaxing body and mind. Prior yoga experience required.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Make wise choices regarding relaxation, stretching, and yoga techniques.
- Participate in safe and effective yoga techniques suitable to their individual needs and the course purpose.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 237 - Advanced Body Toning

Credits: 1

Focuses on use of weights, benches and bands set to music. Allows students to continue to develop muscular strength and endurance, enhance cardio respiratory endurance, reduce or maintain body fat levels, and gain knowledge in safe and effective activity principles.

Enrollment Requirement: P E 137.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Make wise choices regarding physical activity and training techniques.
- Participate in safe and effective physical activity suitable to their individual needs and the course purpose.
- Improve wellness by developing programs and actively participating in physical activity suitable to their individual goals and the course purpose.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.

- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 247 - Advanced Pilates/Yoga

Credits: 1

Allows students to continue their training in Pilates and yoga by training core muscle groups- -abdomen, lower back, hips, and buttocks. Focuses on building a stronger, healthier body, and improving posture, circulation, energy and stamina. Emphasizes stretching and relaxing the mind and body.

Enrollment Requirement: P E 147.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Make wise choices regarding participation in physical activity.
- Improve wellness by actively participating in safe and effective Pilates and yoga techniques suitable to their individual needs and the course purpose.
- Evaluate personal health and wellness, fitness level, and/or physical skill development.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 248 - Advanced Core Training

Credits: 1

Focuses on utilizing Swiss balls and free weights (dumbbells) to build core strength and functional fitness. Allows students to continue to advance their core fitness by toning the entire body with special emphasis on progressively challenging the spinal extensors and deep abdominal muscles.

Enrollment Requirement: P E 148.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Make wise choices regarding physical activity and training techniques.
- Participate in safe and effective physical activity suitable to their individual needs and the course purpose.
- Improve wellness by developing programs and actively participating in physical activity suitable to their individual goals and the course purpose.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 251 - Advanced Sport Conditioning

Credits: 2

Uses aerobic activity, anaerobic activity, and weight training. Allows students to continue training and gain information appropriate for sport-specific conditioning.

Enrollment Requirement: P E 151.

Course Fee: \$8.50

Course Outcomes:

Students who successfully complete this class will be able to:

- Make wise choices regarding physical activity, nutrition, weight management/control, body composition, and risk factors for disease.
- Develop programs and participate in safe and effective aerobic and anaerobic activity suitable to their individual sports and the course purpose.
- Maintain or improve cardiorespiratory endurance and body composition.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 253 - Advanced Total Physical Fitness

Credits: 3

Emphasizes total body fitness focusing on aerobic activity and resistance training.

Allows students to continue and improve their total physical fitness.

Enrollment Requirement: P E 103.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Make wise choices regarding physical activity, nutrition, weight management/control, body composition, and risk factors for disease.
- Develop programs and participate in safe and effective aerobic and anaerobic activity suitable to their individual needs and the course purpose.
- Maintain or improve cardiorespiratory endurance and body composition.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.

- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 258 - Advanced Cardio Fusion

Credits: 1

Focuses on using a boot camp format which promotes cardio respiratory fitness and muscular strength and endurance. Applies interval training principles using hand-held weights, resistance bands, Swiss balls, and aerobic exercise set to music.

Enrollment Requirement: P E 158.

Course Fee: \$10.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Make wise choices regarding physical activity and training techniques.
- Participate in safe and effective physical activity suitable to their individual needs and the course purpose.
- Improve wellness by developing programs and actively participating in physical activity suitable to their individual goals and the course purpose.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

P E 298 - Independent Study-Physical Education 2

Credits: 1-3

Enables students with basic knowledge in a discipline to pursue areas of special interest when there is no offering in the regular curriculum.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate an enhanced understanding of their current knowledge of a physical education subject under the guidance of an instructor.
- Demonstrate an enhanced awareness and understanding of physical activity including safe participation technical proficiency, and skill development.

Program Outcomes

- Participate in academic and physical activities that address various goals of Healthy People 2020. Goals include physical activity, nutrition and weight status, diabetes, heart disease and stroke, and cancer.
- Apply training principles or rules of the sport in fitness- and skill-related classes.
- Identify and/or practice lifetime health and fitness skills that reduce risk of chronic disease and improve or maintain fitness and skill.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Physical Therapist Assistant

PTA 101 - Introduction to Physical Therapy

Credits: 2

Introduces the role of the physical therapist assistant in the practice of physical therapy with emphasis on the history of the profession, clinical practice, being a member of the healthcare team, PT/PTA relationship, ethics and professionalism, laws and regulations.

Enrollment Requirement: Acceptance into PTA program.

Course Fee: \$35.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe and provide examples of the mission, policies and strategies to be a successful student in the GRC PTA program.

- Discuss the history of the physical therapy profession.
- Describe and provide examples of the structure and functions of the American Physical Therapy Association (APTA), American Physical Therapy Association of Washington (APTAWA), Commission of Accreditation in Physical Therapy Education (CAPTE), and Federation of State Boards of Physical Therapy (FSBPT).
- Define the roles of the physical therapist and physical therapist assistant in clinical practice.
- Describe and provide examples of the variety of patients and clinical settings in the physical therapy practice.
- Identify the members of the healthcare team and their roles in the patient/client relationship.
- Describe and provide examples of the laws and regulations for the PT and PTA for the provisions of physical therapy in Washington State.
- Describe and provide examples of ethics and professionalism as defined by the APTA.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Provide care in a safe, legal and ethical manner.
- Communicate effectively and appropriately with patients, families, physical therapists and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Instruct patients, families and other health care providers using techniques consistent with the level of the audience.
- Function as integral team members and participate in the team process.
- Transition to successful employment as PTAs.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PTA 102 - Health Professional and Patient Interaction

Credits: 2

Explore personal self-reflection, behaviors and attitudes that can influence the respectful interaction and communication between the health professional and patient relationship across the life span in the delivery of care.

Enrollment Requirement: Acceptance into PTA program.

Course Outcomes:

Students who successfully complete this class will be able to:

- Engage in critical self-reflection.
- Clarify the PTA's role in shaping the health professional and patient relationship.
- Explore effective models of interprofessional communication and collaboration for the delivery of quality and compassionate care.
- Develop awareness of the larger health care and societal contexts in which each relationship takes place.
- Clarification of personal, professional, and societal values which define the complexity of interactions and the unique perspective that a health professional and patient each brings to their relationship.
- Develop effective communication and collaborative skills within the healthcare team.

Program Outcomes

- Provide care in a safe, legal and ethical manner.
- Communicate effectively and appropriately with patients, families, physical therapists and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Instruct patients, families and other health care providers using techniques consistent with the level of the audience.
- Function as integral team members and participate in the team process.
- Transition to successful employment as PTA.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PTA 104 - Applied Anatomy

Credits: 3

Covers anatomy of the musculoskeletal system including bony landmarks; origins, insertions, innervation of muscles and fundamentals of clinical kinesiology.

Enrollment Requirement: Acceptance into PTA program.

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify movements in the cardinal planes.
- Define medical terminology related to positions and locations in the body.
- Explain and apply arthrokinematic principles of motion to synovial joints.
- Define and identify types of muscular contractions.
- Identify prime movers for musculoskeletal movements.
- Define torque and explain 3 types of lever systems and apply these concepts to basic motions.
- Explain the relationship of center of gravity and base of support and how they interact.
- Name and identify the attachments, action and innervation of major muscles.
- Describe ideal posture and alignment of the spine and appendages.
- Identify and describe the role of joint components including: ligament, bursa, tendon, cartilage.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Provide care in a safe, legal and ethical manner.
- Communicate effectively and appropriately with patients, families, physical therapists and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Instruct patients, families and other health care providers using techniques consistent with the level of the audience.
- Function as integral team members and participate in the team process.
- Transition to successful employment as PTAs.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

PTA 105 - Patient Care Skills Part I

Credits: 2

Introduction to current best practice and skills related to preparation for patient care, body mechanics, positioning and draping, vital signs, infection control, wounds, emergencies, activities of daily living, and wheelchair features and activities.

Enrollment Requirement: Acceptance into PTA program.

Course Fee: \$19.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe and provide examples of the roles of the PT and PTA in relation to patient care including the plan of care, informed consent, HIPAA, professionalism, communication, basic documentation, evidence-based practice and International Classification of Functioning, Disability and Health (IFC).
- Demonstrate proper body mechanics and posture during patient care to avoid injuries.
- Demonstrate proper patient positioning and draping to maintain proper body function and avoid secondary complications due to immobility and patient comfort and modesty.
- Accurately measure and document temperature, respiratory rate, oxygen saturation, blood pressure, heart rate and pain.
- Perform manual blood pressure assessment with using proper technique and patient positioning.
- Demonstrate standard precautions for infection control which include donning and doffing personal protective equipment (PPE), hand hygiene and set up of sterile field.
- Demonstrate how to maneuver and propel a wheelchair.
- Accurately measure and fit a wheelchair and be able to describe the components of a wheelchair.
- Define and describe the different types of activities of daily living.
- Describe and provide examples of when to modify or cease patient care interventions based on signs and symptoms.
- Describe and provide examples of home and environment assessments.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Provide care in a safe, legal and ethical manner.
- Transition to successful employment as PTA.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as

necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

PTA 106 - Neuroscience

Credits: 2

Introduces neuroscience as it relates to the practice of physical therapy.

Enrollment Requirement: Acceptance into PTA program.

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe and identify the basic structure and function of the brain, spinal cord, and peripheral nervous system.
- Describe the components and paths of the primary somatosensory pathways.
- Describe the components and path of the motor pathways.
- Identify the three sensory mechanisms used in maintaining balance.
- Describe the signs and symptoms of diseases and disorders affecting the nervous system.
- Explain how nervous system dysfunctions affect functional ability.
- Complete sensory testing for primary and cortical sensations.
- Describe testing for selected cranial nerve functions and relate to the associated cranial nerve.
- Describe the signs, symptoms, and likely causes of movement disorders seen with upper and lower motor neuron dysfunction.
- Identify and map the dermatomal and peripheral nerve distributions for the extremities.
- Identify and describe myotomal/key muscle testing for the extremities.
- Describe reflex testing and normal responses.
- Describe testing and the responses/results for cranial nerve functions.
- Describe the signs, symptoms, and likely causes of movement disorders seen with upper and lower motor neuron dysfunction including but not limited to: Parkinson's, cerebellar lesions, CVAs, spinal cord injury, radiculopathy.
- Administer and score standardized functional outcome measures for balance.
- Describe the movement disorders seen with pathology of the basal ganglia and of the cerebellum.

- Define and describe communication disorders and strategies to promote effective patient care.
- Describe the components of the autonomic nervous system and disorders that affect the ANS.
- Recognize signs and symptoms of vestibular disorders.
- Accurately assess with special testing for vestibular disorders.
- Accurately and effectively complete and score tests for coordination and balance disorders.
- Identify the four components used to assess orientation.
- Describe how mental function is assessed.
- Administer and score the Mini Mental Status Examination.

Program Outcomes

- Implement plans of care developed by the PT.
- Provide care in a safe, legal and ethical manner.
- Communicate effectively and appropriately with patients, families, PTs, and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Instruct patients, families and other care providers using techniques consistent with the level of the audience.
- Function as an integral team member and participate in the team process.
- Transition to successful employment as PTAs.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

PTA 107 - Procedures of Patient Care 2

Credits: 1

Introduction to current best practices and functional skills related to bed mobility, transfer training, assistive devices and gait throughout the continuum of patient care.

Enrollment Requirement: Acceptance into PTA program.

Course Fee: \$17.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Perform safe and efficient bed mobility.

- Describe and provide examples of the various levels of assist for mobility, transfers and gait.
- Perform various transfers with efficiency, proper technique and safety.
- Describe and provide examples of how to use various mechanical lifts and other therapeutic devices.
- Selection and fit of appropriate assistive devices.
- Perform efficient and safe techniques for gait training, use of various assistive devices and managing environmental obstacles.
- Perform proper guarding techniques with all mobility.
- Identify safety concerns with all levels of functional mobility.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Provide care in a safe, legal and ethical manner.
- Communicate effectively and appropriately with patients, families, physical therapists and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Instruct patients, families and other health care providers using techniques consistent with the level of the audience.
- Function as integral team members and participate in the team process.
- Transition to successful employment as PTA.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PTA 110 - Principles of Physical Agents 1

Credits: 1

Introduces practice of external compression and bandaging; length, girth, and volumetric measurement; thermotherapy including superficial heat, cryotherapy and paraffin;

hydrotherapy; wound care and assessment; massage; pulmonary hygiene; cervical and lumbar traction.

Enrollment Requirement: Acceptance into PTA program.

Course Outcomes:

Students who successfully complete this class will be able to:

- Analyze a peer-reviewed journal article.
- Describe the effects of non-thermal and thermal agents in addressing pain and tone.
- Describe the underlying mechanisms behind pain and tone.
- Explain the contraindications, indications, physiology, rationale theory. and therapeutic effects of:
 - a. Cryotherapy;
 - b. Bandaging and external compression to reduce edema and shape soft tissue;
 - c. Hydrotherapy;
 - d. Massage;
 - e. Pulmonary hygiene techniques;
 - f. Superficial thermotherapy;
 - g. Traction.
- Present a research paper.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Provide care in a safe, legal and ethical manner.
- Communicate effectively and appropriately with patients, families, physical therapists and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Transition to successful employment as PTA.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PTA 111 - Principles of Physical Agents 2

Credits: 3

Covers the study of and application of physical therapy agents including ultrasound, phonophoresis, iontophoresis, electromagnetic radiation, electrotherapy, and biofeedback.

Enrollment Requirement: Acceptance into PTA program.

Course Outcomes:

Students who successfully complete this class will be able to:

- Explain the contraindications, indications, physiology, rationale, theory, and therapeutic effects of electromagnetic radiation.
- Explain the contraindications, indications, physiology, rationale, theory, and therapeutic effects of Electrotherapy including biofeedback.
- Explain the contraindications, indications, physiology, rationale, theory, and therapeutic effects of Iontophoresis.
- Explain the contraindications, indications, physiology, rationale, theory, and therapeutic effects of Laser.
- Explain the contraindications, indications, physiology, rationale, theory, and therapeutic effects of Phonophoresis.
- Explain the contraindications, indications, physiology, rationale, theory, and therapeutic effects of Ultrasound.
- Present an analysis of a peer-reviewed journal article.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Provide care in a safe, legal and ethical manner.
- Communicate effectively and appropriately with patients, families, physical therapists and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Transition to successful employment as PTA.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

PTA 114 - Fundamentals of Tests and Measures

Credits: 3

Covers the role of the physical therapist assistant in collecting subjective data, preparing for treatment, communication skills, performing and developing the skills of collecting objective data, and the clinical reasoning process. These tests and measures include mental functions, components of mobility and function, and musculoskeletal examination.

Enrollment Requirement: Acceptance into PTA program.

Course Fee: \$6.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe and provide examples of the interview process, verbal and nonverbal communication and the uniqueness of each patient and their functional status.
- Describe and provide examples of how to perform a chart review and gather appropriate subjective information and prepare for interventions and data collection.
- Perform goniometry measurements accurately and efficiently of the extremities and document findings.
- Perform safe, efficient and effective manual muscle testing skills in the appropriate position with gravity diminished and against gravity.
- Describe and provide examples of the grading scale for gross muscle testing, manual muscle testing, and muscle length testing.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Provide care in a safe, legal and ethical manner.
- Instruct patients, families and other health care providers using techniques consistent with the level of the audience.
- Transition to successful employment as PTA.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as

necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

PTA 115 - Posture, Gait and Movement

Credits: 1

Covers the study of the principles and assessment of posture, the mechanics and assessment of typical and atypical gait, and the function of prostheses and orthoses. Previously PTA 113.

Enrollment Requirement: Acceptance into PTA program.

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify ideal postural alignment, typical deviations from it.
- Describe observed posture.
- Identify the components of typical human gait.
- Describe the typical human gait cycle.
- Describe atypical gait patterns.
- Identify possible muscular, skeletal and/or neurologic causes of atypical gait patterns.
- For selected lower extremity prosthesis, orthoses and spinal orthoses:
 - Describe their structure.
 - Identify the function of selected components.
- Explain the use and care of these devices to maintain hygiene and skin integrity.
- Identify indications for their use.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Provide care in a safe, legal and ethical manner.
- Transition to successful employment as PTA.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as

necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

PTA 130 - Introduction to Pathology 1

Credits: 2

Introduces normal body structure and function, pathological states and conditions, and underlying concepts of health and disease most commonly seen in the practice of physical therapy throughout the life span. Medical terminology is also introduced. This is part one of a two-part course.

Enrollment Requirement: Acceptance into PTA program.

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe and provide examples of the normal body structures and function and selected pathologies.
- Describe and provide examples of the risk factors and preventative measure of selected diseases and disorders.
- Recognize signs and symptoms associated with a variety of diseases and disorders which include genetic and congenital disorders, oncology and autoimmune disorders.
- Review basic medical terminology with word building and orientation to the body as a whole followed by medical terminology related to specific body systems.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Communicate effectively and appropriately with patients, families, physical therapists and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Transition to successful employment as PTA.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is

designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PTA 131 - Introduction to Pathology 2

Credits: 2

Continuation of the principles of pathological states and conditions affecting the major body systems most commonly seen in the practice of physical therapy throughout the lifespan. Medical terminology is continued and coincides with the body systems. Course two of a two-part series.

Enrollment Requirement: Acceptance into PTA program.

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe and provide examples of the structure and function and selected pathologies of the major body systems.
- Describe and provide examples of the risk factors and preventative measure of selected diseases and disorders of the major body systems.
- Recognize signs and symptoms associated with a variety of diseases and disorders of the major body systems.
- Describe and provide examples of basic medical terminology with word building and orientation to the body as a whole followed by medical terminology related to specific body systems.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Communicate effectively and appropriately with patients, families, physical therapists and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Transition to successful employment as PTA.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is

designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PTA 151 - Preparation for Clinical Experience

Credits: 1

Introduction and discussion on topics related to physical therapy practice and preparation for clinical experiences. Students will complete clinical requirements and meet deadlines for integrated and terminal clinical experiences. This is a pass/no credit course.

Enrollment Requirement: Acceptance into PTA program.

Course Fee: \$40.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Compile required program and clinical requirements for clinical placements.
- Complete HIPAA and AIDS training.
- Review of all required documents for clinical placements.
- Complete student information into the EXXAT database.
- Understand the principles and application of basic documentation.
- Develop a personal and profession plan for clinical experiences.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Provide care in a safe, legal and ethical manner.
- Communicate effectively and appropriately with patients, families, physical therapists and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Instruct patients, families and other health care providers using techniques consistent with the level of the audience.
- Function as integral team members and participate in the team process.
- Transition to successful employment as PTA.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as

necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PTA 160 - Principles of Physical Agents 1 Lab

Credits: 3

The practice of external compression and bandaging; length, girth, and volumetric measure; thermotherapy including superficial heat, cryotherapy and paraffin; hydrotherapy; soft tissue mobilization; pulmonary care; cervical and lumbar traction.

Enrollment Requirement: Acceptance into PTA program.

Course Fee: \$15.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Accurately record girth, length and volumetric displacement measurements.
- Safely and effectively apply superficial thermotherapy.
- Safely and effectively perform mechanical traction.
- Safely and effectively administer mechanical compression and bandaging.
- Perform pulmonary hygiene including assisted coughing and postural drainage, percussion and vibration.
- Effectively perform soft tissue mobilization/therapeutic massage.
- Communicate effectively with patients and/or family members via intervention scenarios.
- Accurately complete SOAP note documentation for given scenarios.
- Modify interventions as needed for safe and effective outcomes.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Provide care in a safe, legal and ethical manner.
- Communicate effectively and appropriately with patients, families, physical therapists and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Instruct patients, families and other health care providers using techniques consistent with the level of the audience.
- Function as integral team members and participate in the team process.

- Transition to successful employment as PTA.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PTA 161 - Principles of Physical Agents 2 Lab

Credits: 3

Practical application of physical therapy agents including ultrasound, phonophoresis and iontophoresis, EM radiation, and electrotherapy.

Enrollment Requirement: Acceptance into PTA program.

Course Fee: \$21.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate and effectively apply electrotherapy (TENS, NMES, FES, iontophoresis.)
- Select parameters for safe and effective TENS intervention.
- Select parameters for safe and effective US/phonophoresis intervention.
- Demonstrate and effectively apply ultrasound/phonophoresis.
- Document intervention thoroughly with SOAP note format.
- Modify physical agents interventions safely and effectively.
- Demonstrate and effectively apply EM spectrum agents, including diathermy, biofeedback and laser.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Provide care in a safe, legal and ethical manner.
- Communicate effectively and appropriately with patients, families, physical therapists and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Instruct patients, families and other health care providers using techniques consistent with the level of the audience.
- Function as integral team members and participate in the team process.

- Transition to successful employment as PTA.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PTA 163 - Posture, Gait and Movement Lab

Credits: 2

Provides laboratory experiences related to the assessment of posture and gait and the function of prostheses and orthoses.

Enrollment Requirement: Acceptance into PTA program.

Course Fee: \$14.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate ideal postural alignment.
- Document observed posture.
- Identify the components of typical human gait.
- Describe the typical human gait cycle.
- Describe and demonstrate atypical gait patterns.
- Implement the use of lower extremity prostheses and orthoses and spinal orthoses.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Provide care in a safe, legal and ethical manner.
- Communicate effectively and appropriately with patients, families, physical therapists and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Instruct patients, families and other health care providers using techniques consistent with the level of the audience.

- Function as integral team members and participate in the team process.
- Transition to successful employment as PTA.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

PTA 164 - Applied Anatomy Lab for PTA

Credits: 3

Application of anatomy of the musculoskeletal system including bony landmarks; origins, insertions, innervation of muscles and fundamentals of clinical kinesiology.

Enrollment Requirement: Acceptance into PTA program.

Course Fee: \$15.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify movements in the cardinal planes.
- Use correct medical terminology to identify positions and locations in the body.
- Explain and apply arthrokinematic principles of motion to synovial joints.
- Identify types of muscular contractions during movements.
- Identify prime movers for musculoskeletal movements.
- Define torque and explain 3 types of lever systems and apply these concepts to basic motions.
- Explain the relationship of center of gravity and base of support and how they interact.
- Identify and palpate major bony landmarks and muscles for the main joints.
- Describe and identify ideal posture and alignment of the spine and appendages.
- Describe the role of an isolated peripheral nerve on overall motor function.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Provide care in a safe, legal and ethical manner.

- Communicate effectively and appropriately with patients, families, physical therapists and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Instruct patients, families and other health care providers using techniques consistent with the level of the audience.
- Function as integral team members and participate in the team process.
- Transition to successful employment as PTA.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

PTA 166 - Neuroscience Lab

Credits: 2

Application of the skills and knowledge in neuroanatomy and neurology as it relates to motor control and physical therapy.

Enrollment Requirement: Acceptance into PTA program.

Course Fee: \$23.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Perform selected procedures to gather data, score responses, and provide interventions related to the sensory system.
- Perform selected procedures to gather data, score responses, and provide interventions related to the motor system including myotomal testing and reflex testing.
- Perform selected procedures to gather data, score responses, and provide interventions related to cognition and mentation.
- Perform selected procedures to gather data, score responses, and provide interventions related to coordination.
- Perform selected procedures to gather data, score responses, and provide interventions related to balance.

- Perform selected procedures to gather data, determine responses, and provide interventions related to the vestibular system.
- Identify and map the distribution of sensory peripheral nerves and dermatomes for the extremities.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Provide care in a safe, legal and ethical manner.
- Communicate effectively and appropriately with patients, families, physical therapists and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Instruct patients, families and other health care providers using techniques consistent with the level of the audience.
- Function as integral team members and participate in the team process.
- Transition to successful employment as PTA.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

PTA 199 - Independent Study-Physical Therapy

Credits: 1-8

Students may participate in an in-depth study of specific areas of physical therapy through library research, field investigation, experience in selected activities, or structured clinical activity under instructor guidance. Maximum of eight credits.

Enrollment Requirement: Instructor consent.

PTA 201 - Current Trends in Physical Therapy Practice

Credits: 2

Study of current trends in the business of physical therapy and clinical education. Discussion of various topics related to healthcare, billing practices, documentation, legal and ethical issues, professionalism and career development.

Enrollment Requirement: Acceptance into PTA program.

Course Fee: \$35.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Discuss current topics related to healthcare, reimbursement and documentation.
- Discuss legal and ethical issues and ramifications of actions in physical therapy.
- Discuss and describe common physical therapy business practices.
- Describe and provide examples of professionalism in the workplace and clinical setting.
- Discuss and apply strategies to deal with challenges in healthcare.
- Prepare for terminal clinical experiences.
- Explore career development.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Provide care in a safe, legal and ethical manner.
- Communicate effectively and appropriately with patients, families, physical therapists and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Instruct patients, families and other health care providers using techniques consistent with the level of the audience.
- Function as integral team members and participate in the team process.
- Transition to successful employment as PTA.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

PTA 205 - Functional Training

Credits: 3

Covers the study of and application of functional training techniques used in the treatment of physical dysfunction and evidence-based practice.

Enrollment Requirement: Acceptance into PTA program.

Course Fee: \$15.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify the effect of hemiplegia and lower extremity amputation on functional abilities and selection of rehabilitation techniques across generations.
- Identify functional expectations for trans-femoral and trans-tibial amputees within their lifespan.
- Instruct a patient and caregiver in ADLs including bed mobility, transfers, gait and wheelchair use and basic self-care.
- Instruct a patient and caregiver in developmental activities as part of functional training program and progress those activities to achieve a stated goal.
- Demonstrate safe and effective guarding techniques when instructing individuals in functional activities.
- Instruct patient/caregivers in safe and effective performance of functional activities.
- Identify barriers to patient safety and safety awareness.
- Administer a standard instrument to determine ADL and functional levels.
- Identify appropriate adaptive devices and instruct an individual in their use and care.
- Implement a progressive mobility program for a lower extremity amputee.
- Identify the effect of phantom limb pain on functional performance and outcomes through a patient's lifespan.
- Identify and determine stages of pressure ulcers.
- Describe positioning to prevent pressure ulcers, bony prominences that are at risk of pressure ulcers.
- Evaluate and apply a peer reviewed literature article based on current trends within physical therapy treatment of hemiplegia and/or the lower extremity amputee across patient generations and apply to physical practice.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Provide care in a safe, legal and ethical manner.
- Communicate effectively and appropriately with patients, families, physical therapists and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Instruct patients, families and other health care providers using techniques consistent with the level of the audience.
- Function as integral team members and participate in the team process.
- Transition to successful employment as PTA.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

PTA 210 - Therapeutic Exercise

Credits: 2

Focuses on theory and principles of therapeutic exercise and selected kinesiology and neurologic principles related to therapeutic exercise.

Enrollment Requirement: Acceptance into PTA program.

Course Outcomes:

Students who successfully complete this class will be able to:

- Discuss the rationale, indications and contraindications for therapeutic exercise and its parameters including: PROM, AROM, stretching, mobilization, strengthening, aerobic exercise, aquatic exercise, balance and proprioception, PNF.
- Describe the exercise progression sequence (of mobility, stability, controlled mobility, skill) and apply it to patient care.
- Identify and describe the, indications and precautions/contraindications for therapeutic exercise including: PROM, AROM, stretching, mobilization, strengthening, aerobic exercise, aquatic exercise, balance and proprioception, PNF.
- Appropriately modify an exercise session based on patient response.
- Educate a patient or family member on a home exercise program.
- Document the implementation of exercises interventions including exercise instruction consistent with defensible professional documentation guidelines from the APTA.
- Compare and contrast types of ROM exercises (active, active assistive, passive, self, mobilization), including indications, goals, parameters, contraindications & precautions, limitations & benefits.
- Compare and contrast exercise programs designed to address strength, endurance and power.
- Calculate and determine the target heart rate for a given patient scenario.
- Recognize and identify the normal and abnormal responses to aerobic exercise.

Program Outcomes

- Implement plans of care developed by physical therapists.

- Provide care in a safe, legal and ethical manner.
- Communicate effectively and appropriately with patients, families, physical therapists and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Instruct patients, families and other health care providers using techniques consistent with the level of the audience.
- Transition to successful employment as PTA.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

PTA 211 - Neurological Rehabilitation

Credits: 2

Focuses on procedures and techniques applied to the treatment of specific impairments primarily of neurologic origin.

Enrollment Requirement: Acceptance into PTA program.

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe the role of physical therapy in the treatment of:
 - spinal cord injuries (SCI);
 - traumatic brain injuries (TBI);
 - cerebrovascular accidents (CVAs);
 - cerebral palsy and selected pediatric conditions;
 - selected neurologic disorders.
- Describe the therapeutic interventions directed at adults and children with neuromuscular dysfunctions.
- Describe and apply the principles of motor learning and motor control theories and gather data relating to an individual's motor control level.

- Describe and provide examples of the PTA role as a mandatory reporter in the suspected cases of abuse of vulnerable populations.
- Implement the ICF to describe patient status as it relates to neurorehabilitation.
- Implement the neurological assessment scale of mental function in therapeutic intervention with the neuro population.
- Describe spasticity, describe muscle tone, and select interventions to address abnormal tone.
- Describe normal motor milestones and use the development sequence in therapeutic interventions.
- Describe and identify righting and equilibrium reactions.
- Thoroughly interview patients/caregivers regarding prior level of function and present health conditions.
- Educate patients and caregivers regarding interventions.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Provide care in a safe, legal and ethical manner.
- Instruct patients, families and other health care providers using techniques consistent with the level of the audience.
- Transition to successful employment as PTA.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

PTA 212 - Acute Care

Credits: 1

Explores physical therapy in acute care settings including cardiac care, pulmonary care, burn care and geriatrics.

Enrollment Requirement: Acceptance into PTA program.

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe the role of physical therapy care in acute care, wound care, cardiac care, and geriatrics.
- Describe evidence based physical therapy interventions to address specific patient situations including:
 - mobilizing patients in critical care
 - airway clearance techniques

- wound management interventions
- conducting cardiac rehabilitation exercises
- post-op surgery and pulmonary precautions
- Describe the physiology and pathophysiology of selected disease processes, typical physiologic responses to treatment, and contraindications to treatment.
- Demonstrate safe equipment handling and usage.
- Participate in medical record review, documentation and interdisciplinary communication.
- Identify and select appropriate patient education strategies.
- Describe population demographics including variety of patient values and preferences and the impact on the healthcare system.
- Describe pharmacological interventions as they relate to physical therapy.
- Identify thoracoabdominal movements and breathing patterns during activities.
- Interview patient and/or caregivers regarding prior level of function and present health conditions.
- Instruct patient and family/caregivers in an effective home program
- Understand and implement a documented plan of care in relation to acute care.
- Assess the physiological response to activity via observation and vital signs.
- Describe the presentation of patients with COPD, asthma, and restrictive lung disease.
- Incorporate pain management strategies into the physical therapy intervention plan.
- Accurately document an intervention session in acute care.
- Demonstrate correct universal precautions, infection control procedures, isolation techniques, and wound management interventions.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Provide care in a safe, legal and ethical manner.
- Communicate effectively and appropriately with patients, families, physical therapists and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Instruct patients, families and other health care providers using techniques consistent with the level of the audience.
- Function as integral team members and participate in the team process.
- Transition to successful employment as PTA.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

PTA 213 - Orthopedic Physical Therapy

Credits: 2

Explores orthopedic pathology and common diagnostic procedures. Covers the study of therapeutic comprehensive intervention exercise, manual techniques, and principles of tissue healing in relationship to orthopedic conditions encountered in the practice of physical therapy.

Enrollment Requirement: Acceptance into PTA program.

Course Fee: \$12.00

Course Outcomes:

Students who successfully complete this class will be able to:

- State the general guidelines, precautions/contraindications for treatment of selected orthopedic conditions and surgical interventions.
- Select and perform a comprehensive orthopedic intervention program, including progression, when given a protocol, plan of care or treatment goals.
- Educate a patient or family member in a home portion of an intervention plan.
- Select and perform selective orthopedic screening tests/tools and document findings.
- Describe typical tissue healing times and phases of healing.
- Discuss the rationale for post-operative precautions.
- Describe rationale for selected orthopedic interventions and the expected response.
- Describe the presentation, pathology, and impairments of common orthopedic conditions such as osteo arthritis, tendinitis/osis, sprains, dislocations, fractures.
- Describe how tissue irritability and staging influences intervention selection and intensity.
- Document an intervention session of orthopedic PT using SOAP note format.
- Develop a home program and instruct the patient in the program.
- State principles of ergonomics, make modifications for optimal ergonomics.
- Apply principles of pain science to treat individuals with chronic pain or pain sensitization.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Provide care in a safe, legal and ethical manner.

- Communicate effectively and appropriately with patients, families, physical therapists and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Instruct patients, families and other health care providers using techniques consistent with the level of the audience.
- Function as integral team members and participate in the team process.
- Transition to successful employment as PTA.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PTA 220 - Pediatric Rehabilitation

Credits: 1

Focuses on procedures and techniques applied to the treatment of specific impairments in a pediatric population.

Enrollment Requirement: Acceptance into PTA program.

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe the role of physical therapy in the treatment of cerebral palsy and selected pediatric conditions.
- Describe the evidence based therapeutic interventions directed at children with neuromuscular dysfunctions.
- Describe and apply the principles of motor learning and motor control theories and gather data relating to an individual's motor control level.
- Understand the PTA role as a mandatory reporter in the suspected cases of abuse of vulnerable populations.
- Implement the ICF to describe patient status as it relates to neurorehabilitation.
- Identify spasticity, muscle tone, and interventions for abnormal tone.

- Describe normal motor milestones and be able use the development sequence in therapeutic interventions.
- Describe and identify righting and equilibrium reactions.
- Interview patients/caregivers regarding prior level of function and present health conditions.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Provide care in a safe, legal and ethical manner.
- Communicate effectively and appropriately with patients, families, physical therapists and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Instruct patients, families and other health care providers using techniques consistent with the level of the audience.
- Function as integral team members and participate in the team process.
- Transition to successful employment as PTAs.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

PTA 221 - Pediatric Rehabilitation Lab

Credits: 1

Practice of procedures and techniques applied to the treatment of specific impairments in a pediatric population.

Enrollment Requirement: Acceptance into PTA program.

Course Fee: \$13.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe, develop, implement, and progress comprehensive interventions per plan of care as identified by the Physical Therapist in cerebral palsy and selected pediatric conditions.
- Teach a prescribed intervention effectively and safely.

- Apply the principles of motor learning and motor control theories and gather data relating to an individual's motor control level.
- Demonstrate ventilation strategies and secretion management for neuro impairments.
- Implement the International Classification of Functioning, Disability, and Health (ICF) to describe patient status as it relates to neurorehabilitation.
- Demonstrate the ability to monitor and adjust therapeutic interventions in response to changes in patients' status, and to communicate appropriately with the supervising Physical Therapist.
- Implement pediatric outcome measure reports as completed by the Physical Therapist to guide treatment interventions in the pediatric population.
- Safely implement therapeutic interventions for those with neuromuscular dysfunction per the Physical Therapist Plan of Care including:
 - Principles of facilitation and inhibition techniques using Proprioceptive Neuromuscular Facilitation (PNF)
 - Facilitation of the developmental sequence, and apply development sequence to the progression of treatment plans
 - Principles of facilitation and inhibition techniques using Neurodevelopmental Treatment Approach (NDT)
- Application of assistive adaptive equipment
- Improvement of balance and gait
- Interview patients/caregivers regarding prior level of function and present health conditions.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Provide care in a safe, legal and ethical manner.
- Communicate effectively and appropriately with patients, families, physical therapists and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Instruct patients, families and other health care providers using techniques consistent with the level of the audience.
- Function as integral team members and participate in the team process.
- Transition to successful employment as PTAs.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

PTA 251 - Clinical Education 1

Credits: 1

Preparation for integrated clinical experience with discussions and the development of skills to participate and gain hands-on experience in the clinical setting. This is a pass/no credit course.

Enrollment Requirement: Acceptance into PTA program.

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe and provide examples of the clinical placement process.
- Complete all program and clinical requirements to attend the integrated clinical experience.
- Discuss various topics related to being part of the healthcare team in a variety of settings.
- Completion of required assessments and documentation of clinical site and clinical instructor within the EXXAT database.
- Demonstrate communication skills and professionalism with clinical sites and clinical instructors.
- Self-evaluation of clinical performance by the use of the CIET.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Provide care in a safe, legal and ethical manner.
- Communicate effectively and appropriately with patients, families, physical therapists and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Instruct patients, families and other health care providers using techniques consistent with the level of the audience.
- Function as integral team members and participate in the team process.
- Transition to successful employment as PTAs.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as

necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

PTA 252 - Clinical Education 2

Credits: 2

Final preparation for terminal clinical experiences and completion of program requirements. Students will participate in online discussions regarding current topics and issues related to physical therapy practice, patient interaction, self-reflection and self-evaluation of clinical experiences and development of skills for licensure and future employment. This is a pass/no credit course.

Enrollment Requirement: Acceptance into PTA program.

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe and provide examples of the PT/PTA relationship and being a member of the healthcare team.
- Develop professional communication skills for patient and clinical instructor interaction.
- Describe and provide examples of the legal, ethical and fiscal implications in physical therapy practice.
- Identify their own strengths and weaknesses for professional development based on experiences in PTA 278, PTA 279 and PTA 280.
- Self-evaluate clinical performance by the use of the CIET.
- Prepare for the licensure exam.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Provide care in a safe, legal and ethical manner.
- Communicate effectively and appropriately with patients, families, physical therapists and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Instruct patients, families and other health care providers using techniques consistent with the level of the audience.

- Function as integral team members and participate in the team process.
- Transition to successful employment as PTA.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

PTA 253 - Clinical Education 3

Credits: 1

Provides supervision to students completing full-time clinical affiliations. Students present and suggest solutions for clinical problems encountered, identify appropriate resources for problem resolution, and complete a final program examination in preparation for the licensure examination. This is a pass/no credit course.

Enrollment Requirement: Acceptance into PTA program.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Contribute to an online discussion about identified topics within the clinical setting, which include but are not limited to:
 - a. impact of cultural and socioeconomic difference,
 - b. documentation procedures and standards, and
 - c. physical therapy delivery system and practice management in the clinical site.
 - d. involvement in inter-professional practice.
- Complete the assigned practice exam in preparation for licensure.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Provide care in a safe, legal and ethical manner.
- Communicate effectively and appropriately with patients, families, physical therapists and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Instruct patients, families and other health care providers using techniques consistent with the level of the audience.
- Function as integral team members and participate in the team process.
- Transition to successful employment as PTA.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

PTA 260 - Therapeutic Exercise Lab

Credits: 3

Practice of therapeutic exercise and selected kinesiological and neurologic principles related to therapeutic exercise.

Enrollment Requirement: Acceptance into PTA program.

Course Fee: \$16.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Implement passive, active, assistive, active and resisted exercises.
- Implement selected prescribed exercise programs.
- Instruct the patient and/or family members in carrying out exercise programs.
- Identify and implement exercise, using a variety of techniques and apparatus, to accomplish a stated therapeutic goal and describe the reasons for selecting a specific exercise.

- Demonstrate the ability to progress an exercise program within a treatment plan.
- Instruct a patient in an aerobic training program and monitor the patient during aerobic exercise.
- Determine a target heart rate for an aerobic training program for a healthy individual.
- Describe the exercise progression sequence (of mobility, stability, controlled mobility, skill) and apply it to patient care.
- Identify and describe the indications and precautions/contraindications for therapeutic exercise including: PROM, AROM, stretching, mobilization, strengthening, aerobic exercise, aquatic exercise, balance and proprioception, PNF.
- Educate a patient or family member on a home exercise program.
- Document the implementation of exercises interventions including exercise instruction consistent with defensible professional documentation guidelines from the APTA.
- Compare and contrast types of ROM exercises (active, active assistive, passive, self, mobilization), including indications, goals, parameters, contraindications & precautions, limitations & benefits.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Provide care in a safe, legal and ethical manner.
- Communicate effectively and appropriately with patients, families, physical therapists and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Instruct patients, families and other health care providers using techniques consistent with the level of the audience.
- Function as integral team members and participate in the team process.
- Transition to successful employment as PTAs.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

PTA 261 - Neurological Rehabilitation Lab

Credits: 3

Apply, implement and discuss neurological interventions/techniques to address neurological impairments and diseases/injuries.

Enrollment Requirement: Acceptance into PTA program.

Course Fee: \$14.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe, develop, implement and progress comprehensive interventions per the plan of care as identified by the Physical Therapist in the following:
 - spinal cord injuries (SCI)
 - traumatic brain injuries (TBI)
 - cerebrovascular accidents (CVA)
 - selected neurological disorders
- Teach a prescribed intervention effectively and safely to a patient/family member/caregiver.
- Apply the principles of motor learning and motor control theories and gather data relating to an individual's motor control level.
- Demonstrate ventilation strategies and secretion management for neuro impairments.
- Implement the ICF to describe patient status as it relates to neurorehabilitation.
- Demonstrate the ability to monitor and adjust therapeutic interventions in response to changes in patients' status, and to communicate appropriately with the supervising PT.
- Use of neurological assessment scale of mental function in therapeutic intervention with the neuro population.
- Safely implement therapeutic interventions for those with neuromuscular dysfunction per the Physical Therapist Plan of Care including:
 - Principles of facilitation and inhibition techniques using Proprioceptive Neuromuscular Facilitation (PNF)
 - Facilitation of the developmental sequence, and apply development sequence to the progression of treatment plans
 - Principles of facilitation and inhibition techniques using Neurodevelopmental Treatment Approach (NDT)
 - application of assistive adaptive equipment
 - application of the principles of Functional Training and Task Oriented Strategies. This is to include the most recent treatment approach for neuro.
 - improvement of balance and gait addressing atypical development
- Interview patients/caregivers regarding prior level of function and present health conditions.

Program Outcomes

- Implement plans of care developed by physical therapists.

- Provide care in a safe, legal and ethical manner.
- Communicate effectively and appropriately with patients, families, physical therapists and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Instruct patients, families and other health care providers using techniques consistent with the level of the audience.
- Function as integral team members and participate in the team process.
- Transition to successful employment as PTAs.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

PTA 262 - Acute Care Lab

Credits: 2

Practice, discuss, implement and modify techniques encountered in the practice of physical therapy in acute care settings, including cardiac care, pulmonary care, burn care, skin care, post-operative conditions, and geriatrics.

Enrollment Requirement: Acceptance into PTA program.

Course Fee: \$9.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate and modify/progress evidence based physical therapy interventions to address specific patient situations including:
 - mobilizing patients in critical care
 - airway wound techniques
 - conducting cardiac rehabilitation exercises
 - post-op surgeries and pulmonary precautions
- Demonstrate safe equipment handling.
- Demonstrate correct universal precautions, infection control procedures, isolation techniques, and wound management techniques.

- Apply and remove dressings and/or agents.
- Identify precautions for dressing removal.
- Describe and demonstrate how to establish and maintain a sterile field
- Participate in medical record review, documentation and interdisciplinary communication.
- Implement patient education strategies, including instruct patients and families in appropriate activities for safe discharge.
- Assess the physiological response to activity via observation and vital signs.
- Incorporate pain management strategies into the physical therapy intervention plan.
- Accurately document an intervention session in an acute care setting.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Provide care in a safe, legal and ethical manner.
- Communicate effectively and appropriately with patients, families, physical therapists and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Instruct patients, families and other health care providers using techniques consistent with the level of the audience.
- Function as integral team members and participate in the team process.
- Transition to successful employment as PTAs.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

PTA 263 - Orthopedic Therapy Lab

Credits: 3

The study of therapeutic exercise, manual techniques, principles of tissue healing, orthopedic pathology and common diagnostic procedures in relationship to orthopedic conditions encountered in the practice of physical therapy.

Enrollment Requirement: Acceptance into PTA program.

Course Fee: \$34.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Select, develop, implement and modify progress comprehensive physical therapy interventions per plan of care per PT evaluations.
- Select, implement, and instruct the patient in strengthening, stretching, and ROM programs for stated muscle groups/joints of the spine and extremities using manual and/or mechanical forces.
- Select, develop, implement and progress programs for the spine and extremities when given a protocol, plan of care or treatment goals.
- Implement selected manual techniques for the extremities and spine.
- Utilize screening tools to gather data about muscle groups/joints comprehensive intervention.
- State and incorporate the general guidelines, precautions/contraindications for treatment of selected orthopedic conditions and surgical interventions.
- Select and Perform a comprehensive orthopedic intervention programs, including progression, when given a protocol, plan of care or treatment goals.
- Educate/instruct a patient or family member in a home portion of an intervention plan.
- Select and perform selective orthopedic screening tests/tools and document findings.
- Recognize the presence of post-operative precautions and incorporate into intervention.
- Describe rationale for selected orthopedic interventions and the expected response.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Provide care in a safe, legal and ethical manner.
- Communicate effectively and appropriately with patients, families, physical therapists and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Instruct patients, families and other health care providers using techniques consistent with the level of the audience.
- Function as integral team members and participate in the team process.
- Transition to successful employment as PTAs.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PTA 278 - Clinical Experience 1

Credits: 3

Supervised integrated clinical experience to introduce the student in the practice of physical therapy. Students are expected to actively participate in hands-on patient care, apply current knowledge and skills from coursework and build confidence within the clinical setting. This is a pass/no credit course.

Enrollment Requirement: Acceptance into PTA program.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate effective and professional communication skills.
- Adhere to legal and ethical standards.
- Demonstrate the ability to perform selected therapeutic interventions under the supervision of the clinical instructor.
- Participate and complete documentation and billing practices.
- Demonstrate the ability to follow policies and procedures delineated by the GRC PTA and clinical sites.
- Participate safely and effectively within the clinical setting as determined by the clinical instructor.
- Complete the Clinical Internship Evaluation Tool (CIET) on Professional Behaviors and Patient Management based on the skills of a competent clinician.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Provide care in a safe, legal and ethical manner.
- Communicate effectively and appropriately with patients, families, physical therapists and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Instruct patients, families and other health care providers using techniques consistent with the level of the audience.
- Function as integral team members and participate in the team process.

- Transition to successful employment as PTAs.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

PTA 279 - Clinical Experience 2

Credits: 6

Terminal clinical experience requiring practical performance and application of physical therapy procedures and techniques within the breadth and depth of the selected clinical setting under the supervision of the clinical instructor. This is a pass/no credit course.

Enrollment Requirement: Acceptance into PTA program.

Course Fee: \$35.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate effective and professional communication skills.
- Adhere to legal and ethical standards.
- Demonstrate the ability to perform selected therapeutic interventions safely and effectively under the supervision of the clinical instructor.
- Participate in and complete documentation and billing practices.
- Demonstrate the ability to follow policies and procedures delineated by the GRC PTA and clinical sites.
- Participate safely and effectively within the clinical setting as determined by the clinical instructor.
- Complete the CIET on Professional Behaviors and Patient Management and become independent based on the skills of a competent clinician.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Provide care in a safe, legal and ethical manner.
- Communicate effectively and appropriately with patients, families, physical therapists and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Instruct patients, families and other health care providers using techniques consistent with the level of the audience.
- Function as integral team members and participate in the team process.
- Transition to successful employment as PTAs.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

PTA 280 - Clinical Experience 3

Credits: 7

Terminal clinical experience requiring practical performance and application of physical therapy procedures and techniques within the breadth and depth of the selected clinical setting under the supervision of the clinical instructor. This is a pass/no credit course.

Enrollment Requirement: Acceptance into PTA program.

Course Fee: \$35.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate effective and professional communication skills.
- Adhere to legal and ethical standards.
- Demonstrate the ability to perform selected therapeutic interventions safely and effectively under the supervision of the clinical instructor.
- Participate in and complete documentation and billing practices.
- Demonstrate the ability to follow policies and procedures delineated by the GRC PTA and clinical sites.
- Participate safely and effectively within the clinical setting as determined by the clinical instructor.
- Complete the CIET on Professional Behaviors and Patient Management and become independent based on the skills of a competent clinician.

Program Outcomes

- Implement plans of care developed by physical therapists.
- Provide care in a safe, legal and ethical manner.
- Communicate effectively and appropriately with patients, families, physical therapists and other care providers both verbally and non-verbally including accurate written communication and documentation.
- Instruct patients, families and other health care providers using techniques consistent with the level of the audience.
- Function as integral team members and participate in the team process.
- Transition to successful employment as PTAs.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

Physics**PHYS& 110 - Physics Non-Science Majors with Lab**

Credits: 5

For the student with no previous experience in physics or other physical science courses and even an apprehension toward science and math. Topics such as light, sound, electricity, and motion, are used to develop underlying principles which describe some of our physical universe. Stresses conceptual reasoning while mathematics is limited to arithmetic reasoning. Uses a hands-on approach to more easily gain insight to the concepts being studied.

Enrollment Requirement: Eligible for ENGL& 101.

Satisfies Requirement: Natural Science or Lab Science

Course Fee: \$18.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Use appropriate reasoning to evaluate problems, make decisions, and formulate solutions, with respect to experimental design and inference in physics.
- Give reasons for conclusions, assumptions, beliefs, and hypotheses, with respect to experimental design and inference in physics.

Program Outcomes

- Use appropriate reasoning to evaluate problems, make decisions, and formulate solutions.
- Give reasons for conclusions, assumptions, beliefs, and hypotheses.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

PHYS& 114 - General Physics I with Lab

Credits: 5

For students in technical and transfer programs. Course goals are to further develop an understanding of basic concepts of physics and analytical and problem-solving skills. Laboratory is an integral component of the course. Covers the ideas of motion, forces, momentum and energy from within the framework of Newton's Laws. No credits given to students who have completed PHYS 154.

Enrollment Requirement: Eligible for ENGL& 101 and a grade of 2.0 or higher in MATH 97; or a grade of 2.0 or higher in 1-1/2 years of high school algebra.

Satisfies Requirement: Natural Science or Lab Science

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Use appropriate reasoning to evaluate problems, make decisions, and formulate solutions, using algebraic methods in Newtonian mechanics.
- Give reasons for conclusions, assumptions, beliefs, and hypotheses, using algebraic methods in Newtonian mechanics.

Program Outcomes

- Use appropriate reasoning to evaluate problems, make decisions, and formulate solutions.
- Give reasons for conclusions, assumptions, beliefs, and hypotheses.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of

emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

PHYS& 115 - General Physics II with Lab

Credits: 5

Continues the goals of PHYS& 114. Course is based on concepts involving thermal properties of matter, and electricity and magnetism. Teaches the properties of fluids as time permits.

Enrollment Requirement: Eligible for ENGL& 101; and a grade of 2.0 or higher in PHYS& 114 and in MATH 97; or 1-1/2 years of high school algebra.

Satisfies Requirement: Natural Science or Lab Science

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Use appropriate reasoning to evaluate problems, make decisions, and formulate solutions, using algebraic methods in the study of thermal properties of matter, electricity, and magnetism.
- Give reasons for conclusions, assumptions, beliefs, and hypotheses, using algebraic methods in the study of thermal properties of matter, electricity, and magnetism.

Program Outcomes

- Use appropriate reasoning to evaluate problems, make decisions, and formulate solutions.
- Give reasons for conclusions, assumptions, beliefs, and hypotheses.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

PHYS& 116 - General Physics III with Lab

Credits: 5

Continues the goals of PHYS& 115. Explores the concepts associated with wave phenomena and atomic physics. Uses sound, light (including lasers) and mechanical

vibrations as examples of waves.

Enrollment Requirement: Eligible for ENGL& 101 and a grade of 2.0 or higher in PHYS& 115 and MATH 97, or 1-1/2 years of high school Algebra.

Satisfies Requirement: Natural Science or Lab Science

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Use appropriate reasoning to evaluate problems, make decisions, and formulate solutions, using algebraic methods in the study of magnetism, waves, oscillations, and modern physics.
- Give reasons for conclusions, assumptions, beliefs, and hypotheses, using algebraic methods in the study of magnetism, waves, oscillations, and modern physics.

Program Outcomes

- Use appropriate reasoning to evaluate problems, make decisions, and formulate solutions.
- Give reasons for conclusions, assumptions, beliefs, and hypotheses.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

PHYS 154 - Physics for the Life Sciences 1

Credits: 5

For students in college transfer programs. Course goals are to further develop an understanding of basic concepts of physics and analytical and problem-solving skills with applications to biological systems. Laboratory is an integral component of the course. Covers the ideas of motion, forces, momentum and energy from within the framework of Newton's Laws. No credit given to students who have completed PHYS& 114.

Enrollment Requirement: Eligible for ENGL& 101 and a grade of 2.0 or higher in MATH 97 or 1-1/2 years of high school Algebra.

Satisfies Requirement: Natural Science or Lab Science

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Use appropriate reasoning to evaluate problems, make decisions, and formulate solutions, using algebraic methods in Newtonian mechanics.
- Give reasons for conclusions, assumptions, beliefs, and hypotheses, using algebraic methods in Newtonian mechanics.

Program Outcomes

- Use appropriate reasoning to evaluate problems, make decisions, and formulate solutions.
- Give reasons for conclusions, assumptions, beliefs, and hypotheses.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

PHYS 155 - Physics for the Life Sciences 2

Credits: 5

For students in college transfer programs, especially those interested in biological or medical sciences. Course develops an understanding of the basic concepts of physics and analytical and problem solving skills with applications to biological systems.

Laboratory is an integral component of the course. Teaches the principles of energy flow and conservation, along with electricity with biological and medical applications. No credit given to students who have completed PHYS& 115.

Enrollment Requirement: Eligible for ENGL& 101 and a grade of 2.0 or higher in PHYS& 114 or PHYS 154 and in either MATH 97 or 1 1/2 years of high school Algebra.

Satisfies Requirement: Natural Science or Lab Science

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Use appropriate reasoning to evaluate problems, make decisions, and formulate solutions, using algebraic methods in the study of thermal properties of matter, electricity, and magnetism.
- Give reasons for conclusions, assumptions, beliefs, and hypotheses, using algebraic methods in the study of thermal properties of matter, electricity, and magnetism.

Program Outcomes

- Use appropriate reasoning to evaluate problems, make decisions, and formulate solutions.
- Give reasons for conclusions, assumptions, beliefs, and hypotheses.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

PHYS 156 - Physics for the Life Sciences 3

Credits: 5

Course develops an understanding of the basic concepts of physics and analytical and problem solving skills with applications to biological systems. Laboratory is an integral component of the course. Teaches the dynamics of oscillations, waves, electromagnetism, and light with biological and medical applications. No credit given to students who have completed PHYS& 116.

Enrollment Requirement: PHYS& 115 or PHYS 155 with a grade of 2.0 or higher; eligible for ENGL& 101; and a grade of 2.0 or higher in either MATH 97; or 1 1/2 years of high school algebra.

Satisfies Requirement: Natural Science or Lab Science

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Use appropriate reasoning to evaluate problems, make decisions, and formulate solutions, using algebraic methods in the study of magnetism, waves, oscillations, and modern physics.
- Give reasons for conclusions, assumptions, beliefs, and hypotheses, using algebraic methods in the study of magnetism, waves, oscillations, and modern physics.

Program Outcomes

- Use appropriate reasoning to evaluate problems, make decisions, and formulate solutions.
- Give reasons for conclusions, assumptions, beliefs, and hypotheses.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

PHYS& 221 - Engineering Physics I with Lab

Credits: 5

Includes a detailed study of the basic laws of physics. Emphasizes the evolution of ideas from experimental observation to mathematical models. Includes a comprehensive investigation of Newtonian particle dynamics. Laboratory is an integral part of the course.

Enrollment Requirement: Eligible for ENGL& 101 and a grade of 2.0 or higher in PHYS& 114 or in a high school physics, or equivalent, and in MATH& 142 or equivalent with concurrent enrollment or completion in MATH& 151.

Satisfies Requirement: Natural Science or Lab Science

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Use appropriate reasoning to evaluate problems, make decisions, and formulate solutions, using elements of calculus and mathematical models to develop a comprehensive investigation of Newtonian particle dynamics.
- Give reasons for conclusions, assumptions, beliefs, and hypotheses, using elements of calculus and mathematical models to develop a comprehensive investigation of Newtonian particle dynamics.

Program Outcomes

- Use appropriate reasoning to evaluate problems, make decisions, and formulate solutions.
- Give reasons for conclusions, assumptions, beliefs, and hypotheses.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

PHYS& 222 - Engineering Physics II with Lab

Credits: 5

Applications of Newtonian Physics to energy, momentum, and extended bodies, as well as the study of electro-magnetic theory. Course develops ideas from experimental observation to a mathematics model. Laboratory is an integral part of the course.

Enrollment Requirement: Eligible for ENGL& 101 and a grade of 2.0 or higher in PHYS& 221 and MATH& 151 and at least concurrent enrollment in MATH& 152.

Satisfies Requirement: Natural Science or Lab Science

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Use appropriate reasoning to evaluate problems, make decisions, and formulate solutions, using differential and integral calculus to develop a comprehensive investigation of rotation, electricity, and circuits.
- Give reasons for conclusions, assumptions, beliefs, and hypotheses, using differential and integral calculus to develop a comprehensive investigation of rotation, electricity, and circuits.

Program Outcomes

- Use appropriate reasoning to evaluate problems, make decisions, and formulate solutions.
- Give reasons for conclusions, assumptions, beliefs, and hypotheses.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

PHYS& 223 - Engineering Physics III with Lab

Credits: 5

Study of classical wave properties with applications to mechanical and electrical systems, sound, electromagnetic waves, light, and atomic physics.

Enrollment Requirement: Eligible for ENGL& 101 and a grade of 2.0 or higher in PHYS& 222 and MATH& 152 and at least concurrent enrollment in MATH& 163.

Satisfies Requirement: Natural Science or Lab Science

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Use appropriate reasoning to evaluate problems, make decisions, and formulate solutions, using differential and integral calculus to develop a comprehensive investigation of rotation, electricity, and circuits.
- Give reasons for conclusions, assumptions, beliefs, and hypotheses, using differential and integral calculus to develop a comprehensive investigation of rotation, electricity, and circuits.

Program Outcomes

- Use appropriate reasoning to evaluate problems, make decisions, and formulate solutions.
- Give reasons for conclusions, assumptions, beliefs, and hypotheses.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

PHYS 225 - Modern Physics

Credits: 3

Fourth quarter general physics sequence course for science and engineering students. Serves as a terminal course for non-physics majors and gives students a good conceptual background for the study of quantum mechanics. Emphasizes a thorough study of phenomena that cannot be explained with ideas from classical physics.

Enrollment Requirement: Eligible for ENGL& 101 and a grade of 2.0 or higher in PHYS& 222 and MATH& 152 and at least concurrent enrollment in PHYS& 223 and MATH& 163.

Satisfies Requirement: Natural Science

Course Outcomes:

Students who successfully complete this class will be able to:

- Use appropriate reasoning to evaluate problems, make decisions, and formulate solutions, using elements of calculus and mathematical models to develop a comprehensive investigation of modern physics.

- Give reasons for conclusions, assumptions, beliefs, and hypotheses, using elements of calculus and mathematical models to develop a comprehensive investigation of modern physics.

Program Outcomes

- Use appropriate reasoning to evaluate problems, make decisions, and formulate solutions.
- Give reasons for conclusions, assumptions, beliefs, and hypotheses.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

PHYS 229 - Electric and Magnetic Fields

Credits: 2

Introduces the quantitative laws of electricity and magnetism including principles of electromagnets, electric generators, and electromagnetic waves.

Enrollment Requirement: Eligible for ENGL& 101 and a grade of 2.0 or higher in PHYS& 222 and MATH& 152 and at least concurrent enrollment in MATH& 163 and PHYS& 223.

Satisfies Requirement: Natural Science

Course Outcomes:

Students who successfully complete this class will be able to:

- Use appropriate reasoning to evaluate problems, make decisions, and formulate solutions, using differential and integral calculus to develop a comprehensive investigation of electromagnetic fields.
- Give reasons for conclusions, assumptions, beliefs, and hypotheses, using differential and integral calculus to develop a comprehensive investigation of electromagnetic fields.

Program Outcomes

- Use appropriate reasoning to evaluate problems, make decisions, and formulate solutions.
- Give reasons for conclusions, assumptions, beliefs, and hypotheses.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of

emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

PHYS 230 - Undergraduate Research

Credits: 5

Gives students the experience of doing research in a cutting edge field. Students read relevant literature, pose a question, state a hypothesis, plan and perform experiments to test their hypothesis. Students work in teams and present their work to their peers. The culmination of the project would be a written paper modeled after a journal article.

Enrollment Requirement: Eligible for ENGL& 101; and a grade of 2.0 or higher in PHYS& 222 and MATH& 152; and at least concurrent enrollment in MATH& 163 and PHYS& 223.

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Ask a research question, carry out experiments, analyze data, make decisions, formulate solutions, to develop and carry out a comprehensive and independent investigation of an advanced topic in physics.
- Give reasons for choice of research question, assumptions, hypotheses, data analysis and conclusions while developing a comprehensive and independent investigation of an advanced topics in physics.

Program Outcomes

- Use appropriate reasoning to evaluate problems, make decisions, and formulate solutions.
- Give reasons for conclusions, assumptions, beliefs, and hypotheses.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

PHYS 298 - Independent Study-Physics

Credits: 1-5

Students contract with an instructor to study topics not part of a regular class. Topics must be in physics or related fields.

Enrollment Requirement: One year of physics and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Use appropriate reasoning to evaluate problems, make decisions, and formulate solutions, using calculus to develop a comprehensive and independent investigation of advanced topics in physics.
- Give reasons for conclusions, assumptions, beliefs, and hypotheses, using calculus to develop a comprehensive and independent investigation of advanced topics in physics.

Program Outcomes

- Use appropriate reasoning to evaluate problems, make decisions, and formulate solutions.
- Give reasons for conclusions, assumptions, beliefs, and hypotheses.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

Political Science

POLS& 101 - Introduction to Political Science

Credits: 5

Explores politics as systems of ideologies, processes, and institutions. Offers an overview of basic political science concepts, theories, and methods and introduces central political issues and debates. As a survey course, it provides a broad overview of the discipline and key political science approaches to studying politics.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Social Science

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify and apply key political science concepts to contemporary political events and institutions.
- Identify and apply key political science approaches and theories.
- Identify, analyze and critique key political ideologies.
- Understand the differences between normative and positive political analysis.

Program Outcomes

Demonstrate knowledge of politics and government in the United States and/or across the world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

POLS 194 - Special Topics-Political Science

Credits: 5

An in-depth study of specific topics in political science or direct involvement in a politically-oriented project. May be in a seminar format or be research focused.

Enrollment Requirement: Eligible for ENGL 99 and instructor consent for individual research projects.

Satisfies Requirement: Social Science

Course Outcomes:

Students who successfully complete this class will be able to:

- Achieve an in-depth understanding of a specific topic or area of political activity.
- Demonstrate honed research skills.

Program Outcomes

Demonstrate knowledge of politics and government in the United States and/or across the world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of

emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

POLS& 200 - Introduction to Law: United States

Credits: 5

Introduction and overview of the legal system and processes in the United States through an examination of several substantive areas of law. Includes an introduction to legal procedure, business ethics, jurisdiction, Constitutional law, criminal and civil law, torts and negligence, product liability, and property. Provides an overview of the Courts and looks at law as a framework in which claims are resolved. Uses a case method approach which utilizes a critical thinking perspective.

Enrollment Requirement: Eligible for ENGL 99.

Satisfies Requirement: Social Science

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Display a working knowledge of the functions of law in society, and the factors that affect the evolution of laws over time.
- Demonstrate an awareness of the fundamental concepts of criminal and civil law, torts, civil procedure, agency, and property, and how they fit under the umbrella of historical common law and Constitutional principles
- Distinguish the differences between civil and criminal law.
- Demonstrate an ability to concisely articulate the specific holdings and reasoning in given assigned cases.
- Apply legal reasoning to evaluate the merit of particular legal arguments, legal disputes, and court decisions.

Program Outcomes

Recognize and use critical thinking elements and standards as they apply to the study of legal content.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

POLS& 201 - Introduction to Political Theory

Credits: 5

Provides an introduction to the study and nature of politics. This course explores key political concepts, such as liberty, equality, justice, authority, power, and identity. Political theory engages with the foundations of political community and institutions as a way to encourage a responsible and politically active citizen.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Summarize key concepts in political theory.
- Distinguish competing conceptions of liberty, equality and the good life in various theories of justice.
- Apply theories of justice to specific policy issues.
- Identify forms of citizen participation in contemporary political decision making.

Program Outcomes

Demonstrate knowledge of politics and government in the United States and/or across the world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

POLS& 202 - United States Government

Credits: 5

Introduces students to the study of the United States political system. Explores United States political development, key political actors, formal and informal political institutions, means of citizen participation, and the analysis of political processes and outcomes. Examines key theories, concepts, and approaches for studying of United States Politics.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science

Course Fee: \$1.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Explain and analyze the origins and evolution of the United States political system.
- Demonstrate critical understanding of principal political institutions in the United States.
- Demonstrate command of key concepts and theories used in the study of United States politics.
- Articulate and explain salient issues in United States politics.

Program Outcomes

Demonstrate knowledge of politics and government in the United States and/or across the world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

POLS& 203 - International Relations

Credits: 5

A broad overview of international relations. Explores key theoretical approaches and concepts for studying international politics. Examines a host of central issues in international relations including: the evolution of the state system, international cooperation and conflict, international political economy, and international institutions and organizations.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science

Course Fee: \$1.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Explain and analyze the origins and evolution of the state system and international politics.
- Demonstrate command of key concepts and theories used in the study of international relations.
- Demonstrate critical understanding of principal actors, international institutions, and organizations.
- Articulate and explain salient issues and key debates in international relations.

Program Outcomes

Demonstrate knowledge of politics and government in the United States and/or across the world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

POLS& 204 - Comparative Government

Credits: 5

A comparative analysis of politics and types of governing systems around the globe (e.g., democratic, authoritarian, theocratic, parliamentary, presidential). Examines power relationships (e.g., race, ethnicity, religion, sex) and citizen rights. Explores and analyzes the political issues and problems in their international, historical, economic, and cultural contexts.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science and Diversity

Course Fee: \$1.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe selected political systems in the world.
- Demonstrate command of key concepts and theories used in the study of comparative politics.
- Employ the basic methodologies for carrying out comparative politics research and analysis.
- Understand the power relationships (e.g., race, ethnicity, religion, sex) within the differing political systems.
- Demonstrate competence in understanding political cultural differences across the globe.

Program Outcomes

Demonstrate knowledge of politics and government in the United States and/or across the world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

POLS 207 - American Political Participation

Credits: 5

Considers the causes and consequences of various forms of American political participation. Focuses on elections, social movements, and political violence while considering representation and citizenship. Through examination of qualitative and quantitative methods, students will investigate democratic theories in historical and current political discourse.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Understand key features of American democracy.
- Understand the power relationships that frame political participation as determined or influenced by diverse histories, genders, races, ethnicities, and religions.
- Identify major political ideologies and contemporary political issues.
- Specify the main methods for mass political participation (voting/electioneering, social movements, civil disobedience, and political violence).
- Understand the role mass political participation plays in shaping the political system, and the outcomes of this system.

Program Outcomes

Demonstrate knowledge of politics and government in the United States and/or across the world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

POLS 209 - State and Local Government Politics

Credits: 5

Explores and analyzes histories, structures, processes, policies, administration, and

politics of state and local governments. Washington state receives close attention. Explores interest groups, lobbying, campaign finance, electoral politics, policy development and implementation, legislatures, executives, judiciary systems, ballot measures, political personalities, and intergovernmental relations. Students engage current political issues.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science

Course Fee: \$1.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Understand the roles and responsibilities of states and local governments in our federal system.
- Understand the power relationships between local governments, states, and our national government.
- Understand the unique role of tribal governments in the United States political system.
- Explain the basic history of Washington State including its creation and evolution.
- Demonstrate command of key concepts and theories used in the study of state and local government and politics in the United States.
- Articulate current political issues in state and local government.

Program Outcomes

Demonstrate knowledge of politics and government in the United States and/or across the world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

POLS 225 - The Arab-Israeli Conflict

Credits: 5

Explores the Arab-Israeli conflict from its inception until the present. Examines key

political processes in the development and persistence of the conflict. Investigates the conflict while applying key political science concepts including: state and institution building, inequality, human rights, ethnic conflict, nationalism, development, and conflict management.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science

Course Outcomes:

Students who successfully complete this class will be able to:

- Explain and analyze the origins and evolution of the Arab-Israeli conflict.
- Identify key trends, developments, and actors in the Arab-Israeli conflict.
- Apply key concepts in political science to various aspects of the Arab-Israeli Conflict.
- Articulate and explain salient narratives and key debates concerning the Arab-Israeli Conflict.
- Identify the role European colonialism played in shaping and sustaining the conflict.
- Explain ethnically motivated patterns of marginalization, discrimination, and violence that have generated, sustained, resulted from the conflict.
- Demonstrate a strong intercultural knowledge regarding diverse ethnic, religious, and political groups across the Middle East.

Program Outcomes

Demonstrate knowledge of politics and government in the United States and/or across the world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

POLS 250 - Immigration, Refugees, and Citizenship

Credits: 5

Immigration, refugee, and citizenship policies are hot button topics across the world. This class introduces students to key debates, research, and theories around these issues. We will explore why people immigrate, immigration and asylum policies, anti-

immigrant sentiment and groups, undocumented immigration and border security, migrant inclusion and exclusion, and the complexities around defining citizenship and belonging in host societies.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science

Course Fee: \$2.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify and apply key concepts, theories, and approaches to studying immigration, asylum, and citizenship.
- Identify the fundamental features of key debates concerning immigration, asylum, and citizenship in the US and across the world.
- Explain and analyze the factors that shape immigration, asylum, and citizenship policies and their outcomes.
- Articulate domestic and international dynamics and debates around immigration, asylum, and citizenship.
- Identify the causes and outcomes of displacement and global refugee movement.
- Articulate how states and societies define membership and belonging.

Program Outcomes

Demonstrate knowledge of politics and government in the United States and/or across the world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.
- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.

POLS 298 - Independent Study-Political Science

Credits: 1-5

Enables students to individually pursue special interests or opportunities to study in political science under guidance of an instructor.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Achieve an in-depth understanding of a specific topic or area of political activity.
- Demonstrate enhanced analytical and research skills.

Program Outcomes

- Demonstrate knowledge of politics and government in the United States and/or across the world.

Practical Nursing

MNURS 103 - Foundations of Nursing Lab

Credits: 2

Designed for a student who is already Medical Assistant-Certified and is enrolled in the MA to LPN program. Provides students with the knowledge of basic client care skills across the lifespan and their application in the clinical setting. Includes documentation, communication, math competency, non-parenteral medication administration, and culturally sensitive care using the nursing process and clinical judgment.

Enrollment Requirement: Admission into the Practical Nursing Program

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify scientific principles when performing basic nursing care in a safe and effective care environment in the skills laboratory.
- Use the nursing process and clinical judgment with nursing care for one or more clients who are in different stages of the life cycle in the skills laboratory.
- Document nursing care provided and client/family teaching in the skills laboratory.
- Provide nursing care in the skills laboratory within legal and ethical guidelines.
- Perform culturally sensitive nursing care, including a focus on racial, socio-economic, sexual, gender, ethnicity, religious, social determinants of health, and spiritual needs of a client in the skills laboratory.
- Communicate with other health care team members to provide for continuity of care in the skills laboratory.

- Demonstrate competence with nursing skills including administration of non-parenteral medications, and a head-to-toe physical assessment in the skills laboratory.
- Integrate principles of safety, quality, collaboration, relationship-centered care, systems-based care, and personal/professional development when providing care in the skills laboratory.
- Demonstrate accurate calculation of math seen in nursing practice.

Program Outcomes

- Provide safe, quality, evidence-based, innovative client-centered nursing care to diverse clients across the lifespan.
- Engage in clinical judgment that integrates evidence, nursing, physical and psychosocial sciences, to ensure healthcare quality and safety, and make client/relationship centered care decisions within the scope of practice of the practical nurse.
- Participate in collaboration and teamwork with the inter-professional team, the client, and the client's support persons to provide and improve client care and communication.
- Integrate quality improvement activities and advocacy skills to enhance client care.
- Utilize information technology and supportive resources to improve client care processes within the healthcare system.
- Incorporate legal and ethical guidelines within the scope of practice of a practical nurse to enhance client care and professional development.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

MNURS 113 - Med-Surg Nursing I Lab

Credits: 1

This course is designed for a student who is already Medical Assistant-Certified and is

enrolled in the MA to LPN program. Provides students with the knowledge of client care skills across the lifespan and their application in the clinical setting. Includes documentation, communication, math competency, indwelling urinary catheter insertion and removal, tracheostomy care and suctioning, parenteral medication administration, and culturally sensitive care using the nursing process and clinical judgment.

Enrollment Requirement: Admission into the MA to Practical Nursing Program

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify scientific principles when performing nursing care in a safe and effective skills laboratory care environment.
- Use the nursing process and clinical judgment with nursing care for one or more clients who are in different stages of the life cycle in a skills laboratory care environment.
- Document nursing care provided and client/family teaching in a skills laboratory care environment.
- Provide nursing care in the skills laboratory within legal and ethical guidelines.
- Perform culturally sensitive nursing care, including a focus on racial, socio-economic, sexual, gender, ethnicity, religious, social determinants of health, and spiritual needs of a client in a skills laboratory care environment.
- Communicate with other health care team members to provide for continuity of care in a skills laboratory care environment.
- Demonstrate competence with nursing skills including indwelling catheter insertion/removal, tracheostomy care and suctioning, and administration of non-parenteral and parenteral medications in a skills laboratory care environment.
- Integrate principles of safety, quality, collaboration, relationship-centered care, systems-based care, and personal/professional development when providing care in a skills laboratory care environment.
- Demonstrate accurate calculation of math seen in nursing practice.

Program Outcomes

- Provide safe, quality, evidence-based, innovative client-centered nursing care to diverse clients across the lifespan.
- Engage in clinical judgment that integrates evidence, nursing, physical and psychosocial sciences, to ensure healthcare quality and safety, and make client/relationship centered care decisions within the scope of practice of the practical nurse.
- Participate in collaboration and teamwork with the inter-professional team, the client, and the client's support persons to provide and improve client care and communication.
- Integrate quality improvement activities and advocacy skills to enhance client care.

- Utilize information technology and supportive resources to improve client care processes within the healthcare system.
- Incorporate legal and ethical guidelines within the scope of practice of a practical nurse to enhance client care and professional development.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PNURSE 102 - Foundations of Nursing

Credits: 6

Students learn concepts and theories relating to the basic art and science of nursing to meet the needs of individuals across the lifespan in an ethical, legal, and safe manner, utilizing the nursing process and clinical judgment. This includes fundamental topics related to nursing care of clients and working with the interdisciplinary health team. Also included is immunology, infection control and inflammation. rehabilitation, death and dying, care of the older adult, and pain.

Enrollment Requirement: Admission into the Practical Nursing Program

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Discuss the role of the nurse, maintaining safety, using the nursing process clinical judgment, evidence-based practice, and principles of pharmacology to clients across the lifespan.
- Describe legal, ethical, social determinants of health, cultural and ethnic diversity considerations when providing care for clients across the lifespan.
- Discuss the health care team and history of nursing including nursing theorists.

- Describe communication, documentation, and HIPAA regulations as they apply to the care of clients.
- Using the nursing process and clinical judgment, discuss basic principles of nutrition, immunology, inflammation and infection control related to the care of clients across the lifespan.
- Using the nursing process and clinical judgment, discuss care for clients experiencing death and dying, rehabilitation, and pain across the lifespan.

Program Outcomes

- Provide safe, quality, evidence-based, innovative client-centered nursing care to diverse clients across the lifespan.
- Engage in the nursing process and clinical judgment that integrates evidence, nursing, physical and psychosocial sciences, to ensure healthcare quality and safety, and make client/relationship centered care decisions within the scope of practice of the practical nurse.
- Participate in collaboration and teamwork with the inter-professional team, the client, and the client's support persons to provide and improve client care and communication.
- Integrate quality improvement activities and advocacy skills to enhance client care.
- Utilize information technology and supportive resources to improve client care processes within the healthcare system.
- Incorporate legal and ethical guidelines within the scope of practice of a practical nurse to enhance client care and professional development.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PNURSE 103 - Foundations of Nursing Lab

Credits: 1-3

Provides students with the knowledge of basic client care skills across the lifespan and their application in the clinical setting. Includes documentation, communication, math competency, non-parenteral medication administration, and culturally sensitive care using the nursing process and clinical judgment.

Enrollment Requirement: Admission into the Practical Nursing Program

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify scientific principles when performing basic nursing care in a safe and effective care environment in the skills laboratory.
- Use the nursing process and clinical judgment with nursing care for one or more clients who are in different stages of the life cycle in the skills laboratory.
- Document nursing care provided and client/family teaching in the skills laboratory.
- Provide nursing care in the skills laboratory within legal and ethical guidelines.
- Perform culturally sensitive nursing care, including a focus on racial, socio-economic, sexual, gender, ethnicity, religious, social determinants of health, and spiritual needs of a client in the skills laboratory.
- Communicate with other health care team members to provide for continuity of care in the skills laboratory.
- Demonstrate competence with nursing skills including administration of non-parenteral medications and a head-to-toe physical assessment in the skills laboratory.
- Integrate principles of safety, quality, collaboration, relationship-centered care, systems-based care, and personal/professional development when providing care in the skills laboratory.
- Demonstrate accurate calculation of math seen in nursing practice.

Program Outcomes

- Provide safe, quality, evidence-based, innovative client-centered nursing care to diverse clients across the lifespan in the skills laboratory.
- Engage in clinical judgment that integrates evidence, nursing, physical and psychosocial sciences, to ensure healthcare quality and safety, and make client/relationship centered care decisions within the scope of practice of the practical nurse.
- Participate in collaboration and teamwork with the inter-professional team, the client, and the client's support persons to provide and improve client care and communication.
- Integrate quality improvement activities and advocacy skills to enhance client care.
- Utilize information technology and supportive resources to improve client care processes within the healthcare system.

- Incorporate legal and ethical guidelines within the scope of practice of a practical nurse to enhance client care and professional development.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PNURSE 104 - Mental Health in Nursing

Credits: 3

Focuses on principles underlying the care of a client with mental health disorders and the importance of a therapeutic relationship and environment. Psychopathology and treatment modalities of mental disorders are reviewed. The role of the nurse, caring for clients with psychological and psychosocial problems, using the nursing process and clinical judgment with the healthcare team is discussed.

Enrollment Requirement: Admission into the Practical Nurse Program

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe mental health, mental illness, the principles of mental health care and the continuum between both mental health and mental illness.
- Discuss factors impacting mental health including culture, socioeconomic, legal, ethical, social determinants of health, and changes in the health care system.
- Describe theorists and psychotherapies related to their impact on personality and behavior.
- Discuss the role of stress, adaptation, coping, illness, and crisis related to mental health.
- Describe components of a therapeutic relationship and therapeutic environment.

- Examine the indications, implications, side effects, contraindications, client teaching and safety precautions for clients receiving medications for mental health disorders.
- Discuss the use of the DSM-V multi-axial system for classification of mental disorders.
- Discuss the role of the nurse, caring for clients with psychological and psychosocial problems, using clinical judgment with the healthcare team.

Program Outcomes

- Provide safe, quality, evidence-based, innovative client-centered nursing care to diverse clients across the lifespan.
- Engage in the nursing process and clinical judgment that integrates evidence, nursing, physical and psychosocial sciences, to ensure healthcare quality and safety, and make client/relationship centered care decisions within the scope of practice of the practical nurse.
- Participate in collaboration and teamwork with the inter-professional team, the client, and the client's support persons to provide and improve client care and communication.
- Integrate quality improvement activities and advocacy skills to enhance client care.
- Utilize information technology and supportive resources to improve client care processes within the healthcare system.
- Incorporate legal and ethical guidelines within the scope of practice of a practical nurse to enhance client care and professional development.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PNURSE 105 - Foundations of Nursing Clinical

Credits: 2

Students will utilize critical thinking with the nursing process and clinical judgment, demonstrate culturally sensitive care, provide documentation, and communicate with

clients/families and members of the health care team. In addition, students will begin concept mapping for the provision of nursing care.

Enrollment Requirement: Admission into the Practical Nursing Program

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify scientific principles when performing basic nursing care in a safe and effective care environment.
- Use the nursing process and clinical judgment with nursing care, and when developing a comprehensive concept map for one client in the geriatric setting.
- Document nursing care provided and client/family teaching.
- Provide nursing care in a clinical environment within legal and ethical guidelines.
- Perform culturally sensitive nursing care, including a focus on racial, socio-economic, sexual, gender, ethnicity, religious, social determinants of health, and spiritual needs of a client.
- Communicate confidentially with other health care team members to provide for continuity of care, as well as therapeutically communicate with the client and family.
- Demonstrate competence with nursing skills including a head-to-toe physical assessment and administration of non-parenteral medications.
- Integrate principles of safety, quality, collaboration, relationship-centered care, systems-based care, and personal/professional development when providing care to clients.

Program Outcomes

- Provide safe, quality, evidence-based, innovative client-centered nursing care to diverse clients across the lifespan.
- Engage in clinical judgment that integrates evidence, nursing, physical and psychosocial sciences, to ensure healthcare quality and safety, and make client/relationship centered care decisions within the scope of practice of the practical nurse.
- Participate in collaboration and teamwork with the inter-professional team, the client, and the client's support persons to provide and improve client care and communication.
- Integrate quality improvement activities and advocacy skills to enhance client care.
- Utilize information technology and supportive resources to improve client care processes within the healthcare system.
- Incorporate legal and ethical guidelines within the scope of practice of a practical nurse to enhance client care and professional development.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PNURSE 107 - Foundations of Nursing Simulation

Credits: 1

On campus and virtual simulation scenarios will provide the student with the opportunity to apply clinical skills using the nursing process and clinical judgment to give culturally sensitive care, and begin to develop clinical reasoning skills in a safe simulation environment.

Enrollment Requirement: Admission into the Practical Nursing Program

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify scientific principles when performing basic nursing care in a safe and effective simulation care environment.
- Use the nursing process and clinical judgment with nursing care for one client who is in different stages of the life cycle in a simulation care environment.
- Document nursing care provided and client/family teaching in a simulation care environment.
- Provide nursing care in a simulation care environment within legal and ethical guidelines.
- Perform culturally sensitive nursing care, including a focus on racial, socio-economic, sexual, gender, ethnicity, religious, social determinants of health, and spiritual needs of a client in a simulation care environment.
- Communicate with other health care team members to provide for continuity of care in a simulation care environment.

- Integrate principles of safety, quality, collaboration, relationship-centered care, systems-based care, and personal/professional development when providing care in a simulation care environment.
- Demonstrate safe administration of non-parenteral medications, and other nursing skills in a simulation care environment.

Program Outcomes

- Provide safe, quality, evidence-based, innovative client-centered nursing care to diverse clients across the lifespan.
- Engage in clinical judgment that integrates evidence, nursing, physical and psychosocial sciences, to ensure healthcare quality and safety, and make client/relationship centered care decisions within the scope of practice of the practical nurse.
- Participate in collaboration and teamwork with the inter-professional team, the client, and the client's support persons to provide and improve client care and communication.
- Integrate quality improvement activities and advocacy skills to enhance client care.
- Utilize information technology and supportive resources to improve client care processes within the healthcare system.
- Incorporate legal and ethical guidelines within the scope of practice of a practical nurse to enhance client care and professional development.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PNURSE 112 - Med-Surg Nursing I

Credits: 5

Provides an overview of the nursing care and management of clients of all ages with common medical - surgical conditions. Etiology, pathophysiology, clinical manifestations,

medical management, nutrition, diagnostic testing, health promotion, and the nursing process and clinical judgment will be integrated to assist the client's health and functioning.

Enrollment Requirement: Admission into the Practical Nursing Program

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify normal/abnormal pathophysiology of common medical surgical conditions experienced by clients across the life-span.
- Discuss the etiology, clinical manifestations, diagnostic tests and medical management of common medical surgical conditions experienced by clients across the life-span.
- Describe the role of the nurse, using the nursing process and clinical judgment, when caring for the client with common medical surgical conditions experienced by clients across the life-span.
- Describe legal, ethical, social determinants of health, cultural and ethnic diversity considerations when providing care for clients across the lifespan.
- Identify nutrition and health promotion activities related to the common medical surgical conditions experienced by clients across the life-span.
- Examine the indications, implications, side effects, contraindications, client teaching and safety precautions for clients receiving medication related to course theory content.

Program Outcomes

- Provide safe, quality, evidence-based, innovative client-centered nursing care to diverse clients across the lifespan.
- Engage in clinical judgment that integrates evidence, nursing, physical and psychosocial sciences, to ensure healthcare quality and safety, and make client/relationship centered care decisions within the scope of practice of the practical nurse.
- Participate in collaboration and teamwork with the inter-professional team, the client, and the client's support persons to provide and improve client care and communication.
- Integrate quality improvement activities and advocacy skills to enhance client care.
- Utilize information technology and supportive resources to improve client care processes within the healthcare system.
- Incorporate legal and ethical guidelines within the scope of practice of a practical nurse to enhance client care and professional development.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of

emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PNURSE 113 - Med-Surg Nursing I Lab

Credits: 1-2

Provides students with the knowledge of client care skills across the lifespan and their application in the clinical setting. Includes documentation, communication, math competency, indwelling urinary catheter insertion and removal, tracheostomy care and suctioning, parenteral medication administration, and culturally sensitive care using the nursing process and clinical judgment.

Enrollment Requirement: Admission into the Practical Nursing Program

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify scientific principles when performing nursing care in a safe and effective skills laboratory care environment.
- Use the nursing process and clinical judgment with nursing care for one or more clients who are in different stages of the life cycle in a skills laboratory care environment.
- Document nursing care provided and client/family teaching in a skills laboratory care environment.
- Provide nursing care in the skills laboratory within legal and ethical guidelines.
- Performs culturally sensitive nursing care, including a focus on racial, socio-economic, sexual, gender, ethnicity, religious, social determinants of health, and spiritual needs of a client in a skills laboratory care environment.
- Communicate with other health care team members to provide for continuity of care in a skills laboratory care environment.
- Demonstrate competence with nursing skills including indwelling catheter insertion/removal, tracheostomy care and suctioning, and administration of non-parenteral and parenteral medication in a skills laboratory care environment.

- Integrate principles of safety, quality, collaboration, relationship-centered care, systems-based care, and personal/professional development when providing care in a skills laboratory care environment.
- Demonstrate accurate calculation of math seen in nursing practice.

Program Outcomes

- Provide safe, quality, evidence-based, innovative client-centered nursing care to diverse clients across the lifespan.
- Engage in clinical judgment that integrates evidence, nursing, physical and psychosocial sciences, to ensure healthcare quality and safety, and make client/relationship centered care decisions within the scope of practice of the practical nurse.
- Participate in collaboration and teamwork with the inter-professional team, the client, and the client's support persons to provide and improve client care and communication.
- Integrate quality improvement activities and advocacy skills to enhance client care.
- Utilize information technology and supportive resources to improve client care processes within the healthcare system.
- Incorporate legal and ethical guidelines within the scope of practice of a practical nurse to enhance client care and professional development.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PNURSE 114 - Pediatric Nursing and Reproductive Health

Credits: 4

Focuses on the nursing care of a pediatric client with common medical surgical, mental, and cognitive conditions using nursing process and clinical judgment, and family centered care. Additionally, nursing care of a client with common medical surgical

reproductive conditions, antepartum/intrapartum/postpartum, and newborn nursing care is included. Decimal

Enrollment Requirement: Admission into the Practical Nursing Program

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify normal/abnormal pathophysiology of common medical surgical, mental, and cognitive conditions experienced by pediatric and reproductive/newborn clients.
- Discuss the etiology, clinical manifestations, diagnostic tests and medical management of common medical surgical, mental, and cognitive conditions experienced by pediatric and reproductive/newborn clients.
- Describe the role of the nurse, using the nursing process and clinical judgment and family centered care when caring for the pediatric and reproductive/newborn client and client/family/caregiver with common medical surgical, mental, and cognitive conditions experienced by clients both at home and during hospitalization.
- Identify nutrition, hazard prevention, health promotion activities and communication with client/family/caregiver related to the common medical surgical, mental, and cognitive conditions experienced by pediatric and reproductive/newborn clients.
- Examine the indications, implications, side effects, contraindications, client/family/caregiver teaching and safety precautions for pediatric and reproductive/newborn clients receiving medication related to course theory content.
- Identify developmental theories pertaining to the care of the pediatric client as well as growth and development of pediatric clients.
- Describe legal, ethical, social determinants of health, cultural and ethnic diversity considerations when providing care for clients across the lifespan.
- Discuss the normal and high-risk pathophysiology and adaptations of antepartum, intrapartum and postpartum mother and baby dyad.
- Describe the nursing care of the client experiencing normal and abnormal labor and delivery including the adolescent, using the nursing process and clinical judgment.
- Describe the nursing care of the normal and high-risk mother/newborn client during the postpartum period using the nursing process and clinical judgment.

Program Outcomes

- Provide safe, quality, evidence-based, innovative client-centered nursing care to diverse clients across the lifespan.
- Engage in clinical judgment that integrates evidence, nursing, physical and psychosocial sciences, to ensure healthcare quality and safety, and make client/relationship centered care decisions within the scope of practice of the practical nurse.

- Participate in collaboration and teamwork with the inter-professional team, the client, and the client's support persons to provide and improve client care and communication.
- Integrate quality improvement activities and advocacy skills to enhance client care.
- Utilize information technology and supportive resources to improve client care processes within the healthcare system.
- Incorporate legal and ethical guidelines within the scope of practice of a practical nurse to enhance client care and professional development.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PNURSE 115 - Med-Surg Nursing I Clinical

Credits: 3

Students will utilize critical thinking with the nursing process and clinical judgment, demonstrate culturally sensitive care, provide documentation, and communicate with clients/families and members of the health care team. In addition, students will continue to develop concept maps for the provision of nursing care to clients of across the lifespan.

Enrollment Requirement: Admission into the Practical Nursing Program

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify scientific principles when performing basic nursing care in a safe and effective care environment.
- Use the nursing process and clinical judgment with nursing care, and when developing a comprehensive concept map for two clients.

- Document nursing care provided and client/family teaching.
- Provide nursing care in a clinical environment within legal and ethical guidelines.
- Perform culturally sensitive nursing care, including a focus on racial, socio-economic, sexual, gender, ethnicity, religious, social determinants of health, and spiritual needs of a client.
- Communicate confidentially with other health care team members to provide for continuity of care, as well as therapeutically communicates with the client and family.
- Demonstrate competence with nursing skills including a head-to-toe physical assessment and administration of non-parenteral and parenteral medications.
- Integrate principles of safety, quality, collaboration, relationship-centered care, systems-based care, and personal/professional development when providing care to clients.

Program Outcomes

- Provide safe, quality, evidence-based, innovative client-centered nursing care to diverse clients across the lifespan.
- Engage in clinical judgment that integrates evidence, nursing, physical and psychosocial sciences, to ensure healthcare quality and safety, and make client/relationship centered care decisions within the scope of practice of the practical nurse.
- Participate in collaboration and teamwork with the inter-professional team, the client, and the client's support persons to provide and improve client care and communication.
- Integrate quality improvement activities and advocacy skills to enhance client care.
- Utilize information technology and supportive resources to improve client care processes within the healthcare system.
- Incorporate legal and ethical guidelines within the scope of practice of a practical nurse to enhance client care and professional development.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PNURSE 117 - Med-Surg Nursing I Simulation

Credits: 1

On campus and virtual simulation scenarios related to content in Med Surg I will provide the student with the opportunity to apply clinical skills using the nursing process and clinical judgment to give culturally sensitive care, and continue to develop clinical reasoning skills in a safe simulation environment.

Enrollment Requirement: Admission into the Practical Nursing Program

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify scientific principles when performing basic nursing care in a safe and effective simulation care environment.
- Use the nursing process and clinical judgment with nursing care for one or more clients who are in different stages of the life cycle in a simulation environment.
- Document nursing care provided and client/family teaching in a simulation environment.
- Provide nursing care in a simulation environment within legal and ethical guidelines.
- Perform culturally sensitive nursing care, including a focus on racial, socio-economic, sexual, gender, ethnicity, religious, social determinants of health, and spiritual needs of a client in a simulation environment.
- Communicate with other health care team members to provide for continuity of care in a simulation environment.
- Integrate principles of safety, quality, collaboration, relationship-centered care, systems-based care, and personal/professional development when providing care in a simulation environment.
- Demonstrate safe administration of non-parenteral and parenteral medications, as well as other nursing skills in a simulation environment.

Program Outcomes

- Provide safe, quality, evidence-based, innovative client-centered nursing care to diverse clients across the lifespan.
- Engage in clinical judgment that integrates evidence, nursing, physical and psychosocial sciences, to ensure healthcare quality and safety, and make client/relationship centered care decisions within the scope of practice of the practical nurse.

- Participate in collaboration and teamwork with the inter-professional team, the client, and the client's support persons to provide and improve client care and communication.
- Integrate quality improvement activities and advocacy skills to enhance client care.
- Utilize information technology and supportive resources to improve client care processes within the healthcare system.
- Incorporate legal and ethical guidelines within the scope of practice of a practical nurse to enhance client care and professional development.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PNURSE 122 - Med-Surg Nursing II

Credits: 6

Provides an overview of the care and management of clients of all ages with more complex common medical - surgical conditions. Etiology, pathophysiology, clinical manifestations, medical management, nutrition, diagnostic testing, health promotion, and the nursing process and clinical judgment will be integrated to assist the client's health and functioning.

Enrollment Requirement: Admission into the Practical Nursing Program

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify normal/abnormal pathophysiology of more complex common medical surgical conditions experienced by clients across the lifespan.

- Discuss the etiology, clinical manifestations, diagnostic tests and medical management of more complex common medical surgical conditions experienced by clients across the life-span.
- Describe the role of the nurse, using the nursing process and clinical judgment, when caring for the client with more complex common medical surgical conditions experienced by clients across the life-span.
- Describe legal, ethical, social determinants of health, cultural and ethnic diversity considerations when providing care for clients across the lifespan.
- Identify nutrition and health promotion activities related to more complex common medical surgical conditions experienced by clients across the life-span.
- Examine the indications, implications, side effects, contraindications, client teaching and safety precautions for clients receiving medication related to course theory content.

Program Outcomes

- Provide safe, quality, evidence-based, innovative client-centered nursing care to diverse clients across the lifespan.
- Engage in clinical judgment that integrates evidence, nursing, physical and psychosocial sciences, to ensure healthcare quality and safety, and make client/relationship centered care decisions within the scope of practice of the practical nurse.
- Participate in collaboration and teamwork with the inter-professional team, the client, and the client's support persons to provide and improve client care and communication.
- Integrate quality improvement activities and advocacy skills to enhance client care.
- Utilize information technology and supportive resources to improve client care processes within the healthcare system.
- Incorporate legal and ethical guidelines within the scope of practice of a practical nurse to enhance client care and professional development.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PNURSE 123 - Med-Surg Nursing II Lab

Credits: 2

Provides students with the knowledge of more advanced client care skills across the lifespan and their application in the clinical setting. Includes documentation, communication, math competency, IV therapy skills and blood typing, neurological assessment, nasogastric tube insertion and care, rectal tubes, emergency airways, code meds, EKG rhythms, central lines, ankle-brachial index, and culturally sensitive care using the nursing process and clinical judgment.

Enrollment Requirement: Admission into the Practical Nursing Program

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify scientific principles when performing nursing care in a safe and effective care environment in a skills laboratory care environment.
- Use clinical judgment with nursing care for one or more clients who are in different stages of the life cycle in a skills laboratory care environment.
- Document nursing care provided and client/family teaching in a skills laboratory care environment.
- Provide nursing care in the skills laboratory within legal and ethical guidelines
- Perform culturally sensitive nursing care in a skills laboratory setting, including a focus on racial, socio-economic, sexual, gender, ethnicity, religious, social determinants of health, and spiritual needs of a client in a skills laboratory care environment.
- Communicate with other health care team members to provide for continuity of care in the skills laboratory in a skills laboratory care environment.
- Demonstrate competence with nursing skills including IV therapy skills and blood typing, neurological assessment, nasogastric tube insertion and care, rectal tubes, emergency airways, code meds, EKG rhythms, central lines, ankle-brachial index in a skills laboratory care environment.
- Integrate principles of safety, quality, collaboration, relationship-centered care, systems-based care, and personal/professional development when providing care in a skills laboratory care environment.
- Demonstrate accurate calculation of math seen in nursing practice.

Program Outcomes

- Provide safe, quality, evidence-based, innovative client-centered nursing care to diverse clients across the lifespan.

- Engage in the nursing process and clinical judgment that integrates evidence, nursing, physical and psychosocial sciences, to ensure healthcare quality and safety, and make client/relationship centered care decisions within the scope of practice of the practical nurse.
- Participate in collaboration and teamwork with the inter-professional team, the client, and the client's support persons to provide and improve client care and communication.
- Integrate quality improvement activities and advocacy skills to enhance client care.
- Utilize information technology and supportive resources to improve client care processes within the healthcare system.
- Incorporate legal and ethical guidelines within the scope of practice of a practical nurse to enhance client care and professional development.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PNURSE 125 - Med-Surg Nursing II Clinical

Credits: 4

Students will utilize critical thinking with the nursing process and clinical judgment, demonstrate culturally sensitive care, provide documentation, and communicate with clients/families and members of the health care team. In addition, students will further refine concept maps for the provision of nursing care to clients of across the lifespan.

Enrollment Requirement: Admission into the Practical Nursing Program

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify scientific principles when performing nursing care in a safe and effective care environment.
- Use the nursing process and clinical judgment with nursing care to two or more clients, and when developing a comprehensive concept map for two clients.
- Document nursing care provided and client/family teaching.
- Provide nursing care in a clinical environment within legal and ethical guidelines.
- Perform culturally sensitive nursing care, including a focus on racial, socio-economic, sexual, gender, ethnicity, religious, social determinants of health, and spiritual needs of a client.
- Communicate confidentially with other health care team members to provide for continuity of care, as well as therapeutically communicate with the client and family.
- Demonstrate competence with nursing skills.
- Integrate principles of safety, quality, collaboration, relationship-centered care, systems-based care, and personal/professional development when providing care to clients.

Program Outcomes

- Provide safe, quality, evidence-based, innovative client-centered nursing care to diverse clients across the lifespan.
- Engage in clinical judgment that integrates evidence, nursing, physical and psychosocial sciences, to ensure healthcare quality and safety, and make client/relationship centered care decisions within the scope of practice of the practical nurse.
- Participate in collaboration and teamwork with the inter-professional team, the client, and the client's support persons to provide and improve client care and communication.
- Integrate quality improvement activities and advocacy skills to enhance client care.
- Utilize information technology and supportive resources to improve client care processes within the healthcare system.
- Incorporate legal and ethical guidelines within the scope of practice of a practical nurse to enhance client care and professional development.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PNURSE 126 - Transition to Practice

Credits: 2

Provide the resources for entry into nursing practice. Topics include preparation of a cover letter, resume, interviewing, components of working as a nurse, professionalism, and preparation for taking the NCLEX-PN licensure exam.

Enrollment Requirement: Admission into the Practical Nursing Program

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Discuss the role of the nurse caring for clients within legal and ethical guidelines in regard to coordination of care, safety and infection control, health promotion and maintenance, psychosocial integrity, basic care and comfort, parenteral therapies, medications, and reduction of risk potential.
- Identify the role of the nurse when caring for clients within legal and ethical guidelines with a disorder in the cardiovascular-hematologic, respiratory, neurosensory, gastrointestinal-biliary, genitourinary-renal-reproductive, endocrine, musculoskeletal, medical emergencies, and integumentary systems.
- Describe the steps involved in registering for the NCLEX with the WA Department of Health and PearsonVue.
- Discuss the process for maintaining continued competency as a nurse, and ways to be a good nurse employee.
- Describe different work settings for a nurse, leadership styles, applying for a position as a nurse, writing a cover letter and resume, and interviewing.
- Identify the benefits of joining professional nursing organizations.
- Describe components of being professional in an online and clinical environment.

Program Outcomes

- Provide safe, quality, evidence-based, innovative client-centered nursing care to diverse clients across the lifespan.
- Engage in clinical judgment that integrates evidence, nursing, physical and psychosocial sciences, to ensure healthcare quality and safety, and make client/relationship centered care decisions within the scope of practice of the practical nurse.

- Participate in collaboration and teamwork with the inter-professional team, the client, and the client's support persons to provide and improve client care and communication.
- Integrate quality improvement activities and advocacy skills to enhance client care.
- Utilize information technology and supportive resources to improve client care processes within the healthcare system.
- Incorporate legal and ethical guidelines within the scope of practice of a practical nurse to enhance client care and professional development.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PNURSE 127 - Med-Surg Nursing II Simulation

Credits: 1

On campus and virtual simulation scenarios related to content in Med Surg II will provide the student with the opportunity to apply clinical skills using the nursing process and clinical judgment to give culturally sensitive care, and further refine clinical reasoning skills in a safe simulation environment.

Enrollment Requirement: Admission into the Practical Nursing Program

Course Fee: \$100.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify scientific principles when performing basic nursing care in a safe and effective care environment.
- Use the nursing process and clinical judgment with nursing care for one client who is in different stages of the life cycle.
- Document nursing care provided and client/family teaching.

- Provide nursing care in a simulation environment within legal and ethical guidelines.
- Perform culturally sensitive nursing care, including a focus on racial, socio-economic, sexual, gender, ethnicity, religious, social determinants of health, and spiritual needs of a client.
- Communicate with other health care team members to provide for continuity of care.
- Integrate principles of safety, quality, collaboration, relationship-centered care, systems-based care, and personal/professional development when providing care.
- Demonstrate safe performance of nursing skills.

Program Outcomes

- Provide safe, quality, evidence-based, innovative client-centered nursing care to diverse clients across the lifespan.
- Engage in clinical judgment that integrates evidence, nursing, physical and psychosocial sciences, to ensure healthcare quality and safety, and make client/relationship centered care decisions within the scope of practice of the practical nurse.
- Participate in collaboration and teamwork with the inter-professional team, the client, and the client's support persons to provide and improve client care and communication.
- Integrate quality improvement activities and advocacy skills to enhance client care.
- Utilize information technology and supportive resources to improve client care processes within the healthcare system.
- Incorporate legal and ethical guidelines within the scope of practice of a practical nurse to enhance client care and professional development.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PNURSE 194 - Special Studies-Nursing

Credits: 1-6

Enables students to pursue areas of special interest in the nursing field such as gerontology, adult critical care, pediatrics, and fetal monitoring.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Course outcomes to be determined by instructor based on selected course topic(s).

Program Outcomes

- Provide safe, quality, evidence-based, innovative client-centered nursing care to diverse clients across the lifespan.
- Engage in clinical judgment that integrates evidence, nursing, physical and psychosocial sciences, to ensure healthcare quality and safety, and make client/relationship centered care decisions within the scope of practice of the practical nurse.
- Participate in collaboration and teamwork with the inter-professional team, the client, and the client's support persons to provide and improve client care and communication.
- Integrate quality improvement activities and advocacy skills to enhance client care.
- Utilize information technology and supportive resources to improve client care processes within the healthcare system.
- Incorporate legal and ethical guidelines within the scope of practice of a practical nurse to enhance client care and professional development.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

PNURSE 198 - Independent Study-Nursing

Credits: 1-10

Students are responsible to meet with a Nursing advisor and agree to a specific objective contract which identifies unit of credits and learning experiences to be completed. This contract is filed with the Dean of Instruction, Health Sciences and Education.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Course outcomes to be mutually agreed upon between instructor and student.

Program Outcomes

- Provide safe, quality, evidence-based, innovative client-centered nursing care to diverse clients across the lifespan.
- Engage in clinical judgment that integrates evidence, nursing, physical and psychosocial sciences, to ensure healthcare quality and safety, and make client/relationship centered care decisions within the scope of practice of the practical nurse.
- Participate in collaboration and teamwork with the inter-professional team, the client, and the client's support persons to provide and improve client care and communication.
- Integrate quality improvement activities and advocacy skills to enhance client care.
- Utilize information technology and supportive resources to improve client care processes within the healthcare system.
- Incorporate legal and ethical guidelines within the scope of practice of a practical nurse to enhance client care and professional development.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

PNURSE 294 - Special Studies in Nursing 2

Credits: 1-6

Enables students to pursue areas of special interest in the nursing field such as neonatal intensive care, adult critical care, advanced pediatrics, and advanced fetal monitoring.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Course outcomes to be determined by instructor based on selected course topic(s).

Program Outcomes

- Provide safe, quality, evidence-based, innovative client-centered nursing care to diverse clients across the lifespan.
- Engage in clinical judgment that integrates evidence, nursing, physical and psychosocial sciences, to ensure healthcare quality and safety, and make client/relationship centered care decisions within the scope of practice of the practical nurse.
- Participate in collaboration and teamwork with the inter-professional team, the client, and the client's support persons to provide and improve client care and communication.
- Integrate quality improvement activities and advocacy skills to enhance client care.
- Utilize information technology and supportive resources to improve client care processes within the healthcare system.
- Incorporate legal and ethical guidelines within the scope of practice of a practical nurse to enhance client care and professional development.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Prior Learning Assessment

PLA 099 - Independent Study-Prior - Learning Assessment

Credits: 1-2

Assists students who wish to work on a Prior Learning Assessment project. PLA orientation sessions are provided by faculty and support staff. Instruction includes documentation requirements, assessment, transcript rules, transfer information and restrictions. Credits are awarded for demonstrated learning outcomes that are appropriate to a particular course offering. Faculty, as the content specialists, assesses and recognizes prior learning and makes the determination of credit awards. Credit for PLA may be granted only upon the recommendation of faculty who are appropriately qualified and who are on a regular appointment with the college on a continuing basis. Successful PLA coursework will be transcript on a notation basis. This is a pass/no credit course.

Enrollment Requirement: Instructor consent.

Psychology

PSYC& 100 - General Psychology

Credits: 5

Provides an overview of the scientific study of behavior and mental processes in humans and animals. Focuses on the presentation of various scientific theories and supporting research that currently guide the understanding of various aspects of human behavior such as learning, sensation, perception, motivation, memory, emotion, personality, development, abnormal behavior, psychotherapy, and group behavior.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Social Science

Course Fee: \$1.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Explain the scientific method as it applies within the discipline of psychology.
- Identify and describe the major theoretical perspectives utilized by psychology in understanding behavior and mental processes.
- Explain the major concepts utilized by psychologists in understanding various aspects of behavior and mental processes.

Program Outcomes

- Identify and apply concepts related to acquiring, evaluating and using reliable, valid, and powerful information to understand mind and behavior.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

PSYC& 180 - Human Sexuality

Credits: 5

Explores the physiological, social and psychological aspects of sexuality. Covers the major theoretical constructs and empirical data regarding sexuality. May cover research

techniques, sexual anatomy and physiology, sexual response, sexual behavior, orientation, relationships, love, sexual communication, sexual dysfunctions, deviations and treatment.

Enrollment Requirement: Eligible for ENGL 99; and PSYC& 100 with a grade of 2.0 or higher; or instructor consent.

Satisfies Requirement: Social Science

Course Fee: \$1.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Explain research data applied to sexuality.
- Describe sexual behavior.
- Describe love and relationships.
- Explain the physiology of sexuality and common deviations from the norm.

Program Outcomes

Identify and apply concepts related to acquiring, evaluating and using reliable, valid, and powerful information to understand mind and behavior.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

PSYC& 200 - Lifespan Psychology

Credits: 5

Covers theories and supporting research that explain psychological development from conception through old age. Topics may include physiological development, emotional development, personality and social development, cognitive development, and aging and death.

Enrollment Requirement: Eligible for ENGL& 101; and PSYC& 100 with a grade of 2.0 or higher; or instructor consent.

Satisfies Requirement: Social Science

Course Outcomes:

Students who successfully complete this class will be able to:

- Explain the research principles that underlie research in developmental psychology.
- Identify and describe the major theories utilized to understand human development.

- Identify and describe developmental milestones associated with prenatal, infancy, childhood, adolescence, and adult developmental periods.
- Explain the influences of biology and environment on human development.

Program Outcomes

Identify and apply concepts related to acquiring, evaluating and using reliable, valid, and powerful information to understand mind and behavior.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

PSYC 201 - Personality

Credits: 5

Presents an overview of various approaches to personality and their implications for healthy psychological adjustment to the demands of living. Approaches may include biological, psychodynamic, trait, behavioral, humanistic and cognitive perspectives on personality. Presents core concepts used by each perspective, as well as the assessment techniques generated by and used by that perspective.

Enrollment Requirement: Eligible for ENGL& 101; and PSYC& 100 with a grade of 2.0 or higher; or instructor consent.

Satisfies Requirement: Social Science

Course Fee: \$1.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Explain the research principles that underlie research on personality.
- Identify and describe the major theories utilized to understand personality.
- Specify the implications of various personality theories for healthy and pathological functioning.
- Identify the assessment techniques utilized by each theory.

Program Outcomes

Identify and apply concepts related to acquiring, evaluating and using reliable, valid, and powerful information to understand mind and behavior.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of

emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

PSYC 209 - Fundamentals of Psychological Research

Credits: 5

Introduces psychological research. Topics include interpretation of research, research problems and design, scientific writing, ethics, and literature review techniques.

Enrollment Requirement: Eligible for ENGL& 101; and PSYC& 100 with a grade of 2.0 or higher; or instructor consent.

Satisfies Requirement: Social Science

Course Outcomes:

Students who successfully complete this class will be able to:

- Plan or execute modest research projects.
- Explain the literature describing psychological research.
- Access research literature.
- Apply methods of psychological research.
- Produce scientific writing and use APA format and documentation.

Program Outcomes

Identify and apply concepts related to acquiring, evaluating and using reliable, valid, and powerful information to understand mind and behavior.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

PSYC& 220 - Psychological Disorders

Credits: 5

Covers the diagnosis, causes, and treatment of psychological disorders. Topics may include defining disorders, the history of psychological disorders, and differing theoretical models used to explain the cause of psychological disorders and the supporting research. Reviews disorders such as depression, anxiety, schizophrenia, anorexia nervosa, and dissociative identity disorder.

Enrollment Requirement: Eligible for ENGL& 101; and PSYC& 100 with a grade of 2.0

or higher; or instructor consent.

Satisfies Requirement: Social Science

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe the research methods appropriate to the study of psychological disorders.
- Explain the predominant theoretical approaches utilized in explaining psychological disorders.
- Describe the current methods of assessing psychological disorders.
- Apply the various theoretical approaches to the explanation of specific psychological disorders.
- Identify and describe specific psychological disorders.

Program Outcomes

Identify and apply concepts related to acquiring, evaluating and using reliable, valid, and powerful information to understand mind and behavior.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

PSYC 225 - Fundamentals of Physiological Psychology

Credits: 5

Introduces the physiological psychology and the neural mechanisms of behavior. May cover how neurons and neurotransmitters function, the anatomical overview of the nervous system, how sensory systems and motor systems function, the neural mechanisms of motivated behavior, emotion, learning, memory, and sleep and psychological disorders.

Enrollment Requirement: Eligible for ENGL& 101; and PSYC& 100 with a grade of 2.0 or higher; or instructor consent.

Satisfies Requirement: Social Science

Course Fee: \$1.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Explain the basic process of neuronal functioning both within and between neurons.

- Explain the fundamentals of the present state of knowledge concerning how brain and nervous system function gives rise to sensory, motor, motivational, memory and emotional processes.
- Identify the utility of models of nervous system processing for enhanced psychological functioning.

Program Outcomes

Identify and apply concepts related to acquiring, evaluating and using reliable, valid, and powerful information to understand mind and behavior.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

PSYC 240 - Social Psychology

Credits: 5

Covers theories and supporting research that explore the area of social psychology. Topics may include the social self, social cognition, stereotypes, prejudice and discrimination, individualistic and collectivistic cultures, attitudes, persuasion, group influence, conformity and obedience, attraction and close relationships, aggression and helping others, and conflict resolution.

Enrollment Requirement: PSYC& 100 with a grade of 2.0 or higher.

Satisfies Requirement: Social Science

Course Outcomes:

Students who successfully complete this class will be able to:

- Define social psychology and understand the role it plays in the field of psychology.
- Describe what attitudes are including attitude formation and persuasion.
- Define social perception and identify related concepts such as attribution theory, first impressions and the fundamental attribution error.
- Describe the power of social influence as demonstrated by classic research in areas like group conformity and obedience to authority.
- Describe the power of group behavior and the influence of groups.
- Define prejudice and identify the contributing factors.
- Identify approaches shown to resolve conflict between individuals and groups.
- Describe how factors related to culture (individualistic and collectivistic) contribute to the understanding of self and others.

Program Outcomes

- Identify and apply concepts related to acquiring, evaluating and using reliable, valid, and powerful information to understand mind and behavior.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

PSYC 298 - Independent Study-Psychology 1

Credits: 1-5

Allows students to pursue a special field of interest in psychology under the guidance of an instructor.

Enrollment Requirement: PSYC& 100 with a grade of 2.0 or higher and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe in detail a particular topic chosen by student.
- Explain the research associated with the chosen topic.
- Design a research project to explore the topic.
- Produce a write-up of the research proposal/project/topic using APA style.

Program Outcomes

Identify and apply concepts related to acquiring, evaluating and using reliable, valid, and powerful information to understand mind and behavior.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PSYC 299 - Independent Study-Psychology 2

Credits: 1-5

Continues project started in PSYC 298, or a second project.

Enrollment Requirement: PSYC 298 with a grade of 2.0 or higher and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe in detail a particular topic chosen by student.
- Explain the research associated with the chosen topic.
- Design a research project to explore the topic.
- Produce a write-up of the research proposal/project/topic using APA style.

Program Outcomes

Identify and apply concepts related to acquiring, evaluating and using reliable, valid, and powerful information to understand mind and behavior.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

PSYC 335 - Psychology of Aging

Credits: 5

Examines the psychological changes that occur in adulthood through late life from a developmental perspective. In this course students examine the psychological theories, perspectives, and research methodology used in the study of development. Biological, cognitive, emotional, social, and cultural aspects of the aging process are explored from individual, familial, and societal viewpoints.

Enrollment Requirement: Enrollment in the LPN to BSN Program.

Course Outcomes:

Students who successfully complete this class will be able to:

- Explain psychological theories of development as they relate to aging.
- Describe the research methods employed in the psychological study of aging.
- Identify and describe age-related biological, cognitive, and typical/atypical psychological changes.

- Identify and describe various influences (such as culture, society, and family) on the aging process.

Program Outcomes

Identify and apply concepts related to acquiring, evaluating and using reliable, valid, and powerful information to understand mind and behavior.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

Reading

READ 104 - Reading Mastery

Credits: 5

Emphasizes the development of the critical reading and thinking skills (analysis, synthesis, and evaluation) needed for courses in the humanities, social sciences, and sciences. Presents active reading strategies and study reading techniques.

Enrollment Requirement: English/reading placement.

Course Fee: \$2.50

Course Outcomes:

Students who successfully complete this class will be able to:

- Improve comprehension of college reading materials.
- Demonstrate meta-cognitive reading skills.
- Demonstrate critical reading skills.

Program Outcomes

Demonstrate college-level reading skills by summarizing, analyzing, interpreting, synthesizing, and evaluating college texts; and develop an awareness of the approaches writers use for different audiences, genres, and rhetorical situations.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

Social Science

S SCI 100 - Truth, Lies and Social Statistics

Credits: 5

Social statistics are not just numbers. They are often created to help explain the nature of social problems and guide personal and public decisions. Examines the creation, use, misuse, and abuse of social statistics. Also emphasizes student ability to critically evaluate arguments that use social statistics.

Enrollment Requirement: Eligible for MATH& 107.

Satisfies Requirement: Social Science

S SCI 160 - Introduction to the Study of Gender

Credits: 5

Introduces students to various methods and theories in the Social Scientific study of gender and sexuality. Course examines the intersections of gender and sex with race/ethnicity, nationality, socioeconomic class, disability, sexuality, and additional dimensions of difference. Course examines marginalization and/or discrimination based on intersectional sex/gender identities.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Social Science & Diversity

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe various methods and theories in the Social Scientific study of gender and sexuality.
- Describe how sex, gender, race, ethnicity, religion, disability, and social class inform intersectional identities.
- Describe historical marginalization and/or discrimination based on intersectional identities.
- Identify and evaluate scientific theory, scholarly research and empirical evidence.

Program Outcomes

Distinguish between opinions, facts, and evidence-based interpretations.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work

products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

S SCI 177 - Social Science Work Experience 1

Credits: 1-12

Allows students to work full- or part-time in jobs directly related to their programs and interests. Students may receive a salary or volunteer.

Enrollment Requirement: Eligible for ENGL 99 and concurrent enrollment in COOP 171 and instructor consent.

S SCI 178 - Social Science Work Experience 2

Credits: 1-12

Allows students to work full- or part-time in jobs directly related to their programs and interests. Students may receive a salary or volunteer.

Enrollment Requirement: Eligible for ENGL 99 and concurrent enrollment in COOP 171 and instructor consent.

S SCI 179 - Social Science Work Experience 3

Credits: 1-12

Allows students to work full- or part-time in jobs directly related to their programs and interests. Students may receive a salary or volunteer.

Enrollment Requirement: Eligible for ENGL 99 and concurrent enrollment in COOP 171 and instructor consent.

S SCI 194 - Special Topics-Social Science

Credits: 1-5

Focuses on a variety of current or long-range problems. Provides opportunities for an in-depth discussion of issues with instructors and specialists. May organize media courses.

Sociology

SOC& 101 - Introduction to Sociology

Credits: 5

Examines the structural forces that shape social experiences, including socialization processes, institutions, and social movements. Emphasizes the role of race, gender, class, and sexuality (amongst others) in shaping both structural inequalities and movements for social change. Contextualizes contemporary social phenomena in historical, cultural, economic, and political contexts.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science

Course Fee: \$1.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Critically analyze the relationship between social structures and individual agency.
- Explain how racial, gender, and class-based inequalities have been constructed over time.
- Critically analyze the effects of social stratification in terms of privilege, inequality, and outcomes for diverse groups in American society.

Program Outcomes

Demonstrate how inequality, privilege, and stratification are connected to course-specific content.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

SOC 194 - Special Topics-Sociology

Credits: 1-5

Focuses on one special topic in the current realm of social concern issues. May be repeated when a different topic is presented. Topics may include social movements, such as the Consciousness Movement, the rise of religious cults, violence in the media, aging in America, new social and political power, or youth in transition.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply the major theoretical perspectives to topic.
- Explain the fundamental significance of topic.
- Discuss the social construction of topic.

Program Outcomes

- Demonstrate how inequality, privilege, and stratification are connected to course-specific content.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

SOC& 201 - Social Problems

Credits: 5

Introduces the study of social problems within cultures, with a primary focus on American society. Examines issues such as social inequality, crime, drug abuse, family violence, population growth and environmental destruction using sociological theories, reasons and possible remedies.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science

Course Fee: \$1.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Analyze contemporary social problems from various lenses and perspectives.
- Demonstrate practical understanding of the complexity and controversy surrounding seemingly straightforward social problems.
- Demonstrate how social responsibility, awareness, and critical ability are needed to assess and tackle interconnected national and global social problems.

Program Outcomes

- Demonstrate how inequality, privilege, and stratification are connected to course-specific content.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

SOC 202 - Sociology of Food

Credits: 5

Using a sociological lens, the relationship between food and humans is examined, focusing on how food production and consumption are informed by social class, ethnicity, gender, globalization, social movements and technological changes. Humans give symbolic meaning to food as more than a source of nourishment; food rituals are embedded in social institutions, cultural patterns and social interactions between individuals which reflect changing cultural values and practices.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science

Course Fee: \$1.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply the major theoretical perspectives to food consumption and production practices.
- Explain the fundamental significance of food in human rituals and social institutions.
- Discuss the social construction of food as a form of cultural expression.
- Recognize the intersection of social class, gender, and ethnicity in food production and consumption patterns.
- Identify the connection between food production and globalization, including assessing the ecological implications of the current global food systems.
- Recall the various social movements related to food production and consumption.

Program Outcomes

- Demonstrate how inequality, privilege, and stratification are connected to course-specific content.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

SOC 205 - Sociology of Disability

Credits: 5

A sociological study of disability includes the implications of disability on identity formation and social policies. Examination also includes the intersectionality of disability with other categories such as race, gender, sexual orientation and social class. Investigates the Disability Rights Movement, from the enactment of the American with Disabilities Act to the development of the model of Universal Design.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science and Diversity

Course Fee: \$1.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe how the definition of disability evolved from a medical to a social one, and the implications of this evolution.
- Demonstrate a theoretical and practical understanding of disability, as part of identity formation, and as an impetus for social change.

- Investigate the intersectionality of disability with other historically marginalized identities and groups.

Program Outcomes

- Demonstrate how inequality, privilege, and stratification are connected to course-specific content.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

SOC 214 - Sociology of Race and Ethnicity

Credits: 5

Overview of major sociological perspectives in the study of race and ethnicity in society, including group relations, social stratification, and social change. Students survey theories, data, and sociohistorical/cultural processes useful for better understanding today's social world. Emphasis is placed on using sociological scholarship to solve modern racial dilemmas. Cross-listed with AMES 214.

Enrollment Requirement: Eligible for ENGL& 101; or instructor consent.

Satisfies Requirement: Social Science and Diversity

Course Fee: \$1.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate an understanding of race and ethnicity, as distinct social concepts.
- Explain the relevance of sociology to approaching social problems created by race.

Program Outcomes

- Demonstrate how inequality, privilege, and stratification are connected to course-specific content.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

SOC 215 - Survey of Criminology

Credits: 5

Covers the history and theory of what causes or contributes to crime, covering the major issues that confront the criminal justice system and studying the social organizations that create and enforce definitions of deviance and crime. Course is interdisciplinary in nature, working primarily from a sociological perspective, but including theories from biology, genetics, anthropology and psychology.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science

Course Fee: \$1.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Analyze crime, deviance, and social control from various perspectives.
- Identify the social forces that contribute to crime and deviance in American society.
- Explain crime and deviance as social construct that contributes to differential justice, across racial and economic lines.

Program Outcomes

- Demonstrate how inequality, privilege, and stratification are connected to course-specific content.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

SOC 220 - Sex and Gender in Society

Credits: 5

Explores gender as a major organizing principle in culture, and examines how gender influences sexuality, personal relationships and social institutions, including media, family, work, school and politics. Examines similarities and differences between the sexes primarily from a sociological perspective, but also through historical, psychological, biological and anthropological theories that contribute to understanding gender as a social force.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science and Diversity

Course Fee: \$1.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Explain how gender is socially constructed;
- Explain how cultural meanings attached to gender roles arise, are maintained, and change over time;
- Describe how relations of power have shaped gendered bodies, lives, and experiences across time and space.

Program Outcomes

- Demonstrate how inequality, privilege, and stratification are connected to course-specific content.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

SOC 230 - Sociology of Death and Dying

Credits: 5

Examines the connection between culture and the process of death, dying and bereavement. Focuses on how social class, family structures, ethnicity, religion and technological changes influence American customs, taboos, and rituals around death by applying sociological theories.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science

Course Fee: \$1.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Explain how people have responded to death and dying historically.
- Describe how one's social position influences the rituals associated with the death rite.
- Identify the role of technology in influencing our expectations around death.
- Differentiate between macro level factors, such as social policy and cultural norms, and micro level consequences, such as personal behaviors, choices and attitudes.

Program Outcomes

- Demonstrate how inequality, privilege, and stratification are connected to course-specific content.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

SOC 240 - Sociology of the Family

Credits: 5

Examines the social institution of family from historical and multi-cultural perspectives emphasizing the use of sociological theories. Specific topics include dating rituals, mate selection, parenting, divorce, family violence and work patterns. Focuses on how families are influenced by larger social forces, such as religion, social class and social policies.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science

Course Fee: \$1.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe how societal expectations and structures influence the way families are organized.
- Explain the influence of class, race, and gender on family structure and expectations.
- Identify how macro level policy come to impact the lives of individual families.

Program Outcomes

- Demonstrate how inequality, privilege, and stratification are connected to course-specific content.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

SOC 245 - Juvenile Delinquency

Credits: 5

Examines the history of the juvenile justice system, environmental influences on delinquency, theories of delinquency, controlling delinquency and current trends in juvenile crime. Examines the rationale behind the juvenile system, as well as the juvenile courts. Analyzes the various theories of crime causation including sociological,

psychological and criminological theories.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science

Course Fee: \$1.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Explain childhood developmental issues and how they relate to delinquency.
- Apply the various theories associated with juvenile delinquency.
- Identify the social forces that push juveniles to commit offenses and the one's contain them.

Program Outcomes

- Demonstrate how inequality, privilege, and stratification are connected to course-specific content.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

SOC 252 - Drugs and Society

Credits: 5

A theoretical exploration of drugs and drug use from a sociological perspective; we will cover the history of racialized drug policies, as they relate to systems of social control and mass incarceration, with a focus on the War on Drugs and the Opioid Epidemic. We will also look at the social meaning behind drug use and how it is influenced by culture and the socialization process. Other key components include the medicalization of drugs, drug use for ritual purposes, drug subcultures, and both legitimate and illegitimate systems of drug production and distribution.

Satisfies Requirement: Satisfies a social science requirement.

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe how drug policy has created mass incarceration in America.
- Apply sociological theory to drug use and policy in America.
- Identify the dimensions that shape our perceptions of drugs.
- Critique how punishments for drug use are shaped by inequality and privilege.

Program Outcomes

Demonstrate how inequality, privilege, and stratification are connected to course-specific content.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

SOC 260 - Crime and Justice

Credits: 5

Sociological study of the extent and causes of crime and a survey of the criminal justice system including the police, the courts and corrections. Gives attention to juvenile delinquency, gun control, capital punishment and violence against women.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science

Course Fee: \$1.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify and explain the types of crimes found in America.
- Apply the sociological perspective to crime.
- Identify the institutional procedures associated with crime.
- Explain the impact of crime on individuals.

- Identify how crime varies across key dimensions of inequality, such as gender, race/ethnicity, social/class.

Program Outcomes

- Demonstrate how inequality, privilege, and stratification are connected to course-specific content.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

SOC 271 - Deviance, Power, and Social Control

Credits: 5

Explores behaviors that breach culturally accepted norms within societies and considers the relations of power in which they are embedded. We examine how responses to deviant attitudes, behaviors, and conditions are determined by those in positions of power and used to label, stigmatize, and criminalize specific groups, as a larger political and economic struggle for power and social control.

Enrollment Requirement: Eligible for ENGL& 101 or instructor consent.

Satisfies Requirement: Social Science

Course Fee: \$1.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify and apply sociological theories of deviance and conformity.
- Dissect and critique specific acts of norm violation as they relate to power and social control.
- Describe the relativity of crime and deviance across time and space.
- Describe and identify the influences of gender, race, ethnicity, sexual orientation, class, and other social markers as they relate to deviance and social control.
- Explain how deviance can be used for social change and group cohesion.

Program Outcomes

- Demonstrate how inequality, privilege, and stratification are connected to course-specific content.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

SOC 298 - Independent Study-Sociology

Credits: 1-5

Allows students to individually pursue special interests in sociology under the guidance of an instructor.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe in detail a particular topic chosen by student.
- Explain the research associated with the chosen topic.
- Design a research project to explore the topic.

Program Outcomes

- Demonstrate how inequality, privilege, and stratification are connected to course-specific content.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

Software Development

SDEV 101 - Data Analytics Technologies

Credits: 5

Students learn how to use tools and technologies to collect, transform, and organize data to draw conclusions and drive informed decision making. Explore data analyst career paths. No prior experience required. Previously SDEV 122.

Course Outcomes:

Students who successfully complete this class will be able to:

- Recall the six stages of the data life cycle.
- Apply filter and sort tools in a spreadsheet to process and analyze data in a file.
- Apply filter and sort operators in a SQL SELECT statement to process and analyze data in a database.
- Apply spreadsheet formulas and functions to clean and summarize data.
- Apply SQL functions to clean and summarize data.
- Create a data visualization using a spreadsheet.
- Create a data visualization using a business intelligence tool.
- Recognize terms and concepts relating to contemporary data analytics technologies and careers.
- Recognize broader impacts and issues relating to data analytics such as privacy, security, ethics, and transparency.

Program Outcomes

- Solve data-related problems using a programming language.
- Demonstrate the ability to acquire, clean, and prepare data for analysis.
- Perform basic data analysis techniques such as filtering, aggregation, and joins.
- Produce and interpret data visualizations to describe, explore, and communicate insights from data.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

SDEV 106 - Front-End Web Development

Credits: 5

Covers the fundamentals of web page production. Students learn the three layers of front-end web development: HTML for structure, CSS for styling and JavaScript for behavior. Emphasizes design for usability and accessibility. Students learn how the Internet works, how a web page is processed, and how to launch a website on the Internet. Previously IT 206.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Use HTML5 to properly mark up a web page using a basic text editor.
- Apply both internal and external CSS to control the look and feel of a web page.
- Utilize classes and IDs, and know when it is appropriate to use each.
- Explain the importance of usability and perform usability testing.
- Explain the importance of accessibility and integrate accessibility features into a web page.
- Navigate directory structures and properly incorporate images and internal and external links.
- Utilize proper document structure and formatting standards.
- Follow proper file and folder naming conventions.
- Explain and utilize the Document Object Model (DOM).
- Write JavaScript functions to create interaction within a web page and control its behavior.

Program Outcomes

Create data visualizations to support communication.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

SDEV 117 - Web Programming with JavaScript

Credits: 5

Introduces students to JavaScript, a powerful programming language for creating dynamic, interactive web pages. Students learn the basics of JavaScript, and apply it

toward the development of a website. Topics include language constructs and syntax, event-driven programming, manipulating the Document Object Model (DOM), form validation, and utilizing JavaScript libraries, such as jQuery. Previously IT 207.

Enrollment Requirement: CS 108, CS 109, CS 121 or SDEV 218; and SDEV 106 all with grades of 1.0 or higher; or instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Design and create JavaScript programs that utilize selection, iteration, and functions.
- Apply best practices to code, including proper naming conventions, indentation, and documentation.
- Explain the difference between client- and server-side scripting.
- Apply JavaScript to a web page to make it more interactive.
- Implement event-driven programming.
- Effectively test and debug JavaScript code.
- Utilize JavaScript libraries to enhance JavaScript development.

Program Outcomes

Create data visualizations to support communication.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

SDEV 121 - Python for Data Analytics

Credits: 5

Problem solving and algorithm development are emphasized as students learn Python, the most widely used data science programming language. Students learn how to write Python programs to process data sets and gather insights from interpreting data.

Enrollment Requirement: CS 108 or CS 109 with a grade of 2.0 or higher; or instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Write a program that reads and processes data from a file.
- Recognize common data file formats (e.g. comma-separated values, JSON).
- Apply Python data structures (e.g. lists and dictionaries) to store and organize data in memory for processing.

- Apply Python control structures (e.g. decision and iteration) to support data analysis techniques such as filtering and calculating aggregate values.
- Apply Python variables and expressions to support calculation of values.
- Apply (call) library functions from the standard Python library (e.g. strings, random) to support data processing.
- Apply (call) library functions from third-party libraries (e.g. NumPy, pandas) to support data processing.
- Write a Python program that is decomposed and organized into multiple functions.

Program Outcomes

- Solve data-related problems using a programming language.
- Demonstrate the ability to acquire, clean, and prepare data for analysis.
- Perform basic data analysis techniques such as filtering, aggregation, and joins.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

SDEV 201 - SQL for Data Analytics

Credits: 5

Structured Query Language (SQL) is used to extract and analyze data stored in databases. Hands-on experience with extracting data and organizing it into meaningful information in realistic scenarios.

Course Outcomes:

Students who successfully complete this class will be able to:

- Explain the structure of tables and the function of keys in a relational database.
- Use diagrams to show how tables in a relational database relate to one another.
- Interpret business information requests to produce accurate SQL statements.
- Construct SQL queries to retrieve data from one or more tables in a database.
- Produce SQL queries using logical operators, expressions, and filters.

Program Outcomes

- Extract data from a database using a relational database language.
- Perform basic data analysis techniques such as filtering, aggregation, and joins.
- Understand and demonstrate basic programming and database constructs.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

SDEV 218 - Java Foundations

Credits: 5

Learn the concepts of Java programming and create Java programs using hands-on, engaging activities. Foundational topics include Java data types, methods, parameter passing, decision and loop constructs, arrays, and using library classes.

Enrollment Requirement: Eligible for MATH& 107 or higher; or instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Write (code) and test small Java programs to meet a specification.
- Identify and correct errors in a small Java program.
- Identify Java data types (e.g., int, double, char, boolean, array) and the operators that are defined on those types.
- Define variables and use them appropriately in expressions.
- Apply appropriate control structures (decisions and loops) to correctly control the flow of a program.
- Implement and call methods in a program with parameters and a return value.
- Apply (instantiate) objects and call methods from the standard library or a provided library.

Program Outcomes

- Develop stable, robust, secure, and efficient code following best practices in database design and software construction.
- Solve data related problems using a programming language.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

SDEV 219 - Object-Oriented Programming

Credits: 5

Introduces students to problem solving methods, algorithm development and object-oriented design. Design, implement, document and debug programs using an object-oriented programming language. Previously IT 219.

Enrollment Requirement: SDEV 218 with a grade of 2.0 or higher; or instructor

consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Define object-oriented terminology.
- Utilize classes, objects, and methods.
- Define variables and perform calculations using variables.
- Define variables and constants, using appropriate data types.
- Utilize the basic control structures in programming: sequence, selection, and iteration.
- Create and utilize a custom class.
- Create and manipulate arrays, including a sort.
- Utilize code libraries.
- Explain the compilation process.
- Define and utilize methods.

Program Outcomes

- Develop stable, robust, secure, and efficient code following best practices in database design and software construction.
- Solve data-related problems using a programming language.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

SDEV 220 - Elementary Data Structures

Credits: 5

A continuation of SDEV 219 emphasizing concepts of data abstraction and encapsulation. Topics include inheritance, interfaces, generics, collections, and the implementation of linked lists and binary search trees. Previously IT 220.

Enrollment Requirement: SDEV 219 with a grade of 2.0 or higher; or instructor consent.

Course Fee: \$50.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Create a class that is derived from another class, inheriting fields and methods from the superclass, and overriding methods in the subclass.

- Demonstrate the concept of polymorphism by defining unique behaviors in subclasses of a class while sharing some of the same functionality of the parent class.
- Define, implement, and use an interface.
- Invoke and instantiate a generic type.
- Use essential classes such as exceptions and basic I/O.
- Implement and manipulate elementary data structures: linked lists, stacks, and queues.
- Implement a binary search tree data structure and its recursive operations.

Program Outcomes

- Develop stable, robust, secure, and efficient code following best practices in database design and software construction.
- Solve data-related problems using a programming language.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

SDEV 280 - Data Analytics Capstone

Credits: 5

Initiate and complete a project in service of an organization, supporting the data life cycle by collecting, transforming, and analyzing data, and communicating results in order to inform and guide decision making. Topics include data sourcing, data visualization tools and techniques, and broader impacts such as privacy, ethics, and transparency.

Enrollment Requirement: SDEV 101 and SDEV 121 and SDEV 201; or instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Initiate a project through interviewing stakeholders and identifying their needs.
- Choose appropriate data sources that support the stakeholders' needs.
- Apply appropriate data science tools and class libraries to support data analysis activities such as data acquisition, processing, visualization.
- Present information and conclusions to stakeholders.
- Discuss broader impacts and issues relating to data analytics such as privacy, security, ethics, and transparency.

Program Outcomes

- Solve data-related problems using a programming language.
- Demonstrate the ability to acquire, clean, and prepare data for analysis.

- Perform basic data analysis techniques such as filtering, aggregation, and joins.
- Produce and interpret data visualizations to describe, explore, and communicate insights from data.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

SDEV 301 - Systems Programming

Credits: 5

Introduces computer systems from the perspective of a programmer. Topics include data and program representation, the memory hierarchy, processes and threads, network programming and run-time analysis. Previously IT 301.

Enrollment Requirement: Admission into the Information Technology-Software Development, BAS program.

Course Fee: \$150.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Represent and manipulate twos-complement integers at the binary level.
- Describe the characteristics of an instruction set architecture, including the roles of registers, op-codes, assembly and machine languages.
- Explain the roles of Java Virtual Machine components: class loader, compiler, interpreter, and garbage collector.
- Understand how memory is allocated to heap space or stack memory in the Java Virtual Machine.
- Compare primary, secondary and cache memory and how they impact program performance.
- Develop a program that uses multiple threads to perform work simultaneously.
- Develop a client-server program that uses a socket API to communicate over a network.

Program Outcomes

- Develop stable, robust, secure, and efficient code following best practices in database design and software construction.
- Write technical documentation to support software lifecycle activities.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

SDEV 305 - Web Development Fundamentals

Credits: 5

Students form software development teams to review and apply foundational concepts in HTML, CSS, and JavaScript to create responsive web pages. Introduces agile methods, version control systems, hosting environments.

Enrollment Requirement: Admission into the Information Technology-Software Development, BAS program.

Course Fee: \$150.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Create modern, responsive web pages using Hypertext Markup Language (HTML), Cascading Style Sheets (CSS), and JavaScript.
- Explain how web pages and applications are deployed, hosted, and managed.
- Define concepts in version control systems, including repositories, commits, branches, and merges.
- Apply workflows within Git and GitHub to collaboratively manage shared repositories.
- Identify and describe the elements of Scrum, including team roles, events, and artifacts.
- Demonstrate effective communication within a team and with project clients.

Program Outcomes

- Develop stable, robust, secure, and efficient code following best practices in database design and software construction.
- Communicate with technical and non-technical project stakeholders, and within project teams.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

SDEV 328 - Server-Side Web Development

Credits: 5

Students develop the back end of a data-driven web application using a server-side web framework. Topics include the HTTP protocol, RESTful web APIs, and authentication and authorization systems.

Enrollment Requirement: SDEV 301 and SDEV 305 with grades of 1.0 or higher.

Course Fee: \$150.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify the fundamental components of a client-server application architecture, including servers, clients, and the communication flow between them.
- Explain key concepts in the HTTP protocol, such as request-response cycles, headers, status codes, and the role of HTTP in client-server communication.
- Produce a data-driven server-side web application by leveraging a modern framework.
- Implement a user authentication and authorization system within a web application.

Program Outcomes

- Develop stable, robust, secure, and efficient code following best practices in database design and software construction.
- Write technical documentation to support software lifecycle activities.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

SDEV 333 - Data Structures

Credits: 5

Introduces algorithmic thinking and data structures, including lists, stacks, queues, trees,

hash tables, and heaps. Focus on data structure and algorithm implementation with integrated coverage of theory: logic, sets and set operations, functions. Previously IT 333.

Enrollment Requirement: SDEV 301 and SDEV 305 with a grades of 1.0 or higher.

Course Fee: \$150.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Develop a list, stack or queue data structure based on linked lists or static arrays.
- Develop a set or map data structure based on hash tables or binary search trees and implement basic set operations.
- Develop a binary search tree and implement pre-, post-, and in-order traversals.
- Demonstrate an understanding of self-balancing routines in a balanced binary search tree.
- Develop a priority queue using a binary heap implementation.

Program Outcomes

- Develop stable, robust, secure, and efficient code following best practices in database design and software construction.
- Communicate with technical and non-technical project stakeholders, and within project teams.
- Perform software quality assurance activities throughout the entire software lifecycle.
- Write technical documentation to support software lifecycle activities.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

SDEV 334 - Algorithms

Credits: 5

A continuation of the concepts and themes from SDEV 333. Algorithms selected from areas such as sorting, searching, shortest paths, greedy algorithms, divide-and-conquer, backtracking, and dynamic programming. Includes coverage of graph theory, graph data structures, and graph algorithms. Previously IT 334.

Enrollment Requirement: SDEV 328 and SDEV 333 with grades of 1.0 or higher.

Course Fee: \$150.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Analyze the runtime performance of an algorithm using big-O notation.
- Implement a graph data structure using an adjacency list or adjacency matrix.
- Differentiate between depth-first and breadth-first search algorithm strategies.
- Implement common graph algorithms such as shortest path and minimum spanning tree.
- Identify and describe common algorithm strategies, such as greedy, divide-and-conquer, backtracking, and dynamic programming.
- Discuss the notion of intractability in terms of P, NP, and NP-complete classes of problems.

Program Outcomes

- Develop stable, robust, secure, and efficient code following best practices in database design and software construction.
- Communicate with technical and non-technical project stakeholders, and within project teams.
- Perform software quality assurance activities throughout the entire software lifecycle.
- Write technical documentation to support software lifecycle activities.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

SDEV 355 - Full Stack Web Development

Credits: 5

Students build a Single-Page Application (SPA) using a modern web framework to explore the distributed application model from the perspective of a front-end developer. Topics include component-based user interfaces, routing, and managing application state.

Enrollment Requirement: SDEV 328 and SDEV 333 with a grades of 1.0 or higher.

Course Fee: \$150.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Develop an interactive and dynamic user interface using a front-end framework.
- Demonstrate proficiency in creating and managing components and handling component lifecycles.
- Implement strategies for routing and state management in a Single-Page Application (SPA).
- Design unit, integration, and end-to-end tests to implement a testing strategy.
- Create a deployment plan for both the back-end and front-end components of a web application.

Program Outcomes

- Develop stable, robust, secure, and efficient code following best practices in database design and software construction.
- Perform software quality assurance activities throughout the entire software lifecycle.
- Write technical documentation to support software lifecycle activities.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

SDEV 372 - Cloud Application Deployment

Credits: 5

Students explore principles of cloud applications from design to deployment. Topics include application deployment through virtual machines or containers and continuous integration/continuous delivery (CI/CD) pipelines for automated testing and deployment.

Enrollment Requirement: SDEV 355 with a grade of 1.0 or higher.

Course Fee: \$150.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Explain microservice architecture principles, including modularity, loose coupling, and decentralized data management.
- Demonstrate comprehension of Linux operating system fundamentals and how they relate to cloud platform deployments, including virtual machines and containerization.
- Apply software testing methods to a cloud-based application, including unit, integration, and end-to-end testing.
- Implement a basic CI/CD pipeline for automated testing and deployment.
- Compare cloud deployment strategies, considering scalability, security, and cost.

Program Outcomes

- Develop stable, robust, secure, and efficient code following best practices in database design and software construction.
- Perform software quality assurance activities throughout the entire software lifecycle.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

SDEV 378 - Software Career Preparation Seminar

Credits: 5

Prepares students for internships and entry-level roles in software development. Focus will be on how to manage the internship/career search and how to effectively secure a position. Personal branding, technical resumes, and industry-specific interviewing skills will also be covered. Previously IT 378. This is a pass/no credit course.

Enrollment Requirement: Admission into the Information Technology-Software Development, BAS program.

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate individual responsibility by taking ownership of their internship and career search.
- Recognize the major elements of the technical career search that are within one's own control.

- Prepare for technical career specific elements of the career search such as one-way video interviews, whiteboarding interviews, and the STAR method of answering behavioral interview questions.
- Set goals, plan, and track progress in the career search and career development processes.
- Create a technical resume that is targeted for a specific technical role.
- Develop a personal brand and the artifacts to support and communicate the brand to others.
- Establish a professional network, online and in-person, leveraging existing resources, to support the career search and development process.

Program Outcomes

Communicate with technical and non-technical project stakeholders, and within project teams.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

SDEV 426 - Design Patterns and Practices

Credits: 5

Software developers rely on design principles to guide their decisions when designing components of software. Topics include design notations, design patterns, refactoring, and design for change. Emphasis on design communication, design integrity and design trade-offs. Previously IT 426.

Enrollment Requirement: SDEV 333 with a grade of 1.0 or higher.

Course Fee: \$150.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Interpret object-oriented design concepts that are expressed in UML.
- Create software design artifacts that are geared toward a technical audience: class diagrams, sequence diagrams, state machine diagrams, or use case diagrams.
- Identify common software design patterns from a catalog of patterns.
- Apply appropriate design patterns in a given scenario and implement the pattern in code.

- Apply well-known principles in software design, such as the open-closed principle, command-query separation, dependency-inversion and the single-responsibility principle.
- Implement a program using a modern software framework that leverages architectural patterns, such as model-view-controller.

Program Outcomes

- Develop stable, robust, secure, and efficient code following best practices in database design and software construction.
- Write technical documentation to support software lifecycle activities.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

SDEV 485 - Software Development Capstone 1

Credits: 5

First of two capstone project courses. Students as technical team members partner with business team members and/or clients to develop a product or service concept that fulfills a business need. Previously IT 485.

Enrollment Requirement: SDEV 355 with a grade of 1.0 or higher.

Course Fee: \$150.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Conduct a project kickoff meeting with all project stakeholders.
- Differentiate between the Product Owner, Development Team, and Scrum Master roles in a Scrum team.
- Organize and conduct regular project meetings, including Sprint Planning meetings, Daily Scrum meetings, Sprint Review meetings, and Sprint Retrospective meetings.
- Integrate and reconcile business activities with technical team activities.
- Work with a team to manage the product backlog, a prioritized list of stories (high-level requirements) for the product.
- Work with a team to manage the sprint backlog, a prioritized list of tasks to be completed during a sprint.

- Work with a team to estimate the size of stories and tasks.
- Work with a team to establish the Definition of Done (DoD, or exit criteria) to determine when a story or task is complete.

Program Outcomes

- Develop stable, robust, secure, and efficient code following best practices in database design and software construction.
- Communicate with technical and non-technical project stakeholders, and within project teams.
- Apply Agile practices such as maintaining a product backlog, planning sprints, participating in sprint reviews and retrospectives.
- Perform software quality assurance activities throughout the entire software lifecycle.
- Write technical documentation to support software lifecycle activities.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

SDEV 486 - Software Development Capstone 2

Credits: 5

Second of two capstone project courses. Students as technical team members continue development of a product or service that fulfills a business need for clients and adapt as needed to changing business environments and/or requirements. Students present their products to a community of peers. Previously IT 486.

Enrollment Requirement: SDEV 485 with a grade of 1.0 or higher.

Course Fee: \$150.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Decompose user stories into acceptance criteria and technical tasks.
- Provide estimates for user stories and report actual effort expended.
- Describe how changes to requirements and design are handled in a project.

- Resolve conflicting perspectives in a project through communication.
- Present and demonstrate the product to a community of peers.
- Conduct a project closeout meeting and review.

Program Outcomes

- Develop stable, robust, secure, and efficient code following best practices in database design and software construction.
- Communicate with technical and non-technical project stakeholders, and within project teams.
- Apply Agile practices such as maintaining a product backlog, planning sprints, participating in sprint reviews and retrospectives.
- Perform software quality assurance activities throughout the entire software lifecycle.
- Write technical documentation to support software lifecycle activities.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

SDEV 494 - Special Topics 1: Software Development

Credits: 5

Course content varies by section and is selected to address contemporary and timely topics in software development, data analytics, and/or data engineering, supporting the program outcomes of the BAS Software Development program.

Enrollment Requirement: SDEV 328 and SDEV 333 with grades of 1.0 or higher.

Course Outcomes:

Students who successfully complete this class will be able to:

- Define relevant terms and concepts relating to the course topics.
- Articulate the relationship of the course topics to applications in industry.
- Create a technical artifact or work product, with supporting documentation, that demonstrates an application of the topic.

Program Outcomes

- Develop stable, robust, secure, and efficient code following best practices in database design and software construction.
- Write technical documentation to support software lifecycle activities.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

Spanish

SPAN 111 - Spanish for Health Care Workers 1

Credits: 5

Focuses on developing basic communication skills primarily for health care workers or for anyone desiring a background in the language of health care in Spanish. Students learn introductory vocabulary and grammatical structures in Spanish related to the language of health care.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Recognize the different cultures and customs of the diverse Hispanic population with whom they will most likely work.
- Demonstrate a basic oral and written communication skills in Spanish related to the provision of health care.
- Demonstrate a basic understanding of the basic structure of the Spanish language, in particular, the needed coordination of all the elements in a sentence.
- Develop proficiency in Spanish both orally and in writing using the present and the future tenses in simple sentences.
- Develop a sense of personal responsibility by following the guidelines stated in the syllabus and being held accountable for this.

Program Outcomes

- Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

SPAN 112 - Spanish for Health Care Workers 2

Credits: 5

A continuation of SPAN 111. Focuses on further developing communication skills primarily for health care workers or for anyone desiring a background in the language of medicine in Spanish. Students expand introductory vocabulary and grammatical structures in Spanish related to the language health care.

Enrollment Requirement: Eligible for ENGL 99 and SPAN 111 with a grade of 2.0 or higher.

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Recognize the different cultures and customs of the diverse Hispanic population with whom they will most likely work.
- Acquire proficiency in basic oral and written communication skills in Spanish related to the vocabulary used when interacting in a health care environment.
- Demonstrate communication in Spanish both orally and in writing using the forms of the past tense, the subjunctive and other related grammatical structures.
- Demonstrate a sense of personal responsibility by following the guidelines stated in the syllabus and be accountable for this.

Program Outcomes

- Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

SPAN 115 - Hispanic Activities

Credits: 1

Allows students to learn about the multiple contributions of the Hispanic world to the global community. Students are exposed to different elements of Hispanic culture, including music, dancing, and festivals, as well as basic Hispanic history.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate knowledge of the diversity of the Hispanic world.
- Illustrate a basic knowledge of the complex relation between the USA and the Hispanic world.
- Define different aspects of Hispanic popular culture such as food traditions, the importance of music and dancing, festivals, sports.

Program Outcomes

- Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

SPAN& 121 - Spanish I

Credits: 5

Begins the systematic study of Spanish emphasizing speaking and listening, basic grammar, vocabulary, reading, writing, and conversation practice. Course requires practice with lab materials.

Enrollment Requirement: Eligible for ENGL 99; and no previous background in Spanish, or no more than one year of high school Spanish, or no more than two years of high school Spanish with a "C" average or less.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate a basic knowledge of the diversity of the Hispanic world, its history and relations to the USA.
- Develop an understanding of the basic structure of the Spanish language, in particular, the needed coordination of all the elements in a sentence.
- Demonstrate communication in Spanish both orally and in writing using the present and the future tenses in simple sentences.

Program Outcomes

- Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

SPAN& 122 - Spanish II

Credits: 5

Systematic study of Spanish using the four basic skills of listening, speaking, reading and writing. Course requires practice with lab materials.

Enrollment Requirement: Eligible for ENGL 99; and a grade of 2.0 or higher in SPAN& 121; or equivalent with instructor consent. The equivalent of SPAN& 121 is one year in high school with a grade of B or higher.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Develop a basic knowledge of the diversity of the Hispanic world and its history.
- Determine the roots of common stereotypes about the Hispanic world in the US and about the USA in the Hispanic World.
- Demonstrate proficiency in Spanish orally and in writing using the present, the future and past tenses, as well as the reflexive constructions, at a level that allows them to be understood in Spanish on daily life situations.

Program Outcomes

- Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of

emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

SPAN& 123 - Spanish III

Credits: 5

Completion of basic grammar system, vocabulary, reading, writing, and conversation. Course requires practice with lab materials. Fulfills the University of Washington College of Arts and Sciences graduation requirement.

Enrollment Requirement: Eligible for ENGL 99; and a grade of 2.0 or higher in SPAN& 122 or equivalent with instructor consent. The equivalent of SPAN& 122 is two years in high school with a grade of B or higher.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Formulate knowledge of the diversity of the Hispanic world.
- Develop a basic knowledge of the complex relation between the USA and the Hispanic world.
- Demonstrate proficiency with the structure of the Spanish language, in particular, the needed coordination of all the elements in a sentence.
- Demonstrate proficiency in Spanish both orally and in writing using the present, the future, past and conditional tenses at a level that allows them to be understood in Spanish on daily life situations.
- Develop an understanding of the meaning and the construction of the subjunctive in Spanish.
- Demonstrate improvement in foreign language proficiency as well as intercultural competence.

Program Outcomes

- Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

SPAN 192 - Introduction to Spanish Life and Culture

Credits: 5

Students learn the various aspects of Spanish culture through the humanities. Students explore Spanish culture through history, literature and film. Explores the diverse cultural influences that have converged to influence the resulting Spanish culture of Spain. In English. Previously HUMAN 192.

Enrollment Requirement: Eligible for ENGL 99 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Gain an understanding of the diverse influences that have converged to create Spanish culture.
- Critically analyze various aspects of Spanish culture in relation to that of their own.
- Gain an awareness, understanding and appreciation of a culture different from their own.

Program Outcomes

Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

SPAN 194 - Special Studies-Spanish

Credits: 3-5

A field course experience in which students improve their conversational Spanish within a cultural framework. Content varies each time the course is offered. Includes actual practice in the language.

Enrollment Requirement: SPAN& 121 and SPAN& 122; or instructor consent; and eligible for ENGL 99.

Course Outcomes:

Students who successfully complete this class will be able to:

- Course outcomes to be determined by instructor based on selected course topic(s).

Program Outcomes

Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

SPAN& 221 - Spanish IV

Credits: 5

Systematic review of Spanish grammar aimed at communicative competency at an intermediate level. Intensive practice in listening, speaking, reading, and writing with special emphasis on reading and reacting to texts that explore the diversity of the Spanish speaking world, as well as the global and local implications of gender, racial and cultural interdependence. Includes a service component through interaction with ESL and International Hispanic students.

Enrollment Requirement: Eligible for ENGL 99; and a grade of 2.0 or higher in SPAN& 123 or equivalent with instructor consent. The equivalent of SPAN& 123 is three years in high school with a grade of B or higher.

Satisfies Requirement: Humanities/Fine Arts/English and Diversity

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate knowledge of the intricate diversity of the Hispanic World including issues related to the regions, conceptualizations and social relations in the areas of religion, political and economic power and gender as compared to European/Spanish constructions.
- Explain the complex relationship between the USA and the Hispanic world.
- Communicate in Spanish both orally and in writing using the present, the future and past (both preterit and imperfect) tenses at a level that allows them to be understood in Spanish in daily life situations and that allows them to understand readings at a fairly complex level.
- Generate complex sentences using the subjunctive in Spanish.
- Understand examples of Hispanic Literature.
- Apply knowledge in designed service learning experiences that will allow them to practice their language skills in real life situations while learning with/from the ESL and international Hispanic students on campus.

Program Outcomes

- Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

SPAN& 222 - Spanish V

Credits: 5

Systematic review of Spanish grammar aimed at communicative competency at an intermediate level. Intensive practice in listening, speaking, reading, and writing with special emphasis on reading and reacting to texts that explore the diversity of the Spanish speaking world, as well as the global and local implications of gender, racial and cultural interdependence. Includes a service component through interaction with ESL and International Hispanic students.

Enrollment Requirement: Eligible for ENGL 99; and a grade of 2.0 or higher in SPAN& 221 or equivalent with instructor consent. The equivalent of SPAN& 221 is four years in high school with a grade of B or above higher.

Satisfies Requirement: Humanities/Fine Arts/English and Diversity

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate knowledge of the intricate diversity of the Hispanic World including issues related to the regions conceptualizations and social relations in the areas of religion, political and economic power and gender as compared to European/Spanish constructions.
- Explain the complex relationship between the USA and the Hispanic world.
- Develop communicative proficiency in Spanish both orally and in writing using the present, the future and past (both preterit and imperfect) tenses at a level that allows them to be understood in Spanish in daily life situations and that allows them to understand readings at a fairly complex level.
- Generate complex sentences using the subjunctive in Spanish.
- Develop a basic knowledge of Hispanic Literature.
- Participate in designed service learning experiences that will allow them to practice their language skills in real life situations while learning with/from the ESL and international Hispanic students on campus.

Program Outcomes

- Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

SPAN& 223 - Spanish VI

Credits: 5

Systematic review of Spanish grammar aimed at communicative competency at an intermediate level. Intensive practice in listening, speaking, reading, and writing with special emphasis on reading and reacting to texts that explore the diversity of the Spanish speaking world, as well as the global and local implications of gender, racial and cultural interdependence. Includes oral practice through discussion of above-mentioned materials.

Enrollment Requirement: Eligible for ENGL 99; and a grade of 2.0 or higher in SPAN& 222 or equivalent with instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English and Diversity

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate knowledge of the intricate diversity of the Hispanic World including issues related to the regions, conceptualizations and social relations in the areas of religion, political and economic power and gender as compared to European/Spanish constructions.
- Explain the complex relationship between the USA and the Hispanic world.
- Develop communicative proficiency in Spanish both orally and in writing using the present, the future and past (both preterit and imperfect) tenses at a level that allows them to be understood in Spanish in daily life situations and that allows them to understand readings at a fairly complex level.
- Produce complex sentences using the construction of the subjunctive in Spanish.
- Understand complex texts of Hispanic Literature.
- Develop cultural empathy and understanding of another way of thinking and being.
- Demonstrate an advanced intermediate proficiency level of Spanish that is considered a professional skill for the global studies concentration.

Program Outcomes

- Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is

designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

SPAN 272 - Culturas de Espana

Credits: 5

Explores the cultural, historical and ethnographic forces influential in the development of modern Spanish culture. Explores the diverse cultural forces that forged modern demographics and cultures of Spain. Includes topics on marginalized cultures, cultural syncretism and cultural hegemony in the context of the Iberian Peninsula. Taught in the Spanish language, all lectures, readings, class discussion and assignments are in Spanish.

Enrollment Requirement: SPAN& 223 or instructor consent; and eligible for ENGL 99.

Satisfies Requirement: Humanities/Fine Arts/English

Course Fee: \$20.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Interpret cultural and historical forces that have convalesced to produce modern Spanish Culture.
- Demonstrate the origin and significance of the many influences on Spanish and world culture by thinking critically about the artistic, cultural, historical architectural influences evident today in the country.
- Develop and demonstrate communicative competency in Spanish by investigating, studying and holding class in the target language.
- Interpret and analyze the notions of cultural hegemony, cultural syncretism and minority cultures of the Iberian peninsula.

Program Outcomes

- Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is

designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

SPAN 290 - Latin American Culture Through Literature (Spanish)

Credits: 5

Introduces the study of Latin American culture through important works of literature that explore the complex social relations and culture of the region. Analyzes how Latin American literature has reflected cultural changes throughout the history of the region such as the impact of the conquest and slavery; the influence of Patriarchy/Machismo and Marianism in gender relations; the problematic relations with the U.S., the history of dictatorship and social revolution in Latin America. Focuses on preparing students to understand Latin America to be able to function in our globalized world while practicing the Spanish language. Cross-listed with LAS 190

Enrollment Requirement: Eligible for SPAN& 223 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English and Diversity

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Comprehend the usefulness of literary works to understand Latin American societies, histories and their complex social mixture of African, European and indigenous American constructions.
- Understand the main periods of the evolution of Latin American literature and their social and political contexts throughout the history of the region.
- Connect the socio-political changes within different Latin American societies with the evolution of its literature.
- Develop critical thinking tools in Spanish to analyze the multiple identities, histories, cultures, perspectives, contributions, knowledge and/or strategies of historically excluded groups in Latin America in some of the literature they produced.
- Develop skills in Spanish to travel, work, understand, and be sensitive to our Latin American neighbors.

Program Outcomes

Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.

SPAN 291 - Latin America in Film (Spanish)

Credits: 5

Explores the relationship between film and cultural interpretation and understanding of Latin America. Considers the history of cinema in Latin America. Focuses on how film has been used to interpret Latin American culture and how we can use it to understand Latin American past and present with special emphasis on discussing the complex history and social problems of the region. Also explores common stereotypes with which Latin America has been portrayed in mainstream U.S. movies. Knowledge of Spanish language required. Spanish 291 is cross-listed with LAS 191 and FILM 191

Enrollment Requirement: Eligible for ENGL 99 and completion of SPAN& 223; or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English and Diversity

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Interpret and discuss in Spanish art movies that deal with cultural and historical issues relating to multiple identities, histories cultures, perspectives, contributions, knowledge, struggles and strategies of historically excluded groups in Latin America.
- Acquire a general knowledge of Latin American history and culture in Spanish.
- Identify the stereotypes with which Latin America has been portrayed in mainstream US movies and will be able to discuss their own preconceptions and/or experiences.
- Use movies as a tool for understanding complex social realities.
- Connect theoretical reading with movies while practicing Spanish.

Program Outcomes

Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.

SPAN 292 - Latin American Women: Struggles and Literature (Spanish)

Credits: 5

Introduces the study of Latin American Women's struggles through important literature produced by Latin American women, to explore the historical construction of masculinity and femininity in the region, the role of politics and ideologies in that construction, the intersection of gender, race, class, ethnicity and nationality and the social movements that have impacted the lives of women in the region. Cross-listed with LAS 200

Enrollment Requirement: Eligible for SPAN& 223 or instructor consent.

Satisfies Requirement: Humanities/Fine Arts/English and Diversity

Course Outcomes:

Students who successfully complete this class will be able to:

- Discuss in Spanish the intersections of gender, race, politics, power, social structures and history in Latin America.
- Discuss in Spanish the relation of Latin American women's issues to the conquest and subsequent imperial dominations in the region.
- Understand the impacts of patriarchy/machismo, marianismo/malinchismo in gender relations in Latin America.
- Assess in Spanish how literature and art produced by Latin American women reflects, questions and advances the causes of women.
- Appraise the emergence of feminist ideas and organizations in Latin America, their conflicts with "First World Feminism," and their relations with non-feminist women organizations.
- Recognize and apply the basic principles and conventions of effective written communication about the subject in Spanish.
- Examine the following elements of thought: points of view, purpose, question at issue, implications and consequences, assumptions, concepts, conclusion and solutions.

Program Outcomes

Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.

SPAN 299 - Independent Study-Spanish

Credits: 1-5

Encourages students to study independently in a field of their special interest in Spanish. Students meet on a tutorial basis with their instructor. Course content is decided in conferences between student and instructor.

Enrollment Requirement: Eligible for ENGL 99; and a grade of 2.0 or higher in SPAN& 222 or equivalent with instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Course outcomes to be determined by instructor based on selected course topic(s).

Program Outcomes

Analyze cultural perspectives and values of a multicultural world.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Study Skills

ST SK 103 - Study-Reading Techniques in Science

Credits: 1

Improves study-reading skills related to the sciences. Introduces students to valuable information about study-reading techniques in science and stimulating resources. This is an important skill-building course that can influence college success but does not fulfill degree requirements. Planned or concurrent enrollment in a science course is recommended. This is a pass/no credit course.

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify some of the main challenges in science courses.
- Develop reading and study skills for science courses.
- Identify and use support resources in the science area and on campus.

Program Outcomes

Demonstrate college-level reading skills by summarizing, analyzing, interpreting, synthesizing, and evaluating college texts; and develop an awareness of the approaches writers use for different audiences, genres, and rhetorical situations.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

ST SK 106 - College Survival

Credits: 2

Provides first-time and returning students with specific skills and strategies needed to accomplish their academic goals with greater success. Through discussion, group exercises, and guest speakers, students are introduced to a variety of topics critical to student success: time management, setting priorities, learning styles, campus resources and policies, critical thinking, motivation, and test taking. This is a pass/no credit course.

Enrollment Requirement: Eligible for ENGL 97 or instructor consent.

Course Fee: \$5.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply study skills including note and test taking.
- Illustrate test taking and test anxiety coping strategies.
- Apply time management skills.
- Apply a decision making process to long and short term goal setting.
- Locate and use the college resources and services.
- Articulate career interests and abilities and apply them to develop a career plan.

Program Outcomes

Demonstrate college-level reading skills by summarizing, analyzing, interpreting, synthesizing, and evaluating college texts; and develop an awareness of the approaches writers use for different audiences, genres, and rhetorical situations.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of

emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

ST SK 110 - College Success

Credits: 2

Provides students with mentors and tailored tools, strategies, and self-reflective experiences that will help them identify and develop their unique strengths while also recognizing and elevating the skills of others with varied lived experiences in order to excel personally, academically, and professionally while at Green River College (GRC) and beyond.

Course Outcomes:

Students who successfully complete this class will be able to:

- Operate confidently as a culturally aware college student on GRC's virtual and physical campuses with clear comprehension of college terms and resources, and proactive engagement with campus community.
- Demonstrate professionalism and sensitivity in face-to-face and online interactions with others including peers, staff, and faculty.
- Practice academic success strategies, including academic goal setting, syllabus literacy, time management skills, note-taking, study, and test-taking skills.
- Select several personal-toolkit and self-advocacy strategies that increase mental, physical, and emotional well-being and support healthy social and academic networks, including values exercises, time- and stress- management tools, and effective communication approaches.
- Prepare actionable short- and long-term academic and career goals with the support of key campus resources (academic, transfer, and career planning).

Program Outcomes

Demonstrate college-level reading skills by summarizing, analyzing, interpreting, synthesizing, and evaluating college texts; and develop an awareness of the approaches writers use for different audiences, genres, and rhetorical situations.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as

necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Diversity and Equity** - In order to advance equity and social justice, students will be able to examine their own and others' identities, behaviors, and/or cultural perspectives as they connect to power, privilege, and/or resistance.

ST SK 199 - Independent Study-Study Skills

Credits: 1-3

Encourages students to work on a specific study technique. The technique must increase the student's understanding and application of study technique to academic work.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Develop reading and study skills to address specific issues and obstacles faced by the student.

Program Outcomes

Demonstrate college-level reading skills by summarizing, analyzing, interpreting, synthesizing, and evaluating college texts; and develop an awareness of the approaches writers use for different audiences, genres, and rhetorical situations.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Transitional Studies

\$25 tuition will be charged for any combination of TS classes each quarter.

TS 1 - HS21+ Prior Learning Assessment

Credits: 1

Allows students to earn high school-level credit for prior experience or learning on an individual basis. This is a pass/no credit course.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Write arguments to support claims using valid reasoning and relevant and sufficient evidence.
- Write informative/explanatory texts to convey complex ideas, concepts, and information clearly and accurately.

OR

- Gather relevant information from multiple sources.
- Integrate and present research in an effective format.
- Avoid plagiarism by following a standard format of citation.

Program Outcomes

Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS 20 - Transitional Studies Academic Orientation and Planning

Credits: 1-8

In this class, you'll make connections with classmates, teachers, and staff. You'll explore available resources and prepare to transition to college programs. Building on your own strengths and support systems, we will develop academic and career goals, personal wellness strategies, and college readiness skills. Find yourself at Green River! This is a pass/no credit course.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Set meaningful educational and career goals.
- Demonstrate college success skills.
- Navigate and utilize the Internet for college and career purposes.
- Make use of the resources available to support your program and career success.

Program Outcomes

Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS 24 - HS 21+-Pacific NW & Washington State History

Credits: 3-5

Examines the emergence of the modern Pacific Northwest beginning with the earliest geological creation of the region and continuing with Native American habitation, contact with Euro-Americans, the development of trade and early settlement, the development of an industrial economy, the cycle of 20th century wars and depression, and the post-World War II emergence of the Pacific Northwest. Students who successfully complete this course will earn High school 21+ credits in Washington State History.

Enrollment Requirement: Appropriate placement and instructor consent.

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Discuss the environmental, political, social, and economic issues that have led to the creation of the modern Pacific Northwest.
- Read important historical literature and documents to enhance their understanding of the region.
- Explore topics of current and historical interest in the region.
- Observe regional and local conditions in the historic and modern PNW through personal observation.
- Experience field experiences with other students.
- Write short papers and essay exams to refine their understanding of readings, observations, and field experiences.

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS 25 - HS+21-Civics and Government

Credits: 3-5

Introduces students to the American political system; its core values and principles as set forth in foundational documents, as well as its origins, institutions and operations. Includes brief treatments of political parties, historic development of American politics, civil liberties, plus taxes and budgets. Introduces students to the rights and responsibilities of citizenship and of democratic civic involvement. Students who successfully complete this course earn High School 21+ credits in Civics and Government.

Enrollment Requirement: Appropriate placement and instructor consent.

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Explain the core values and principles of U.S. democracy as set forth in foundational documents, including the Declaration of Independence and the Constitution.
- Analyze the purposes and organization of governments and laws.
- Identify the rights and responsibilities of citizenship and the principles of democratic civic involvement.
- Analyze the effect of economic systems on individuals, groups, and society using basic economic concepts.

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS 52 - Adult Basic Math Support

Credits: 1-10

A fully integrated support course for TS 53 for Transitional Studies students. Helps students succeed in TS 53 by providing additional coaching in critical thinking skills, time management, and study skills. Provides enhanced instruction in computer literacy, testing literacy, math language skills, college and career math readiness, integrating on-campus resources for additional support. This is a pass/no credit course.

Enrollment Requirement: Appropriate placement; concurrent enrollment in TS 53; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Predict number patterns and demonstrate operations fluency.
- Use technology tools and Green River's WAMAP assessment tool.
- Apply math to real life applications, including financial literacy, situational examples, and workplace computations.
- Use math language .
- Analyze math formulas and texts.
- Illustrate math resiliency (demonstrating a growth mindset toward learning math).

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

TS 53 - Adult Basic Math

Credits: 1-5

Students learn to easily select and apply the knowledge, skills, and strategies to independently accomplish well-defined and structured math tasks in a range of comfortable and familiar settings using whole numbers, decimals, and percents. This is a pass/no credit course.

Enrollment Requirement: Appropriate placement and instructor consent.

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Read, write, and interpret a variety of common mathematical information about:
- Whole number operations
- Integer operations
- Decimal operations
- Simple Order of operations
- Simple Algebraic expressions
- Fraction operations with benchmark fractions and mixed numbers

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

TS 54 - Transitional Studies Math Review Support

Credits: 1-10

A fully integrated support course for TS 55 for Transitional Studies students. Helps students succeed in TS 55 by providing additional coaching in critical thinking skills, time management, and study skills. Provides enhanced instruction in computer literacy, testing literacy, math language skills, college and career math readiness, integrating on-campus resources for additional support.

This is a pass/no credit course.

Enrollment Requirement: Appropriate placement; concurrent enrollment in TS 55; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe fraction and decimal relationships.
- Use navigate technology tools and Green River's WAMAP assessment tool.
- Apply math to real-life applications, including financial literacy, situational examples, and workplace computations.
- Use math language .

- Analyze math formulas and texts.
- Illustrate math resiliency (demonstrating a growth mindset toward learning math).

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

TS 55 - Transitional Studies Math Review

Credits: 5-10

Students review basic operations of arithmetic including whole numbers, fractions, decimals, percents, ratios, proportions, place value, roots, and basic concepts related to measurements and geometry. Methods include use of hands-on manipulatives. Study skills incorporate into the curriculum.

Enrollment Requirement: Appropriate placement and instructor consent.

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Read, write, and interpret a variety of common mathematical information about:
 - Linear equations
 - Equations with decimals and fractions
 - Basic statistics
 - Cartesian coordinates
 - Rates, ratios, and proportions
 - Percents
 - Roots and exponents

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.

- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

TS 56 - TS Problem Solving for Math HS Equivalency I

Credits: 5-10

Study of problem solving, geometry and measurement, exponents and signed numbers. Includes introductory work with polynomials, simple equations, basic descriptive statistics, and graphing.

Enrollment Requirement: TS 55 or appropriate placement; and instructor consent.

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Read, write, and interpret a variety of common mathematical information about:
- Unit conversion
- Geometry and measurement
- Basic statistics and coordinate graphing
- Pythagorean Theorem
- Introduction to polynomials
- Complex order of operations
- Complex algebraic expressions and linear equations

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

TS 57 - TS Problem Solving for Math HS Equivalency 2

Credits: 5-8

Study of properties and terminology of real numbers, absolute value, simplifying algebraic expressions, integer exponents, graphing and solving linear equations and inequalities, unit analysis, ratios, rates, and proportions, solving systems of equations, factoring and performing operations on polynomial expressions, Pythagorean Theorem, functions, and applications. Course requires a graphing calculator.

Enrollment Requirement: TS 56 with a grade of 2.5 or higher; or appropriate placement; or high school transcript evaluation; and instructor consent. **Recommended:** Eligible for READ 104.

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Read, write, and interpret a variety of common mathematical information about:
- Find real solutions for linear equations using tables, graphs, and algebra
- Simplify expressions involving integer exponents
- Simplify, add, subtract, and multiply polynomials
- Factor polynomial equations
- Graph linear equations
- Use functions in the form of graphs, tables, and linear equations
- Solve systems of linear equations
- Solve linear inequalities with one variable

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

TS 58 - TS Math High School Equivalency 1 Support

Credits: 1-10

A fully integrated support course for TS 56 for Transitional Studies students. Helps students succeed in TS 56 by providing additional coaching in critical thinking skills, time management, and study skills. Provides enhanced instruction in computer literacy,

testing literacy, math language skills, college and career math readiness, integrating on-campus resources for additional support. This is a pass/no credit course.

Enrollment Requirement: Appropriate placement; and concurrent enrollment in TS 56; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Compute variable equations and expressions.
- Use technology tools and Green River's WAMAP assessment tool.
- Apply math to real-life applications, including financial literacy, situational examples, and workplace computations.
- Use math language competencies.
- Analyze math formulas and texts.
- Illustrate math resiliency (demonstrating a growth mindset toward math).

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

TS 59 - TS Math High School Equivalency 2 Support

Credits: 1-10

A fully integrated support course for TS 57 for Transitional Studies students. Helps students succeed in TS 57 by providing additional coaching in critical thinking skills, time management, and study skills. Provides enhanced instruction in computer literacy, testing literacy, math language skills, college and career math readiness, integrating on-campus resources for additional support. This is a pass/no credit course.

Enrollment Requirement: Appropriate placement; and concurrent enrollment in TS 57; and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Compute and graph linear equations and systems of equations.

- Use technology tools and Green River's WAMAP assessment tool.
- Apply math to real-life applications, including financial literacy, situational examples, and workplace computations.
- Use math language competencies.
- Analyze math formulas and texts.
- Illustrate math resiliency (demonstrating a growth mindset toward learning math).

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

TS 62 - Language Arts in Social Studies Level 2

Credits: 5-10

Introduces Level 2 students to the basic principles of civics and government, US history, economics, geography, or current world problems. Students practice critical reading skills in the context of social studies-related texts. Students demonstrate analysis and understanding of social studies readings and concepts through the writing process.

Enrollment Requirement: Appropriate placement and instructor consent.

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Determine the meaning of words and phrases as they are used in a social studies text.
- Determine and summarize the organization structure and supporting details of a social studies text.
- Analyze how social studies texts make connections between ideas or compare and contrast facts.
- Use the writing process to convey ideas, concepts, explanations & research ideas with clear evidence.
- Use technology to produce and publish writing.

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS 63 - Language Arts in Social Studies Level 3

Credits: 5-10

Introduces Level 3 students to the basic principles of civics and government, US history, economics, geography, or current world problems. Students practice critical reading skills in the context of social studies-related texts. Students demonstrate analysis and understanding of social studies readings and concepts through the writing process.

Enrollment Requirement: Appropriate placement and instructor consent.

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Determine the meaning of concepts and ideas as they are presented in a social studies text.
- Apply social studies texts to current events, making connections between ideas.
- Compare and contrast facts from historical texts.
- Explain events, procedures, ideas or concepts in a historical text.
- Use information from multiple sources to compare and contrast events, ideas, and concepts.
- Use technology to research and report on topics of historical significance.

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is

designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS 64 - Language Arts in Social Studies Level 4

Credits: 5-10

Introduces Level 4 students to the basic principles of civics and government, US history, economics, geography, or current world problems. Students practice critical reading skills in the context of social studies-related texts. Students demonstrate analysis and understanding of social studies readings and concepts through the writing process. This is a pass/no credit course.

Enrollment Requirement: Appropriate placement and instructor consent.

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Analyze complex sets of ideas or sequences of historical events.
- Identify aspects of a social studies text that reveal an author's point of view or purpose.
- Paraphrase and summarize social studies texts.
- Analyze textual connections among and distinctions between individuals, ideas, or events of historical significance.
- Differentiate between relevant and irrelevant historical information.
- Gather relevant historical information from multiple print and digital sources, using search terms effectively.

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS 65 - Language Arts in Social Studies Level 5

Credits: 5-10

Introduces Level 5 students to the basic principles of civics and government, US history, economics, geography, or current world problems. Students practice critical reading skills in the context of social studies-related texts. Students demonstrate analysis and understanding of social studies readings and concepts through the writing process. Students who successfully complete this course earn 21 high school credits in social studies.

Enrollment Requirement: Appropriate placement and instructor consent.

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Cite specific textual evidence to support analysis of primary and secondary sources.
- Explain how author perspective affects the telling of historical events.
- Analyze a case in which two or more texts provide conflicting information on the same topic and identify where the texts disagree on matters of fact or interpretation.
- Analyze a complex set of ideas or sequence of events to explain how individuals, ideas, or events interact and develop over the course of a text.
- Integrate quantitative or technical analysis with qualitative analysis.
- Analyze seminal U.S. documents of historical and literary significance.
- Complete a research and application project on a social studies topic.

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS 66 - Language Arts in Social Studies Level 6

Credits: 5-10

Introduces Level 6 students to the basic principles of civics and government, US history, economics, geography, or current world problems. Students practice critical reading skills in the context of social studies-related texts. Students demonstrate analysis and understanding of social studies readings and concepts through the writing process. Students who successfully complete this course earn 21 high school credits in social studies.

Enrollment Requirement: Appropriate placement and instructor consent.

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Cite specific textual evidence to support analysis of primary and secondary sources.
- Explain how author perspective affects the telling of historical events.
- Analyze a case in which two or more texts provide conflicting information on the same topic and identify where the texts disagree on matters of fact or interpretation.
- Analyze a complex set of ideas or sequence of events to explain how individuals, ideas, or events interact and develop over the course of a text.
- Integrate quantitative or technical analysis with qualitative analysis.
- Analyze seminal U.S. documents of historical and literary significance.
- Complete a research and application project on a social studies topic.

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS 72 - Language Arts and Literature Level 2

Credits: 5-10

Introduces Level 2 students to the basic principles of the mechanics of writing and strategies to develop and organize complex ideas in writing. Students practice critical reading skills and demonstrate understanding of a variety of texts, including fiction, nonfiction, and informational through the writing process.

Enrollment Requirement: Appropriate placement and instructor consent.

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Find key evidence and make inferences from a text.
- Determine and summarize the organization structure and supporting details of a text.
- Analyze how texts make connections between ideas or compare and contrast facts.
- Use technology to produce and publish writing.
- Write a 5-sentence paragraph including topic sentence, supporting details, and a conclusion.
- Demonstrate exact sentence structure including capitalization, grammar, and punctuation.

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS 73 - Language Arts and Literature Level 3

Credits: 5-10

Introduces Level 3 students to the basic principles of the mechanics of writing and strategies to develop and organize complex ideas in writing. Students practice critical reading skills and demonstrate understanding of a variety of texts, including fiction, nonfiction, and informational through the writing process.

Enrollment Requirement: Appropriate placement and instructor consent.

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Locate, refer to and quote key details and examples from a text.
- Determine the meaning of general academic and domain-specific words and phrases.
- Determine and summarize the main idea or theme of a story, drama or poem.
- Use the writing process to convey opinions, explanation, stories & research.
- Use technology to research and report on topics.
- Write an 8-sentence paragraph incorporating topic sentence, supporting details, evidence from text, and conclusion.

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS 74 - Language Arts and Literature Level 4

Credits: 5-10

Introduces Level 4 students to the basic principles of the mechanics of writing and strategies to develop and organize complex ideas in writing. Students practice critical reading skills and demonstrate understanding of a variety of texts, including fiction, nonfiction, and informational through the writing process. This is a pass/no credit course.

Enrollment Requirement: Appropriate placement and instructor consent.

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Cite strong and thorough evidence and inferences from a text.
- Determine and summarize the theme, development and conclusion of a fiction or nonfiction text.
- Analyze and evaluate an author's claim and the effectiveness of the structure of a text.
- Use the writing process to convey ideas, concepts, explanations & research.
- Use technology to produce, publish, and revise writing products.
- Write a three paragraph essay, including introductory paragraph, body paragraph with supporting evidence, and a conclusion paragraph.

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS 75 - Language Arts and Literature Level 5

Credits: 5-10

Introduces Level 5 students to the basic principles of the mechanics of writing and strategies to develop and organize complex ideas in writing. Students practice critical reading skills and demonstrate understanding of a variety of texts, including fiction, nonfiction, and informational through the writing process. Students who successfully complete this course earn 21 high school credits in English.

Enrollment Requirement: Appropriate placement and instructor consent.

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.
- Determine the theme or central idea of a text and analyze in detail its development over the course of the text.

- Interpret figurative, connotative, and technical language.
- Write arguments to support claims with clear reasons and relevant evidence from multiple sources.
- Assess the credibility and accuracy of sources.
- Write a minimum of 5-paragraph research essay to answer a question, incorporating several sources to draw an original conclusion.
- Avoid plagiarism by following a standard format for citation.

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS 76 - Language Arts and Literature Level 6-1

Credits: 5-10

Introduces Level 6 students to the basic principles of the mechanics of writing and strategies to develop and organize complex ideas in writing. Students practice critical reading skills and demonstrate understanding of a variety of texts, including fiction, nonfiction, and informational through the writing process. Students who successfully complete this course earn High School 21+ credits in English.

Enrollment Requirement: Appropriate placement and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.
- Determine the theme or central idea of a text and analyze in detail its development over the course of the text.
- Interpret figurative, connotative, and technical language.
- Write arguments to support claims with clear reasons and relevant evidence from multiple sources.

- Assess the credibility and accuracy of sources.
- Write a minimum of 5-paragraph research essay to answer a question, incorporating several sources to draw an original conclusion.
- Avoid plagiarism by following a standard format for citation.

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS 77 - Language Arts and Literature Level 6-2

Credits: 5-10

Introduces Level 6 students to take an additional course studying the basic principles of the mechanics of writing and strategies to develop and organize complex ideas in writing. Students practice critical reading skills and demonstrate understanding of a variety of texts, including fiction, nonfiction, and informational through the writing process. Students who successfully complete this course earn High School 21+ credits in English.

Enrollment Requirement: Appropriate placement and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.
- Determine the theme or central idea of a text and analyze in detail its development over the course of the text.
- Interpret figurative, connotative, and technical language.
- Write arguments to support claims with clear reasons and relevant evidence from multiple sources.
- Assess the credibility and accuracy of sources.

- Write a minimum of 5-paragraph research essay to answer a question, incorporating several sources to draw an original conclusion.
- Avoid plagiarism by following a standard format for citation.

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS 82 - Language Arts in Physical Science Level 2

Credits: 5-10

Introduces Level 2 students to the basic principles of science through reading and writing. Also introduces students to the history and nature of science. Students explore the fundamental concepts of physics, chemistry, astronomy and earth science.

Enrollment Requirement: Appropriate placement and instructor consent.

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Determine the meaning of words and phrases as they are used in a science text.
- Determine and summarize the organization structure and supporting details of a science text.
- Analyze how science texts make connections between ideas or compare and contrast facts.
- Use the writing process to convey ideas, concepts, explanations & research ideas with clear evidence.
- Use technology to produce and publish writing.

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS 83 - Language Arts in Physical Science Level 3

Credits: 5-10

Introduces Level 3 students to the basic principles of science through reading and writing. Also introduces students to the history and nature of science. Students explore the fundamental concepts of physics, chemistry, astronomy and earth science.

Enrollment Requirement: Appropriate placement and instructor consent.

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Find specific evidence to support analysis of science and technical texts.
- Determine the meaning of concepts and ideas as they are presented in a scientific texts, charts, and graphs.
- Apply the steps of the scientific method to everyday situations as well as laboratory investigations.
- Explain events, procedures, ideas or concepts in a scientific or technical text.
- Use technology to research and report on topics of scientific significance.

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS 84 - Language Arts in Physical Science Level 4

Credits: 5-10

Introduces Level 4 students to the basic principles of science through reading and writing. Also introduces students to the history and nature of science. Students explore the fundamental concepts of physics, chemistry, astronomy and earth science. This is a pass/no credit course.

Enrollment Requirement: Appropriate placement and instructor consent.

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Cite specific textual evidence to support analysis of science and technical texts.
- Make connections using multiple sources to compare and contrast scientific events, ideas, and concepts.
- Apply scientific thinking to solve a problem.
- Identify aspects of a text that reveal an author's point of view or bias.
- Paraphrase and summarize texts.
- Differentiate between opinion and fact in scientific information.
- Gather relevant historical information from multiple print and digital sources.

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS 85 - Language Arts in Science Level 5

Credits: 5-10

Introduces Level 5 students to the basic principles of science through reading and writing. Also introduces students to the history and nature of science. Students explore the fundamental concepts of life, physics, chemistry, astronomy or earth science. Students who successfully complete this course earn High School 21+ credits in science OR lab science.

Enrollment Requirement: Appropriate placement and instructor consent.

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Cite specific textual evidence to support analysis of science and technical texts.
- Apply the steps of the scientific method to solve a problem.
- Critique information from various sources to determine if the information is scientific and credible.
- Demonstrate basic lab skills through the collection, synthesis, and analysis of data.
- Write arguments on science topics using valid reasoning, relevant information, and sufficient evidence.
- Summarize complex concepts, processes, or information presented in science texts.
- Complete a research and application project on a scientific topic applying the scientific method.
- Analyze and report on data drawn from the material world using the tools, data collection techniques, models and theories of science.
- Integrate quantitative or technical analysis with qualitative analysis.

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is

designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS 86 - Language Arts in Science Level 6

Credits: 5-10

Introduces Level 6 students to the basic principles of science through reading and writing. Also introduces students to the history and nature of science. Students explore the fundamental concepts of life, physics, chemistry, astronomy or earth science. Students who successfully complete this course earn High School 21+ credits in science OR lab science.

Enrollment Requirement: Appropriate placement and instructor consent.

Course Fee: \$3.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Determine the central ideas or conclusions of a text.
- Summarize complex concepts, processes, or information presented in a text by paraphrasing them in simpler but still accurate terms.
- Analyze a complex set of ideas or sequence of events and explain how specific individuals, ideas, or events interact and develop over the course of the text.
- Analyze and evaluate the effectiveness of the structure an author uses in his or her exposition or argument, including whether the structure makes points clear, convincing, and engaging.
- Integrate and evaluate multiple sources of information presented in different media or formats (e.g., visually, quantitatively) as well as in words in order to address a question or solve a problem.
- Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
- Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
- Draw evidence from literary or informational texts to support analysis, reflection, and research.
- Analyze and report on data gained from direct interaction with the material world, or with data drawn from the material world, using the tools, data collection techniques, models and theories of science.

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS 92 - HS21+ Prior Learning Assessment-Health & Fitness

Credits: 1-20

Allows students to earn high school-level credit for prior experience or learning on an individual basis. Involves documentation of the skill or training in health & fitness, accompanied by a reflection, written by the student/applicant, that describes the importance of this skill and why it should be considered for high school credit. This is a pass/no credit course.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Write arguments to support claims on health and fitness using valid reasoning and relevant and sufficient evidence.
- Write informative/explanatory texts on health and fitness to convey complex ideas, concepts, and information clearly and accurately.

OR

- Gather relevant information from multiple sources on a health and fitness topic.
- Integrate and present research on health and fitness in an effective format.
- Avoid plagiarism by following a standard format of citation.

Program Outcomes

Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS 93 - HS21+ Prior Learning Assessment-Art

Credits: 1-20

Allows students to earn high school-level credit for prior experience or learning on an individual basis. Involves documentation of the skill or training in art, including student-created art samples accompanied by artist statements or a research paper on other artists' work. This is a pass/no credit course.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Write arguments to support claims on art using valid reasoning and relevant and sufficient evidence.
- Write informative/explanatory texts on art to convey complex ideas, concepts, and information clearly and accurately.

OR

- Gather relevant information from multiple sources on an art topic.
- Integrate and present research on art in an effective format.
- Avoid plagiarism by following a standard format of citation.

Program Outcomes

Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS 94 - HS21+ Prior Learning Assessment-Occupational Ed

Credits: 1-20

Allows students to earn high school-level credit for prior experience or learning on an individual basis. Involves documentation of the skill or training in occupational education, accompanied by a reflection, written by the student/applicant, that describes the importance of this skill and why it should be considered for high school credit. This is a pass/no credit course.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Write arguments to support claims on occupational education using valid reasoning and relevant and sufficient evidence.
- Write informative/explanatory texts on occupational education to convey complex ideas, concepts, and information clearly and accurately.

OR

- Gather relevant information from multiple sources on an occupational education topic.
- Integrate and present research on art in an effective format.
- Avoid plagiarism by following a standard format of citation.

Program Outcomes

Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS 95 - HS 21+ Prior Learning Assessment 1

Credits: 5-20

Allows students to earn high school-level credit for prior experience or learning on an individual basis. Involves documentation of the skill or training in question, including but not limited to health and fitness, occupational education and fine arts, accompanied by a 2-page (750 word) reflection, written by the student/applicant, that describes the importance of this skill and why it should be considered for high school credit. This is a pass/no credit course.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Write arguments to support claims using valid reasoning and relevant and sufficient evidence.
- Write informative/explanatory texts to convey complex ideas, concepts, and information clearly and accurately.

OR

- Gather relevant information from multiple sources.
- Integrate and present research in an effective format.
- Avoid plagiarism by following a standard format of citation.

Program Outcomes

Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS 96 - HS 21+ Prior Learning Assessment 2

Credits: 5-20

Allows students to earn high school-level credit for prior experience or learning on an individual basis. Involves documentation of the skill or training in question, including but not limited to health and fitness, occupational education and fine arts, accompanied by a 2-page (750 word) reflection, written by the student/applicant, that describes the importance of this skill and why it should be considered for high school credit. This is a pass/no credit course.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Write arguments to support claims using valid reasoning and relevant and sufficient evidence.
- Write informative/explanatory texts to convey complex ideas, concepts, and information clearly and accurately.

OR

- Gather relevant information from multiple sources.
- Integrate and present research in an effective format.
- Avoid plagiarism by following a standard format of citation.

Program Outcomes

Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS 97 - Transitional Studies World Languages PLA

Credits: 5-20

This course awards prior learning credit for high school World Languages based on

student's ability to demonstrate competency via assessment. This is a pass/no credit course.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate at least novice mid-level of proficiency in World Language communication skills (listening, speaking, reading, and writing), determined through the guidelines set up by the American Council on the Teaching of Foreign Languages (ACTFL).

Program Outcomes

Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

Transitional Studies-Open Doors

TS-OD 1 - Open Doors-Prior Learning Assessment

Credits: 1

Allows students to earn high school-level credit for prior experience or learning on an individual basis. Involves documentation of the skill or training in question.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Write arguments to support claims using valid reasoning and relevant and sufficient evidence.
- Write informative/explanatory texts to convey complex ideas, concepts, and information clearly and accurately.

OR

- Gather relevant information from multiple sources.
- Integrate and present research in an effective format.
- Avoid plagiarism by following a standard format of citation.

Program Outcomes

Demonstrate the skills necessary for successful transition to college credit courses

and/or living wage employment.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS-OD 20 - Academic Orientation and Planning for Open Doors

Credits: 1-8

In this class, you'll make connections with classmates, teachers, and staff. You'll explore available resources and prepare to successfully transition to college programs and/or careers. Building on your own strengths and support systems, we will develop academic and career goals, personal wellness strategies, and college readiness skills, including skills needed for success on standardized tests, such as the GED®. Find yourself at Green River! This is a pass/no credit course.

Enrollment Requirement: Instructor consent. Students must be admitted through Open Doors.

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify and implement strategies for answering typical standardized test questions (multiple choice, short answer, and essay).
- Effectively evaluate standardized test results and make adjustments that improve subsequent test results.
- Practice academic and life success strategies, including academic and career goal setting and applying motivational strategies to support academic and career goals.
- Demonstrate professionalism and active learning in an in-person and/or online classroom environment through effective and meaningful participation.

Program Outcomes

Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

TS-OD 52 - Open Doors Adult Basic Math Support

Credits: 1-10

A fully integrated support course for TS-OD 53 for Open Doors students. Helps students succeed in TS-OD 53 by providing additional coaching in critical thinking skills, time management, and study skills. Provides enhanced instruction in computer literacy, testing literacy, math language skills, college and career math readiness, integrating on-campus resources for additional support. This is a pass/no credit course.

Enrollment Requirement: Appropriate placement; and concurrent enrollment in TS-OD 53; and instructor consent. Students must be admitted through Open Doors.

Course Outcomes:

Students who successfully complete this class will be able to:

- Predict number patterns and demonstrate operations fluency.
- Use navigate technology tools and Green River's WAMAP assessment tool.
- Apply math to real-life applications, including financial literacy, situational examples, and workplace computations.
- Use math language.
- Analyze math formulas and texts.
- Illustrate math resiliency (demonstrating a growth mindset toward learning math).

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

TS-OD 53 - Open Doors Adult Basic Math

Credits: 1-5

Students learn to easily select and apply the knowledge, skills, and strategies to independently accomplish well-defined and structured math tasks in a range of comfortable and familiar settings using whole numbers, decimals, and percents. This is a pass/no credit course.

Enrollment Requirement: Appropriate placement and instructor consent. Students must be admitted through Open Doors.

Course Outcomes:

Students who successfully complete this class will be able to:

- Read, write, and interpret a variety of common mathematical information about:
- Whole number operations
- Integer operations
- Decimal operations
- Simple Order of operations
- Simple Algebraic expressions
- Fraction operations with benchmark fractions and mixed numbers

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

TS-OD 54 - Open Doors Math Review Support

Credits: 1-10

A fully integrated support course for TS-OD 55 for Transitional Studies students. Helps students succeed in TS-OD 55 by providing additional coaching in critical thinking skills, time management, and study skills. Provides enhanced instruction in computer literacy, testing literacy, math language skills, college and career math readiness, integrating on-campus resources for additional support. This is a pass/no credit course.

Enrollment Requirement: Appropriate placement; and concurrent enrollment in TS-OD 55; and instructor consent. Students must be admitted through Open Doors.

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe fraction and decimal relationships.
- Use technology tools and Green River's WAMAP assessment tool.
- Apply math to real-life applications, including financial literacy, situational examples, and workplace computations.
- Use math language.
- Analyze math formulas and texts.
- Illustrate math resiliency (demonstrating a growth mindset toward learning math).

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

TS-OD 55 - Open Doors Math Review

Credits: 5-10

Students review basic operations of arithmetic including whole numbers, fractions, decimals, percents, ratios, proportions, place value, roots, and basic concepts related to measurements and geometry. Methods include use of hands-on manipulatives. Study skills incorporate into the curriculum.

Enrollment Requirement: Appropriate placement and instructor consent. Students must be admitted through Open Doors.

Course Outcomes:

Students who successfully complete this class will be able to:

- Read, write, and interpret a variety of common mathematical information about:
- Linear equations
- Equations with decimals and fractions
- Basic statistics
- Cartesian coordinates
- Rates, ratios, and proportions
- Percents
- Roots and exponents

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

TS-OD 56 - OD Math High School Equivalency 1

Credits: 5-10

Study of problem solving, geometry and measurement, exponents and signed numbers. Includes introductory work with polynomials, simple equations, basic descriptive statistics, and graphing.

Enrollment Requirement: Appropriate placement or high school transcript evaluation; and instructor consent. Students must be admitted through Open Doors.

Course Outcomes:

Students who successfully complete this class will be able to:

- Read, write, and interpret a variety of common mathematical information about:
- Unit conversion
- Geometry and measurement
- Basic statistics and coordinate graphing
- Pythagorean Theorem
- Introduction to polynomials
- Complex order of operations
- Complex algebraic expressions and linear equations

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

TS-OD 57 - OD Math High School Equivalency 2

Credits: 5-8

Expands student's algebraic skills in order to achieve a wide range of career, educational and personal goals. Content is delivered in a lecture format and includes evaluation and calculation of algebraic expressions and equations, inequalities, polynomials, systems of equations, and graphing. Emphasizes perseverance by building strategies based on past experience, algebraic skills, and numerical relationships.

Enrollment Requirement: TS-OD 56 with a grade of 2.5 or higher; or appropriate placement; or high school transcript evaluation; and instructor consent. Students must be admitted through Open Doors. **Recommended:** Eligible for READ 104.

Course Outcomes:

Students who successfully complete this class will be able to:

- Read, write, and interpret a variety of common mathematical information about:
- Find real solutions for linear equations using tables, graphs, and algebra
- Simplify expressions involving integer exponents
- Simplify, add, subtract, and multiply polynomials
- Factor polynomial equations
- Graph linear equations
- Use functions in the form of graphs, tables, and linear equations
- Solve systems of linear equations
- Solve linear inequalities with one variable

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

TS-OD 58 - OD Math High School Equivalency 1 Support

Credits: 1-10

A fully integrated support course for TS-OD 56 for Transitional Studies students. Helps students succeed in TS-OD 56 by providing additional coaching in critical thinking skills, time management, and study skills. Provides enhanced instruction in computer literacy, testing literacy, math language skills, college and career math readiness, integrating on-campus resources for additional support. This is a pass/no credit course.

Enrollment Requirement: Appropriate placement; and concurrent enrollment in TS-OD 56; and instructor consent. Students must be admitted through Open Doors.

Course Outcomes:

Students who successfully complete this class will be able to:

- Compute variable equations and expressions.
- Use navigate technology tools and Green River's WAMAP assessment tool.
- Apply math to real life applications, including financial literacy, situational examples, and workplace computations.
- Use math language competencies.
- Analyze math formulas and texts.
- Illustrate math resiliency (demonstrating growth mindset toward math).

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

TS-OD 59 - OD Math High School Equivalency 2 Support

Credits: 1-10

A fully integrated support course for TS-OD 57 for Transitional Studies students. Helps students succeed in TS-OD 57 by providing additional coaching in critical thinking skills, time management, and study skills. Provides enhanced instruction in computer literacy, testing literacy, math language skills, college and career math readiness, integrating on-campus resources for additional support. This is a pass/no credit course.

Enrollment Requirement: Appropriate placement; and concurrent enrollment in TS-OD 57; and instructor consent. Students must be admitted through Open Doors.

Course Outcomes:

Students who successfully complete this class will be able to:

- Compute and graph linear equations and systems of equations.
- Use technology tools and Green River's WAMAP assessment tool.

- Apply math to real-life applications, including financial literacy, situational examples, and workplace computations.
- Use math language competencies.
- Analyze math formulas and texts.
- Illustrate math resiliency (demonstrating a growth mindset toward math).

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

TS-OD 64 - Language Arts in Social Studies Level 4 Open Doors

Credits: 5-10

Introduces Level 4 students to the basic principles of civics and government, US history, economics, geography, or current world problems. Students practice critical reading skills in the context of social studies-related texts. Students demonstrate analysis and understanding of social studies readings and concepts through the writing process. This is a pass/no credit course.

Enrollment Requirement: Appropriate placement and instructor consent. Students must be admitted through Open Doors.

Course Outcomes:

Students who successfully complete this class will be able to:

- Analyze complex sets of ideas or sequences of historical events.
- Identify aspects of a social studies text that reveal an author's point of view or purpose.
- Paraphrase and summarize social studies texts.
- Analyze textual connections among and distinctions between individuals, ideas, or events of historical significance.
- Differentiate between relevant and irrelevant historical information.
- Gather relevant historical information from multiple print and digital sources, using search terms effectively.

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS-OD 65 - Language Arts in Social Studies Level 5 Open Doors

Credits: 5-10

Introduces Level 5 students to the basic principles of civics and government, US history, economics, geography, or current world problems. Students practice critical reading skills in the context of social studies-related texts. Students demonstrate analysis and understanding of social studies readings and concepts through the writing process. Students who successfully complete this course earn High School 21+ credits in social studies.

Enrollment Requirement: Appropriate placement and instructor consent. Students must be admitted through Open Doors.

Course Outcomes:

Students who successfully complete this class will be able to:

- Cite specific textual evidence to support analysis of primary and secondary sources.
- Explain how author perspective affects the telling of historical events.
- Analyze a case in which two or more texts provide conflicting information on the same topic and identify where the texts disagree on matters of fact or interpretation.
- Analyze a complex set of ideas or sequence of events to explain how individuals, ideas, or events interact and develop over the course of a text.
- Integrate quantitative or technical analysis with qualitative analysis.
- Analyze seminal U.S. documents of historical and literary significance.
- Complete a research and application project on a social studies topic.

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.

- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS-OD 66 - Language Arts in Social Studies Level 6 Open Doors

Credits: 5-10

Introduces Level 6 students to the basic principles of civics and government, US history, economics, geography, or current world problems. Students practice critical reading skills in the context of social studies-related texts. Students demonstrate analysis and understanding of social studies readings and concepts through the writing process. Students who successfully complete this course earn High School 21+ credits in social studies.

Enrollment Requirement: Appropriate placement and instructor consent. Students must be admitted through Open Doors.

Course Outcomes:

Students who successfully complete this class will be able to:

- Cite specific textual evidence to support analysis of primary and secondary sources.
- Explain how author perspective affects the telling of historical events.
- Analyze a case in which two or more texts provide conflicting information on the same topic and identify where the texts disagree on matters of fact or interpretation.
- Analyze a complex set of ideas or sequence of events to explain how individuals, ideas, or events interact and develop over the course of a text.
- Integrate quantitative or technical analysis with qualitative analysis.
- Analyze seminal U.S. documents of historical and literary significance.
- Complete a research and application project on a social studies topic.

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS-OD 72 - Open Doors Language Arts and Literature Level 2

Credits: 5-10

Introduces Level 2 students to the basic principles of the mechanics of writing and strategies to develop and organize complex ideas in writing. Students practice critical reading skills and demonstrate understanding of a variety of texts, including fiction, nonfiction, and informational through the writing process.

Enrollment Requirement: Appropriate placement and instructor's permission. Students must be admitted through Open Doors.

Course Outcomes:

Students who successfully complete this class will be able to:

- Find key evidence and make inferences from a text.
- Determine and summarize the organizational structure and supporting details of a text.
- Analyze how texts make connections between ideas or compare and contrast facts.
- Use technology to produce and publish writing.
- Write a 5-sentence paragraph including topic sentence, supporting details, and a conclusion.
- Demonstrate exact sentence structure including capitalization, grammar, and punctuation.

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS-OD 73 - Open Doors Language Arts and Literature Level 3

Credits: 5-10

Introduces Level 3 students to the basic principles of the mechanics of writing and strategies to develop and organize complex ideas in writing. Students practice critical reading skills and demonstrate understanding of a variety of texts, including fiction, nonfiction, and informational through the writing process.

Enrollment Requirement: Appropriate placement and instructor's permission. Students must be admitted through Open Doors.

Course Outcomes:

Students who successfully complete this class will be able to:

- Locate, refer to and quote key details and examples from a text.
- Determine the meaning of general academic and domain-specific words and phrases.
- Determine and summarize the main idea or theme of a story, drama or poem.
- Use the writing process to convey opinions, explanation, stories & research.
- Use technology to research and report on topics.
- Write an 8-sentence paragraph incorporating topic sentence, supporting details, evidence from text, and conclusion.

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS-OD 74 - Language Arts and Literature Level 4 Open Doors

Credits: 5-10

Introduces Level 4 students to the basic principles of the mechanics of writing and strategies to develop and organize complex ideas in writing. Students practice critical

reading skills and demonstrate understanding of a variety of texts, including fiction, nonfiction, and informational through the writing process. This is a pass/no credit course.

Enrollment Requirement: Appropriate placement and instructor consent. Students must be admitted through Open Doors.

Course Outcomes:

Students who successfully complete this class will be able to:

- Cite strong and thorough evidence and inferences from a text.
- Determine and summarize the theme, development and conclusion of a fiction or nonfiction text.
- Analyze and evaluate an author's claim and the effectiveness of the structure of a text.
- Use the writing process to convey ideas, concepts, explanations & research.
- Use technology to produce, publish, and revise writing products.
- Write a three paragraph essay, including introductory paragraph, body paragraph with supporting evidence, and a conclusion paragraph.

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS-OD 75 - Language Arts and Literature Level 5 Open Doors

Credits: 5-10

Introduces Level 5 students to the basic principles of the mechanics of writing and strategies to develop and organize complex ideas in writing. Students practice critical reading skills and demonstrate understanding of a variety of texts, including fiction, nonfiction, and informational through the writing process. Students who successfully complete this course earn High School 21+ credits in English.

Enrollment Requirement: Appropriate placement and instructor consent. Students must be admitted through Open Doors.

Course Outcomes:

Students who successfully complete this class will be able to:

- Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.
- Determine the theme or central idea of a text and analyze in detail its development over the course of the text.
- Interpret figurative, connotative, and technical language.
- Write arguments to support claims with clear reasons and relevant evidence from multiple sources.
- Assess the credibility and accuracy of sources.
- Write a minimum of 5-paragraph research essay to answer a question, incorporating several sources to draw an original conclusion.
- Avoid plagiarism by following a standard format for citation.

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS-OD 76 - Language Arts & Literature Level 6 Open Doors-1

Credits: 5-10

Introduces Level 6 students to the basic principles of the mechanics of writing and strategies to develop and organize complex ideas in writing. Students practice critical reading skills and demonstrate understanding of a variety of texts, including fiction, nonfiction, and informational through the writing process. Students who successfully complete this course earn High School 21+ credits in English.

Enrollment Requirement: Appropriate placement and instructor consent. Students must be admitted through Open Doors.

Course Outcomes:

Students who successfully complete this class will be able to:

- Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.
- Determine the theme or central idea of a text and analyze in detail its development over the course of the text.
- Interpret figurative, connotative, and technical language.
- Write arguments to support claims with clear reasons and relevant evidence from multiple sources.
- Assess the credibility and accuracy of sources.
- Write a minimum of 5-paragraph research essay to answer a question, incorporating several sources to draw an original conclusion.
- Avoid plagiarism by following a standard format for citation.

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS-OD 77 - Language Arts and Lit Level 6 Open Doors-2

Credits: 5-10

Introduces Level 6 students to the basic principles of the mechanics of writing and strategies to develop and organize complex ideas in writing. Students practice critical reading skills and demonstrate understanding of a variety of texts, including fiction, nonfiction, and informational through the writing process. Students who successfully complete this course earn High School 21+ credits in English.

Enrollment Requirement: Appropriate placement and instructor consent. Students must be admitted through Open Doors.

Course Outcomes:

Students who successfully complete this class will be able to:

- Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.

- Determine the theme or central idea of a text and analyze in detail its development over the course of the text.
- Interpret figurative, connotative, and technical language.
- Write arguments to support claims with clear reasons and relevant evidence from multiple sources.
- Assess the credibility and accuracy of sources.
- Write a minimum of 5-paragraph research essay to answer a question, incorporating several sources to draw an original conclusion.
- Avoid plagiarism by following a standard format for citation.

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS-OD 84 - Language Arts in Physical Science Level 4 Open Doors

Credits: 5-10

Introduces Level 4 students to the basic principles of science through reading and writing. Also introduces students to the history and nature of science. Students explore the fundamental concepts of physics, chemistry, astronomy and earth science. This is a pass/no credit course.

Enrollment Requirement: Appropriate placement and instructor consent. Students must be admitted through Open Doors.

Course Outcomes:

Students who successfully complete this class will be able to:

- Cite specific textual evidence to support analysis of science and technical texts.
- Make connections using multiple sources to compare and contrast scientific events, ideas, and concepts.
- Apply scientific thinking to solve a problem.
- Identify aspects of a text that reveal an author's point of view or bias.

- Paraphrase and summarize texts.
- Differentiate between opinion and fact in scientific information.
- Gather relevant historical information from multiple print and digital sources.

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS-OD 85 - Language Arts in Science Level 5 Open Doors

Credits: 5-10

Introduces Level 5 students to the basic principles of science through reading and writing. Also introduces students to the history and nature of science. Students explore the fundamental concepts of life, physics, chemistry, astronomy or earth science. Students who successfully complete this course earn High School 21+ credits in science OR lab science.

Enrollment Requirement: Appropriate placement and instructor consent. Students must be admitted through Open Doors.

Course Outcomes:

Students who successfully complete this class will be able to:

- Cite specific textual evidence to support analysis of science and technical texts.
- Apply the steps of the scientific method to solve a problem.
- Critique information from various sources to determine if the information is scientific and credible.
- Demonstrate basic lab skills through the collection, synthesis, and analysis of data.
- Write arguments on science topics using valid reasoning, relevant information, and sufficient evidence.
- Summarize complex concepts, processes, or information presented in science texts.
- Complete a research and application project on a scientific topic applying the scientific method.

- Analyze and report on data drawn from the material world using the tools, data collection techniques, models and theories of science.
- Integrate quantitative or technical analysis with qualitative analysis.

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS-OD 86 - Language Arts in Science Level 6 Open Doors

Credits: 5-10

Introduces Level 6 students to the basic principles of science through reading and writing. Also introduces students to the history and nature of science. Students explore the fundamental concepts of life, physics, chemistry, astronomy or earth science. Students who successfully complete this course earn High School 21+ credits in science OR lab science.

Enrollment Requirement: Appropriate placement and instructor consent. Students must be admitted through Open Doors.

Course Outcomes:

Students who successfully complete this class will be able to:

- Determine the central ideas or conclusions of a text; summarize complex concepts, processes, or information presented in a text by paraphrasing them in simpler but still accurate terms.
- Analyze a complex set of ideas or sequence of events and explain how specific individuals, ideas, or events interact and develop over the course of the text.
- Analyze and evaluate the effectiveness of the structure an author uses in his or her exposition or argument, including whether the structure makes points clear, convincing, and engaging.
- Integrate and evaluate multiple sources of information presented in different media or formats (e.g., visually, quantitatively) as well as in words in order to address a question or solve a problem.

- Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
- Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
- Draw evidence from literary or informational texts to support analysis, reflection, and research.
- Analyze and report on data gained from direct interaction with the material world, or with data drawn from the material world, using the tools, data collection techniques, models and theories of science.

Program Outcomes

- Demonstrate college-ready level reading, writing, digital literacy, and communication skills in social studies, literature, and science.
- Demonstrate competency in college-ready level mathematics.
- Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS-OD 92 - HS21+ Open Doors PLA-Health & Fitness

Credits: 1-20

Allows students to earn high school-level credit for prior experience or learning on an individual basis. Involves documentation of the skill or training in health & fitness, accompanied by a reflection, written by the student/applicant, that describes the importance of this skill and why it should be considered for high school credit. This is a pass/no credit course.

Enrollment Requirement: Instructor consent. Students must be admitted through Open Doors.

Course Outcomes:

Students who successfully complete this class will be able to:

- Write arguments to support claims on health and fitness using valid reasoning and relevant and sufficient evidence.

- Write informative/explanatory texts on health and fitness to convey complex ideas, concepts, and information clearly and accurately.

OR

- Gather relevant information from multiple sources on a health and fitness topic.
- Integrate and present research on health and fitness in an effective format.
- Avoid plagiarism by following a standard format of citation.

Program Outcomes

Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS-OD 93 - HS21+ Open Doors Prior Learning Assessment-Art

Credits: 1-20

Allows students to earn high school-level credit for prior experience or learning on an individual basis. Involves documentation of the skill or training in art, including student-created art samples accompanied by artist statements or a research paper on other artists' work. This is a pass/no credit course.

Enrollment Requirement: Instructor consent. Students must be admitted through Open Doors.

Course Outcomes:

Students who successfully complete this class will be able to:

- Write arguments to support claims on art using valid reasoning and relevant and sufficient evidence.
- Write informative/explanatory texts on art to convey complex ideas, concepts, and information clearly and accurately.

OR

- Gather relevant information from multiple sources on an art topic.
- Integrate and present research on art in an effective format.
- Avoid plagiarism by following a standard format of citation.

Program Outcomes

Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS-OD 94 - HS21+ Open Doors PLA - Occupational Ed

Credits: 1-20

Allows students to earn high school-level credit for prior experience or learning on an individual basis. Involves documentation of the skill or training in occupational education, accompanied by a reflection, written by the student/applicant, that describes the importance of this skill and why it should be considered for high school credit. This is a pass/no credit course.

Enrollment Requirement: Instructor consent. Students must be admitted through Open Doors.

Course Outcomes:

Students who successfully complete this class will be able to:

- Write arguments to support claims on occupational education using valid reasoning and relevant and sufficient evidence.
- Write informative/explanatory texts on occupational education to convey complex ideas, concepts, and information clearly and accurately.

OR

- Gather relevant information from multiple sources on an occupational education topic.
- Integrate and present research on art in an effective format.
- Avoid plagiarism by following a standard format of citation.

Program Outcomes

Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS-OD 95 - Open Doors-Prior Learning Assessment 1

Credits: 5-30

Allows Open Doors students to earn high school-level credit for prior experience or learning on an individual basis. Involves documentation of the skill or training in question, including but not limited to health and fitness, occupational education and fine arts, accompanied by a 2-page (750 word) reflection, written by the student/applicant, that describes the importance of this skill and why it should be considered for high school credit. This is a pass/no credit course.

Enrollment Requirement: Instructor consent. Students must be admitted through Open Doors.

Course Outcomes:

Students who successfully complete this class will be able to:

- Write arguments to support claims using valid reasoning and relevant and sufficient evidence.
- Write informative/explanatory texts to convey complex ideas, concepts, and information clearly and accurately.

OR

- Gather relevant information from multiple sources.
- Integrate and present research in an effective format.
- Avoid plagiarism by following a standard format of citation.

Program Outcomes

Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS-OD 96 - Open Doors-Prior Learning Assessment 2

Credits: 5-20

Allows students to earn high school-level credit for prior experience or learning on an individual basis. Involves documentation of the skill or training in question. This is a pass/no credit course.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Write arguments to support claims using valid reasoning and relevant and sufficient evidence.
- Write informative/explanatory texts to convey complex ideas, concepts, and information clearly and accurately.

OR

- Gather relevant information from multiple sources.
- Integrate and present research in an effective format.

- Avoid plagiarism by following a standard format of citation.

Program Outcomes

Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

TS-OD 97 - Open Doors World Languages PLA

Credits: 5-20

This course awards prior learning credit for high school World Languages based on student's ability to demonstrate competency via assessment. This is a pass/no credit course.

Enrollment Requirement: Instructor consent. Students must be admitted through Open Doors

Course Outcomes:

Students who successfully complete this class will be able to:

- Demonstrate at least novice mid-level of proficiency in World Language communication skills (listening, speaking, reading, and writing), determined through the guidelines set up by the American Council on the Teaching of Foreign Languages (ACTFL).

Program Outcomes

Demonstrate the skills necessary for successful transition to college credit courses and/or living wage employment.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

Wastewater Technology

WWT 172 - Industrial Wastewater Instrumentation

Credits: 1

Covers basic concepts and industry practices regarding wastewater treatment instrumentation measuring systems and their associated control systems.

Course Outcomes:

Students who successfully complete this class will be able to:

- Explain the purpose and nature of measurement and control systems.
- Recognize types of sensors and transducers.
- Read instruments and apply the information to industrial wastewater treatment processes.
- Identify measurement and control system problems.
- Operate treatment process support equipment
- electronic testing equipment
- flow measurement devices
- Evaluate treatment processes using SCADA systems.

Program Outcomes

- Monitor physical/chemical industrial wastewater treatment processes.
- Evaluate physical/chemical industrial wastewater treatment processes.
- Adjust physical/chemical industrial wastewater treatment processes.
- Add chemicals to industrial wastewater treatment processes.
- Collect samples for industrial wastewater treatment processes.
- Perform laboratory analysis of samples.
- Interpret analysis of sample data.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

WWT 174 - Industrial Wastewater Regulations

Credits: 1

Covers water pollution control statutes and regulations that concern industrial facilities which discharge directly to the environment or to publicly owned wastewater collection systems and treatment plants.

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe portions of the Clean Water Act that impact industrial wastewater treatment.
- Describe the role of the Environmental Protection Agency in pollution control efforts.
- Describe the types of industrial dischargers regulated by the National Pollutant Discharge Elimination System permit system, the National Pretreatment Program, the categorical pretreatment program, and other federal programs.
- Explain the role of local authorities in control of pollutants.
- Demonstrate knowledge of legal liability.
- Explain the role of local codes and ordinances in the National Pretreatment Program.
- Demonstrate knowledge of regulations for direct and indirect dischargers.
- Interpret monitoring and reporting requirements.

Program Outcomes

- Monitor physical/chemical industrial wastewater treatment processes.
- Evaluate physical/chemical industrial wastewater treatment processes.
- Adjust physical/chemical industrial wastewater treatment processes.
- Add chemicals to industrial wastewater treatment processes.
- Collect samples for industrial wastewater treatment processes.
- Perform laboratory analysis of samples.
- Interpret analysis of sample data.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

WWT 175 - Industrial Wastewater Treatment Processes 1

Credits: 2

Focuses on the operation of industrial wastewater pretreatment facilities and industrial wastewater treatment facilities discharging directly to the environment (with NPDES permits). Introduces industrial wastewater variables, components, effects and generation. Covers treatment processes including preliminary treatment (flow equalization, screening, pH adjustment), and physical treatment (air stripping, carbon absorption).

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe industrial wastewater variables, components, effects and generation.
- Describe theory and operational considerations of typical physical/chemical industrial wastewater treatment processes.
- Flow equalization
- Screening
- Dissolved air flotation
- Air stripping
- Electrodialysis
- Carbon adsorption
- Cyanide destruction
- Metal hydroxide precipitation
- Oil separation
- Perform process control calculations.
- Adjust physical/chemical industrial wastewater treatment processes.
- Add chemicals to industrial wastewater treatment processes.
- Collect samples for industrial wastewater treatment processes.

Program Outcomes

- Monitor physical/chemical industrial wastewater treatment processes.
- Evaluate physical/chemical industrial wastewater treatment processes.
- Adjust physical/chemical industrial wastewater treatment processes.
- Add chemicals to industrial wastewater treatment processes.
- Collect samples for industrial wastewater treatment processes.
- Perform laboratory analysis of samples.
- Interpret analysis of sample data.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

WWT 176 - Industrial Wastewater Treatment Processes 2

Credits: 2

A continuation of WWT 175. Covers treatment processes including physical chemical (coagulation, flocculation and sedimentation), filtration, and treatment of metal waste streams.

Course Outcomes:

Students who successfully complete this class will be able to:

- Characterize industrial wastewater, including variables, components, effects and generation.
- Describe theory and operational consideration of typical industrial wastewater treatment processes.
- Perform related calculations.

Program Outcomes

- Monitor physical/chemical industrial wastewater treatment processes.
- Evaluate physical/chemical industrial wastewater treatment processes.
- Adjust physical/chemical industrial wastewater treatment processes.
- Add chemicals to industrial wastewater treatment processes.
- Collect samples for industrial wastewater treatment processes.
- Perform laboratory analysis of samples.
- Interpret analysis of sample data.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

WWT 177 - Wastewater Work Experience

Credits: 1-12

Allows student to work full- or part-time in jobs directly related to their programs and interests. Students may receive a salary or volunteer. This is a pass/no credit course.

Enrollment Requirement: Instructor consent.

Course Fee: \$80.00 per unit/credit

Course Outcomes:

Student and instructor will agree upon specific course content learning outcomes and assessment instruments and will state them in the Cooperative Education Training Agreement.

Program Outcomes

- Identify characteristics of wastewater conveyed and treated in municipal wastewater collection and wastewater treatment systems.
- Monitor, evaluate and adjust processes used in municipal wastewater collection and wastewater treatment systems.
- Monitor, evaluate, operate and maintain common types of equipment found in municipal wastewater collection and wastewater treatment systems.
- Apply appropriate safety procedures to operation of municipal wastewater collection and wastewater treatment systems.
- Collect samples for, perform and interpret results of basic laboratory analyses used to monitor municipal wastewater collection and wastewater treatment systems.
- Perform supporting administrative duties for municipal wastewater collection and wastewater treatment systems.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

WWT 180 - Wastewater Collection

Credits: 3

Topics include composition and sources of wastewater; purposes of wastewater collection systems; wastewater collection system components including preliminary treatment, piping systems and lift stations; wastewater collection system operation and maintenance including inspecting, testing, and cleaning; normal and abnormal operating conditions.

Course Fee: \$500.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify parts of a wastewater collection system.
- Identify equipment used during maintenance of wastewater collection system.
- Describe standard operating procedures within a wastewater collection system.
- Describe indicators of normal and abnormal conditions in a wastewater collection system.

Program Outcomes

- Identify characteristics of wastewater conveyed and treated in municipal wastewater collection systems.
- Monitor, evaluate and adjust processes used in municipal wastewater collection systems.
- Monitor, evaluate, operate and maintain common types of equipment found in municipal wastewater collection systems.
- Apply appropriate safety procedures to operation of municipal wastewater collection systems.
- Perform supporting administrative duties for municipal wastewater collection systems.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

WWT 185 - Municipal Wastewater Treatment 1

Credits: 3

Gives an overview of the purpose, operation and maintenance of municipal wastewater treatment plant processes including preliminary treatment, primary treatment, trickling filters and rotating biological contractors.

Enrollment Requirement: MATH 72, MATH 97 or eligible for MATH 97; ENGL 99 or ENGL& 101 or eligible for ENGL 99.

Course Fee: \$500.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe sources and characteristics of wastewater.
- Interpret regulations affecting operation of wastewater treatment plants.
- Describe the purpose and operation of wastewater treatment process units.
- Perform calculations related to process control of wastewater treatment processes.

Program Outcomes

- Identify characteristics of wastewater conveyed and treated in municipal wastewater collection and wastewater treatment systems.
- Monitor, evaluate and adjust processes used in municipal wastewater collection and wastewater treatment systems.
- Monitor, evaluate, operate and maintain common types of equipment found in municipal wastewater collection and wastewater treatment systems.
- Apply appropriate safety procedures to operation of municipal wastewater collection and wastewater treatment systems.
- Collect samples for, perform and interpret results of basic laboratory analyses used to monitor municipal wastewater collection and wastewater treatment systems.
- Perform supporting administrative duties for municipal wastewater collection and wastewater treatment systems.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

WWT 186 - Municipal Wastewater Treatment 2

Credits: 3

Gives an overview of the purpose, operation and maintenance of municipal wastewater treatment activated sludge and stabilization pond processes. Covers solids processes including thickening, anaerobic digestion, aerobic digestion and dewatering.

Enrollment Requirement: WWT 185

Course Fee: \$500.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Interpret regulations affecting operation of wastewater treatment plants.
- Describe the purpose and operation of wastewater treatment process units.
- Perform calculations related to process control of wastewater treatment processes.

Program Outcomes

- Monitor, evaluate and adjust processes used in municipal wastewater collection and wastewater treatment systems.
- Monitor, evaluate, operate and maintain common types of equipment found in municipal wastewater collection and wastewater treatment systems.
- Apply appropriate safety procedures to operation of municipal wastewater collection and wastewater treatment systems.

- Collect samples for, perform and interpret results of basic laboratory analyses used to monitor municipal wastewater collection and wastewater treatment systems.
- Perform supporting administrative duties for municipal wastewater collection and wastewater treatment systems.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

WWT 188 - Wastewater Laboratory

Credits: 2

Covers theory, performance, and interpretation of basic wastewater laboratory procedures used to assess water quality. Topics include safety, total solids, dissolved oxygen, biochemical oxygen demand, pH, fecal coliform, and chlorine residual.

Course Fee: \$360.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Define terms as they apply to basic wastewater laboratory testing.
- Safe conduct and handling of equipment and chemicals.
- Identify lab equipment, chemicals, glassware.
- Demonstrate understanding of basic wastewater laboratory practices.
- Perform basic wastewater laboratory testing.
- Perform calculations related to basic wastewater laboratory testing.

Program Outcomes

- Identify characteristics of wastewater conveyed and treated in municipal wastewater collection and wastewater treatment systems.
- Monitor, evaluate, operate and maintain common types of equipment found in municipal wastewater collection and wastewater treatment systems.
- Apply appropriate safety procedures to operation of municipal wastewater collection and wastewater treatment systems.
- Collect samples for, perform and interpret results of basic laboratory analyses used to monitor municipal wastewater collection and wastewater treatment systems.
- Perform supporting administrative duties for municipal wastewater collection and wastewater treatment systems.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

WWT 199 - Independent Study-Wastewater Technology

Credits: 1-5

Allows students to investigate an area of interest in the wastewater technology field with the guidance of an instructor, using a learning contract.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Course outcomes to be mutually agreed upon between instructor and student.

Program Outcomes

- Identify characteristics of wastewater conveyed and treated in municipal wastewater collection and wastewater treatment systems.
- Monitor, evaluate and adjust processes used in municipal wastewater collection and wastewater treatment systems.
- Monitor, evaluate, operate and maintain common types of equipment found in municipal wastewater collection and wastewater treatment systems.
- Apply appropriate safety procedures to operation of municipal wastewater collection and wastewater treatment systems.
- Collect samples for, perform and interpret results of basic laboratory analyses used to monitor municipal wastewater collection and wastewater treatment systems.
- Perform supporting administrative duties for municipal wastewater collection and wastewater treatment systems.

College-wide Outcomes

- **Critical Thinking** - Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

Water Supply Technology

WST 177 - Wastewater Cooperative Education

Credits: 1-12

Allows students to work full- or part-time in jobs directly related to their programs and interests. Students may receive a salary or volunteer. This is a pass/no credit course.

Enrollment Requirement: Instructor consent.

Course Fee: \$80.00 per credit

Course Outcomes:

Student and instructor will agree upon specific course content learning outcomes and assessment instruments and will state them in the Cooperative Education Training Agreement.

Program Outcomes

- Monitor, evaluate and adjust processes used in municipal water distribution and water treatment systems.
- Monitor, evaluate, operate and maintain common types of equipment found in municipal water distribution and water treatment systems.
- Apply appropriate safety procedures to operation of municipal water distribution and water treatment systems.
- Collect samples for, perform and interpret results of laboratory analyses used to monitor municipal water distribution and water treatment systems.
- Perform supporting administrative duties for municipal water distribution and water treatment systems.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

WST 180 - Water Distribution

Credits: 3

Covers components of a water distribution system, operation and maintenance procedures for a water distribution system and normal and abnormal conditions in water distribution systems.

Enrollment Requirement: ENGL 99, ENGL& 101 or eligible for ENGL 99.

Course Fee: \$500.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Interpret water distribution system pressure data.
- Assess water system production capacity to meet demand.
- Interpret designs used for water distribution projects.
- Describe the purpose and function of backflow prevention and control devices.
- Implement a cross connection control program.
- Describe maintenance activities related to the following distribution system components.
 - Mains and related equipment (hydrants and valves)
 - Metering and related equipment
 - Describe the process to Install and repair water lines.
 - Service lines
 - Water mains
 - Explain the process to inspect and clean finished water storage facilities.
 - Implement distribution system flushing.
 - Implement a leak detection program (e.g., survey, testing meters, water loss audit).
 - Demonstrate the ability to read water meters.

Program Outcomes

- Monitor, evaluate and adjust processes used in municipal water distribution and water treatment systems.
- Monitor, evaluate, operate and maintain common types of equipment found in municipal water distribution and water treatment systems
- Apply appropriate safety procedures to operation of municipal water distribution and water treatment systems.
- Collect samples for, perform and interpret results of laboratory analyses used to monitor municipal water distribution and water treatment systems.
- Perform supporting administrative duties for municipal water distribution and water treatment systems.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

WST 183 - Water Sources

Credits: 1

Provides basic information related to water sources used for public drinking water systems. Includes water supply hydrology, groundwater sources, surface water sources and water source protection.

Enrollment Requirement: ENGL 99, ENGL& 101 or eligible for ENGL 99.

Course Fee: \$200.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Summarize the aspects of water hydrology that influence water supplies.
- Identify groundwater sources and explain they are developed for use as public water supplies.
- Perform inspections of ground water well sites and report any issues that may affect water quality (e.g., contamination, flooding, well head protection) .
- Measure static water level and pumping levels of wells.
- Determine if wells are under the direct influence of surface water (GWI) .
- Identify surface water sources and explain how they are developed for use as public water supplies.
- Explain the purpose and elements of water supply source contingency planning.
- Summarize the major categories of water use and the major factors that cause variations in water use in a public water system.
- Summarize the factors involved in supply management and demand management.
- Compare the various legal bases for water rights and the allocation of surface water and groundwater.
- Explain the fundamental principles involved in water source protection.

Program Outcomes

- Identify characteristics of source water used to provide public drinking water through municipal water distribution and water treatment systems.
- Monitor, evaluate and adjust processes used in municipal water distribution and water treatment systems.
- Monitor, evaluate, operate and maintain common types of equipment found in municipal water distribution and water treatment systems.
- Apply appropriate safety procedures to operation of municipal water distribution and water treatment systems.
- Collect samples for, perform and interpret results of laboratory analyses used to monitor municipal water distribution and water treatment systems.
- Perform supporting administrative duties for municipal water distribution and water treatment systems.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

WST 184 - Water Regulations

Credits: 2

Provides an overview of federal and state drinking water regulations including a brief history and the structure of the Safe Drinking Water Act. Reviews current drinking water regulations. Identifies water quality parameters addressed in drinking water regulations. Covers operator certification.

Enrollment Requirement: ENGL 99, ENGL& 101 or eligible for ENGL 99.

Course Fee: \$350.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Explain the public water supply regulations in the U.S.
- Demonstrate knowledge of water quality standards.
- Determine if water quality violations have occurred.
- Demonstrate knowledge of monitoring and reporting requirements.
- Evaluate water quality to determine compliance with regulatory agency standards.
- Implement public notification when reportable MCLs are exceeded.
- Summarize the purpose and requirements of consumer confidence reports.
- Demonstrate knowledge of record keeping function, policies, and requirements.
- Demonstrate knowledge of rules and regulations within the Safe Drinking Water Act
- Surface Water Treatment Rule
- Lead and Copper Rule
- Disinfectants/Disinfection By-Products Rule
- Total Coliform Rule
- Unregulated contaminants
- Explain the operator certification requirements under the Washington waterworks operator certification program.

Program Outcomes

- Identify characteristics of source water used to provide public drinking water through municipal water distribution and water treatment systems.
- Monitor, evaluate and adjust processes used in municipal water distribution and water treatment systems.
- Monitor, evaluate, operate and maintain common types of equipment found in municipal water distribution and water treatment systems.
- Apply appropriate safety procedures to operation of municipal water distribution and water treatment systems.
- Collect samples for, perform and interpret results of laboratory analyses used to monitor municipal water distribution and water treatment systems.
- Perform supporting administrative duties for municipal water distribution and water treatment systems.

College-wide Outcomes

- **Critical Thinking** -Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.
- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.
- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

WST 185 - Water Treatment 1

Credits: 3

Covers public drinking water treatment processes, theory, operation and maintenance. Processes include preliminary treatment, coagulation, flocculation, sedimentation and filtration.

Enrollment Requirement: MATH 72, MATH 97 or eligible for MATH 97, and ENGL 99, ENGL& 101, or eligible for ENGL 99.

Course Fee: \$500.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Evaluate the biological, chemical, and physical characteristics of the water source.
- Perform water quality inspections of surface water sources (e.g., non-native plant species, mussels, algae, erosion).
- Control water treatment plant process, chemical dosages, and equipment used to treat water.
- Calculate chemical dosages, filter performance data, backwash water, and residuals.
- Identify trends and abnormal operation in plant processes by interpreting data from gauges, meters, charts, and graphs.
- Make appropriate changes in plant processes to optimize performance and efficiency.
- Monitor filter performance and backwash filters
- Monitor, evaluate, and adjust:

- Pretreatment
- Coagulation and flocculation
- Clarification and sedimentation
- Residuals disposal
- Backwash aids
- Source water treatment
- Analyze filter media to determine compliance with design specifications.
- Ensure the operation and maintenance of equipment at the water treatment facility:
- Chlorine disinfection system
- Filter systems
- Clarifier
- Clearwell
- Raw water screening
- Determine correct disinfection dosage and contact time.

Program Outcomes

- Monitor, evaluate and adjust processes used in municipal water distribution and water treatment systems.
- Monitor, evaluate, operate and maintain common types of equipment found in municipal water distribution and water treatment systems.
- Apply appropriate safety procedures to operation of municipal water distribution and water treatment systems.
- Collect samples for, perform and interpret results of laboratory analyses used to monitor municipal water distribution and water treatment systems.
- Perform supporting administrative duties for municipal water distribution and water treatment systems.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

WST 186 - Water Treatment 2

Credits: 3

A continuation of WST 185. Processes include fluoridation, control of corrosion and scaling, iron and manganese control, lime softening, ion exchange processes, absorption, aeration, and membrane processes.

Enrollment Requirement: WST 185.

Course Fee: \$500.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Evaluate the biological, chemical, and physical characteristics of the source water characteristics.
- Monitor, evaluate, and adjust the following treatment processes:
 - Membrane filtration and reverse osmosis
 - Iron/manganese treatment
 - Lime-soda ash softening
 - Granular and powdered activated carbon
 - Ion exchange
 - Corrosion control
 - Fluoridation
- Control water treatment plant process, chemical dosages, and equipment used to treat water.
- Calculate chemical dosages, filter performance data, backwash water, and residuals.
- Identify trends and abnormal operation in plant processes by interpreting data from gauges, meters, charts, and graphs.
- Make appropriate changes in plant processes to optimize performance and efficiency.
- Ensure the proper handling, storage, and use of chemicals:
 - Acids
 - Bases
 - Oxidants
 - Coagulants
 - Polymers
 - Fluoride
 - Corrosion control chemicals

Program Outcomes

- Monitor, evaluate and adjust processes used in municipal water distribution and water treatment systems.
- Monitor, evaluate, operate and maintain common types of equipment found in municipal water distribution and water treatment systems.
- Apply appropriate safety procedures to operation of municipal water distribution and water treatment systems.
- Collect samples for, perform and interpret results of laboratory analyses used to monitor municipal water distribution and water treatment systems.
- Perform supporting administrative duties for municipal water distribution and water treatment systems.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

WST 188 - Water Laboratory

Credits: 2

Uses theory, performance, and interpretation of basic water laboratory procedures to assess water quality. Topics include safety, sampling, alkalinity, hardness, pH, coliform, jar testing, turbidity, chlorine residual, and advanced water testing procedures.

Course Fee: \$350.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Define terms as they apply to basic water laboratory testing.
- Handle and conduct equipment and chemicals safely.
- Identify lab equipment, chemicals, glassware.
- Demonstrate understanding of basic water laboratory practices.
- Perform basic water laboratory testing using equipment to evaluate water quality.
- Perform calculations related to basic water laboratory testing.
- Perform calibration of laboratory instrumentation to ensure proper operation.
- Collect water samples according to standardized methods.
- Perform sample preservation and documentation for laboratory samples.
- Perform lab tests, record results, and interpret data.

Program Outcomes

- Identify characteristics of source water used to provide public drinking water through municipal water distribution and water treatment systems.
- Monitor, evaluate and adjust processes used in municipal water distribution and water treatment systems.
- Monitor, evaluate, operate and maintain common types of equipment found in municipal water distribution and water treatment systems.
- Apply appropriate safety procedures to operation of municipal water distribution and water treatment systems.
- Collect samples for, perform and interpret results of laboratory analyses used to monitor municipal water distribution and water treatment systems.
- Perform supporting administrative duties for municipal water distribution and water treatment systems.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

WST 199 - Independent Study-Water Supply Technology

Credits: 1-5

Allows students to investigate an area of interest in the water supply technology field with the guidance of an instructor using a learning contract.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Course outcomes to be mutually agreed upon between instructor and student.

Program Outcomes

- Identify characteristics of source water used to provide public drinking water through municipal water distribution and water treatment systems.
- Monitor, evaluate and adjust processes used in municipal water distribution and water treatment systems.
- Monitor, evaluate, operate and maintain common types of equipment found in municipal water distribution and water treatment systems.
- Apply appropriate safety procedures to operation of municipal water distribution and water treatment systems.
- Collect samples for, perform and interpret results of laboratory analyses used to monitor municipal water distribution and water treatment systems.
- Perform supporting administrative duties for municipal water distribution and water treatment systems.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

Water Technology

WTECH 181 - Water Hydraulics

Credits: 3

Examines the general principles of water hydraulics and how they relate to the operation of water distribution systems, wastewater collection systems, and water and wastewater treatment facilities. Topics include mass, density, displacement, flow, velocity, pressure, Bernoulli's theorem, friction loss, minor head loss, and flow measurement.

Enrollment Requirement: MATH 72, MATH 97 or eligible for MATH 97.

Course Fee: \$500.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Define terms as they apply to basic water hydraulics.
- Demonstrate understanding of basic water hydraulics concepts.
- Apply basic water hydraulic concepts to practical situations.
- Perform calculations related to basic water hydraulics applications.
- Aid in the design of water distribution system projects.
- Monitor water distribution system pressure.
- Monitor and calibrate flow meters.
- Determine water volume (e.g., tank, main).
- Determine water flow rate (e.g., mains, pumps, service connections).
- Identify flow characteristics (e.g., pipe size, C-factor, head loss).

Program Outcomes

- Identify characteristics of water used to provide public drinking water through municipal water distribution and water treatment systems.
- Identify the characteristics of wastewater conveyed and treated in municipal wastewater collection and wastewater treatment systems.
- Monitor, evaluate and adjust processes used in municipal water distribution, water treatment, municipal wastewater collection and wastewater treatment systems.
- Monitor, evaluate, operate and maintain common types of equipment found in municipal water distribution, water treatment systems, municipal wastewater collection and wastewater treatment systems.
- Apply appropriate safety procedures to operation of municipal water distribution, water treatment, municipal wastewater collection and wastewater treatment systems.
- Collect samples for, perform and interpret results of laboratory analyses used to monitor municipal water distribution, water treatment systems, municipal wastewater collection and wastewater treatment systems.
- Perform supporting administrative duties for municipal water distribution, water treatment, municipal wastewater collection and wastewater treatment systems.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

WTECH 182 - Pumps and Pumping Systems

Credits: 3

Examines pumps and pump piping systems used in water and wastewater applications. Emphasizes operational theory, application and basic maintenance of centrifugal pumps.

Enrollment Requirement: MATH 72, MATH 97 or eligible for MATH 97.

Course Fee: \$500.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Classify the types of pumps typically found in water and wastewater utilities
- Interpret pump system data to evaluate performance of pump stations and related equipment.
- Describe the general and mechanical principles related to centrifugal pumping systems.
- Implement start-up and shut-down procedures for centrifugal pumping systems.
- Identify and schedule general maintenance and repairs on centrifugal pumping systems.
- Identify normal and abnormal operating conditions for centrifugal pumping systems.

Program Outcomes

- Identify characteristics of water used to provide public drinking water through municipal water distribution and water treatment systems.
- Identify the characteristics of wastewater conveyed and treated in municipal wastewater collection and wastewater treatment systems.
- Monitor, evaluate and adjust processes used in municipal water distribution, water treatment, municipal wastewater collection and wastewater treatment systems.
- Monitor, evaluate, operate and maintain common types of equipment found in municipal water distribution, water treatment systems, municipal wastewater collection and wastewater treatment systems.
- Apply appropriate safety procedures to operation of municipal water distribution, water treatment, municipal wastewater collection and wastewater treatment systems.
- Collect samples for, perform and interpret results of laboratory analyses used to monitor municipal water distribution, water treatment systems, municipal wastewater collection and wastewater treatment systems.
- Perform supporting administrative duties for municipal water distribution, water treatment, municipal wastewater collection and wastewater treatment systems.

College-wide Outcomes

- **Critical Thinking** -Critical thinking finds expression in all disciplines and everyday life. It is characterized by an ability to reflect upon thinking patterns, including the role of emotions on thoughts, and to rigorously assess the quality of thought through its work products. Critical thinkers routinely evaluate thinking processes and alter them, as necessary, to facilitate an improvement in their thinking and potentially foster certain dispositions or intellectual traits over time.

WTECH 183 - Utility Worker Safety

Credits: 3

Examines safety concerns for water and wastewater utilities including confined space entry, underground utility location, excavation safety, fire safety, electrical safety, hazardous energy control (lock out/tag out), machine guarding, and the chemical hazard communication standard. Personal protection topics includes back safety, safe stairway/ladder use, personal fall protection, blood borne pathogen awareness, respiratory, eye, hand, head, hearing, and foot protection. Reviews regulations and standards relating to these topics.

Course Fee: \$500.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Understand the significance of a safety compliance program.
- Identify opportunities to mitigate occupational health and safety risks.
- Implement a confined space program.
- Perform underground utility locating, marking, and notification.
- Demonstrate ability to implement cave-in protection program.
- Implement traffic control during system maintenance, repairs, and construction.
- Ability to practice lock out/tag out procedures.
- Describe the elements of fall protection.
- Inspect treatment plant safety equipment (e.g., fire extinguishers, AED, and gas detectors).
- Interpret safety data sheets.

Program Outcomes

- Identify characteristics of water used to provide public drinking water through municipal water distribution and water treatment systems.
- Identify the characteristics of wastewater conveyed and treated in municipal wastewater collection and wastewater treatment systems.
- Monitor, evaluate and adjust processes used in municipal water distribution, water treatment, municipal wastewater collection and wastewater treatment systems.
- Monitor, evaluate, operate and maintain common types of equipment found in municipal water distribution, water treatment systems, municipal wastewater collection and wastewater treatment systems.
- Apply appropriate safety procedures to operation of municipal water distribution, water treatment, municipal wastewater collection and wastewater treatment systems.
- Collect samples for, perform and interpret results of laboratory analyses used to monitor municipal water distribution, water treatment systems, municipal wastewater collection and wastewater treatment systems.
- Perform supporting administrative duties for municipal water distribution, water treatment, municipal wastewater collection and wastewater treatment systems.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

WTECH 184 - Disinfection and Chemical Feed Systems

Credits: 3

Covers principles of disinfection and disinfection alternatives. Discusses operation and maintenance of chemical feed systems used in water and wastewater applications including gas chlorinators and solution feed systems. Covers safety procedures for handling chlorine.

Enrollment Requirement: MATH 72, MATH 97 or eligible for MATH 97.

Course Fee: \$500.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Explain the process objectives of water and wastewater disinfection.
- Recognize the chemical properties of chlorine sources.
- Demonstrate understanding of chlorine reactions with constituents in water and wastewaters.
- Calculate the required disinfection dosage.
- Determine the correct disinfection dosage and contact time to meet disinfection process objectives.
- Demonstrate ability to dilute and mix batches of chemical solutions to desired concentration.
- Demonstrate the ability to operate and maintain chlorine gas system equipment (e.g., cylinders and connections).
- Evaluate the operation of chemical feed equipment at chlorine gas facilities.
- Identify the major components of gas chlorinators.
- Perform routine maintenance on hypochlorite solution system disinfection equipment.
- Understand the principles of chlorine safety
- Schedule chlorine deliveries to maintain an adequate supply of the disinfection chemicals
- Describe the process to accept chemical shipments
- Implement proper handling and storage of disinfection chemicals (e.g., chain cylinders, lock the facility).
- Inspect, operate, and maintain UV and ozone disinfection equipment.

Program Outcomes

- Identify characteristics of water used to provide public drinking water through municipal water distribution and water treatment systems.
- Identify the characteristics of wastewater conveyed and treated in municipal wastewater collection and wastewater treatment systems.
- Monitor, evaluate and adjust processes used in municipal water distribution, water treatment, municipal wastewater collection and wastewater treatment systems.
- Monitor, evaluate, operate and maintain common types of equipment found in municipal water distribution, water treatment systems, municipal wastewater collection and wastewater treatment systems.
- Apply appropriate safety procedures to operation of municipal water distribution, water treatment, municipal wastewater collection and wastewater treatment systems.
- Collect samples for, perform and interpret results of laboratory analyses used to monitor municipal water distribution, water treatment systems, municipal wastewater collection and wastewater treatment systems.
- Perform supporting administrative duties for municipal water distribution, water treatment, municipal wastewater collection and wastewater treatment systems.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

WTECH 185 - Water and Wastewater Applied Problems

Credits: 3

Students perform calculations related to water and wastewater laboratory, effectiveness of each major stage of water and wastewater treatment operation, pump capacities, pump rates, process loading rates, flow rates and chemical dosage rates.

Enrollment Requirement: MATH 72, MATH 97 or eligible for MATH 97.

Course Outcomes:

Students who successfully complete this class will be able to:

- Analyze data to evaluate and adjust equipment
- Add chemicals to disinfect and deodorize water and other liquids (e.g., ammonia, chlorine, lime)
- Analyze laboratory data to evaluate and adjust processes.
- Adjust the disinfection dosage.
- Conduct distribution system flushing.
- Calculate chemical dosages.
- Calculate water treatment plant residuals, backwash water, daily flow rates, chemical levels, previous days usage, and filter performance data.

- Mix batches of chemical solutions.

Program Outcomes

- Identify characteristics of water used to provide public drinking water through municipal water distribution and water treatment systems.
- Identify the characteristics of wastewater conveyed and treated in municipal wastewater collection and wastewater treatment systems.
- Monitor, evaluate and adjust processes used in municipal water distribution, water treatment, municipal wastewater collection and wastewater treatment systems.
- Monitor, evaluate, operate and maintain common types of equipment found in municipal water distribution, water treatment systems, municipal wastewater collection and wastewater treatment systems.
- Apply appropriate safety procedures to operation of municipal water distribution, water treatment, municipal wastewater collection and wastewater treatment systems.
- Collect samples for, perform and interpret results of laboratory analyses used to monitor municipal water distribution, water treatment systems, municipal wastewater collection and wastewater treatment systems.
- Perform supporting administrative duties for municipal water distribution, water treatment, municipal wastewater collection and wastewater treatment systems.

College-wide Outcomes

- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

WTECH 187 - Drawings and Manuals

Credits: 3

Includes interpretation of maps, drawings, and operation and maintenance manuals as these activities relate to the water and wastewater technology field.

Course Fee: \$500.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Describe and apply the principles of the Federal System of Rectangular Surveys to real-world situations.
- Identify examples of maps and drawings commonly used in the water and wastewater technology field.
- Interpret standardized symbols and terminology used on maps and drawings used in the water and wastewater technology field.
- Apply information contained in maps and drawings to real-world situations.

- Access information in typical operation and maintenance manuals utilized in the water and wastewater technology field.
- Implement revisions to maintain an up-to-date map of the distribution and collection systems.

Program Outcomes

- Identify characteristics of water used to provide public drinking water through municipal water distribution and water treatment systems.
- Identify the characteristics of wastewater conveyed and treated in municipal wastewater collection and wastewater treatment systems.
- Monitor, evaluate and adjust processes used in municipal water distribution, water treatment, municipal wastewater collection and wastewater treatment systems.
- Monitor, evaluate, operate and maintain common types of equipment found in municipal water distribution, water treatment systems, municipal wastewater collection and wastewater treatment systems.
- Apply appropriate safety procedures to operation of municipal water distribution, water treatment, municipal wastewater collection and wastewater treatment systems.
- Collect samples for, perform and interpret results of laboratory analyses used to monitor municipal water distribution, water treatment systems, municipal wastewater collection and wastewater treatment systems.
- Perform supporting administrative duties for municipal water distribution, water treatment, municipal wastewater collection and wastewater treatment systems.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

WTECH 188 - Water and Wastewater Electrical

Credits: 3

Electrical fundamentals for water and wastewater applications including atomic theory, energy sources, circuit basics, electromagnetism, inductance, capacitance, power systems, control system component reading, electrical diagrams, electrical measurements, normal operations, and troubleshooting.

Course Fee: \$500.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply electric circuit basics to real-world situation.
- Apply power system basics to real-world situations.

- Interpret and apply information from control systems.
- Interpret and apply information from electrical diagrams.
- Perform basic electrical system measurements.
- Identify normal electrical system operation.
- Perform preventive and corrective maintenance to electric motors.
- Identify normal operation of motors and instrumentation.
- Apply elementary electrical principles to troubleshooting breakers, relays, and circuits.

Program Outcomes

- Identify characteristics of water used to provide public drinking water through municipal water distribution and water treatment systems.
- Identify the characteristics of wastewater conveyed and treated in municipal wastewater collection and wastewater treatment systems.
- Monitor, evaluate and adjust processes used in municipal water distribution, water treatment, municipal wastewater collection and wastewater treatment systems.
- Monitor, evaluate, operate and maintain common types of equipment found in municipal water distribution, water treatment systems, municipal wastewater collection and wastewater treatment systems.
- Apply appropriate safety procedures to operation of municipal water distribution, water treatment, municipal wastewater collection and wastewater treatment systems.
- Collect samples for, perform and interpret results of laboratory analyses used to monitor municipal water distribution, water treatment systems, municipal wastewater collection and wastewater treatment systems.
- Perform supporting administrative duties for municipal water distribution, water treatment, municipal wastewater collection and wastewater treatment systems.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

WTECH 191 - Pre-Employment Seminar

Credits: 3

Covers job search and preparation for water and wastewater careers. Includes resume, cover letter, and application preparation, as well as interview techniques and practice. Also includes identification of potential employers. Students gain workplace skills including internal customer service and diverse workforce awareness.

Course Fee: \$500.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Develop resume in traditional and electronic formats.
- Develop cover and follow-up letters.
- Develop job application information.
- Identify appropriate and inappropriate pre-employment inquiries.
- Develop positive interview techniques.
- Identify potential employers in the water and wastewater field.
- Identify attributes of a successful workplace attitude.
- Develop skills for working successfully with a diverse workforce.
- Perform supervisory duties:
 - Enforcing policies and safety procedures
 - Conducting performance evaluations
 - Resolving grievances
 - Making appropriate hiring decisions
 - Initiating, investigating, and implementing disciplinary actions.

Program Outcomes

- Identify characteristics of water used to provide public drinking water through municipal water distribution and water treatment systems.
- Identify the characteristics of wastewater conveyed and treated in municipal wastewater collection and wastewater treatment systems.
- Monitor, evaluate and adjust processes used in municipal water distribution, water treatment, municipal wastewater collection and wastewater treatment systems.
- Monitor, evaluate, operate and maintain common types of equipment found in municipal water distribution, water treatment systems, municipal wastewater collection and wastewater treatment systems.
- Apply appropriate safety procedures to operation of municipal water distribution, water treatment, municipal wastewater collection and wastewater treatment systems.
- Collect samples for, perform and interpret results of laboratory analyses used to monitor municipal water distribution, water treatment systems, municipal wastewater collection and wastewater treatment systems.
- Perform supporting administrative duties for municipal water distribution, water treatment, municipal wastewater collection and wastewater treatment systems.

College-wide Outcomes

- **Written Communication** - Written Communication encompasses all the abilities necessary for effective expression of thoughts, feelings, and ideas in written form.

Welding**WELD 103 - Special Welding**

Credits: 3

Any welding process available at Green River designed to suit the needs of the student who registers for either a specified number of hours or enters on a space-available basis after the class has begun. Credits completed in WELD 103 are applied to WELD 141, WELD 142, WELD 143 or WELD 194. (Special Note: Veterans may not exceed a total of 16 credits in WELD 103. Eight credits must apply to other welding courses as indicated if they are receiving educational benefits from the Veterans Administration.)

Enrollment Requirement: Instructor consent.

Course Fee: \$37.00

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply basic shop safety.
- Properly use heavy shop equipment.
- Perform groove welds in all positions in accordance to WABO standard 27-13.
- Pursue shop WABO or AWS certification in single or multiple processes.
- Understand weld procedures (WPS) for the various positions.
- Be familiar with machine polarity and machine operation.
- Weld ferrous and non-ferrous material.

Program Outcomes

- Work as an industry standard trade welder.
- Demonstrate OSHA and WISHA standards for safety in the workplace.
- Use multiple welding processes in all positions.
- Identify the cause and effect of various welding processes per welding procedure (WPS).
- Understand basic theory of welding and the related equipment.
- Conform to AWS and WABO qualification procedures.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

WELD 107 - Basic Blueprint Reading

Credits: 3

A related subject for welding students to help prepare them for the demands of the industry. Covers alphabet of lines, orthographic and isometric drawings, shop prints and details of how to read them, standard measuring devices and their uses, structural materials (how they intersect and tie together) and welding symbols and their applications.

Enrollment Requirement: Instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Identify and describe the significance of different lines, symbols, and views.
- Locate and explain the purpose of the title block content.
- Use typical measuring and scale methods to interpret and convert dimensions from blueprints.
- Create a bill of materials from reading a print.
- Identify metals, welding processes, and sequences of operations from blueprints.
- Determine tolerance variances from the blueprints.
- Weld from a blueprint.

Program Outcomes

- Work as an industry standard trade welder.
- Use multiple welding processes in all positions.
- Identify the cause and effect of various welding processes per welding procedure (WPS).
- Discuss basic theory of welding and the related equipment.
- Conform to AWS and WABO qualification procedures.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

WELD 141 - Basic Arc Weld and Flame Cutting

Credits: 1-13

Prepares students as trade welders or, with proper selection of classes, to receive an AAS degree as Welding Technicians using one or more welding processes. Students learn arc welding of low-carbon steel in all positions, electrode clarification, and manual and machine flame cutting of low carbon steels using oxyacetylene process.

Enrollment Requirement: Instructor consent.

Course Fee: \$12.50 per credit

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply basic shop safety.
- Perform proper set up and shut down procedure for oxy-acetylene.
- Demonstrate oxy-acetylene welding.
- Perform manual flame cutting with oxy-acetylene.
- Perform basic Shielded Metal Arc Welding (SMAW) on low carbon steel.
- Discuss electrode identification.
- Define machine polarity and machine operation.

Program Outcomes

- Work as an industry standard trade welder.
- Demonstrate OSHA and WISHA standards for safety in the workplace.
- Use multiple welding processes in all positions.
- Identify the cause and effect of various welding processes per welding procedure (WPS).
- Discuss basic theory of welding and the related equipment.
- Conform to AWS and WABO qualification procedures.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

WELD 142 - Intermediate Welding

Credits: 1-13

For students with previous welding experience or WELD 141. Students continue arc welding of low-carbon steel in all positions in preparation for the American Welding

Society (AWS) or Washington Association of Building Officials (WABO) test. Students learn theory and application of stick electrode and carbon electrode for cutting and gouging.

Enrollment Requirement: Instructor consent.

Course Fee: \$12.50 per credit

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply basic shop safety.
- Perform the SMAW process in various positions.
- Discuss basic theory and application of SMAW on low carbon steel.
- Work towards AWS/WABO certification in SMAW.
- Perform fillet welds in the flat and horizontal position.
- Interpret electrode identification and application.
- Discuss machine polarity and machine operation.

Program Outcomes

- Work as an industry standard trade welder.
- Demonstrate OSHA and WISHA standards for safety in the workplace.
- Use multiple welding processes in all positions.
- Identify the cause and effect of various welding processes per welding procedure (WPS).
- Discuss basic theory of welding and the related equipment.
- Conform to AWS and WABO qualification procedures.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

WELD 143 - Advanced Arc Welding

Credits: 1-13

Introduces gas tungsten arc, gas metallic arc, and flux cored arc welding processes for those students proficient at manual arc and oxyacetylene welding. Students gain experience in all of the general welding processes used by local industry.

Enrollment Requirement: Instructor consent.

Course Fee: \$12.50

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply basic shop safety.
- Properly use heavy shop equipment.
- Be proficient in the SMAW process in all positions.
- Identify and perform fillet and groove welds.
- Pursue certification in the SMAW process.
- Understand weld procedures (WPS) for the various positions.
- Illustrate machine polarity and machine operation.

Program Outcomes

- Work as an industry standard trade welder.
- Demonstrate OSHA and WISHA standards for safety in the workplace.
- Use multiple welding processes in all positions.
- Identify the cause and effect of various welding processes per welding procedure (WPS).
- Discuss basic theory of welding and the related equipment.
- Conform to AWS and WABO qualification procedures.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

WELD 177 - Welding Work Experience 1-3

Credits: 1-12

Allows student to work full- or part-time in jobs directly related to their programs and interests. Students may receive a salary or volunteer.

Enrollment Requirement: Concurrent enrollment in COOP 171 and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Course outcomes to be mutually agreed upon between instructor and student.

Program Outcomes

- Work as an industry standard trade welder.
- Demonstrate OSHA and WISHA standards for safety in the workplace.
- Use multiple welding processes in all positions.
- Identify the cause and effect of various welding processes per welding procedure (WPS).
- Discuss basic theory of welding and the related equipment.
- Conform to AWS and WABO qualification procedures.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

WELD 178 - Welding Work Experience 1-3

Credits: 1-12

Allows student to work full- or part-time in jobs directly related to their programs and interests. Students may receive a salary or volunteer.

Enrollment Requirement: Concurrent enrollment in COOP 171 and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Course outcomes to be mutually agreed upon between instructor and student.

Program Outcomes

- Work as an industry standard trade welder.
- Demonstrate OSHA and WISHA standards for safety in the workplace.
- Use multiple welding processes in all positions.
- Identify the cause and effect of various welding processes per welding procedure (WPS).
- Discuss basic theory of welding and the related equipment.
- Conform to AWS and WABO qualification procedures.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

WELD 179 - Welding Work Experience 1-3

Credits: 1-12

Allows student to work full- or part-time in jobs directly related to their programs and interests. Students may receive a salary or volunteer.

Enrollment Requirement: Concurrent enrollment in COOP 171 and instructor consent.

Course Outcomes:

Students who successfully complete this class will be able to:

- Course outcomes to be mutually agreed upon between instructor and student.

Program Outcomes

- Work as an industry standard trade welder.
- Demonstrate OSHA and WISHA standards for safety in the workplace.
- Use multiple welding processes in all positions.
- Identify the cause and effect of various welding processes per welding procedure (WPS).
- Discuss basic theory of welding and the related equipment.
- Conform to AWS and WABO qualification procedures.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.

WELD 194 - Special Welding Project 1

Credits: 1-13

Suits the student's personal needs. Course focuses beyond basic techniques in GTAW, GMAW, FCAW, SMAW, in pipe, plate, aluminum, titanium, and magnesium welding.

Enrollment Requirement: Instructor consent.

Course Fee: \$12.50 per credit

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply basic shop safety.
- Properly use heavy shop equipment.
- Learn the theory of semi-automatic welding processes (FCAW).
- Perform FCAW (Flux Core Arc Welding) in the 2 and 3F positions.

- Learn to identify weld profiles plus cause and effect of FCAW.
- Weld with C25 and CO2 welding gases.
- Learn basic operation of multi-process inverters.
- Be familiar with machine polarity and machine operation.
- Operate and understand basic theory operation of wire feed units.

Program Outcomes

- Work as an industry standard trade welder.
- Demonstrate OSHA and WISHA standards for safety in the workplace.
- Use multiple welding processes in all positions.
- Identify the cause and effect of various welding processes per welding procedure (WPS).
- Understand basic theory of welding and the related equipment.
- Conform to AWS and WABO qualification procedures.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

WELD 195 - Special Welding Project 2

Credits: 1-13

Provides students with the manual skills and technical knowledge that is required by industry to pass various specialized welding tests, and to meet industry certification standards. Students increase their level of proficiency in each welding process.

Enrollment Requirement: Instructor consent.

Course Fee: \$12.50 per credit

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply basic shop safety.
- Properly use heavy shop equipment.
- Learn the theory of the GMAW (Gas Metal Arc Welding) process.
- Be proficient in the GMAW process in all positions.
- Identify and perform fillet and groove welds in all positions.
- Pursue certification in the GMAW process.

- Understand weld procedures (WPS) for the various positions.
- Be familiar with machine polarity and machine operation.

Program Outcomes

- Work as an industry standard trade welder.
- Demonstrate OSHA and WISHA standards for safety in the workplace.
- Use multiple welding processes in all positions.
- Identify the cause and effect of various welding processes per welding procedure (WPS).
- Understand basic theory of welding and the related equipment.
- Conform to AWS and WABO qualification procedures.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

WELD 196 - Special Welding Project 3

Credits: 1-13

Further provides the students with the manual skills and technical knowledge that is required by the industry to pass various specialized welding tests and to meet industry certification standards. Students increase their level of proficiency in each welding process.

Enrollment Requirement: Instructor consent.

Course Fee: \$12.50 per credit

Course Outcomes:

Students who successfully complete this class will be able to:

- Apply basic shop safety.
- Properly use heavy shop equipment.
- Learn the theory of the GTAW (Gas Tungsten Arc Welding) process.
- Be proficient in the GTAW process in all positions.
- Identify and perform fillet and groove welds in all positions.
- Pursue shop certification in the GTAW process.
- Understand weld procedures (WPS) for the various positions.
- Be familiar with machine polarity and machine operation.

- Weld ferrous and non-ferrous material.

Program Outcomes

- Work as an industry standard trade welder.
- Demonstrate OSHA and WISHA standards for safety in the workplace.
- Use multiple welding processes in all positions.
- Identify the cause and effect of various welding processes per welding procedure (WPS).
- Understand basic theory of welding and the related equipment.
- Conform to AWS and WABO qualification procedures.

College-wide Outcomes

- **Responsibility** - Responsibility encompasses those behaviors and dispositions necessary for students to be effective members of a community. This outcome is designed to help students recognize the value of a commitment to those responsibilities which will enable them to work successfully individually and with others.
- **Quantitative and Symbolic Reasoning** - Quantitative Reasoning encompasses abilities necessary for a student to become literate in today's technological world. Quantitative reasoning begins with basic skills and extends to problem solving.

WELD 201 - Introduction to Metal Art

Credits: 1-3

A technical course including theory and safety, hands-on oxy-acetylene and MIG/wire feed welding, plasma cutting, basic grinding and other shop equipment. Lays the foundation for more advanced and project-based courses and increases your understanding and practice of incorporating metal into your artistic, architectural or sculptural visions.

Enrollment Requirement: Concurrent enrollment in ART 119; and instructor consent.

Course Fee: \$132.91

Distribution Lists

Humanities/Fine Arts/English Distribution Course List

Minimum 15 credits from Humanities/Fine Arts/English Distribution in three separate areas. No more than 5 credits in foreign language at the 100-level. No more than 5 credits in performance or skills courses may be applied as a Humanities/Fine Arts/English distribution.

ARAB 121 - Arabic I Credits: 5

Campus Visits

The Welcome Desk on the first floor of the Student Affairs and Success Center offers group and individual tours for potential students during fall, winter, spring and summer quarters. All tours begin at the Welcome Desk and take approximately 45 minutes. We would like the opportunity to personalize your tour. Please sign-up at least 24 hours in advance at greenriver.edu/campus/welcome-desk and include any special requests and/or accommodations. Contact the Welcome Desk at (253) 333-6000 or email gettingstarted@greenriver.edu with questions.

K-12 and community groups can schedule tours by contacting the Recruitment and Outreach staff at outreach@greenriver.edu or (253) 288-3395.

Catalogs

Catalogs are available on the web at www.catalog.greenriver.edu.

Faculty and Administration

Madeleine Aguilar Tessandori, Anthropology, B.A., M.A., California State University Fullerton

CarrieAnne Allergri, Occupational Therapy, B.S. California State University; M.A., Cabarrus College of Health Sciences

Cathy "Kit" Alston, Interim Vice President of Equity, Diversity and Inclusion, B.A., Queen College (CUNY); M.A., University of Phoenix

Third Andresen, American Minority & Ethnic Studies, B.A., M.A., Ph.D., University of Washington

Philip Andrist, Technology, B.S., M.S., University of Washington

Heidi Aranda, English for Speakers of Other Languages, B.A., Western Washington University; M.Ed., Seattle University

Josh Archer, Information Technology, B.S, M.S., University of Washington

Vivek Bahl, English, B.A., University of Michigan; M.A., Ph.D., University of Texas

Julian Baldemire Celorrio, Spanish and Latin American Studies, B.A., University of Las Tunas; M.A., Ohio State University; Ph.D., Ohio State University

Jashon Banks Sr., Criminal Justice, B.S., Saint Joseph's College; M.A.S., Colorado Technical University; Ph.D., Walden University

Richard "Ty" Barnes, Philosophy, B.A., Southeast Missouri State University; M.A., University of Kansas

Marc Barrington, English, B.A., University of California, San Diego; M.A., University of New Mexico

Adrienne Battle, Physics, B.A., California Polytechnic State University; M.S., Ph.D., University of Washington

Emily Beals, English, B.A., M.A., California State University

Robert Bean, Carpentry, A.A.S., Green River College

Allison Beckwith, Mathematics, B.S., Saint Mary's College of California; M.S., University of Washington

Steven Black, Mathematics, A.A., College of the Sequoias; B.S., University of California-Davis; M.S., Oregon State University

Garth Blackburn, Nursing, B.S.N., San Francisco State University; M.S.N., Western Governor's University

Mark Blaisdell, Economics, A.A., Green River Community College; B.A., University of Washington; M.B.A., Pacific Lutheran University, CFP

Kyle Boroughs, Carpentry, A.A.S., Green River College

Whitney Boswell, Senior Director of E-Learning, M.Ed., City University of Seattle

Monica Bowen, Art History, B.A., M.A., Brigham Young University

Robin Bowles, Drama, A.O.S., American Academy of Dramatic Arts; B.F.A., College of Santa Fe; M.F.A., University of Portland

Jessie Brugger, Art, B.F.A., Concordia University; M.F.A., New York Academy of Art

Miebeth Bustillo-Booth, Dean of Transfer Education, Math and Science, B.A. University of Washington; M.Ed., University of Washington; M.A.E., Pacific Lutheran University; M.B.A., University of Washington; Ph.D., University of Washington

Lionel Candido-Flores, Interim Dean of College and Career Pathways, Health Sciences, Education, & Wellness, B.A., University of Washington; M.Ed., Western Washington University

Catherine Cantrell, IBEST, B.A., University of Oregon; M.Ed., Seattle University

Francis Cantwell, Aviation, B.S., United States Air Force Academy; M.P.A., Texas Christian University; M.Ed., Marymount University

Alan Carter, Information Technology, A.A.S., Community College of the Air Force; A.A., B.A., Saint Leo University; B.S., Troy State University; M.S., Capella University

Brazell Carter II, History, B.A., University of California, Santa Barbara; M.A., The George Washington University

Patricia Carter, Accounting, B.S., M.B.A., City University; CPA

Laurie Centauri, Chemistry, B.S., M.S., University of Utah

Tara Champion, Photography, A.A., Edmonds Community College; B.A., Seattle University; B.S., Seattle university; M.Sc., University of Nottingham

Tsai-En Cheng, Dean of Branch Locations, Academic and Program Development, A.A., Accounting and Statistics, Tainan University of Technology, Taiwan; B.A., Communication Arts, Chao Yang University of Technology, Taiwan; M.A., Teaching English to Speakers of Other Languages (TESOL), Seattle University

Siobhan Cheatham, Counseling, A.A., Sierra College; B.A., Sacramento State University; M.A., American Public University

Betsabel Chicano, Anatomy and Physiology, B.S., University of California; M.S., San Francisco State University

Amanda Chin, Humanities, M.A., Second Language Studies, University of Hawai'i at Manoa; M.L.I.S., University of Washington

Bradley Chinn, Manufacturing Technology

Miriam Chitiga, Interim Executive Director of Institutional Effectiveness

Andee Church, Early Childhood Education, A.A.S., Highline College; B.A., Central Washington University; M.S., St. Catherine's University

George Comollo, Aviation, A.S., Broward Community College; Professional Pilot, Houston Community College; Aircraft Dispatcher, Sheffield School of Aeronautics

Genevieve Corrin, IBEST, B.A., The Evergreen State College; M.A., SIT Graduate Institute

Jason Counihan, Mathematics, B.S., California Lutheran University; M.S., University of Washington; Cert., Wheaton College

Joy Crawford, Psychology, B.A., Whitworth College; M.Ed., Ph.D., University of Washington

dani crivello-chang, Dean of Campus Life, A.A., Green River Community College; B.A., Western Washington University; Scandinavian Politics & Culture Cert., Mittuniversitetet; M.Ed., University of Washington

Matthew Cullen, Counseling, B.S.W., Northern Michigan University; M.S.W., University of Illinois at Chicago; M.Ed., Loyola University Chicago

Katherine Cunnion, Interim Associate Dean of Library, Media Services and Tutoring, Counseling/Librarian, B.A., Oregon State University; M.A. University of California, Los Angeles

Michelle Danberg-Marshman, Social Science, B.A., Seattle Pacific University; M.A., Western Washington University; Ph.D., University of California, Riverside

Angela Davis, Senior Vice President - Chief of Staff, B.S., Norfolk State University; M.B.A., University of Phoenix; Ed.D., Wingate University

Shaunie Decker, College and Career Pathways, B.A., University of Washington; M.Ed., University of Phoenix

Philip Denman, Senior Director of College Relations, B.A., University of Washington; M.P.A., University of Colorado at Colorado Springs

Daniel deWolff, Business, B.A., Pomona College; M.S., University of Washington

Sarah Dillon Gilmartin, Art, B.A., University of Puget Sound; M.F.A., Boston University

Anne Dolan, History, B.A., University of Northern Colorado; M.Ed., Seattle University

Anna Drury, Nursing, A.D.N., Tacoma Community College; B.A., Washington State University; B.S.N., M.S.N., Western Governor's University

Neil Duldulao, Chemistry, B.A., B.S., University of California Berkeley; Ph.D., Yale University

Yoav Duman, Political Science, B.A., Ben Gurion University; M.A., Tel Aviv University; M.A., Ph.D., University of Washington

Catherine Duva, English for Speakers of Other Languages, B.A., Wayne State University; M.A., Eastern Michigan University

Sarah Edwards, Math, A.A., North Idaho College; B.A., St. Olaf College; M.S., Clemson University

Kelly Eisenhour, Music, B.M., Berklee College of Music; M.M., University of Utah

Georgie Fehringer, English Composition, B.A., M.A., Evergreen State College

Nicole Feider, Chemistry, B.S., Western Washington University; M.S., University of California, Riverside

Daniel Ferguson, Senior Director of Student Life and Wellness, B.A., Albion College; M.Ed., Western Washington University

Erin Fernandez Mommer, Spanish, B.A., M.A., University of Northern Iowa

Rebeka Ferreira, Philosophy, B.A., M.A., San Francisco State University

Lori Fishburn, Business, B.S., M.Ed. Central Washington University

Jamie Fitzgerald, Interim Vice President of Instruction, B.A., Grand Valley State University; M.A., University of Oregon

Jeanette Fohn, Business, B.A., Washington State University

Callae Frasier, English, B.S., Colorado State University; M.F.A., Iowa State University

George Frasier, Vice President of College Advancement, B.S., Washington State University; M.B.A., Western Governors University

Jacob Frye, Reading, A.A., Muskegon Community College; B.A., Western Michigan University; M.A., Western Washington University

Tsega Gaim, Political Science, B.A., M.A., Gonzaga University

Jitendra Gangaram, Math/Physics, B.A., M.S., University of the South Pacific; M.B.A., Keller Graduate School of Management; Ph.D., North Central University

Taliesha Garrett, Business, Marketing and Entrepreneurship, B.A., M.A., University of Washington

Eric Greer, Vice President of Student Affairs, B.A., California State Polytechnic University; M.S. Capella University; Ed.D., University of Southern California

Raminderpal Gill, Engineering, B. Tech, GND University; M.S. EE, University of Wisconsin; M.B.A., UCLA Anderson School of Management; UCLA AIM Certification Diploma

Christie Gilliland, Dean of Fine Arts and Social Science Divisions, Dean of College Transfer Education, B.A., Trinity University; M.S., Oregon State University

Edrick Goad, Information Technology, A.A., Clover Park Technical College; B.A., Northwest University; M.S., Western Governors University

Vance Graham, Information Technology, B.A., Seattle Pacific University; MCSA, MCSE, CTT +, MCT

Jeanine Hatfield, Nursing, B.S., University of Texas at Arlington; B.S.N., Texas Women's University; M.S.N.Ed., Grand Canyon University

Bethany Hawes, Director of Student Financial Aid, B.A., Central Washington University; M.A., Central Washington University; A.A.A., Green River College

Tad Henry, Aviation, B.A.S., M.A.S, Embry-Riddle Aeronautical University

Kirsten Higgins, English, B.A., Central Washington University; M.A., University of Minnesota

Jennifer "Jaeney" Hoene, English, B.A., Albertson College of Idaho; M.A., University of Idaho

Stephanie Hoffman, Biology, B.S., Seattle Pacific University; M.S., Auburn University; Ph.D., Auburn University

Jen Yong Ho, English, M.A., San Diego State University

Dan Holverson, Interim CIO, Executive Director of IT, B.S., University of Wisconsin; M.B.A., Olivet Nazarene University

Kathryn Hoppe, Geology and Oceanography, B.A., Washington University in St. Louis; M.S., University of Washington; Ph.D., Princeton University

Tina Horner, Nursing, A.A., Green River College; A.A.S., Renton Technical College; A.D.N., Tacoma Community College; B.S.N., M.N., University of Washington

Erica Ihrig, Chemistry, A.A., Guam Community College; B.S., Mississippi College; Ph.D., University of Washington

Thomas Jackson, Physical Education and Wellness, A.A., Green River Community College; B.S., Seattle Pacific University; M.S., University of Montana

Seunghye Jang, Computer Science and Engineering, B.S., M.S., Michigan State University; Ph.D., Texas A&M University

Suzanne Johnson, President, B.A., Ithaca College; M.A., Ph.D., Stony Brook University

Sara Keene, Sociology, A.A., Columbia College; B.A., University of California; M.Sc., School of Oriental and African Studies; M.Sc., Ph.D., Cornell University

Joshua Kessler, Japanese, B.A., University of California, Santa Cruz; M.A., San Francisco State University

Leslie Kessler, Early Childhood Education, B.S., Montana State University; M.Ed., City University; M.A., Argosy University

Pamela Kikillus, Physical Therapy, B.A., Olivet Nazarene University; M.S., DHSc, University of Indianapolis

Roberta Kim, Early Childhood Education, B.A., University of Puget Sound; M.A., University of Phoenix

Devon Klein, Counseling, LMHC, B.A., Smith College; M.A., Assumption College

Sam Krahn, Music, B.A., Boston University College of Fine Arts; M.A., Roosevelt University; Ph.D., University of Minnesota

Nancy Kremer, Senior Director of International Services & Operations, B.A., Western Washington University; Japanese Language Cert., Asia University, Japan

David Larsen, Dean of Enrollment and Completion, A.A., Green River Community College; B.S., City University; M.Ed., University of Washington

KaraLynn LaValley, Nursing, A.A.S.-RN, Tacoma Community College; B.S.N., M.N., Ph.D., University of Washington

Katherine Lawson, Sociology, B.A., California Polytechnic University, Pomona; M.A., California State University, Fullerton

Samuel Le, Economics, B.A., University of California Irvine; M.A., California State University Long Beach

Aaron Leavitt, English for Speakers of Other Languages, B.A., Western Washington University; M.Ed., Seattle University

Luther Lessor, Math, A.A., Pierce College; B.A., Northwest University; M.S., Texas A&M University

David Lewis, Auto Technology, A.A.S., Green River College; A.S.E. Master Technician

Elizabeth Longo, Intensive English as a Second Language, B.A., University of Durham, England; M.A., University of Birmingham, England

Auberon López, Software Development, B.S., California State Polytechnic University

Walter Lowe, English, B.A., University of Washington; M.A., Buffalo State College; M.R.E., Unification Seminary

Lisa Luengo, French, B.A., Northwestern University; M.A., University of Denver; Ph.D., University of Colorado at Boulder

Xiaoqian "Lily" Ma, Engineering, B.S., Shenyang University of Technology; M.S., Ph.D., South Dakota School of Mines and Technology

Marjorie MacKenzie, Reference and Instruction Librarian, B.A., M. Libn., University of Washington

Michael Macon, Mathematics, B.A., Drew University; M.A., San Francisco State University

Krishnan Mahadevan, Information Technology, B.E.E.E., Anna University, Chennai, India; M.S.E.E., Wayne State University

Jerald Marshall, Psychology, B.S., University of Pittsburgh; Ph.D., University of Texas

Tracey Masingale, English for Speakers of Other Languages, B.A., California State University Stanislaus; M.A., California State University Hayward; ESOL Teaching Certificate, School of TESOL

John McCormick, Sr. Director of Facilities and Campus Operations

Timothy McDaniel, Intensive English as a Second Language, B.A., M.A., University of Washington

Sean Mckeague, Business, B.S., United States Military Academy; M.B.A., Seattle University

Elizabeth McKinney, Counseling, B.A., Stanford University; M.S., Ph.D., University of Florida

Paul A. Metivier, Ceramics, A.A., Orange Coast Community College; B.F.A., California State University Long Beach; M.F.A., University of Washington

Lara Michaels, Mathematics, B.S., University of Utah; Ph.D., University of Texas

Candice Mihaila, Nursing, B.S., M.S., Western Governors University

Patrick Milian, English, B.A., University of Colorado Denver; M.F.A., Ph.D., University of Washington

Joshua Misenar, Natural Resources

Rochelle Mitchell, Mathematics, B.A., St. Martin's College; M.S., Western Washington University

Kathryn Moninger, Nursing, A.A., Highline Community College

Julie Moore, English, B.A., University of Puget Sound; M.A., Cert., Western Washington University

Michael Moreno, English, B.A., St. Mary's College of California; M.A., San Francisco State University; M.A., Ph.D., University of California Riverside

Ruth Mueller, Music, B.A., Southern Illinois University Edwardsville; M.A., University of Nevada, Reno; Ph.D., The University of Sheffield

Patrick Mumpower, Intensive English as a Second Language, B.A., Maryville College; M.A., The University of Tennessee, Knoxville

Daniel Najera, Biology, B.S., Ph.D., University of Kansas

Ajay Narayanan, Physics, B.S., M.Sc., University of Bombay; Ph.D., University of Arizona

Carel Neffenger, Communication Studies, B.S., Northwestern University; M.A., University of Southern California; M.A., Seattle University

Anna Neil, Physical Therapy, A.A.S., B.S., Pacific Lutheran University

David Nelson, Mathematics, B.S., Washington State University; M.S., Western Washington University

David Norberg, History, B.A., University of Washington; M.A., Western Washington University

Johnathan Nuttall, Anatomy & Physiology, B.S., Saint Bonaventure University; Ph.D., University of California Davis

Gary Oliveira, Art, B.F.A., University of Dayton; M.F.A., Massachusetts College of Art

Benjamin Orr, Welding, Cert., Green River College

Tina Ostrander, Information Technology, B.S., University of Washington; M.A., Gordon-Conwell Theological Seminary; M.S., Regis University

Shelley Pahlow, Mathematics, B.A., Seattle Pacific University; M.Ed., University of Washington

Elnaz Parviz, Communication Studies, B.A., Science and Research University; M.A., Ph.D., University of Kansas

Monica Paulson Priebe, Natural Resources, B.A., Gustavus Adolphus College; M.S., M.P.A., Ph.D., Indiana University, Bloomington

Joel Perdue, Manufacturing, A.A.A, Green River College

Luu Phan, Nursing, B.S., M.A., Western Governors University

Nelson Phouphakone, Mathematics, A.A., South Seattle Community College; B.S., University of Washington; M.S., Washington State University

Justin Pitt, Welding, Green River College

Carolina Pittser, English, B.A., Universidad Austral de Chile; B.A., M.A., Central Washington University

Melissa Porras-Monroe, Occupational Therapy Assistant Program Director, B.A., University of Puget Sound; M.A., Concordia University Chicago

Richard Potsubay, English, B.A., University of Iowa; M.Ed., Western Washington University

Megan Reiser, Humanities, B.A., University of Washington; M.A., Washington State University; Cert., University of Washington

Jennifer Rohan, Librarian, B.A., University of California, Los Angeles; M.L.I.S., University of Washington

Derek Ronnfeldt, Director of Campus Safety and Transportation, B.S., Illinois State University

Mary Saldin, IBEST, B.A., Whitworth University; M.Ed., Seattle University

Paul Sanchez, Associate Dean of International Education, B.A., California State University; M.A., Ph.D., Alliant International University

Amanda Schaefer, English, B.A., University of California-Irvine; M.A., University of Notre Dame

Timothy Scharks, Geography, B.S., University of Alaska, Fairbanks; M.S., Western Washington University

Scott Schreiber, Welding, Journeyman Welder; W.A.B.O. Certified

Tyler Schrock, Information Technology, B.A., Malone University; M.B.A., Waynesburg University

Kindra Schuller, Cybersecurity, B.A., Baker University; M.A., Capella University

William Sciacca, Mechatronics, A.A.S., A.A.S., Green River College; A.A.S., Sonoran Desert Institute

William Scott, Communication Studies, B.A., M.A., California State University, Los Angeles

Joanna Segal, Librarian, B.A., M.A., M.L.I.S., University of Washington

Shannon Sharpe, Business, A.A., Highline Community College; B.A., Southern Illinois University, Carbondale; Cert., Renton Technical College

Katherine Shaw, Geology, B.A., Bryn Mawr College; M.S., University of Washington

Heidi Sheneberger, College and Career Pathways, B.A., Central Washington University; Cert., University of Washington; Cert., School of Teaching ESL; M.A., Seattle University

Ian Sherman, Interim Dean of Instruction for English and Humanities Divisions, English, B.A., Oberlin College; M.F.A., University of Washington

Lea Ann Simpson, Interim Dean of Business and Law Divisions, Business Education, B.S., M.S., University of Idaho

Marcie Sims, English, B.A., California State Polytechnic University; M.A., San Diego State University

Clinton Sizemore, Information Technology, A.A.S, B.A.S., Green River College; M.C.L., University of Washington - Tacoma

Anthony Smith, Physics, A.A., Yakima Valley College; B.S., Central Washington University; M.S., Ph.D., Washington State University

Lindsey Smith, Political Science, B.A., M.A., Ph.D., University of Alabama

Samantha Smith, Mathematics, A.A., Skagit Valley College; B.S., M.S., Western Washington University; Ph.D., Cert, Oregon State University

Chitra Solomonson, Physics, B.S., University of Madras, India; M.S., Indian Institute of Technology, Madras, India; Ph.D., Louisiana State University

Janee Sommerfeld, Senior Director of Financial Services, B.B.A., Washington State University; M.B.A., City University

Dan Sorensen, Automotive Technology, A.S., Rogue Community College; A.S.E. Master Technician

Renate Sorg, Intensive English as a Second Language, B.A., Pacific Lutheran University; M.A., American University

Leslie Soule, English for Speakers of Other Languages

Megan Stevens, Nursing, B.S., University of Northern Colorado; M.A., University of Washington

Wendy Stewart, Vice President of International Programs and Extended Learning, B.A., University of Puget Sound; M.A., Monash University, Australia; Ed.D., Northeastern University

Rachel Stuart, Communication Studies, B.A., M.A., California State University Chico; A.B.D., Washington State University

Brian Stubbs, Physics, B.S., Pacific Lutheran University; M.S., University of Oregon

Leo Studach, Biology, B.S., Marquette University; Ph.D., Purdue University

Andrew Sturt, Journalism, B.A., M.S., University of Colorado

Mary Jane Swenson, Criminal Justice, B.A., M.A., University of Washington; J.D., Seattle University

Su Hoon Tan, Senior Director of Auxiliary Services, B.S, M.S., St. Cloud State University

Vaishnavi Thakar, Natural Resources, B.S., University of Pune, India; M.S., Ph.D., University of Texas at Dallas

Mark Thomason, History, B.A., University of Washington; M.A., New Mexico State University

Peter Turylo, Information Technology, B.A., B.A.Sc., M.B.A., University of Toronto

Susan Uland, Computer Engineering, B.S., University of Virginia; M.Ed., University of St. Thomas; M.S., Texas A&M University

Jeremy Upsal, Math, B.A., University of Colorado; M.A., Ph.D., University of Washington

Julissa Valenciano, Math, A.S., Columbia Basin College; B.S., Washington State University; M.S., Oregon State University

Jamie Vandette, Anatomy and Physiology/Biology, B.S., Central Washington University; M.S., Ohio State University

Leonard Wainstein, College and Career Pathways, B.A., University of Puget Sound; M.A., TESOL, University of Washington

Michelle Wallace, Mathematics, A.A., Mira Costa Community College; B.A.S., University of California San Diego; M.A.S., Washington State University

Allison Warner, Senior Director of Career and Advising, B.A. University of Washington; M.A., Seattle University

Anthony Warnke, English, B.A., University of Washington; M.A., Western Washington University

Nicole Wetter, Accounting, B.A., M.P.A., University of Washington

Ariel Wetzel, English, B.A., M.A., Western Washington University; Ph.D., University of Washington

Jennifer Wheeler, Registrar/Director of Office of the Registrar, A.A., A.A.A, Green River Community College; Cert., B.S., M.S., Western Governors University

Staci Whitehouse, Interim Executive Director of Human Resources, B.A., Pacific Lutheran University

Ariadne Wilber, English, B.A., M.S., Eastern Washington University

Michelle Williams, Criminal Justice, CA POST Certified, San Diego Regional Law Enforcement Agency (SDRLEA); B.S., Northern Arizona University; M.S., National University

Michael Wood, Engineering, B.S., Colorado State University; M.S., University of Colorado-Denver

Jean-Paul Yafali, Business, A.A., Philosophat Edit Stein & Saint Augustin; B.A., M.A., M.S., Universite Catholique du Congo; M.B.A., Seattle University; D.B.A., Saint Mary's College of California

Harmen Zijlstra, Chemistry, Ph.D., University of Groningen

Glossary

Academic - Pertaining to a liberal arts program of study, as opposed to a career or technical program. Term used with degree, program, or course.

Academic Advisement Report - A ctcLink tool which allows students to view degree and certificate requirements, and track completed coursework in their selected program of study.

Academic calendar - A two-year calendar indicating quarter start and end dates, holidays to be observed by Green River campuses, and other non-class days.

Academic certificate - Awarded for recognition of accomplishment in an academic program.

Academic Credit for Prior Learning (ACPL) - An opportunity for students to earn credit for prior nontraditional education and/or work experience.

Academic standards - College policy that requires students to maintain a minimum grade point average of 2.0.

Advisor - The faculty member, administrator, or Career and Advising Center staff person who helps you in the advising process.

Application - The process of applying for admission to the college or to a specific program of study; also, the form you fill out to apply.

Articulation agreement - An agreement between the college and certain high schools or other colleges by which specific courses taken at one institution are allowed for automatic credit at the other institution.

Associate Development (AD) - A degree designed for students to plan their educational program with self-direction and development without specific requirements in subject areas.

Associate in Applied Arts (AAA) - A degree designed for students in career/technical programs, generally in business and business-related fields.

Associate in Applied Science (AAS) - A degree designed for students in career/technical programs, generally in health sciences, technical, and trades subjects.

Associate in Applied Science-Transfer (AAS-T) - A degree for technical courses required for job preparation and includes college-level general education requirements.

Associate in Arts (AA-DTA) - Liberal arts degree fulfilling the general requirements taken by college freshmen and sophomores. Students must complete 90 quarter credits in courses numbered 100 or above and meet specific distribution requirements.

Associate in Business (AB-DTA/MRP) - A degree for students pursuing a career in the field of business.

Associate in Computer Science (ACS-DTA/MRP) - A degree for students who plan to transfer to a four-year college or university at a junior level to a Bachelors of Computer Science program.

Associate in Fine Arts (Art) (AFA) - A degree for students pursuing a degree in fine arts specializing in art or photography.

Associate in Math Education (AM-DTA/MRP) - A degree for students who plan to transfer to a four-year college or university at a junior level to a Bachelor's of Science in Nursing Program.

Associate in Pre-Nursing (A-PreN-DTA/MRP) - A degree for students who plan to transfer to a four-year college or university at a junior level to a Bachelor's of Science in Nursing.

Associate in Science-Transfer (Track 1) (AST- 1) - A degree for students interested in Biology, Environmental Science, Chemistry, Geology, and Earth Science.

Associate in Science-Transfer (Track 2) (AST- 2) - A degree for students interested in Engineering, Engineering Technology, Computer Science, Physics, and Atmospheric Science.

Audit - Taking a class for information only and not for credit or a grade.

Bachelor's or Baccalaureate - A degree awarded by four-year colleges and universities to students who have completed a specified course of study.

Bachelor of Applied Science (BAS) - A degree for students who already hold a technical degree. This degree is built upon technical courses required for job placement and career promotion.

Career/technical - A program of study intended to prepare students for employment in a certain field rather than for transfer to a four-year college or university. Used to describe a degree, program, or course. Also referred to as vocational.

Certificate of Completion (Cert) - Awarded in some career/technical programs. These certificates usually do not include courses outside the major subject.

Certificate of Proficiency (Cert-P) - Awarded for the successful completion of a specific short-term program of study in a career/technical field where course work is 44 credits or less and generally does not include "Related Instruction" requirements.

Common Course Number - Includes commonly shared courses among Washington community and technical colleges with the same course number and title, designated by the "&" symbol.

Concurrent enrollment - Enrollment in two or more linked classes.

Continuing and Community Education - Courses, seminars or workshops, usually non-credit, that do not apply to degrees but are taken for personal enrichment, professional development, or general knowledge.

Co-op fee - An extra charge, in addition to tuition, required for certain courses to cover lab supplies, equipment, computer use, etc.

Course - A single subject of study taken for one quarter or other specified period of time. Sometimes referred to as a class.

Course abbreviation - A shortened version of the name of a department; for example, ENGL for "English."

Course code/number - The number used with the course abbreviation to refer to a specific course; for example, "ENGL& 101."

Course title - The descriptive name of a specific course; for example, "English Composition I" is the course title for ENGL& 101.

Credit or credit hour - The unit of measurement for the amount of work and/or time required for a course. A five-credit class will usually meet five hours a week. Also known as quarter hour.

Credit by exam - An alternative method by which you may complete credits to earn a particular degree or certificate.

Credit load - The total number of credit hours you enroll in for a quarter.

Curriculum - A set of courses constituting an area of specialization.

Degree - Awarded for the successful completion of a specific program of study.

Department - A specific area of study in which the college offers classes. Also, the group of faculty who teach that subject.

Distribution - Each degree requires completion of course work in specific learning areas: arts and humanities, science and mathematics, and social and behavioral sciences. These requirements provide students with a broad exposure to the humanities and sciences. To fulfill the requirements, students may choose from a wide variety of subject fields within each learning area.

Diploma - Awarded for successful completion of high school.

Drop a course - Withdrawal from a course by the deadline published in the quarterly class schedule.

Direct Transfer Agreement (DTA) - The Direct Transfer Agreement assures the transfer of credit, but not automatic admission (since each institution has separate admission criteria which are based on grades, test scores and other considerations) to a college or university with which Green River has such an agreement. Essentially, transfer agreements ensure that a student who completes an Associate of Arts degree at a community college will have satisfied all or most of the basic (i.e. general education or core) requirements at the various four-year institutions.

Elective - A course you choose to take which is not a core or required course for your particular program.

Emphasis - Concentrated study in a specialized area within a career/technical or academic program of study.

English Language Learning (ELL) - A program designed specifically for those needing to further develop their English reading, writing, and speaking skills.

ESOL (English for Speakers of Other Languages) - A program designed specifically for those needing to further develop their English reading, writing, and speaking skills.

Full-time student - A student who is enrolled for 12 or more credits.

General Education Requirements (GER) - A range of courses distributed across various academic areas, required for the AS-T and other degrees, in order to develop breadth of knowledge outside the major field. Sometimes referred to as distribution requirements or core requirements, a.k.a. GUR, General Undergraduate Requirements.

Grade points - The number obtained by multiplying the numerical value of the grade you receive for a course by the number of credit hours earned in that course. For example, if you earn a 3.3 grade in a 5-credit course you earn 16.5 grade points for that course.

Grade point average (GPA) - The number obtained by dividing total grade points earned by total credit hours attempted in a quarter. Your cumulative grade point average is obtained by dividing total grade points on your record by total hours you have attempted.

High School Equivalency Preparation Test - A program for adults who have not graduated from high school and want to earn a certificate of high school equivalency.

Independent study - A course of study on a topic of interest to a student, designed with the help of an instructor and supervised by an instructor, and undertaken with departmental approval.

International Baccalaureate - (IB) - A rigorous pre-college course of study for highly motivated high school students.

Major - The subject area in which you choose to specialize.

Major Related Program (MRP) - A degree designed for students planning to transfer directly into a specific major at a baccalaureate institution.

Non-resident student - A student who has not lived in the State of Washington for at least one year before the initial quarter of study. See also Resident student.

Northwest Commission on Colleges and Universities - The regional association through which Green River College is accredited.

Part-time student - A student registered for fewer than 12 credits. See also Full-time student.

Permission Codes - Instructor permission codes that allow a student entry into a particular course or course section when enrollment requirements have not been documented.

Phi Theta Kappa - The international honor society for two-year colleges. Its purpose is to recognize and encourage scholarship among students attending two-year colleges.

Placement - An assessment indicating the appropriate starting point for each student.

Prefix - A shortened version of the name of a department; for example, ENGL for "English."

Pre-professional program - A program designed to fulfill part of the requirements leading to study in a professional program or school.

Prerequisite - A requirement that must be met before you enroll in a particular course, usually a test score or completion of another course.

Program of study - A group of courses leading to a particular degree or certificate.

Quarter - The designation for a school term, lasting approximately 11 weeks (8 weeks for summer).

Related instruction - A range of courses distributed across various areas, required for a career/technical degree in order to develop breadth of knowledge outside the major field.

Residence requirement - Credits required by a college in order to fulfill degree requirements, which cannot be transferred in from another institution.

Resident student - A student who has lived in the State of Washington for at least one year immediately prior to the first day of instruction for a quarter.

Section - A specific class with its own unique days, hours, location and instructor. A number of sections of a certain course may be offered during a quarter, with different days, times, locations and instructors.

Special Topics - A course offering on a special topic of interest to students.

Student Identification Number - A unique number assigned to a student for tracking, data entry, identification, transcripts, and for conducting other college business.

Student Learning Outcomes - The knowledge, skills, abilities or attitudes that students have attained by the end of any set of college experiences-courses, programs, degrees and certificates or encounters with college services. Articulates the major goals of each experience, requires higher-level thinking skills and usually results in a product that can be evaluated.

Study Day - The day preceding the finals testing schedule to be used for study, reading, individual meetings with faculty, study groups or other activities that will better prepare the student for their final course assessments. Study day applies to day classes only and night classes will meet during their normal time period.

Technology Fee - A quarterly fee charged to students to support computer-based resources and services available to all students in the Holman Library and the open lab in the Technology building.

TOEFL - Test of English as a Foreign Language-a compulsory test for students wanting to study in U.S. colleges and universities.

Transcript evaluation - An official determination as to which courses taken at another college will be allowed for credit at Green River. Also, the determination by a four-year college as to which of your Green River courses will be allowed for credit at that institution.

Transfer credits - Credits earned at one college that are accepted toward a degree at another college.

Transfer degree - A degree intended to parallel the first two years of a bachelor's degree program.

Withdrawal from the college - Officially dropping all courses for which you are enrolled for a particular quarter. See Drop a Course.

Appendix A: Course Options for Meeting Diploma Requirements

The chart on the following page provides a list of Washington State for high school graduation requirements and the Green River classes that will meet those requirements. Students must pay careful attention to the graduation requirements for their particular graduation year and diploma pathway by consulting with their advisor. This will ensure they take the correct courses to earn their diploma.

*Minimum Washington state High School Requirements	High School Credits (1 HS credit = 5 Green River credits)	Green River College Course options for students entering high school classes in Fall 2004 or later.	Green River Credits (1 HS credit = 5 Green River credits)
English	3 or 4 *	Reading/Literature: READ READ 084 , READ 094 , READ 104; or ENGL ENGL & 101, ENGL & 112, ENGL & 113, ENGL & 114, ENGL 115, ENGL 160, ENGL 163, ENGL 165, ENGL 168, ENGL 180, ENGL 181, ENGL 183, ENGL 185, ENGL & 220, ENGL & 226, ENGL & 227, ENGL & 228, ENGL & 244, ENGL & 245, ENGL & 246, ENGL 247, ENGL 248, ENGL 249, ENGL & 254 , ENGL & 255, ENGL & 256, ENGL 257 ; HSC HSC 033 ; IBEST IBEST 37, IBEST 38, IBEST 47, IBEST 48, IBEST 57, IBEST 58, IBEST 67, IBEST 68, 095, 096; IGRAD iGRAD 065 , iGRAD 066 , iGRAD 075 , iGRAD 076 , iGRAD 085 , iGRAD 086 ; TS TS 75, TS 76, TS 65, TS 66, TS 85, TS 86 Writing: ENGL ENGL 081 or ENGL 99, ENGL & 101, ENGL 126, ENGL 127, ENGL 128, ENGL 109 , ENGL & 235, ENGL & 236 ENGL & 237 ENGL 239 Communication Studies: CMST CMST 100 or higher	15-20*
Math	2-3*	MATH MATH 62 , MATH 70, MATH 72 with 5 of those credits at MATH MATH 72 or higher;	10-15*

		IBEST IBEST 47, IBEST 48, IBEST 57, IBEST 58, IBEST 67, IBEST 68; IGRAD iGRAD 055 , iGRAD 056 ; TS TS 55, TS 56; TS 57, TS 95, TS 96; CARP& CARP 113, CARP 114, CARP 115	
Science	2	10 credits of science with 5 of those credits being any lab science course that meets the lab science requirement (see AA degree for details): AP AP 103, AP 104; ASTR& ASTR & 101; BIOL BIOL 103, BIOL 110, or BIOL & 100, BIOL & 160; CHEM CHEM & 121, CHEM & 131, &141; ECED ECED & 120; GEOL GEOL & 101, GEOL 107; IBEST IBEST 67, IBEST 68; IDS IDS 101 , IDS 102 , IDS 103 ; IGRAD iGRAD 085 , iGRAD 086 ; NURSE HEALTH 104, NRS A NRS A 104, NRS A 103; OCEA OCEA & 101; PHYS PHYS & 110, PHYS & 114 PHYS & 115 PHYS & 116; or TS TS 045 , TS 046 , TS 85, TS 86; TS 087 , TS 088 , TS 95, TS 96	10
U.S. History	1	Select 5-8 credits from the following: HIST 021 (4 credits) and/or HIST 022 (4 credits) or HIST HIST 135, HIST & 136, HIST & 137, HIST 220 (5 credits each); IGRAD iGRAD 065 , iGRAD 066 ; TS TS 65, TS 66, TS 95, TS 96	5
Civics and Government	0.5	Select 5 credits from the following: HSC HSC 25 (5 credits); TS TS 25; or POLS& POLS & 202 (5 credits); TS TS 95, TS 96	3
Washington State History **	0.5	Select 5 credits from the following: ANTH& ANTH & 210, ANTH 211 , ANTH & 216, HIST 024 or HIST& HIST & 214; TS TS 24, TS 95, TS 96	3

		HIST 101, 102, 103, 120, 135, &136, &137, 224, 230, 231, 232, 233, 237, 240, 245, 250, &215; IGRAD 065, 066; TS 065, 066, 095, 096	
Contemporary World History, Geography, and Problems	1	Select 5 credits from the following: AMES 100; ECON 100, &201,&202; GEOG& 200, 201; HIST 103, 231, 250; IGRAD 065, 066; PHIL 102; POLS& 101, &203, &204; or SOC & 101 (5 credits each)); TS 065, 066, 095, 096;	5
Fitness/Health	2	A minimum of 3 credits is required from List A. The remaining credits may be taken from any combination of List A and List B. List A: Health -HL ED 150, 180; P E 101, 102, 103, 111, 131, 149, 160, 165, 169; ECED&107 List B: Fitness--HL ED 190; P E 107, 108, 109, 110, 112, 113, 114, 115, 117, 118, 119, 121, 122, 124, 125, 128, 129, 131, 132, 134, 136, 137, 138, 139, 140, 141, 143, 144, 147, 148, 150, 158, 160, 165, 168, 169, 193, 201, 202, 207, 210, 211, 212, 215, 216, 224, 231, 234, 236, 237, 247, 248, 251, 253, 258; NURSE 127; TS 095, 096	10
Occupational Education	1	5 credits from any career/technical course with the following prefixes: A SIM, AAM, ACCT, ATECH; AVIA; B A; BUS; BTAC; CARP; CPT; CJ; CS; D T; ECED, ECED& 107; EDUC; EMT, ENGR; H SCI; INDUS; IBEST 037, 038, 047, 048, 057, 058, 067, 068; I E; IT; JOURN; MFG; MTX, NATRS; NURSE; OTA; PHLEB, PHOTO; PTA; R EST; TECH; WWT; WST; WTECH; WELD; or ECON &201, &202; NRS A 110, 111, 127; TS 095, 096	5
Arts	1	5 credits in any fine arts or performing arts course with the following prefixes: ART; DANCE; DRMA; MUSC; PHOTO; TS 095, 096	5

Electives	5 or 4 *	20 - 25 credits, as needed to total of 95-100 credits. Any Green River credit, except ESOL and TS classes under the 100 level that are not listed above. IBEST 037, 038, 047, 048, 057, 058, 067, 068; IGRAD 055, 056, 065, 066, 075, 076, 085, 086	25 or 20*
Total credits	19-20		95-100*

** Washington state high school graduation requirements are subject to change based on the student's incoming year. Be sure to talk about your specific plan of study with an advisor after receiving your official transcript evaluation from Enrollment Services.*

***Students who have taken Washington State History or Pacific NW History in high school will have satisfied this credit. Students who took either of these classes in Middle School will need to take a social studies class.*

We strongly encourage students to make an educational plan with their advisor to ensure that they take the appropriate classes for their particular graduation requirements.

Appendix B: Chart of Flight Fees

All flight courses require additional flight fees. Green River College partners with local approved flight schools to complete flight training. The number of training hours and costs vary for each flight course depending on which school the student selects. Some students need more time to obtain FAA certification above and beyond the average minimums, therefore any cost incurred by the student above those averages will be considered an out- of-pocket expense. Students must also obtain a FAA Class II Medical Certificate before entering the program (Class I for ATP License). Any student requesting to take two flight classes simultaneously (dual enrollment) must have the permission of the Instructor of Record (IOR) prior to enrollment.

	Rainer Flight	Rainer Flight- Boeing Field	Safety In Motion	Aero Maintenance	Snohomish Flying Service
FLT 111 - Private Pilot Flight 1	8,598.33	9,131.67	5,137.75	8,600.00	11,129.00
